

Agency Response to Economic Impact Analysis (EIA)

The Board of Medicine concurs with the analysis of the Department of Planning and Budget (DPB) for Regulations Governing the Practice of Genetic Counselors with the exception of the adverse impact notification to the Joint Commission on Administrative Rules, House Committee on Appropriations and the Senate Committee on Finance.

The “adverse impact” of this regulation is no different from and no greater than any of the 80 professions regulated by boards at the Department of Health Professions – all of which require initial and ongoing evidence of competency and fees for the operation of the board and department.
