Summary

Please provide a brief summary of all regulatory changes, including the rationale behind such changes. Alert the reader to all substantive matters or changes. If applicable, generally describe the existing regulation.

Under [Virginia Code § 2.2-4007.02](#), every rulemaking body in Virginia is required to adopt public participation guidelines and to use these guidelines in the development of its regulations. Pursuant to [SB 734/HB 1167](#) of the 2008 General Assembly, the law was modified to require state agencies either to adopt the model public participation guidelines (PPG) issued by the Department of Planning and Budget (DPB), or, if they need to make significant changes to the guidelines, to file a fast-track regulatory action with DPB by December 1, 2008. The Board of Health Professions has chosen to adopt the model PPG regulations issued by DPB as an exempt action and to repeal the current public participation guidelines.

Public participation guidelines exist to promote public involvement in the development, amendment, or repeal of state regulations. The legislative intent is to standardize the public participation process so that interested members of the public know how and when to comment and/or participate in various topics of interest. Highlights of the model public participation

guidelines include the addition of negotiated rulemaking panels and regulatory advisory panels and instructions for notification lists.
