VIRGINIA BOARD OF DENTISTRY
September 14, 2018 AGENDA
Department of Health Professions
Perimeter Center - 2nd Floor Conference Center, Board Room 4
9960 Mayland Drive, Henrico, Virginia 23233

Board Business

9:00 a.m. Call to Order – Dr. Tonya A. Parris-Wilkins, President
Evacuation Announcement – Ms. Reen
Public Comment – Dr. Parris-Wilkins
  * Written Comment from Dr. McGraw
Election of Officers

Approval of Minutes - Dr. Parris-Wilkins

- June 8, 2018 Board Business Meeting
- June 8, 2018 Formal Hearing
- July 27, 2018 Public Hearing
- July 30, 2018 New Member Orientation

Director's Report – Dr. Brown

Conference/Meeting Reports
  * SRTA - Dr. Watkins and Dr. Bonwell
  * ADEX - Dr. Bryant
  * JCNDE – Dr. Bryant

Liaison/Committee Reports

  - Dr. Watkins
    * BHP – Minutes August 23, 2018 meeting
  * Exam Committee – Minutes August 10, 2018 meeting

  - Dr. Petticolas
    * Regulatory – Legislative Committee – Minutes June 29, 2018 meeting

Legislation and Regulation – Ms. Yeatts
Legislation and Regulation – (continued)

- Proposed legislation on administration of Schedule VI drugs by dental hygienists
- Status of Regulatory Actions
  - Adoption of proposed regulations for change in renewal schedule
  - Adoption of proposed regulations for amendment to restriction on advertising dental specialties
  - Adoption of proposed regulations for administration of sedation and anesthesia
  - Report on fast track action for continuing education for practice by remote supervision
  - Report on fast track action for education and training for dental assistants II
  - Request extension for prescribing opioids for pain management
- Report on fast track action for conforming rules to ADA guidelines on moderate sedation
- Action on petition for rulemaking

Board Discussion/Action

- Public Comment
- Review of Guidance Documents
  - 60-13 – Practice of Dental Hygienist under Remote Supervision
  - 60-15 – Standards for Professional Conduct in the Practice of Dentistry
  - 60-17 – Policy on Recovery of Disciplinary Costs
  - 60-25 – Policy on Dental Clinical Examinations Acceptable to the Board
- Adopt 2019 Board Business Calendar

Deputy Executive Report/Business – Ms. Palmatier

- Disciplinary Activity Report

Board Counsel Report– Jim Rutkowski

- A1C Diabetes Testing

Executive Director’s Report/Business – Ms. Reen

Calibration Exercise

Service Recognition Lunch
Hi Sandra,
Please find attached a letter of support for chairside Blood Glucose testing as well as an article stating the connection between periodontal disease and diabetes.

Thanks
Ms. Marina D. McGraw, RDH, BSHS, MHA
Program Director- Dental Hygiene
Northern Virginia Community College
July 12, 2018

To whom it may concern:

I am writing in reference to Dr. Marioneaux’s petition to the Board of Dentistry regarding the chairside Blood Glucose screening. I concur that this additional measure would prove to be integral for comprehensive, quality and safe care for the patients of the Commonwealth of Virginia.

As a Registered Dental Hygienist with 18 ½ years’ experience in private practice and now as an educator of future Registered Dental Hygienists, having knowledge of a patient’s health status is vitally important for oral healthcare providers. This knowledge of the patient’s health status wouldn’t only allow for a customized treatment plan to meet their oral health needs; it would lend itself to improving over-all wellness by potentially improving early diagnosis rates. In addition to this, it could potentially prevent any unnecessary medical emergencies occurring during treatment of diabetic patients when Blood Glucose levels are either elevated or low.

In our curriculum at Northern Virginia Community College, treatment of the diabetic population is discussed in the following, but not limited to, DNH 120, DNH 145, DNH 146, DNH 235, DNH 244, DNH 245. In addition to the topic being discussed in these courses, the program also has Student Learning Outcomes applicable to the care of diabetic patients such as: Plan and document a patient’s treatment needs, Evaluate the outcomes of treatment for determining a patient’s subsequent treatment needs and Communicate the provision of oral health care services with diverse population groups.

Research has shown a correlation between periodontal disease and diabetes, it is imperative oral health care providers have every opportunity to provide the most comprehensive care to yield the best opportunity for health, oral and overall for this population. The Blood Glucose screening would improve this opportunity.

I have provided in this letter an example of what is taught in DNH 244, see below. Also, I have included with this letter an article detailing the relationship between periodontal disease and diabetes.

I appreciate your consideration of this petition so that oral healthcare providers in Virginia have the opportunity to offer detailed comprehensive care to improve the health of the patients of the Commonwealth.

Sincerely,

Marina D. McGraw, RDH, BSHS, MHA
DNH 244

The patient with diabetes mellitus

1. Identify and define key terms and concepts related to diabetes.
2. Explain the function and effects of insulin.
3. Identify risk factors for diabetes.
4. List etiologic classifications, signs and symptoms, diagnostic procedures, complications, and common medical treatment for diabetes.
5. Relate the appropriate management of a diabetic emergency.
6. Explain the relationship between diabetes and oral health.

A. Diabetes Mellitus
   1. Definition
   2. Impact

B. Insulin
   1. Definition
   2. Description
   3. Functions
   4. Effects of Decreased Insulin (Type 1 Diabetes)
   5. Effects of Decreased Action of Insulin (Type 2 Diabetes)
   6. Insulin Complications

C. Diabetes Mellitus Etiologic Classification
   1. Type 1
   2. Type 2
   3. Gestational Diabetes Mellitus
   4. Other Specific Types of Diabetes

D. Diagnosis of Diabetes
   1. Symptoms Suggestive of Diabetes
   2. Diagnostic Tests

E. Complications of Diabetes
1. Infection
2. Peripheral Neuropathy
3. Autonomic Neuropathy
4. Nephropathy
5. Retinopathy
6. Cardiovascular Disease
7. Amputation
8. Pregnancy Complications
9. Psychosocial
10. Silent Killer

F. Medical Treatment and Modifications for Diabetes Control
1. General Procedures
2. Instruction
3. Exercise
4. Diet
5. Habits

G. Medications
1. Insulin Therapy
2. Oral Hypoglycemic Agents

H. Pancreas Transplantation

I. Blood Glucose Testing
1. Self-Administered Tests
2. Laboratory Test

J. Oral Relationships
1. Periodontal involvement
2. Other Oral Findings
3. Endodontic Infections
4. Dental Implants

K. Dental Hygiene Care Plan
1. Patient History
2. Consultation with Physician
3. Appointment Planning
4. Clinical Procedures
5. Maintenance Phase

Subject: Communication from the National Commission on Recognition of Dental Specialties and Certifying Boards

Good Morning-

The National Commission on Recognition of Dental Specialties and Certifying Boards held its inaugural meeting on May 9-10, 2018. At this meeting, the National Commission adopted formal policies and procedures related to all aspects of the recognition process.

Please find attached communication from Dr. Charles Norman, chair, National Commission on Recognition of Dental Specialties and Certifying Boards related to the roles and duties of the National Commission with regard to the recognition of dental specialties and their respective certifying boards.

If you have any questions, please feel free to contact me.

Cathy

Catherine Baumann, M.A.P.S. baumannca@ada.org

June 29, 2018

Dr. John Alexander
President
Virginia Board of Dentistry
9960 Maryland Drive, Suite 300
Henrico, VA 23233

Dear Dr. Alexander,

As you are aware, in late 2016, the American Dental Association (ADA) Board of Trustees charged the Task Force on Specialty and Specialty Certifying Board Recognition to evaluate the process and criteria by which specialties and specialty certifying boards were recognized. The ADA Board of Trustees agreed with the findings of the Task Force that the establishment of the National Commission on Recognition of Dental Specialties and Certifying Boards would enhance the recognition program that sets requirements designed to help dentists excel throughout their careers and the public ascertain the importance of educated and board certified dental specialists.

With adoption of the ADA Board of Trustees Report 7 to the ADA House of Delegates and Resolution 30H-2017, the House of Delegates established the National Commission on Recognition of Dental Specialties and Certifying Boards. In Resolution 30H-2017, the ADA House of Delegates adopted the following roles of the National Commission:

- Establishment of the National Commission reduces the potential or perceived bias or conflict of interest in the decision-making process for recognizing dental specialties and is intended to emulate the process for the recognition of specialties and certifying boards in other health professions.

- The National Commission will set requirements designed to help dentists excel throughout their careers. Those requirements will also be designed to help the public ascertain the importance of educationally qualified and board certified dental specialists.

- The duties of the National Commission are specific to the recognition of dental specialties and certifying boards and in accord with the ADA Requirements for Recognition of Dental Specialties and National Certifying Boards for Dental Specialties and provisions for appealing an adverse action.

The National Commission on Recognition of Dental Specialties and Certifying Boards held its inaugural meeting May 9-10, 2018. At this meeting, the National Commission adopted formal policies and procedures related to, all aspects of the recognition process. The Rules of the National Commission, along with the Policy and Procedure Manual, are attached and will be posted on the National Commission's website.

Subject: Formal Notification of the INBDE, on behalf of Dr. Lisa Heinrich-Null

The attached communication is a formal notification that the Integrated National Board Dental Examination (INBDE) will be available for administration beginning on August 1, 2020. The NBDE Part I will be discontinued on July 31, 2020, and the NBDE Part II will be discontinued on August 1, 2022.

The JCNDE requests your assistance in communicating relevant INBDE information to those who would benefit from this information. Any questions regarding this notification can be directed to the Joint Commission via nbexams@ada.org.

Sincerely yours,
Dr. Lisa Heinrich-Null, Chair
Joint Commission on National Dental Examinations
In 2009, the Joint Commission on National Dental Examinations ("Joint Commission") initiated formal efforts to begin development of an examination program that integrates content from the biomedical, behavioral, and clinical sciences, to replace National Board Dental Examination (NBDE) Parts I and II. The purpose of the Integrated National Board Dental Examination (INBDE) mirrors that of the NBDE Program: to assist dental boards in determining the qualifications of individuals who seek licensure to practice dentistry. Throughout its development the INBDE has been focused on the clinical relevance of examination content, and the corresponding clinical relevance of the biomedical sciences. The INBDE is the product of a comprehensive strategic planning process, and years of rigorous psychometric research that have resulted in a substantial amount of evidence that supports usage of this examination in the licensure decision making process of dental boards.

This communication provides the Joint Commission’s official notification to your organization that the INBDE will be available for administration beginning on August 1, 2020. Concomitantly, the NBDE Part I will be discontinued as of the day prior (July 31, 2020). The NBDE Part II will be discontinued two years later, on August 1, 2022. No further administrations of the NBDE will be provided after the aforementioned dates. The Joint Commission first announced anticipated details of the INBDE Implementation Plan on March 13, 2016, and the current schedule of activity is in accordance with those announced details. The Joint Commission’s website (www.ada.org/JCNDE/INBDE) contains the INBDE Implementation Plan, as well as a tremendous amount of information concerning validity evidence for the INBDE, activity timelines, etc.

The INBDE Implementation Plan provides information concerning the dates of implementation, how implementation will occur, and general guidance on how best to prepare. In reviewing this plan, the Joint Commission recommends your organization take into consideration any modifications and/or adjustments that may be necessary to accommodate the discontinuation of NBDE Parts I and II. This Implementation Plan will be updated regularly so it remains current, as the Joint Commission responds to inquiries and releases any additional information to help stakeholders and communities of interest with the transition.

The INBDE Retest Policy and Candidate Eligibility document provides an example of a document that was created to help facilitate the transition to the INBDE. This document provides additional guidance through the clarification of retest policies and unique issues that will be present during the transition period. Candidates are advised to consider their available options well in advance of testing. Dental school faculty will also find this information useful in advising students and considering administrative or academic policy changes that may be needed.
The Joint Commission requests your assistance in communicating relevant INBDE information to those who would benefit from this information. The Joint Commission will continue to provide updates to help facilitate this transition as information becomes available. Please review and monitor INBDE information on the Joint Commission’s website (www.ada.org/JCNDE/INBDE). Any questions regarding this notification can also be directed to the Joint Commission via nbexams@ada.org.

Sincerely yours,

Dr. Lisa Heinrich-Null, Chair
Joint Commission on National Dental Examinations

</table>
Unless stated otherwise, INBDE policies and procedures are anticipated to be fully consistent with the policies and procedures of the National Board Dental Examination and National Board Dental Hygiene Examination. This includes, for example, policies concerning examination conduct and appeals.

### Results Reporting

**Candidate Results.** INBDE results will be reported as Pass/Fail. For remediation purposes, candidates who fail the examination will be provided with information concerning their performance in the following areas:

- Overall results
- Diagnosis and Treatment Planning
- Oral Health Management
- Practice and Profession
- Molecular, biochemical, cellular, and systems-level development, structure and function
- Physics and chemistry to explain normal biology and pathobiology
- Physics and chemistry to explain the characteristics and use of technologies and materials
- Principles of genetic, congenital and developmental diseases and conditions and their clinical features to understand patient risk
- Cellular and molecular bases of immune and non-immune host defense mechanisms
- General and disease-specific pathology to assess patient risk
- Biology of microorganisms in physiology and pathology
- Pharmacology
- Sociology, psychology, ethics and other behavioral sciences
- Research methodology and analysis, and informatics tools

**School Results.** Candidates' pass/fail status will be reported through the DTS Hub. Monthly and annual school reports will also be available through the DTS Hub.

**State Board Results.** Candidates' pass/fail status will be reported through the DTS Hub. The DTS Hub will indicate whether a candidate has met or not met the National Board Dental Examination cognitive skills requirements for dentistry (i.e., no distinction will be made among Part I, Part II, or the INBDE).

### Retesting Policy

The INBDE Retest Policy is available here: http://www.ada.org/-/media/JCNDE/pdfs/inbde_retest_policy_and_eligibility.pdf?la=en

The focal aspects of the policy are as follows:

- Candidates who have passed may not retest the examination unless required by a state board or relevant regulatory agency.
- Candidates who have not passed may apply for re-examination. An examination attempt is defined as any examination administration where the candidate has been seated at a computer at a test center, and electronically agreed to the confidentiality statement to start the examination.
- Candidates must wait a minimum of 90 days between test attempts.
- Candidates are encouraged to seek formal remediation before re-examination.
- Under the JCNDE's 5 Years/6 Attempts Eligibility Rule, candidates must pass the examination within a) five years of their first attempt or b) five examination attempts, whichever comes first. Subsequent to the fifth year or fifth attempt, failing candidates may test once every 12 months after their most recent attempt.
<table>
<thead>
<tr>
<th>Candidates should contact the dental boards of each state to understand state requirements and the acceptability of the INBDE. With respect to administration timing, the JCNDE has received informal feedback suggesting a general preference for candidates to complete the examination in close proximity to when they are applying for licensure.</th>
</tr>
</thead>
</table>
| INBDE development was initiated in 2009 with the formation of a Committee for an Integrated Examination (CIE). The INBDE has made steady and consistent progress since that time. Background information on INBDE development is available here:  
http://www.ada.org/en/jcnde/inbde  
A specific timeline of activity can be found here:  
http://www.ada.org/en/jcnde/inbde/inbde-timeline |
| The INBDE Technical Report will be available in the coming months. |

UNAPPROVED - DRAFT

BOARD OF DENTISTRY
MINUTES of the NOMINATING COMMITTEE MEETING

Friday, May 18, 2018

CALL TO ORDER: The meeting was called to order at 12:40 p.m.

PRESIDING: John M. Alexander, D.D.S., Chair

MEMBER PRESENT: James D. Watkins, D.D.S.

STAFF PRESENT: Sandra K. Reen, Executive Director for the Board

QUORUM: With two members present, a quorum was established.

NOMINATIONS: The Committee discussed possible candidates and agreed by consensus to nominate Dr. Parrs-Wilkins for president, Dr. Petticolas for vice-president and Dr. Catchings for secretary.

APPROVAL OF MINUTES: Ms. Reen requested approval of the June 30, 2017 meeting minutes. The Committee agreed by consensus to approve these minutes.

ADJOURNMENT: With all business concluded, the Committee adjourned at 1:05 p.m.

John M. Alexander, D.D.S., Chair

Sandra K. Reen, Executive Director
CALL TO ORDER: Dr. Alexander called the meeting of the Board to order at 9:34 AM. With 10 Board members present, a quorum was established.
Ms. Reen provided the emergency egress procedures for Board Room 4.

MEMBERS PRESENT: John M. Alexander, D.D.S., President
Tonya A. Parris-Wilkins, D.D.S., Vice-President
Augustus A. Petticolas, Jr., D.D.S., Secretary
Tammy C. Ridout, R.D.H.
Sandra J. Catchings, D.D.S.
James D. Watkins, D.D.S.
Carol R. Russek, JD
Jeremiah Dawson, D.D.S.
Patricia B. Bonwell, R.D.H., PhD
Nathaniel C. Bryant, D.D.S.

STAFF PRESENT: Sandra K. Reen, Executive Director of the Board
Kelley W. Palmatier, Deputy Executive Director of the Board
Sheila Beard, Executive Assistant
Connie McHale, Licensing Manager
David Brown, DC, DHP Director
Barbara Allison-Bryan, MD, DHP Chief Deputy Director
Elaine Yeatts, DHP Policy Analyst

COUNSEL PRESENT: James E. Rutkowski, Assistant Attorney General

Dr. Gaskin asked the Board to be cautious and to be aware of perceived bias in relating EBD to standard of care.

APPROVAL OF MINUTES: With one change noted in the March 9, 2018 minutes, Dr. Petticolas made a motion to adopt the 3 sets minutes. The motion was seconded and passed.
DHP DIRECTOR’S REPORT

Dr. Brown informed the Board that the agency has completed the move of the reception area renovation to the first floor and the move of the Board of Dentistry to its new space on the 3rd floor. Additional changes included informing the Board of new agency ID badges with the agency logo for staff and board members. In addition, the Medicaid expansion implementation will happen in January. Dr. Brown informed the board that the Board of Pharmacy will monitor production of the THC oils, monitoring who and what can be prescribed and allowing five processors to get a permit.

Dr. Brown informed the Board that there is underway an evaluation of the need for community health workers to be regulated. Lastly, there is a bill that may require ER doctors to check with PMP before prescribing narcotics and evaluate the need for the availability of naloxone for patients receiving narcotic medications.

Dr. Allison-Bryan informed the Board that presently, security measures for staff and board members are being reviewed for the building. In addition, she provided a recap regarding the opioid epidemic. She also mentioned the presentation made by Dr. Abubaker at the staff development day.

CONFERENCE REPORTS

AADB – Dr. Dawson submitted a report to the Board, which is included in the agenda package, referencing her attendance to the AADB meeting held in Chicago, IL in April. She thanked the Board for the opportunity to attend.

Dr. Petticolas was also in attendance at the AADB meeting stating the meeting was very beneficial and enlightening. Some of the topics discussed included curriculum assessments, corporate dentistry, dental education today and a case study on dentist administering the flu vaccine.

COMMITTEE REPORTS

Dr. Watkins made the following reports:

- SRTA – Dr. Watkins stated the application has been submitted for SRTA rejoining ADEX for the development of licensure exams. What may still pose to be a hindrance is that ADEX is assessing a $20k fee for rejoining. There will be more information to come on this decision.
- BHP - BHP has not met since our last board meeting. The next meeting is scheduled this month.
- Exam Committee - The Exam Committee has not met since our last board meeting.

Dr. Petticolas made the following report:

- Regulatory-Legislative Committee – Dr. Petticolas informed the Board that the committee is scheduled to meet on June 29, 2018. Currently on the agenda, the committee will be discussing recovery of disciplinary costs.
Dr. Bryant made the following report:
- **2018 National Dental Educator’s Advisory Forum** – Dr. Bryant will be representing the Board at the upcoming forum being held in Chicago, IL. This forum will deal with the process of changing its examination to the Integrated National Board Dental Examination and recommended actions dental boards should take to prepare for the change.
- **ADEX** – Dr. Bryant will be attending the conference August 10-12, 2018.

Dr. Alexander made the following reports:
- **Advisory Panel on Opioids** – Dr. Alexander informed the Board that the final regulation is still pending. He will be working on a patient education statement with Dr. Abubaker regarding usage and proper disposal of opioids.
- **Executive Committee Meeting** – Dr. Alexander informed the Board that the Executive Committee met on March 8, 2018. Revisions for the By-Laws were discussed. The meeting minutes and the proposed revisions were in the agenda package. Ms. Reen reviewed the proposed changes. Striking the word “treasurer” throughout the by-laws was suggested. A motion was made by Ms. Ridout to approve the changes made to the by-laws. Dr. Catchings seconded the motion and it passed.
- **Nominating Committee** – Dr. Alexander also informed the Board that the Nominating Committee met on May 18, 2018. The minutes have been included in the agenda package. The Committee has recommended Dr. Parras-Wilkins for President, Dr. Petticolas for Vice-President and Dr. Catchings as Secretary. He said the elections would be held at the September meeting.

**LEGISLATION AND REGULATORY ACTIONS**

Ms. Yeatts gave a report that all regulatory actions for dentistry are currently pending in the Governor’s office.

Ms. Yeatts provided a status report on the following regulatory actions:
- **Conforming rules to ADA guidelines on moderate sedation** – The comment period ended on February 23, 2018 so the Board can adopt these for publication as a final action. Ms. Russek made the motion to adopt as a final action. The motion was seconded and passed.
- **Continuing education for practice by remote supervision** – Ms. Yeatts said the emergency regulation is in effect and needs to be replaced with final regulations by May 12, 2019. She requested adoption of these regulations as proposed final regulations to be released for public comment. Dr. Bonwell made the motion to adopt the proposed regulations. The motion was seconded and passed.

**BOARD DISCUSSIONS**

**Acknowledgment of Public Comments** – There were no comments or discussion regarding public comment.

**Guidance Documents** – The Board discussed the following Guidance Documents:
- **60-1 Confidential Consent Agreements** – This Guidance document has been identified for Board review based on its age to consider revision, re-adoption or withdrawal. If re-adopted, consider removing violations of “terms of probation” in item number 2 as a matter that could be addressed in a CCA. Dr.
Petticolas made a motion to adopt the change and to re-adopt this guidance document as revised. The motion was seconded and passed.

- **60-7 - Delegation to Dental Assistants** - Identified for Board review based on its age to consider revision, re-adoption or withdrawal. Staff did not identify any needed changes or additions. Dr. Watkins made a motion to re-adopt. The motion was seconded and passed.

- **60-9 - Code of Conduct for Members** - Identified for Board review based on its age to consider revision, re-adoption or withdrawal. Staff did not identify any needed changes or additions. Dr. Bonwell made a motion to re-adopt. The motion was seconded and passed.

- **60-11 - Guidance on Completion of Treatment If Patient Has Not Paid Fees** - Identified for Board review based on its age to consider revision, re-adoption or withdrawal. If the Board wishes to retain this guidance, staff recommends withdrawing this guidance document and addressing it in the Practitioner Responsibility section of Guidance Document 60-15 by adding this provision. A motion was made by Dr. Petticolas to withdraw the guidance document. The motion was seconded and passed.

- **60-12 - Administration of Topical Oral Fluorides by Dental Hygienists under Standards adopted by the Virginia Department of Health** - Identified for Board review based on its age to consider revision, re-adoption or withdrawal. Staff recommends withdrawal of this guidance document because the substance of this guidance is more fully addressed in Guidance Document 60-13 Practice of Dental Hygienists under Remote Supervision, which is the next document in the agenda package. Dr. Watkins moved to withdraw this guidance document. The motion was seconded and passed.

- **60-13 - Practice of Dental Hygienists under Remote Supervision** - The Virginia Dental Hygienists' Association has requested that the Board make two revisions to this guidance document to conform to language in the governing statutes. Staff has drafted language to address this request for review by the Board and added language addressing §54.1-3408 provisions. Attachments also provided are:
  * The email sent by the VDHA
  * §54.1-2722 of the Code of Virginia
  * An excerpt from the Drug Control Act, §54.1-3408, with subsections J. and V

This guidance document has been tabled until the next board meeting and referred to the Regulatory-Legislative Committee for review.

- **60-15 - Adding an unpaid fee provision in the Practitioner Responsibility section Standards for Professional Conduct in the Practice of Dentistry** - Ms. Russek moved to accept the document with adding “30 day notice period”. The motion was seconded and approved.

- **60-19 - Dental Laboratory Subcontractor Work Order Form** - Identified for Board review based on its age to consider revision, re-adoption or withdrawal. Staff did not identify any needed changes or additions. This form has been deferred to the Regulatory-Legislative Committee for review.

**BOARD COUNSEL REPORT**

Mr. Rutkowski had nothing to report to Board.
DISCIPLINE AND DEPUTY EXECUTIVE DIRECTOR REPORT

• Disciplinary Activity Report
  Ms. Palmatier reviewed her report noting for the third quarter of 2018, the Board received a total of 65 patient care cases. The Board closed a total of 75 patient care cases for a 115% clearance rate, which is down from 122% in Q2 of 2018. The current pending caseload older than 250 days is 25%, while the Board’s goal is 20%. In Q3 of 2018, 89% of the patient care cases were closed within 250 days. There was one mandatory suspension of a dental license and one voluntary surrender for indefinite suspension by the Board between February 21, 2018 and May 25, 2018.

EXECUTIVE DIRECTORS REPORT –

• Oral Health Providers Overview
  Ms. Reen shared an article with the Board with information referencing dental hygienists and dental therapists with direct access of prescriptive authority.

• Virginia DEQ Dental Rule FAQ for Dentists
  Ms. Reen shared the Dental Rule FAQ sheet with the Board, indicating that it would be added in the announcements section of the Board’s webpage.

• New Staff Member Introduction
  Ms. Reen introduced and welcomed the new Licensing Manager, Connie Mc Hale to the Board.

EXECUTIVE ASSISTANTS REPORT –

• Ms. Beard discussed travel policy and procedures with the Board to assist in understanding policies and reimbursement procedures. A travel information sheet as well as the travel regulations were provided.

CALIBRATION EXERCISE –

• The Board participated in a calibration exercise related to probable cause decisions.

ADJOURNMENT: With all business concluded, Dr. Alexander adjourned the meeting at 12:18 PM.

John M. Alexander, D.D.S., Chair

Sandra K. Reen, Executive Director

MEMBERS PRESENT: August A. Petticolas Jr., D.D.S.
Tammy C. Ridout, R.D.H.
Sandra J. Catchings, D.D.S.
Jamiah Dawson, D.D.S.
Patricia B. Bonwell, R.D.H., PhD
Tonya A. Parris-Wilkins, D.D.S.
James D. Watkins, D.D.S.
Carol R. Russek, JD
Nathanial C. Bryant, D.D.S.

STAFF PRESENT: Sandra K. Reen, Executive Director
Sheila Beard, Executive Assistant
Donna M. Lee, Discipline Case Manager

COUNSEL PRESENT: James E. Rutkowski, Assistant Attorney General

OTHERS PRESENT: James E. Schliessmann, Senior Assistant Attorney General
Shevaun Roukous, Adjudication Specialist
Juan Ortega, Court Reporter
Peter Baruch, Esquire, Respondent's Counsel

ESTABLISHMENT OF A QUORUM: With 10 Board members present, a quorum was established.

Jennifer Combs, R.D.H. Ms. Combs was present with legal counsel in accordance with the Notice of the Board dated October 2, 2017.

Case No. 181096 Dr. Alexander swore in the witnesses.

Ms. Combs stated that she was familiar with the order of proceedings. There were no preliminary matters discussed.

Following Mr. Schliessmann's opening statement; Dr. Alexander admitted into evidence Commonwealth's exhibits 1-5.
Following Mr. Baruch’s opening statement; Dr. Alexander admitted into evidence Respondent’s Exhibit A.

Testifying on behalf of the Commonwealth was Gayle Miller, DHP Senior Investigator, Dr. Lawrence, Alyssa Adkins, and Rebecca Britt, HPMP Case Manager.

Testifying on behalf of the Respondent was Dawn C. Rigler and Jennifer Combs testified on her own behalf.

Mr. Schlessmann and Mr. Baruch provided closing statements.

**Closed Meeting:**

Dr. Parris-Wilkins moved that the Board enter into a closed meeting pursuant to §2.2-3711(A)(27) and Section 2.2-3712(F) of the Code of Virginia for the purpose of deliberation to reach a decision in the matter of Jennifer Combs, R.D.H. Additionally, she moved that Board staff, Ms. Reen, Ms. Lee, and Board counsel, Mr. Rutkowski attend the closed meeting because their presence in the closed meeting was deemed necessary and would aid the Board in its deliberations. The motion was seconded and passed.

**Reconvene:**

Dr. Parris-Wilkins moved to certify that the Board heard, discussed or considered only public business matters lawfully exempted from open meeting requirements under the Virginia Freedom of Information Act and only such public business matters as were identified in the motion by which the closed meeting was convened. The motion was seconded and passed.

The Board reconvened in open session pursuant to § 2.2-3712(D) of the Code.

**Decision:**

Dr. Parris-Wilkins moved to accept the Findings of Facts and Conclusion of Law as presented by the Commonwealth, amended by the Board and read by Mr. Rutkowski. The motion was seconded and passed.

Mr. Rutkowski reported that Jennifer Combs, R.D.H. is continued on Indefinite Suspension until such time she can come before the Board and prove that she is safe and competent to practice.
Dr. Parris-Wilkins moved the adoption of the sanction imposed as read by Mr. Rutkowski. The motion was seconded and passed.

ADJOURNMENT: The Board adjourned at 3:48 p.m.

John M. Alexander, D.D.S., President

Sandra K. Reen, Executive Director

Date

Date
VIRGINIA BOARD OF DENTISTRY
PUBLIC HEARING
July 27, 2018

TIME AND PLACE: The Virginia Board of Dentistry convened a Public Hearing at 9:00 a.m., on July 27, 2018 in Hearing Room 4 to receive comments on proposed Regulations on Prescribing Opioids for pain management.

PRESIDING: Tonya A. Parrís-Wilkins, D.D.S.

MEMBERS PRESENT: None

STAFF PRESENT: Sandra K. Reen, Executive Director for the Board
Sheila Beard, Executive Assistant for the Board

QUORUM: Not Required

PUBLIC COMMENT: Zachary Hairston, DDS – In support of regulations. Recommended addressing the use of electronic health records and the PMP when prescribing opioids.

Dr. Parrís-Wilkins announced the deadline for submitting written comments is September 7, 2018, and indicated that the Board will consider all comments received before adoption of final Regulations on September 14, 2018.

ADJOURNMENT: The public hearing concluded at 9:32 a.m.

Tonya A. Parrís-Wilkins, D.D.S., President

Sandra K. Reen, Executive Director

Date

Date
TIME AND PLACE: The meeting was called to order at 8:30 a.m., on Monday, July 30, 2018 in Training Room 2, Department of Health Professions, 9960 Mayland Drive, Suite 201, Henrico, Virginia.

PRESIDING: Tonya A. Parris-Wilkins, D.D.S., President

MEMBERS PRESENT: Perry E. Jones, D.D.S.

STAFF PRESENT: Sandra K. Reen, Executive Director
Kelley W. Palmatier, Deputy Executive Director
Sheila Beard, Executive Assistant

OTHER PRESENT: James E. Rutkowski, Assistant Attorney General, Board Counsel

ORIENTATION: Dr. Parris-Wilkins welcomed Dr. Jones and reviewed the Board’s current issues involving Sedation, DA II, and remote supervision.

Ms. Reen went over the laws, regulations and policies in the Board Member’s notebook to include the bylaws and Code of Conduct for the members. She then explained the Board’s three areas of work; licensure, regulation, and discipline. She gave an overview of the Board’s structure, staffing, and memberships in AADB, SRTA and ADEX.

Mr. Rutkowski explained his role with the Board and discussed the powers and duties of health regulatory boards, the Administrative Process Act, the Freedom of Information Act, and the Conflict of Interest provisions.

Ms. Beard reviewed the state’s policies on travel, per diems and reimbursements then directed Dr. Jones on how to complete the conflict of interest training.

Ms. Palmatier explained the disciplinary case process and the Probable Cause Review form and discussed the information needed to close a case and to move a case forward for issuance of an advisory letter, confidential consent agreement, pre-hearing consent order and notice for an informal conference. She also reviewed the guide for case reviews, probable cause decisions
and disciplinary action. She encouraged Dr. Jones to use it when reviewing cases and to call staff with any questions about a case.

ADJOURNMENT: The training was adjourned at 11:45 a.m.
43rd ANNUAL SOUTHERN REGIONAL TESTING AGENCY CONVENTION

THIS MEETING WAS HELD FROM AUGUST 2-4, 2018 AT THE SHERATION AIRPORT HOTEL IN CHARLOTTE, NC.

I REPRESENTED OUR BOARD AS A MEMBER OF THE SRTA BOARD OF DIRECTORS; SRTA DENTAL CALIBRATION COMMITTEE; SRTA DENTAL EXAMINATION COMMITTEE; SRTA DENTAL EXAMINER REVIEW COMMITTEE AND SRTA NOMINATING COMMITTEE.

—The Dental Calibration committee:
Met at 8am on Thursday morning with the committee chair, Dr. Glenn Young (VA) opening the meeting by having the SRTA president, Dr. Susan King (KY) give the committee members an update on the SRTA application to ADEX. There was a motion made after considerable discussion that SRTA eliminate the necessity for candidates to declare the type of Class II composite restoration they will perform (either conventional or slot prep). Also, some minor changes were made to the criteria sections in the Class III restoration and to clarify the removal of calculus and stains in the Periodontal section of the exam. The committee has been working over the past year with Mr. Jeff Scott of Acadental in the development of a new tooth to be used in mock board exams. This new tooth has caries and a pulp and cuts more like a natural tooth. Two of our Faculty advisors had made preparations with the tooth and submitted photos and samples of the prepped teeth to the committee. The committee recommended the teeth be used in the 2019 examination cycle.

—The Dental Examination committee:
Met at 8am on Friday morning with the committee chair, Dr. Van Morgan (SC), proposing that SRTA incorporate an Orofacial Assessment for the Periodontal section of the SRTA exam. The state of South Dakota requested that assessment in order for their state to accept the SRTA exam results for licensure. The committee members reviewed an assessment worksheet and proposed the assessment for the 2019 exam. Additionally, the committee discussed introducing probing depth measurements for two teeth that are recorded and graded during the Perio exam. The committee has received nothing but positive feedback from the schools and candidates on the use of pre-approval of lesions for the past examination year and will continue to use it. The committee voted to accept the changes to the manual for the Class II composite restoration, the Class III restoration and the Periodontal section; as proposed by the Calibration committee. The committee proposes that there be at least two examiner alternates for each exam in case an examiner has an emergency and cannot attend an assigned exam. President-elect, Dr. George Martin (AR) gave an update on the ADEX application.

—The Nominating committee:
Committee met and presented the following slate of officers for 2018-2019:

- Dr. George Martin (AR): President
- Dr. Gerald Walker (AL): President-elect
- Dr. Robert Hall (VA): Treasurer
- Ms. BethAnn Casey-Thompson, RDH (TN): Secretary

—All examiners and Board of Directors met at 1pm on Friday to receive a report from the newly formed SRTA Quality Assurance Committee, which is chaired by Dr. John Dixon (WVA). This committee recommends the following:

1. SRTA photograph all dental failures on both the manikin and patient procedures with the approved SRTA camera.
2. SRTA reinstate implementation of dental and dental hygiene CFM/CFC/SAC/DA and DHA training prior to each new exam cycle.
3. SRTA amend the bylaws to specify a separate dental hygienist position/member as a part of the Quality Assurance Committee.

—The SRTA Board of Directors:
Met at 5pm on Friday with the SRTA president, Dr. Susan King, presiding. The BOD reviewed all committee reports to be presented to the assembly. The president gave the following report: the SRTA has completed its 2017-18 examination cycle. SRTA has had a significant decrease in the number of candidates taking both the dental and dental hygiene exams over the previous year’s numbers. This year, the combined total of initial and sectional dental examination candidates totaled 189, down from the 270 in the 2016-17 cycles. An even larger change was seen in the number of candidates taking the dental hygiene examination. There were 187 first-time and repeat candidates for the dental hygiene examination, down from 373. These numbers represent a 30% decrease in the number of dental candidates and a 49% decrease in the number of dental hygiene candidates from the last year. The BOD feels that this downturn in numbers is a result of candidates choosing other examination platforms that they believe offer them more licensee PORTABILITY than the SRTA examination. SRTA has paid to ADEX the $30K that they perceived was owed to them when SRTA withdrew from ADEX. SRTA has submitted its application to rejoin ADEX along with their $20K application fee and awaits the ADEX decision which is assumed will be made next week when ADEX holds its annual session. Dr. King is very OPTIMISTIC that our application will be accepted.

THE SRTA GENERAL ASSEMBLY MET AT 8am ON SATURDAY, AUGUST 4, 2018

---The GA was called to order by SRTA president, Dr. Susan King.
---A state roll call was held by the Secretary, Ms. Tanya Riffe, RDH (SC) and a quorum was established.
---A moment of silence was held in memory of the passing of Dr. Wendell Garrett (AR), who had been a SRTA member who worked many years for the organization, especially with updating the dental examination manuals.
---All committee reports were presented and voted on by the general assembly.
---The majority of the conversation revolved around the future of the SRTA organization. This led to a motion that was unanimously passed that SRTA pursue and accept the ADEX status and aggressively pursue merger opportunities with other testing agencies.
---New officers were elected.
---New SRTA President, Dr. George Martin, addressed the assembly. He stated that the site and dates of the next annual meeting will be determined later. SRTA may consider changing its annual meeting dates to AFTER the ADEX annual meeting so as to be able to institute changes that may occur in the ADEX exam after its annual meeting. Any changes to the exam that may be made, especially if the ADEX status is achieved for 2019, will be made at a special session of the Dental and Dental Hygiene Examination committees at a place and time to be determined later.

MEETING ADJOURNED.

THANKS TO THE DHP DIRECTOR AND THE BOARD FOR ALLOWING MY ATTENDANCE AT THIS MEETING.
JAMES D. WATKINS, DDS
Thursday, August 2, 2018
A. Dental Hygiene Examination Development Committee
   1. Thorough page by page review of the Examiner Manuel and Candidate Guide
      a. Spelling and grammatical errors corrected
      b. Suggestions to be made to the Dental Hygiene Examination Committee
         1. Verbiage regarding radiographs change “diagnostic” to “required”;
            Panorex or FMX within 4 years and 4 BW x-rays within 2 years
         2. Clarifying the selection of Primary and Secondary quadrants
         3. Share exam results the end of day of the last testing day at a site
         4. Numbering the candidate forms to aid with clarifying what form goes
            where or to whom
      5. Reviewed 10 “most missed” questions on computer portion of exam
      6. Proof showing certified to administer local anesthesia
      7. Working with Dental Exam Committee on BP standards
   2. Presentation shared by Ms. Southall focusing on licensure requirements.
      a. Beneficial to share with students licensure requirements for the state their
         school is located
      b. Advise students to find out in advance what is required in whatever state they
         decide to practice in.

Friday, August 3, 2018
A. Dental Hygiene Examination Committee Meeting
   1. Nominated and voted on BOD Dental Hygiene Representative
   2. Discussed and voted on proposed changes
   3. Educators report shared
      a. Educators shared they would like to see the computer segment exam questions
         before the exam.
      b. Want scoring areas when at all possible
      c. Discussed relationship building with State Dental Boards
      d. Shared and idea accepted/supported to create and share with students
         licensure requirement presentations for the state where their school is located
         1) Advise students to find out in advance what is required in whatever
            state they decide to practice in.
   4. Reviewed 10 “most missed” test questions with educators present
      a. asked for input/provision of more questions from educators

Saturday, August 4, 2018 - General Assembly
   Discussion focused primarily on SRTA re-joining and working with ADEX for
   administering clinical board exams. Outgoing president shared that she and other Board
   members were hopeful for a positive report of application acceptance coming out of the ADEX
   annual meeting, being held this coming weekend.
   Exploring options of working with/collaborating with other testing agencies such as
   CITA, etc.
   Amended by-laws were reviewed and accepted via vote.
From: Dr Nathaniel Bryant
To: Virginia Dental Board
Subj: Report on the ADEX and JCNDE Meetings

ADEX

The meeting was held on August 10, 2018 in Chicago, IL. As an overview, the meeting started with a welcome by the president. Following the welcome each participant met with their respective subcommittees to discuss any changes that were proposed by the Executive Committee. The subcommittees in each of the testing disciplines presented their recommendations to the general assembly for voting. There were some changes proposed in some of the sections of the examination, which if finalized and adopted will go into effect during the 2019-2020 test cycle. No major changes were made at the meeting as far as administration of the exam. There was also no decision announced concerning the status of the SRTA application to administer the ADEX exam.

JCNDE

The Meeting was held on June 20, 2018 in Chicago IL, at the ADA headquarters. The meeting was designed to update the attending State Board members, in addition to the other members of different organizations, on the changes to the National Board exam for dental and dental hygiene. The Integrated Board Exam will combine Part I and II. This will go into effect in August 2020, with full implementation and elimination of the two separate parts to the exam in 2022. Beta testing has occurred around the country, and the results have been favorable.
Welcome!
- The purpose of the JCNDE
- The purpose of NDEAF
- The JCNDE and its activities
  - JCNDE background and policy updates
  - JCNDE examination program and implementation
  - Standard setting activities
  - Administration volume and failure rates
  - The Integrated National Board Dental Examination
  - Q&A

JCNDE was created to encourage dialogue between the JCNDE and dental board members.
- The JCNDE's National Board Dental and Dental Hygiene Examinations are designed to help dental boards understand whether a candidate possesses the necessary cognitive skills to satisfy practice.
- The content outline for these examinations is available online in Candidate Guides and Technical Reports.
- Dental board members can use this material to understand the nature of the cognitive skills evaluation, and the validity evidence that supports use of these examinations.
- NDEAF provides an opportunity for the JCNDE to interact face-to-face (or remotely) with board members, to understand their unique perspectives and identify any areas for improvement concerning the National Board Examinations.

JCNDE B Yalee is being approached in a new way to facilitate direct engagement between members of the JCNDE and communities of interest.
- In attendance today we have:
  - Members of dental boards
  - In-person
  - Remote attendees
  - Members of the JCNDE
  - In-person
  - Remote attendees
  - Members of the Committee for an Integrated Examination (CIE)
  - Invited guests and observers from the ADA, ADEA, ABDA, AGD, and staff who work closely with the JCNDE's examination programs.

The JCNDE Yalee indicates that the purpose of the JCNDE is:
- to provide and conduct examinations to assist state boards in determining qualifications of dentists and dental hygienists who seek licensure.
- to make rules and regulations for the conduct of National Board examinations and certificates.
- to serve as a resource for the dental profession in the development of examinations.
The JCNDE develops and conducts highly reliable, state-of-the-art cognitive examinations that assist regulatory agencies in making valid decisions regarding licensure of oral health care professionals, develops and implements policy for the orderly, secure, and fair administration of its examinations, and is a leader and resource in assessment for the oral health care profession.

- Psychosocial Foundation of Commissions:
  - Consistent and free from bias or conflict of interest—remain objective.
  - No single community of interest can have undue influence in the decision-making process, including the ADA.
  - Quality assurance is necessary to protect the public and assure long-term viability of the profession.
  - Integrity, confidentiality, due process.
  - Subject to ADA Bylaws and Standing Rules, as maintaining own Bylaws and Rules in accordance with ADA and with HOD approval.
  - Commissions maintain independent authority to carry out their programs.

- The composition of the JCNDE reflects the important perspectives that must be considered in the building and implementing of National Board Examinations, with particular emphasis given to dental boards.
  - The JCNDE has a long track record of helping dental boards identify those who are not qualified to practice.
  - The JCNDE monitors administrators through internal procedures and close collaboration with key vendors (Prometric and Pearson-Vue).
  - The JCNDE monitors examination and examinee performance (valuation and computer administration policies) and ensures that examination policies are in place to address any issues that arise.
  - The JCNDE updates examination content and programs to ensure clinical relevance and to verify that examination standards (those who do not possess the cognitive skills necessary to practice) are maintained.
  - The integrated National Board Dental Examination (NBDE) provides continuing records of performance.
The Joint Commission on National Dental Examinations (JCNDE) met in June 2017 and took the actions reported in the Unofficial Report of Major Actions.

These actions are posted here: https://www.ada.org/jcnde/resources/unofficial-actions

In today’s JCNDE meeting (directly following NOBEAF), the JCNDE will discuss and make decisions concerning the following:

- The Integrated National Board Dental Examination (INBDE)
  - Field test results
  - Final format of examination (size of questions, length of administration)
  - Updates to the Domain of Dentistry (content domain for the INBDE)
  - Formal announcement of launch of the INBDE

- Strategic planning (Executive Session)
- Review of policy and policy outcomes
  - First (9) years/Five (5) years eligibility rules
  - Irregularities and appeals
  - Changes in last constructor selection and placement
  - Introduction of Image portal
  - Improvements to results reporting for candidates who fail NBDE Part II

Please join us. Those participating remotely are advised to log in ReadyTalk.

The Joint Commission needs high quality images and case materials to support its examination programs. Please contribute to this effort.

Updates will be posted on the JCNDE website and communications will be distributed to all communities of interest.

The JCNDE held a three-day strategic planning meeting in Chicago in May 2018.

- Discussions included topics such as the JCNDE’s purpose and mission, testing industry trends and best practices, the JCNDE Commission structure, governance, resources, and communications.
- During the Executive Session portion of today’s JCNDE meeting, the JCNDE will discuss the establishment of working committees to further explore major topics identified during the strategic planning meeting.
The JCNDI oversees the following licensure testing programs:

- National Board Dental Examination Part I (NBDE Part I)
- National Board Dental Examination Part II (NBDE Part II)
- National Board Dental Hygiene Examination (NBDE)
- Integrated National Board Dental Examination (INBDE)  

The Standards were developed by the American Educational Research Association (AERA), American Psychological Association (APA), and the National Council on Measurement in Education (NCME).

The Standards provide considerations for developing, implementing, and evaluating tests.

The Standards and industry best practices help guide JCNDI and DTS activities as it designs, constructs, and implements the assessments under its care.

The JCNDI's primary focus is on validity, the evidence that supports the interpretation and use of NBE results.
The National Board Examinations are criterion-referenced and norm-referenced examinations.

Subject matter experts identify standards (pass/fail points) following established procedures and criteria that reference specific skill-level requirements. NOT by the process sometimes known as "grading on a curve."

- All candidates who demonstrate the necessary skill level through their examination performance will pass the examination (it is NOT the case that scoring is established to hit a certain percentage of examinees).
- All candidates who do not demonstrate the necessary skill level through their examination performance will fail the examination.

Based on standard-setting activities, the NCDBE has recently INCREASED STANDARDS across all of its examination programs.

The new standards for the NBDE Part I, NBDE Part II, and NBDE Part III were separately reviewed and approved by the Joint Commission, and implemented in November 2016, January 2017, and March 2017, respectively.

The following tables present information concerning examinee volume and performance for a 10-year period.

Examinee volume data includes all individuals (first time, repeaters, accredited, non-accredited) completing the National Board Dental Examinations (Part I and Part II) and the National Board Dental Hygiene Examination.

Performance trend data include candidates enrolled in accredited schools in the U.S and Canada who took the examination for the first time.

** A new standard was introduced this year, based on updated standard setting activities.
In 2009, the JCNDE appointed a Committee for an integrated Examination (CIE) to develop and validate a new examination instrument for dentistry that integrates the biomedical, behavioral, and clinical sciences to assess entry-level competency in dental practice, to supplement NSBE Part I and Part II.

- The integrated examination retains the same fundamental purpose as NSBE Part I and Part II — to assist state boards of dentistry in determining qualifications of dentists who seek licensure to practice in the U.S.

A convergence of factors led to the INBDE, which was designed to better serve communities of interest by:
- Improving test content to make it more appropriate and relevant to the practice of dentistry and contemporary dental education
- Improving processes and candidates' experiences in taking the examination
- Better assisting regulatory agencies

Examination content trends and the movement toward integrated content and clinical relevance also were considered.

The members of the ad hoc CIE are well acquainted with the Joint Commission's mission and workings:

Mark Ridenour, DDS, PhD
(AACD 2005-2009)
Chair — JCNDE (2009)

Yale Chou, DDS
Chair — JCNDE (2011)

Andrew Spanaitis, DDS, Wil, PhD.
(JCRA 2008-2011)
Chair — JCNDE (2011)

Chair — Examination Development (2008)

Chair — Dental Hygiene (2008 & 2007)

JoAnn D. Wynn, DDS
(AACD 2006-2009)
Chair — JCNDE (2009)

Chair — Administrator (2009)

Chair — Examination Development (2008)

Chair — Dental Hygiene (2010)

B. Ellis Byrne, DDS, PhD.
(AACD 2006-2010)
Chair — Research & Development (2011)

Chair — Administrator (2011)

Chair — Examination Development (2011 & 2017)

Yale Chou — JCNDE (2011)

and the leaders of the Board of Directors of the Joint Commission.
### Year, Stability Tests and Activities

<table>
<thead>
<tr>
<th>Year</th>
<th>Stability Tests and Activities</th>
</tr>
</thead>
<tbody>
<tr>
<td>2013</td>
<td>Stability tests were conducted. Non-invasive methods were used for stability assessment.</td>
</tr>
<tr>
<td>2014</td>
<td>Evaluation of reliability and validity of the INSEDC. Stabilization parameters were refined.</td>
</tr>
</tbody>
</table>

### Clinical Relevance and Alignment with Test Purpose

- Clinical relevance and alignment with test purpose are the key considerations in establishing content and the items that appear on the INSEDC.

- Integration is viewed as a means of implementing and promoting this perspective; as such, integration is secondary to clinical relevance and alignment with test purpose.

- In summary, examination purpose drives all considerations, clinical relevance is the best way to achieve the exam purpose, and integration provides a strong means of achieving clinical relevance.

### Content Domain

- A "content domain" is the set of behaviors, knowledge, skills, abilities that a test measures.

- In establishing the INSEDC content domain, the Joint Commission focused on two key questions:
  1. What tasks must entry-level general dentists be able to perform to practice safely?
  2. What knowledge, skills and abilities underlie the performance of those tasks?
INBDE Test Construction Teams (TCTs) have been formed for each clinical content section.
- Diagnostics and Treatment Planning
- Oral Health Management
- Practice and Profession

TCTs meet within their 8-partner groups and also as a full unit (16 members) during item reviewers.
INBDE TCTs have drafted over 2,000 items to date in support of field testing efforts.
Additional INBDE TCTs have focused tasks:
- Case Development, Clinical Relevance Review, Form Review

The INBDE field testing efforts have been successful to date.

The Joint Commission is on track for an August 2020 release of the INBDE.
On June 20, 2018 the JONDE will vote on release of the formal notice concerning INISOE implementation and INISO discontinuation.

- Information concerning the INISOE is available via the Joint Conferences website (www.safa.org/CJCN.CONFIGISOE).
- The following information is currently available and is updated as changes occur:
  - INISOE background
  - INISOE FAQs
  - Domain of Densities and general velocity evidence
  - Test specifications
  - Preliminary sample questions
  - INISOE related policy and candidate eligibility
  - INISOE draft term development guide
  - INISOE practice test questions
- The following information will be posted as soon as it becomes available:
  - Technical report(s) providing detailed information concerning velocity adaptations.
In Attendance

Kevin Doyle, EdD, LPC, LSATP, Board of Counseling
Allen R. Jones, Jr., DPT, PT, Board of Physical Therapy
Derrick Kendall, NHA, Board of Long-Term Care Administrators
Trula E. Minton, MS, RN, Board of Nursing
Kevin P. O’Connor, Board of Medicine
Martha S. Perry, MS, Citizen Member
Herb Stewart, PhD, Board of Psychology
Jacquelyn Tyler, RN, Citizen Member
Laura P. Verdun, MA, CCC-SLP, Board of Audiology & Speech-Language Pathology

Approval of Minutes
Presenter Dr. Jones, Jr.
Discussion
The June 26, 2018 Full Board meeting minutes were approved with no revisions. All members in favor, none opposed.
Welcome

Presenter  Dr. Jones, Jr.

Dr. Allen R. Jones, Jr. was acting Chair for this meeting as Dr. Clayton-Jeter is out of the state on business. He thanked the board members for their commitment to the Commonwealth and thanked staff for their work and dedication to DHP.

Directors Report

Presenter  Dr. Brown

Discussion

Dr. Brown stated that the agency is gearing up for the 2019 legislative session.

In follow-up to the 2018 session:

- Dr. Brown briefed the Board on an upcoming e-prescribing meeting;
- Dr. Allison-Bryan will be meeting with stakeholders to take a preliminary look into regulating community health workers;
- DHP will be convening a meeting of the Behavioral Sciences Unit, Board of Nursing and Board of Medicine to come up with a common set of regulations regarding conversion therapy for minors;
- A workgroup will be convening to see how the PMP may be automated for greater efficiency in ER physicians notifying prescribers of a patient overdose;
- In lieu of yearly board member orientation, DHP will be initiating at the board level, 45 minute board member orientation sessions to train board members on changes relevant to the board and the agency;
- Ms. Hahn and Dr. Allison-Bryan are continuing to work with Virginia State Police and the Henrico County Crime Prevention Environmental Divide Unit to establish agency safety protocol.

Invited Presentations

Presenter  Ms. Marschean

Virginia Family Caregivers

Dr. Richard Lindsay provided a PowerPoint presentation on the status of today’s caregiving community. Ms. Marschean followed up with an overview of the Virginia Department for Aging and Rehabilitative Services report on Recommendations for Improving Family Caregiver Support in Virginia 2018. Dr. Jenson provided details of different approaches Riverside is taking to support their staff of caregivers.
Criminal Background Checks

Presenter  Ms. Willinger

Discussion

Ms. Willinger provided a PowerPoint presentation on how the Virginia Board of Nursing obtained authority and the methods and impact on public safety of criminal background checks. The Board of Pharmacy is also utilizing CBCs for applicants seeking a Pharmaceutical Processor permit. *Attachment 1*

Presenter  Mr. Wells

Discussion

Mr. Wells provided information regarding the Committee’s recommendation to license Art Therapists in Virginia. He stated that the burden of regulation was justified and proof of The Criteria was supported.

Motion

A motion was made to accept the recommendation of the Regulatory Research Committee to license Art Therapists in Virginia was made and by a vote of eight (8) members in favor, one (1) opposed, was properly seconded.

Legislative and Regulatory Report

Presenter  Ms. Yeatts

Discussion

Ms. Yeatts advised the Board that there are 13 proposals to move forward in the 2019 legislative session. Updates to regulations and General Assembly legislative actions relevant to DHP were also provided. *Attachment 2*

*Lunch*

Executive Directors Report

Presenter  Dr. Carter

Board Budget

Dr. Carter stated that the Board is operating within budget.
Agency Performance

Dr. Carter reviewed the agencies performance measures in relation to clearance rate, age of pending caseload and time to disposition.

Sanction Reference Points (SRP) - Update

Dr. Carter advised that the Board of Long Term Care had just completed its latest SRP revisions, and the Board of Dentistry is next.

Policies and Procedures

Dr. Carter discussed the updating of the Board’s sunrise policies and procedures guidance document, and that the matter will be placed on the December agenda for the full Board’s consideration and vote.

New FTE Allocation

Dr. Carter advised the Board of a new FTE to the unit. Dr. Allison-Bryan added that the agency’s statistical analysis and data reporting functions are returning to BHP. The new data analyst position will focus on data validation, analysis and reporting, methods documentation, and providing technical analytic support related to agency performance measures, strategic planning, and support for DHP HWDC increasing users.

Healthcare Workforce Data Center (HWDC)

Presenter Dr. Carter

Discussion

Dr. Carter stated that all 2017 profession workforce surveys have been approved by the respective Board and are posted on the agencies website. HWDC collaboration with VLDS is still ongoing. The HWDC released its first newsletter in August with quarterly reports to follow.

Board Reports

Presenter Dr. Jones, Jr.

Board of Audiology & Speech Language Pathology

Ms. Verdun was not in attendance.

Board of Counseling

Dr. Doyle stated that the Board of Counseling is convening a Supervisor’s Summit on September 7, 2018 that will allow an opportunity to explain the laws and regulations around supervision. He stated that the board is also registering Qualified Mental Health Professionals. With the additional of QMHPs, the Board of Counseling now has an applicant count of over 24,000. He stated that the Behavioral Sciences Boards would also be participating in the conversion therapy for minor’s workgroup.
Board of Dentistry
Dr. Watkins was not in attendance.

Board of Funeral Directors & Embalmers
The seat for this Board is currently vacant.

Board of Long Term Care Administrators
Mr. Kendall stated that the Board has finalized its revisions to the Sanction Reference Point manual and that the periodic review of the Regulations Governing the Practice of Nursing Home Administrators was in its final stage at the Secretary's Office. He was happy to announce that the Board has no vacancies at this time.

Board of Medicine
Dr. O'Connor reported that the board has five (5) new members. The Executive Committee met August 3, 2018 and discussed autonomous practice for Nurse Practitioners; the Board is currently undergoing a periodic review of regulations; and the Board of Medicine will be participating in the conversion therapy for minor's workgroup.

Board of Nursing
Ms. Minton attended the 40th annual NCSBN national meeting and was very excited to announce that Ms. Douglas, Executive Director for the Board of Nursing, has been appointed to the NCSBN Board. She also advised that the NCSBN is working to address the role of nurses working with patients who use medical marijuana. She also discussed that "Nursing Now" is a global campaign that aims to improve health by raising the profile of nursing worldwide.

Board of Optometry
Dr. Jones, Jr. provided the report as follows:

*Next meeting is scheduled for July 13, 2018.

Complaints FY2016: Received 13
Complaints FY2017: Received 36

Licenses (in state/out of state based on address of record provided by licensee)
FY2017: Total – 1,921  TPA – 1,148/390  DPA – 27/90  Professional Designations – 266
Y-T-D FY2018: Total – 1,929  TPA – 1,168/400  DPA – 20/84  Professional Designations – 257

Continuing Education: Audit has not yet commenced.
Regulatory Changes: The Board adopted emergency regulations for the prescribing of opioids, which became effective on 10/30/17. The final replacement regulations under review in the Secretary's office. In addition, a periodic review is in the proposed stage and is still under consideration by the administration.

In response to a petition for rulemaking, the Board moved forward with a NOIRA to add inactive licenses to the regulations.

**Board of Pharmacy**
Mr. Logan was not in attendance.

**Board of Physical Therapy**
Dr. Jones, Jr., reported that he is no longer the President of the Board, that Arkana Daily was appointed President at the August 16, 2018 meeting. He stated that the Virginia Board of Physical Therapy was chosen as one of two Boards across the country to receive the 2018 Excellence in Regulation Award from the Federation of State Boards of Physical Therapy (FSSPT). The Boards guidance documents have been reviewed and updated. The Board voted to pursue legislation to enact the Physical Therapy Licensure Compact.

**Board of Psychology**
Dr. Stewart stated they have approximately 6,500 applicants. The Board has a member seat specific to applied psychologist and due to the low number in the profession, this seat has been vacant for an extended period of time. The board is considering reallocation of the seat. The Board is performing a top to bottom review of existing regulations and has submitted for a one-time fee reduction. The Board of Psychology will also be participating in the conversion therapy for minor's workgroup. In July, the Board voted to endorse PSYPAC and it has been added to 2019 legislation.

**Board of Social Work**
The seat for this Board is currently vacant.

**Board of Veterinary Medicine**
Dr. Johnson was not in attendance.

**New Business**

UNAPPROVED
MINUTES

BOARD OF DENTISTRY
EXAMINATION COMMITTEE
August 10, 2018

TIME AND PLACE: The Examination Committee convened on August 10, 2018, at 1:06 p.m., at the Department of Health Professions, Perimeter Center, 2nd Floor Conference Center, 9960 Mayland Drive, Henrico, VA 23233.

PRESIDING: James D. Watkins, D.D.S.

MEMBERS PRESENT: Jamiah Dawson, D.D.S.
Patricia B. Bonwell, R.D.H., PhD
Tonya A. Parris-Wilkins, D.D.S.

MEMBER ABSENT: Nathaniel C. Bryant, D.D.S.
Carol R. Russek, J.D.

STAFF PRESENT: Sandra K. Reen, Executive Director
Kelley W. Palmatier, Deputy Executive Director
Sheila Beard, Executive Assistant

BOARD COUNSEL PRESENT: James E. Rutkowski, Assistant Attorney General

ESTABLISHMENT OF A QUORUM: With three members of the Committee present, a quorum was established.

PUBLIC COMMENT: There were no public comments.

APPROVAL OF MINUTES: Dr. Watkins asked if the Committee members had reviewed the February 2, 2018 minutes and asked if there were any corrections needed. Dr. Bonwell moved to accept the minutes presented. The motion was seconded and passed.

DISCUSSION: Letter from JCNDE - The letter included in the agenda package from JCNDE was accepted for informational purposes.
Acceptance of Clinical Examinations

**ADHA** - Dr. Bonwell acknowledged the letter included in the agenda package and shared the information presented at the recent SRTA meeting. Extensive conversation went forth surrounding ADHA’s support to eliminate clinical exams.

**ADEA** - Ms. Reen informed the Committee that this matter continues to come before the Board and should be addressed by the Committee. Ms. Reen stated when licensing by credentials the Board must be aware what will be good for Virginia. The information for ADHA and ADEA will be added to the September Board Meeting package.

**Acceptance of Regional Exams** - Ms. Reen informed the Committee that it must review the examinations of all the regional testing agencies and recommend to the Board which examinations are acceptable. Ms. Reen stated there are inconsistencies between regional exams and how results are reported, which seem to change year to year. Currently, the prosthodontics section of the WREB exam is optional and is a required section of all other regional exams. There is a concern that many applicants are applying with no intention to practice in Virginia.

Dr. Watkins asked if it would be beneficial for a Board representative to be part of each exam agency in order to keep up with the changes that take place.

Ms. Reen informed the Committee that Guidance Document 60-25, as currently written, cannot be enforced. Ms. Reen suggested that consideration should be given to possibly accepting ADEX exams only and that the Board put a new policy in place. The Board can make changes to this Guidance Document in September. Mr. Rutkowski reminded the Committee that guidance documents are not enforceable as law and recommended a regulatory change. Ms. Reen stated the Board can choose to adopt a fast-track regulatory action at the September Board meeting.

Dr. Dawson made a motion to change Guidance Document 60-25 to read “All examinations taken after January 1, 2019 must include, at a minimum, sections on Endodontics; Prosthodontics; operative dentistry consisting of a Posterior Class II and Anterior Class III restorations; and a Periodontal section” for dental licensure applicants by examination or credentials. This motion was seconded by Dr. Bonwell and passed.

Dr. Bonwell made a motion to adopt a regulatory action to change the policy for exam acceptance under the section of licensure by examinations and credentials.

The next Exam Committee meeting is being considered for September 13, 2018.

**ADJOURNMENT:** With all business concluded, the meeting adjourned at 2:54pm
CALL TO ORDER: Dr. Augustus A. Petticolas, Jr. called the meeting of the Regulatory-Legislative Committee to order at 10:04AM. With 8 Board members present, a quorum was established.

MEMBERS PRESENT: Augustus A. Petticolas, Jr., D.D.S., Chair
Tonya A. Parris-Wilkins, D.D.S.
Tammy C. Ridout, R.D.H.
Sandra J. Catchings, D.D.S.
James D. Watkins, D.D.S.

OTHER BOARD MEMBERS PRESENT: Patricia Bonwell, R.D.H., Ph.D.
John M. Alexander, D.D.S.
Carol Russek, JD

STAFF PRESENT: Sandra K. Reen, Executive Director
Sheila Beard, Executive Assistant
Elaine Yeatts, DHP Policy Analyst

PUBLIC COMMENT: Emily Bonovitch, VDHA – Thanked the Board for reviewing Guidance Documents “Practice of Dental Hygienist under Remote Supervision”, and “Administration of Topical Fluorides”, to address how they align with current Code and regulatory provisions. She asked that the Remote Supervision Guidance Document, be amended to remove the age restriction in #7(g) and #8.

Terry Dickenson, D.D.S., Executive Director, VDA – Supports the position of the VDHA regarding removing the age restriction for the application of fluoride.

Michelle McGregor, VCU Dental Hygienist – Supports allowing dentists to do the A1C finger prick screening. Requested dental hygienists be included since students are trained for this.

Terry Dickenson, D.D.S., Executive Director, VDA – Said the VDA also supports allowing dentists and dental hygienists to do A1C screening.
Ms. Ridout moved to accept the minutes of March 8, 2018 as written. The motion was seconded and passed.

Ms. Yeatts informed the Committee that all regulatory actions are still pending in the Governor’s office. She added that she expects the 60-day comment period on the proposed regulations to replace the emergency regulations for opioid prescribing will take place between 7/9/2018 and 9/7/2018.

**A1C Test and Diabetes -**

At the June 8, 2018 Board meeting, Dr. Alexander referred this matter to the Regulatory- Legislative Committee for review to consider if legislative action is required to allow dentists and dental hygienists to perform skin pricks. Ms. Reen advised that in prior discussion with Board Council, she was advised that the Code definition of dentistry would require amendment to include A1C screening. The Committee decided to ask Board Council to reconsider his advice given the current research on A1C and how it relates to the profession of dentistry in making decisions about treatment and sedation.

**Guidance Documents -**

The committee discussed the following Guidance Documents:

- **60-12 Administration of Topical Oral Fluorides by Dental Hygienists Under Standards adopted by the Virginia Department of Health** - This Guidance document has been identified for the committee to consider revision, re-adoption, or withdrawal. Ms. Ridout made the motion to recommend withdrawing guidance document 60-12. The motion was seconded and passed.

- **60-13 Practice of a Dental Hygienist under Remote Supervision**- The Committee discussed the difference in provisions for dental hygienists to possess and administer topical fluorides, topical anesthetics, antimicrobial agents or other Schedule VI topical drug while practicing under remote supervision to and while practicing under general supervision. Ms. Yeatts advised that legislative action was needed to address the Committee’s interest in having the provisions for general supervision apply to remote supervision. She added that to have this change included in the Board’s legislative proposal a decision on this could not wait for Board action at the September meeting. She said DHP Director Dr. Brown could make this change at the request of the Committee. A motion was made by Ms. Ridout to ask Dr. Brown to amend the Board’s legislative proposal to add “or remote” supervision to §54.1-3408(J) and to add the Schedule VI topical drugs addressed in §54.1-3408 (J) to §54.1-2722 F(g). The motion was seconded and passed. Ms. Ridout made a motion to recommend adoption of guidance document 60-13 as proposed. The motion was seconded and passed.
• **60-17 Recovery of Disciplinary Costs** – In response to Dr. Brown’s concern about the Board’s policy on disciplinary cost recovery, Dr. Alexander asked the Committee to consider the options of eliminating or reducing such costs or reducing the costs for dental hygienist and to make a recommendation to the Board. A motion was made by Dr. Watkins to recommend dismissing the costs for first time offenders and to continue recovering costs for repeat offenders; additionally, to recommend maintaining the maximum cost assessment of $5,000.00 for dentists and establishing the maximum cost assessment at $1,250.00 for dental hygienists. The motion was seconded and passed.

• **60-19 Dental Laboratory Subcontractor Work Order Form** – Ms. Reen informed the Board after review of this document, she recommends to re-adopt the form. There is no license number associated with the subcontractor form; therefore, the form presented is the correct form for use. Ms. Ridout made a motion to recommend that the Board re-adopt the guidance as is. The motion was seconded and passed.

**ADJOURNMENT:**

With all business concluded, Dr. Petticolas adjourned the meeting at 11:58AM.

Augustus A. Petticolas, Jr., D.D.S., Chair

DRAFT Legislation

2019 Session of the General Assembly

A BILL to amend the Code of Virginia by amending §§ 54.1-2722 and 54.1-3408 of the Code of Virginia relating to administration of Schedule VI drugs by dental hygienists.

Be it enacted by the General Assembly of Virginia:

1. That §§ 54.1-2722 and 54.1-3408 of the Code of Virginia are amended and reenacted as follows:

§ 54.1-2722. License; application; qualifications; practice of dental hygiene.

A. No person shall practice dental hygiene unless he possesses a current, active, and valid license from the Board of Dentistry. The licensee shall have the right to practice dental hygiene in the Commonwealth for the period of his license as set by the Board, under the direction of any licensed dentist.

B. An application for such license shall be made to the Board in writing and shall be accompanied by satisfactory proof that the applicant (i) is of good moral character, (ii) is a graduate of a dental hygiene program accredited by the Commission on Dental Accreditation and offered by an accredited institution of higher education, (iii) has passed the dental hygiene examination given by the Joint Commission on Dental Examinations, and (iv) has successfully completed a clinical examination acceptable to the Board.

C. The Board may grant a license to practice dental hygiene to an applicant licensed to practice in another jurisdiction if he (i) meets the requirements of subsection B; (ii) holds a current, unrestricted license to practice dental hygiene in another jurisdiction in the United States; (iii) has not committed any act that would constitute grounds for denial as set forth in § 54.1-2706; and (iv) meets other qualifications as determined in regulations promulgated by the Board.

D. A licensed dental hygienist may, under the direction or general supervision of a licensed dentist and subject to the regulations of the Board, perform services that are educational, diagnostic, therapeutic, or preventive. These services shall not include the establishment of a final diagnosis or treatment plan for a dental patient. Pursuant to subsection V of § 54.1-3408, a licensed dental hygienist may administer topical oral fluorides under an oral or written order or a standing protocol issued by a dentist or a doctor of medicine or osteopathic medicine.

A dentist may also authorize a dental hygienist under his direction to administer Schedule VI nitrous oxide and oxygen inhalation analgesia and, to persons 18 years of age or older, Schedule VI local anesthesia. In its regulations, the Board of Dentistry shall establish the education and training requirements for dental hygienists to administer such controlled substances under a dentist's direction.
For the purposes of this section, "general supervision" means that a dentist has evaluated the patient and prescribed authorized services to be provided by a dental hygienist; however, the dentist need not be present in the facility while the authorized services are being provided.

The Board shall provide for an inactive license for those dental hygienists who hold a current, unrestricted license to practice in the Commonwealth at the time of application for an inactive license and who do not wish to practice in Virginia. The Board shall promulgate such regulations as may be necessary to carry out the provisions of this section, including requirements for remedial education to activate a license.

E. For the purposes of this subsection, "remote supervision" means that a public health dentist has regular, periodic communications with a public health dental hygienist regarding patient treatment, but such dentist may not have conducted an initial examination of the patients who are to be seen and treated by the dental hygienist and may not be present with the dental hygienist when dental hygiene services are being provided.

Notwithstanding any provision of law, a dental hygienist employed by the Virginia Department of Health who holds a license issued by the Board of Dentistry may provide educational and preventative dental care in the Commonwealth under the remote supervision of a dentist employed by the Department of Health. A dental hygienist providing such services shall practice pursuant to a protocol adopted by the Commissioner of Health on September 23, 2010, having been developed jointly by (i) the medical directors of the Cumberland Plateau, Southside, and Lenowisco Health Districts; (ii) dental hygienists employed by the Department of Health; (iii) the Director of the Dental Health Division of the Department of Health; (iv) one representative of the Virginia Dental Association; and (v) one representative of the Virginia Dental Hygienists' Association. Such protocol shall be adopted by the Board as regulations.

A report of services provided by dental hygienists pursuant to such protocol, including their impact upon the oral health of the citizens of the Commonwealth, shall be prepared and submitted by the Department of Health to the Virginia Secretary of Health and Human Resources annually. Nothing in this section shall be construed to authorize or establish the independent practice of dental hygiene.

F. For the purposes of this subsection, "remote supervision" means that a supervising dentist is accessible and available for communication and consultation with a dental hygienist during the delivery of dental hygiene services, but such dentist may not have conducted an initial examination of the patients who are to be seen and treated by the dental hygienist and may not be present with the dental hygienist when dental hygiene services are being provided.

Notwithstanding any other provision of law, a dental hygienist may practice dental hygiene under the remote supervision of a dentist who holds an active license by the Board and who has a dental practice physically located in the Commonwealth. No dental hygienist shall practice under remote supervision unless he has (i) completed a continuing education course designed to develop the competencies needed to provide care under remote supervision offered by an accredited dental education program or from a continuing education provider approved by the Board and (ii) at least two years of clinical experience, consisting of at least 2,500 hours of
clinical experience. A dental hygienist practicing under remote supervision shall have professional liability insurance with policy limits acceptable to the supervising dentist. A dental hygienist shall only practice under remote supervision at a federally qualified health center; charitable safety net facility; free clinic; long-term care facility; elementary or secondary school; Head Start program; or women, infants, and children (WIC) program.

A dental hygienist practicing under remote supervision may (a) obtain a patient's treatment history and consent, (b) perform an oral assessment, (c) perform scaling and polishing, (d) perform all educational and preventative services, (e) take X-rays as ordered by the supervising dentist or consistent with a standing order, (f) maintain appropriate documentation in the patient's chart, (g) administer topical oral fluorides, topical oral anesthetics, topical and directly applied antimicrobial agents for treatment of periodontal pocket lesions, as well as any other Schedule VI topical drug approved by the Board of Dentistry under an oral or written order-or a standing protocol issued by a dentist or a doctor of medicine or osteopathic medicine pursuant to subsection subsections J or V of § 54.1-3408, and (h) perform any other service ordered by the supervising dentist or required by statute or Board regulation. No dental hygienist practicing under remote supervision shall administer local anesthetic or nitrous oxide.

Prior to providing a patient dental hygiene services, a dental hygienist practicing under remote supervision shall obtain (1) the patient's or the patient's legal representative's signature on a statement disclosing that the delivery of dental hygiene services under remote supervision is not a substitute for the need for regular dental examinations by a dentist and (2) verbal confirmation from the patient that he does not have a dentist of record whom he is seeing regularly.

After conducting an initial oral assessment of a patient, a dental hygienist practicing under remote supervision may provide further dental hygiene services following a written practice protocol developed and provided by the supervising dentist. Such written practice protocol shall consider, at a minimum, the medical complexity of the patient and the presenting signs and symptoms of oral disease.

A dental hygienist practicing under remote supervision shall inform the supervising dentist of all findings for a patient. A dental hygienist practicing under remote supervision may continue to treat a patient for 90 days. After such 90-day period, the supervising dentist, absent emergent circumstances, shall either conduct an examination of the patient or refer the patient to another dentist to conduct an examination. The supervising dentist shall develop a diagnosis and treatment plan for the patient, and either the supervising dentist or the dental hygienist shall provide the treatment plan to the patient. The supervising dentist shall review a patient's records at least once every 10 months.

Nothing in this subsection shall prevent a dental hygienist from practicing dental hygiene under general supervision whether as an employee or as a volunteer.

§ 54.1-3408. Professional use by practitioners.

A. A practitioner of medicine, osteopathy, podiatry, dentistry, or veterinary medicine or a licensed nurse practitioner pursuant to § 54.1-2957.01, a licensed physician assistant pursuant to
§ 54.1-2952.1, or a TPA-certified optometrist pursuant to Article 5 (§ 54.1-3222 et seq.) of Chapter 32 shall only prescribe, dispense, or administer controlled substances in good faith for medicinal or therapeutic purposes within the course of his professional practice.

B. The prescribing practitioner's order may be on a written prescription or pursuant to an oral prescription as authorized by this chapter. The prescriber may administer drugs and devices, or he may cause drugs or devices to be administered by:

1. A nurse, physician assistant, or intern under his direction and supervision;

2. Persons trained to administer drugs and devices to patients in state-owned or state-operated hospitals or facilities licensed as hospitals by the Board of Health or psychiatric hospitals licensed by the Department of Behavioral Health and Developmental Services who administer drugs under the control and supervision of the prescriber or a pharmacist;

3. Emergency medical services personnel certified and authorized to administer drugs and devices pursuant to regulations of the Board of Health who act within the scope of such certification and pursuant to an oral or written order or standing protocol; or

4. A licensed respiratory therapist as defined in § 54.1-2954 who administers by inhalation controlled substances used in inhalation or respiratory therapy.

C. Pursuant to an oral or written order or standing protocol, the prescriber, who is authorized by state or federal law to possess and administer radiopharmaceuticals in the scope of his practice, may authorize a nuclear medicine technologist to administer, under his supervision, radiopharmaceuticals used in the diagnosis or treatment of disease.

D. Pursuant to an oral or written order or standing protocol issued by the prescriber within the course of his professional practice, such prescriber may authorize registered nurses and licensed practical nurses to possess (i) epinephrine and oxygen for administration in treatment of emergency medical conditions and (ii) heparin and sterile normal saline to use for the maintenance of intravenous access lines.

Pursuant to the regulations of the Board of Health, certain emergency medical services technicians may possess and administer epinephrine in emergency cases of anaphylactic shock.

Pursuant to an order or standing protocol issued by the prescriber within the course of his professional practice, any school nurse, school board employee, employee of a local governing body, or employee of a local health department who is authorized by a prescriber and trained in the administration of epinephrine may possess and administer epinephrine.

Pursuant to an order or a standing protocol issued by the prescriber within the course of his professional practice, any employee of a school for students with disabilities, as defined in § 22.1-319 and licensed by the Board of Education, or any employee of a private school that is accredited pursuant to § 22.1-19 as administered by the Virginia Council for Private Education
who is authorized by a prescriber and trained in the administration of epinephrine may possess and administer epinephrine.

Pursuant to an order or a standing protocol issued by the prescriber within the course of his professional practice, any employee of a public institution of higher education or a private institution of higher education who is authorized by a prescriber and trained in the administration of epinephrine may possess and administer epinephrine.

Pursuant to an order issued by the prescriber within the course of his professional practice, an employee of a provider licensed by the Department of Behavioral Health and Developmental Services or a person providing services pursuant to a contract with a provider licensed by the Department of Behavioral Health and Developmental Services may possess and administer epinephrine, provided such person is authorized and trained in the administration of epinephrine.

Pursuant to an oral or written order or standing protocol issued by the prescriber within the course of his professional practice, such prescriber may authorize pharmacists to possess epinephrine and oxygen for administration in treatment of emergency medical conditions.

E. Pursuant to an oral or written order or standing protocol issued by the prescriber within the course of his professional practice, such prescriber may authorize licensed physical therapists to possess and administer topical corticosteroids, topical lidocaine, and any other Schedule VI topical drug.

F. Pursuant to an oral or written order or standing protocol issued by the prescriber within the course of his professional practice, such prescriber may authorize licensed athletic trainers to possess and administer topical corticosteroids, topical lidocaine, or other Schedule VI topical drugs; oxygen for use in emergency situations; and epinephrine for use in emergency cases of anaphylactic shock.

G. Pursuant to an oral or written order or standing protocol issued by the prescriber within the course of his professional practice, and in accordance with policies and guidelines established by the Department of Health pursuant to § 320-50.2, such prescriber may authorize registered nurses or licensed practical nurses under the supervision of a registered nurse to possess and administer tuberculin purified protein derivative (PPD) in the absence of a prescriber. The Department of Health's policies and guidelines shall be consistent with applicable guidelines developed by the Centers for Disease Control and Prevention for preventing transmission of mycobacterium tuberculosis and shall be updated to incorporate any subsequently implemented standards of the Occupational Safety and Health Administration and the Department of Labor and Industry to the extent that they are inconsistent with the Department of Health's policies and guidelines. Such standing protocols shall explicitly describe the categories of persons to whom the tuberculin test is to be administered and shall provide for appropriate medical evaluation of those in whom the test is positive. The prescriber shall ensure that the nurse implementing such standing protocols has received adequate training in the practice and principles underlying tuberculin screening.
The Health Commissioner or his designee may authorize registered nurses, acting as agents of the Department of Health, to possess and administer, at the nurse's discretion, tuberculin purified protein derivative (PPD) to those persons in whom tuberculin skin testing is indicated based on protocols and policies established by the Department of Health.

H. Pursuant to a written order or standing protocol issued by the prescriber within the course of his professional practice, such prescriber may authorize, with the consent of the parents as defined in § 22.1-1, an employee of (i) a school board, (ii) a school for students with disabilities as defined in § 22.1-319 licensed by the Board of Education, or (iii) a private school accredited pursuant to § 22.1-19 as administered by the Virginia Council for Private Education who is trained in the administration of insulin and glucagon to assist with the administration of insulin or administer glucagon to a student diagnosed as having diabetes and who requires insulin injections during the school day or for whom glucagon has been prescribed for the emergency treatment of hypoglycemia. Such authorization shall only be effective when a licensed nurse, nurse practitioner, physician, or physician assistant is not present to perform the administration of the medication.

Pursuant to a written order or standing protocol issued by the prescriber within the course of his professional practice, such prescriber may authorize an employee of a public institution of higher education or a private institution of higher education who is trained in the administration of insulin and glucagon to assist with the administration of insulin or administration of glucagon to a student diagnosed as having diabetes and who requires insulin injections or for whom glucagon has been prescribed for the emergency treatment of hypoglycemia. Such authorization shall only be effective when a licensed nurse, nurse practitioner, physician, or physician assistant is not present to perform the administration of the medication.

Pursuant to a written order issued by the prescriber within the course of his professional practice, such prescriber may authorize an employee of a provider licensed by the Department of Behavioral Health and Developmental Services or a person providing services pursuant to a contract with a provider licensed by the Department of Behavioral Health and Developmental Services to assist with the administration of insulin or to administer glucagon to a person diagnosed as having diabetes and who requires insulin injections or for whom glucagon has been prescribed for the emergency treatment of hypoglycemia, provided such employee or person providing services has been trained in the administration of insulin and glucagon.

I. A prescriber may authorize, pursuant to a protocol approved by the Board of Nursing, the administration of vaccines to adults for immunization, when a practitioner with prescriptive authority is not physically present, by (i) licensed pharmacists, (ii) registered nurses, or (iii) licensed practical nurses under the supervision of a registered nurse. A prescriber acting on behalf of and in accordance with established protocols of the Department of Health may authorize the administration of vaccines to any person by a pharmacist, nurse, or designated emergency medical services provider who holds an advanced life support certificate issued by the Commissioner of Health under the direction of an operational medical director when the prescriber is not physically present. The emergency medical services provider shall provide documentation of the vaccines to be recorded in the Virginia Immunization Information System.
J. A dentist may cause Schedule VI topical drugs to be administered under his direction and supervision by either a dental hygienist or by an authorized agent of the dentist.

Further, pursuant to a written order and in accordance with a standing protocol issued by the dentist in the course of his professional practice, a dentist may authorize a dental hygienist under his general or remote supervision, as defined in § 54.1-2722, to possess and administer topical oral fluorides, topical oral anesthetics, topical and directly applied antimicrobial agents for treatment of periodontal pocket lesions, as well as any other Schedule VI topical drug approved by the Board of Dentistry.

In addition, a dentist may authorize a dental hygienist under his direction to administer Schedule VI nitrous oxide and oxygen inhalation analgesia and, to persons 18 years of age or older, Schedule VI local anesthesia.

K. Pursuant to an oral or written order or standing protocol issued by the prescriber within the course of his professional practice, such prescriber may authorize registered professional nurses certified as sexual assault nurse examiners—A (SANE-A) under his supervision and when he is not physically present to possess and administer preventive medications for victims of sexual assault as recommended by the Centers for Disease Control and Prevention.

L. This section shall not prevent the administration of drugs by a person who has satisfactorily completed a training program for this purpose approved by the Board of Nursing and who administers such drugs in accordance with a prescriber’s instructions pertaining to dosage, frequency, and manner of administration, and in accordance with regulations promulgated by the Board of Pharmacy relating to security and record keeping, when the drugs administered would be normally self-administered by (i) an individual receiving services in a program licensed by the Department of Behavioral Health and Developmental Services; (ii) a resident of the Virginia Rehabilitation Center for the Blind and Vision Impaired; (iii) a resident of a facility approved by the Board or Department of Juvenile Justice for the placement of children in need of services or delinquent or alleged delinquent youth; (iv) a program participant of an adult day-care center licensed by the Department of Social Services; (v) a resident of any facility authorized or operated by a state or local government whose primary purpose is not to provide health care services; (vi) a resident of a private children’s residential facility, as defined in § 63.2-100 and licensed by the Department of Social Services, Department of Education, or Department of Behavioral Health and Developmental Services; or (vii) a student in a school for students with disabilities, as defined in § 22.1-319 and licensed by the Board of Education.

In addition, this section shall not prevent a person who has successfully completed a training program for the administration of drugs via percutaneous gastrostomy tube approved by the Board of Nursing and been evaluated by a registered nurse as having demonstrated competency in administration of drugs via percutaneous gastrostomy tube from administering drugs to a person receiving services from a program licensed by the Department of Behavioral Health and Developmental Services to such person via percutaneous gastrostomy tube. The continued competency of a person to administer drugs via percutaneous gastrostomy tube shall be evaluated semiannually by a registered nurse.
M. Medication aides registered by the Board of Nursing pursuant to Article 7 (§ 54.1-3041 et seq.) of Chapter 30 may administer drugs that would otherwise be self-administered to residents of any assisted living facility licensed by the Department of Social Services. A registered medication aide shall administer drugs pursuant to this section in accordance with the prescriber's instructions pertaining to dosage, frequency, and manner of administration; in accordance with regulations promulgated by the Board of Pharmacy relating to security and recordkeeping; in accordance with the assisted living facility's Medication Management Plan; and in accordance with such other regulations governing their practice promulgated by the Board of Nursing.

N. In addition, this section shall not prevent the administration of drugs by a person who administers such drugs in accordance with a physician's instructions pertaining to dosage, frequency, and manner of administration and with written authorization of a parent, and in accordance with school board regulations relating to training, security and record keeping, when the drugs administered would be normally self-administered by a student of a Virginia public school. Training for such persons shall be accomplished through a program approved by the local school boards, in consultation with the local departments of health.

O. In addition, this section shall not prevent the administration of drugs by a person to (i) a child in a child day program as defined in § 63.2-100 and regulated by the State Board of Social Services or a local government pursuant to § 15.2-914, or (ii) a student of a private school that is accredited pursuant to § 22.1-19 as administered by the Virginia Council for Private Education, provided such person (a) has satisfactorily completed a training program for this purpose approved by the Board of Nursing and taught by a registered nurse, licensed practical nurse, nurse practitioner, physician assistant, doctor of medicine or osteopathic medicine, or pharmacist; (b) has obtained written authorization from a parent or guardian; (c) administers drugs only to the child identified on the prescription label in accordance with the prescriber's instructions pertaining to dosage, frequency, and manner of administration; and (d) administers only those drugs that were dispensed from a pharmacy and maintained in the original, labeled container that would normally be self-administered by the child or student, or administered by a parent or guardian to the child or student.

P. In addition, this section shall not prevent the administration or dispensing of drugs and devices by persons if they are authorized by the State Health Commissioner in accordance with protocols established by the State Health Commissioner pursuant to § 32.1-42.1 when (i) the Governor has declared a disaster or a state of emergency or the United States Secretary of Health and Human Services has issued a declaration of an actual or potential bioterrorism incident or other actual or potential public health emergency; (ii) it is necessary to permit the provision of needed drugs or devices; and (iii) such persons have received the training necessary to safely administer or dispense the needed drugs or devices. Such persons shall administer or dispense all drugs or devices under the direction, control, and supervision of the State Health Commissioner.

Q. Nothing in this title shall prohibit the administration of normally self-administered drugs by unlicensed individuals to a person in his private residence.
R. This section shall not interfere with any prescriber issuing prescriptions in compliance with his authority and scope of practice and the provisions of this section to a Board agent for use pursuant to subsection G of § 182-258.1. Such prescriptions issued by such prescriber shall be deemed to be valid prescriptions.

S. Nothing in this title shall prevent or interfere with dialysis care technicians or dialysis patient care technicians who are certified by an organization approved by the Board of Health Professions or persons authorized for provisional practice pursuant to Chapter 27.01 (§ 54.1-2729.1 et seq.), in the ordinary course of their duties in a Medicare-certified renal dialysis facility, from administering heparin, topical needle site anesthetics, dialysis solutions, sterile normal saline solution, and blood volumizers, for the purpose of facilitating renal dialysis treatment, when such administration of medications occurs under the orders of a licensed physician, nurse practitioner, or physician assistant and under the immediate and direct supervision of a licensed registered nurse. Nothing in this chapter shall be construed to prohibit a patient care dialysis technician trainee from performing dialysis care as part of and within the scope of the clinical skills instruction segment of a supervised dialysis technician training program, provided such trainee is identified as a "trainee" while working in a renal dialysis facility.

The dialysis care technician or dialysis patient care technician administering the medications shall have demonstrated competency as evidenced by holding current valid certification from an organization approved by the Board of Health Professions pursuant to Chapter 27.01 (§ 54.1-2729.1 et seq.).

T. Persons who are otherwise authorized to administer controlled substances in hospitals shall be authorized to administer influenza or pneumococcal vaccines pursuant to § 32.1-126.4.

U. Pursuant to a specific order for a patient and under his direct and immediate supervision, a prescriber may authorize the administration of controlled substances by personnel who have been properly trained to assist a doctor of medicine or osteopathic medicine, provided the method does not include intravenous, intrathecal, or epidural administration and the prescriber remains responsible for such administration.

V. A physician assistant, nurse or a dental hygienist may possess and administer topical fluoride varnish to the teeth of children aged six months to three years pursuant to an oral or written order or a standing protocol issued by a doctor of medicine, osteopathic medicine, or dentistry that conforms to standards adopted by the Department of Health.

W. A prescriber, acting in accordance with guidelines developed pursuant to § 32.1-46.02, may authorize the administration of influenza vaccine to minors by a licensed pharmacist, registered nurse, licensed practical nurse under the direction and immediate supervision of a registered nurse, or emergency medical services provider who holds an advanced life support certificate issued by the Commissioner of Health when the prescriber is not physically present.

X. Notwithstanding the provisions of § 54.1-3303, pursuant to an oral, written, or standing order issued by a prescriber or a standing order issued by the Commissioner of Health or his designee
authorizing the dispensing of naloxone or other opioid antagonist used for overdose reversal in the absence of an oral or written order for a specific patient issued by a prescriber, and in accordance with protocols developed by the Board of Pharmacy in consultation with the Board of Medicine and the Department of Health, a pharmacist may dispense naloxone or other opioid antagonist used for overdose reversal and a person may possess and administer naloxone or other opioid antagonist used for overdose reversal to a person who is believed to be experiencing or about to experience a life-threatening opioid overdose. Law-enforcement officers as defined in § 9.1-101, employees of the Department of Forensic Science, employees of the Office of the Chief Medical Examiner, employees of the Department of General Services Division of Consolidated Laboratory Services, and firefighters who have completed a training program may also possess and administer naloxone in accordance with protocols developed by the Board of Pharmacy in consultation with the Board of Medicine and the Department of Health.

Y. Notwithstanding any other law or regulation to the contrary, a person who is authorized by the Department of Behavioral Health and Developmental Services to train individuals on the administration of naloxone for use in opioid overdose reversal and who is acting on behalf of an organization that provides services to individuals at risk of experiencing an opioid overdose or training in the administration of naloxone for overdose reversal and that has obtained a controlled substances registration from the Board of Pharmacy pursuant to § 54.1-3423 may dispense naloxone to a person who has completed a training program on the administration of naloxone for opioid overdose reversal approved by the Department of Behavioral Health and Developmental Services, provided that such dispensing is (i) pursuant to a standing order issued by a prescriber, (ii) in accordance with protocols developed by the Board of Pharmacy in consultation with the Board of Medicine and the Department of Health, and (iii) without charge or compensation. The dispensing may occur at a site other than that of the controlled substance registration provided the entity possessing the controlled substances registration maintains records in accordance with regulations of the Board of Pharmacy. A person to whom naloxone has been dispensed pursuant to this subsection may possess naloxone and may administer naloxone to a person who is believed to be experiencing or about to experience a life-threatening opioid overdose.

Z. Pursuant to a written order or standing protocol issued by the prescriber within the course of his professional practice, such prescriber may authorize, with the consent of the parents as defined in § 22.1-1, an employee of (i) a school board, (ii) a school for students with disabilities as defined in § 22.1-1319 licensed by the Board of Education, or (iii) a private school accredited pursuant to § 22.1-19 as administered by the Virginia Council for Private Education who is trained in the administration of injected medications for the treatment of adrenal crisis resulting from a condition causing adrenal insufficiency to administer such medication to a student diagnosed with a condition causing adrenal insufficiency when the student is believed to be experiencing or about to experience an adrenal crisis. Such authorization shall be effective only when a licensed nurse, nurse practitioner, physician, or physician assistant is not present to perform the administration of the medication.

Agenda Item: Board Action on Change in Renewal Schedule

Included in your agenda package are:

NOIRA for change of renewal schedule from expiration on March 31 to renewal by birth month beginning in 2020

Comments on NOIRA received to date (8/30/18) – comment period ends on 9/5/18; additional comments will be distributed as a handout at the meeting

DRAFT proposed regulation

Board action:

- Adoption of proposed regulation as drafted to change renewal schedule to birth month; or another action by the Board
Notices of Intended Regulatory Action

Statutory Authority: §§ 54.1-2400 and 54.1-2709.5 of the Code of Virginia.

Public Comment Deadline: September 5, 2018.

Agency Contact: Sandra Reen, Executive Director, Board of Dentistry, 9960 Mayland Drive, Suite 300, Richmond, VA 23233, telephone (804) 367-4437, FAX (804) 527-4428, or email sandra.reen@dhp.virginia.gov.

VA R. Doc. No. R18-5313; Filed July 5, 2018, 5:51 p.m.

Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 2.2-4007.01 of the Code of Virginia that the Board of Dentistry intends to consider amending 18VAC60-21, Regulations Governing the Practice of Dentistry; 18VAC60-25, Regulations Governing the Practice of Dental Hygiene; and 18VAC60-30, Regulations Governing the Practice of Dental Assistants. The purpose of the proposed action is to change the license renewal schedule from the set date of March 31 to renewal in the licensee's birth month. The change will occur in the calendar year after the effective date of the regulation. The intent is to distribute the workload associated with renewal across a calendar year and to make the renewal deadline easier for licensees to remember.

The agency does not intend to hold a public hearing on the proposed action after publication in the Virginia Register.

Public Comment Deadline: September 5, 2018.

Agency Contact: Sandra Reen, Executive Director, Board of Dentistry, 9960 Mayland Drive, Suite 300, Richmond, VA 23233, telephone (804) 367-4437, FAX (804) 527-4428, or email sandra.reen@dhp.virginia.gov.

VA R. Doc. No. R18-5332; Filed July 5, 2018, 5:11 p.m.

Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 2.2-4007.01 of the Code of Virginia that the Board of Dentistry intends to consider amending 18VAC60-30, Regulations Governing the Practice of Dental Assistants. The purpose of the proposed action is to modify the educational qualifications for registration of a dental assistant II by moving to a competency-based program in which basic didactic course work is followed by clinical training under the direction and supervision of a dentist who has successfully completed a calibration exercise on evaluating the clinical skills of a student. The intent of the proposed regulatory action is to make entry into the profession more accessible to students and ensure greater consistency in their training and assurance of competency.

The agency intends to hold a public hearing on the proposed action after publication in the Virginia Register.

Date of renewal
I feel the current fixed date makes it easier to remember. Not in favor of change.

Commenter: Robert F. Morrison D.M.D.; Morrison Dental Group
2 Year renewal.
To further distribute workload for both the regulatory agency and the dental practices and to facilitate less credentialing burden with insurance companies and maspractice carriers, a 2 year renewal period, with appropriate fee is indicated. Much like the 3 year renewal period for a DEA license this eases the administrative burden on practitioners and their staff. As there are regulatory pathways for disciplinary actions on a license regardless of the length of renewal period this seems to be the most efficient pathway. Our Board should be run as a business as our practices.
Dr. Morrison

Commenter: Matthew Stephens, DDS, Dental Associates
Birth Month Renewal-Against
From the user end, I am a member of a group practice and the single date renewal is easiest for our dentists and hygienists. Therefore, I am against a change to month of birth license renewal.
However, if this proceeds, what is the plan for the valid dates of the license that is given for the year prior to this regulation’s implementation? For example, if the changed regulation goes into effect Dec 2019 and a practitioner’s birthday is the following May, the previous year’s license, that

Renewal by birth month

I'd like to keep the March 31 date because the year end month December is very busy as it is with holidays and school activities and patients who need to schedule before the end of the year. My birth month is December. Thank you.

Commenter: Bridgett Davis R.D.H.
8/16/18 7:16 pm
Against

This is not a hard date to remember. This will just make it more difficult for offices to keep track of who is currently registered.

Against Birth Month

Against Birth Month Renewal

Commenter: Christine Rodgers RDH Randazzo Dentistry
8/16/18 7:47 pm
Renewal

Renewal by birth sounds ok. If you already renewed for a year how are you compensated for the year paid. Do we renew for a half a year? Or do we get a prorated deal for the months we already paid???

Commenter: Mariana Bruce RDH
8/16/18 7:51 pm
Against Birth Month

I believe it should stay March 31 for everyone. Much easier to keep track since it has been done this way for a long time.

Commenter: Christine Rodgers
8/16/18 7:51 pm
Renewal

Two year renewal is a great idea!!

Commenter: H. Chegini DDS
8/16/18 8:14 pm
2 Year Renewal

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8169
Please consider 2 year renewal on birth month.

**Commenter: April M. Snyder**

Support a birth-month biennial renewal schedule

I support birth-month biennial renewal. Licensees renew every two years by the end of their birth month. Individuals born in even numbered years, renew no later than the end of their birth month in even numbered years. Individuals born in odd-numbered years, renew by the end of their birth month in odd-numbered years. This spreads out the workload of renewals across a longer timeframe, as well as makes it easier for licensees to remember when to renew.

**Commenter: Debra Dycus**

Against

I am against changing the current renewal date to birth date.

**Commenter: Noreen Leyden, RDH**

Against birth month.

Birth month throws ce completion/deadline into a much different, more hectic part of the year for me. Do NOT like the idea at all.

**Commenter: Becky C.**

against

I am against changing the renewal date to birth months. Some offices take CE course together and this may affect timing. If the renewal date is the same for everyone, it will encourage more team involvement which is important in an office.

**Commenter: Dr. Z**

Against

I am licensed in a few states, and it's great that each has a set date. Birthdates for Virginia means people will be all over the place with Ce coursework and remembering to renew. I am against this, as communicating with others and taking courses together is what builds our community and makes us all better practitioners.

**Commenter: Arlene G. USN**

against

Some CE courses in my area are scheduled for all RDHs to have the requirements in time for the
renewal. I don't have a problem remembering when my license is due for renewal.

Commenter: Dr. T  
Against

Birth months would not be in sync with CE requirements, or compatible with other state licenses.

Commenter: Kim Mulvey  
License renewal by birth month  
Against

Commenter: Jemice Giles, DDS  
8/18/18 7:24 pm  
Against

Please keep the March 31st renewal date. Managing staff with various renewal dates would present unnecessary challenges.

Commenter: M Nazareth  
8/25/18 2:17 pm  
Support

Renewal at the end of the birth month would be easier for me to remember. I am concerned that it might create an administrative burden, though. Initially, there would be inequities in time periods between renewals. It seems as though this might cause increased renewal rates.
Project 5382 - Proposed

BOARD OF DENTISTRY

Change in renewal schedule

Part V

Licensure Renewal

18VAC60-21-240. License renewal and reinstatement.

A. The license or permit of any person who does not return the completed renewal form and fees by the deadline shall automatically expire and become invalid, and his practice of dentistry shall be illegal. With the exception of practice with a current, restricted volunteer license as provided in § 54.1-2712.1 of the Code practicing in Virginia with an expired license or permit may subject the licensee to disciplinary action by the board.

B. Every Prior to March of 2020, every person holding an active or inactive license and those holding a permit to administer conscious/moderate sedation, deep sedation, or general anesthesia shall annually, on or before March 31, renew his license or permit. Beginning in March of 2020, every person holding an active or inactive license and those holding a permit to administer conscious/moderate sedation, deep sedation, or general anesthesia shall annually renew his license or permit in his birth month.

C. Every person holding a faculty license, temporary resident's license, a restricted volunteer license, or a temporary permit shall, on or before June 30, request renewal of his license.

C-D. Any person who does not return the completed form and fee by the deadline required in subsection B of this section shall be required to pay an additional late fee.

D-E. The board shall renew a license or permit if the renewal form, renewal fee, and late fee are received within one year of the deadline required in subsection B of this section provided that
no grounds exist to deny said renewal pursuant to § 54.1-2708 of the Code and Part II (18VAC80-21-50 et seq.) of this chapter.

E. Reinstatement procedures.

1. Any person whose license or permit has expired for more than one year or whose license or permit has been revoked or suspended and who wishes to reinstate such license or permit shall submit a reinstatement application and the reinstatement fee. The application must include evidence of continuing competence.

2. To evaluate continuing competence, the board shall consider (i) hours of continuing education that meet the requirements of subsection H of 18VAC80-21-260; (ii) evidence of active practice in another state or in federal service; (iii) current specialty board certification; (iv) recent passage of a clinical competency examination accepted by the board; or (v) a refresher program offered by a program accredited by the Commission on Dental Accreditation of the American Dental Association.

3. The executive director may reinstate such expired license or permit provided that the applicant can demonstrate continuing competence, the applicant has paid the reinstatement fee and any fines or assessments, and no grounds exist to deny said reinstatement pursuant to § 54.1-2708 of the Code and Part II (18VAC80-21-50 et seq.) of this chapter.

Part V
Licensure Renewal and Reinstatement

18VAC80-25-180. Requirements for licensure renewal.

A. An Prior to March of 2020, an active or inactive dental hygiene license shall be renewed on or before March 31 each year. Beginning in March of 2020, an active or inactive dental hygiene license shall be renewed in the licensee's birth month each year.
B. A faculty license, a restricted volunteer license, or a temporary permit shall be renewed on or before June 30 each year.

B-C. The license of any person who does not return the completed renewal form and fees by the deadline required in subsection A of this section shall automatically expire and become invalid and his practice of dental hygiene shall be illegal. With the exception of practice with a current, restricted volunteer license as provided in § 54.1-2726.1 of the Code, practicing in Virginia with an expired license may subject the licensee to disciplinary action by the board.

C-D. Any person who does not return the completed form and fee by the deadline required in subsection A of this section shall be required to pay an additional late fee. The board may renew a license if the renewal form, renewal fee, and late fee are received within one year of the deadline required in subsection A of this section.

Part V

Requirements for Renewal and Reinstatement

18VAC50-30-150. Registration renewal requirements.

A. Every Prior to March of 2020, every person holding an active or inactive registration shall annually, or on or before March 31, renew his registration. Beginning in March of 2020, every person holding an active or inactive registration shall annually renew his registration in his birth month. Any person who does not return the completed form and fee by the deadline shall be required to pay an additional late fee.

B. The registration of any person who does not return the completed renewal form and fees by the deadline shall automatically expire and become invalid and his practice as a dental assistant II shall be illegal. Practicing in Virginia with an expired registration may subject the registrant to disciplinary action by the board.
C. In order to renew registration, a dental assistant II shall be required to maintain and attest to current certification from the Dental Assisting National Board or another national credentialing organization recognized by the American Dental Association.

D. A dental assistant II shall also be required to maintain evidence of successful completion of training in basic cardiopulmonary resuscitation.

E. Following the renewal period, the board may conduct an audit of registrants to verify compliance. Registrants selected for audit shall provide original documents certifying current certification.

Copy of comments on the NOIRA received to date (8/30/18) – comment period ends on 9/5/18; additional comments will be distributed as a handout at the meeting

Copy of amended regulation as originally adopted by the Board as a fast-track action

Copy of applicable Code section

Board action:

To adopt the regulation as proposed or take other such action as determined by the Board.
NOTICES OF INTENDED REGULATORY ACTION

TITLE 12. HEALTH
STATE BOARD OF BEHAVIORAL HEALTH AND
DEVELOPMENTAL SERVICES

Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 2.2-4007.01 of the Code of Virginia that the State Board of Behavioral Health and Developmental Services intends to consider amending 12VAC35-105, Rules and Regulations for Licensing Providers by the Department of Behavioral Health and Developmental Services. The purpose of the proposed action is to comply with the quality and risk management system requirements of the U.S. Department of Justice’s Settlement Agreement with Virginia (United States of America v. Commonwealth of Virginia, Civil Action No. 3:12cv059-JAG) and develop and implement a system to ensure that individuals in the Settlement Agreement population who are receiving services in Virginia’s public system of services receive a level of care that is good quality, meets individuals’ needs, and helps individuals achieve positive outcomes. Quality improvement measures are required of community services boards for services they provide, but those services are not currently in the Department of Behavioral Health and Developmental Services (DBHDS) licensing regulations for providers. The proposed amendments will clarify and expand the requirements for the quality practices for the health, safety, care, and treatment for adults who receive services from DBHDS service providers.

The agency intends to hold a public hearing on the proposed action after publication in the Virginia Register.

Statutory Authority: §§ 37.2-302 and 37.2-400 of the Code of Virginia.

Public Comment Deadline: September 5, 2018.

Agency Contact: Emily Bowles, Legal Coordinator, Office of Licensing, Department of Behavioral Health and Developmental Services, 1220 Bank Street, P.O. Box 1797, Richmond, VA 23218, telephone (804) 225-3281, FAX (804) 692-0066, TTY (804) 371-8977, or email emily.bowles@dbhds.virginia.gov.

V.A.R. Doc. No. R18-458; Filed July 12, 2018, 9:52 a.m.

TITLE 18. PROFESSIONAL AND
OCCUPATIONAL LICENSING
BOARD OF DENTISTRY

Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 2.2-4007.01 of the Code of Virginia that the Board of Dentistry intends to consider amending 18VAC60-21, Regulations Governing the Practice of Dentistry. The purpose of the proposed action is to replace regulatory provisions specific to the advertising of dental specialties with reference to the statutory language regarding the use of trade names. Specifically being considered for removal are provisions prohibiting (i) advertising a claim of a dental specialty unless it is approved by the National Certifying Boards for Dental Specialists of the American Dental Association and (ii) representation by a dentist who does not hold specialty certification that his practice is limited to providing services in such specialty area without disclosing that he is a general dentist. The prohibition of a claim of professional superiority remains in the regulation.

The agency intends to hold a public hearing on the proposed action after publication in the Virginia Register.

Public Comment Deadline: September 5, 2018.

Agency Contact: Sandra Reen, Executive Director, Board of Dentistry, 9960 Mayland Drive, Suite 300, Richmond, VA 23233, telephone (804) 367-4437, FAX (804) 527-4428, or email sandra.ureen@dhp.virginia.gov.

V.A.R. Doc. No. R18-539; Filed July 5, 2018, 9:11 a.m.

Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 2.2-4007.01 of the Code of Virginia that the Board of Dentistry intends to consider amending 18VAC60-21, Regulations Governing the Practice of Dentistry. The purpose of the proposed action is to amend regulations relating to administration of sedation or anesthesia in dental offices. The goals of the proposed action are greater consistency and clarity of the requirements, depending on the level of sedation and the risk to the patient, and closer alignment with the American Dental Association Guidelines for the Use of Sedation and General Anesthesia. The board intends to amend provisions that are problematic to dentists, such as compliance with current regulations regarding special needs patients. The board intends to incorporate guidelines and best practices for sedation and anesthesia, such as the use of a three-person team in the operatory during administration of moderate sedation.

The agency intends to hold a public hearing on the proposed action after publication in the Virginia Register.
August 9, 2018

Ms. Sandra Reen
Executive Director
Virginia Board of Dentistry
9960 Mayland Drive, Suite 300
Richmond, VA 23233

Dear Ms. Reen:

On behalf of the 209 members of the American Association of Oral and Maxillofacial Surgeons (AAOMS) practicing in Virginia, we appreciate the opportunity to provide this commentary as the Virginia Board of Dentistry ("Board") considers possible rule making on 18 VAC 60-21-80.

After earning a dental degree from an accredited four-year dental school, oral and maxillofacial surgeons (OMSs) complete a minimum of four years of hospital-based oral and maxillofacial surgery residency training, which includes rotations in such areas as general surgery, anesthesia and clinical research. These programs are accredited by the Commission on Dental Accreditation (CODA) and undergo meticulous review. As one of the nine ADA-recognized dental specialties, patients who visit an OMS can be assured their practitioner has been trained to the highest training standards due to the requirements for specialty recognition.

The question of dental specialty recognition is a complex issue and one that has been debated in-depth over the past several years. The ruling in American Academy of Implant Dentistry v. Parker caused many state Dental Boards to review their dental specialty recognition processes. Rather than completely upending the current specialty recognition process, we ask Dental Boards to remember that the basis of the AAID v. Parker case was founded on the fact that the state delegated all authority to determine dental specialties to the ADA, a non-governmental entity.

When considering the recognition of new dental specialties and the ability to advertise as a dental specialist, we urge the Board to consider proposed specialties on their merits individually rather than approving en masse through the approval of a single credentialing board, such as the American Board of Dental Specialties, as suggested in previous petitions received by the Board. We also urge the Board to require members of any new dental specialty to complete a CODA-accredited postdoctoral residency. CODA is the only dental group recognized by the U.S. Department of Education to accredit advanced dental education programs and any recognition of dental specialties should be based on advanced educational standards and training. To use any other standard would be detrimental to patient care and safety.
We thank you for the opportunity to comment on this proposal. Please contact Ms. Sandy Guenther of the AAOMS Governmental Affairs Department at 847-678-6200 or sguenther@aaoms.org with questions or for additional information.

Sincerely,

Brett L. Ferguson, DDS, FACS

Opposing Removal of Restrictions on Dental Specialty Advertising in Virginia

Date: August 06, 2018

To: Virginia Department of Health Professions

Re: Opposing Removal of Restrictions on Dental Specialty Advertising in Virginia

Dear Board Members,

I was recently informed that the Virginia Board of Dentistry proposed removing restrictions on specialty advertising. I was informed that this proposal was in response to lobbying from dental groups that are not affiliated with the American Dental Association (ADA). Removing restrictions on dental specialty advertising places the public health at risk. Let me briefly explain why.

There are currently 9 ADA recognized specialties. To achieve recognition as a ADA recognized specialist, dentists must complete years of training under strict guidelines of their parent specialty organization. This includes intensive specialty literature review, supervision of the treatment aspects of their specialty and examinations. It has been my experience that the general public is not well informed about some of the dental specialties and the intensive training they receive.

An example of this problem is seen with the dramatic rise in the number of dentists placing dental implants with limited training. This limited training would allow them, however, to advertise as having specialty training if restrictions to advertising were removed. Removing restrictions, therefore, would place patients at increased risk for an invasive surgical procedures that could have irreversible consequences. A study published in the Journal of the American Dental Association in 2014, Outcomes of implants and restorations placed in general dental practices, concluded that "implant success rates in general practices may be lower than those reported in studies conducted in academic or specialist settings". It would seem prudent to make sure that the public is not confused by advertising that appears to place the limited training of some dentists on the same level as an ADA recognized specialty program.
As a periodontist, I can tell you that the American Academy of Periodontology is very concerned about the considerable rise in cases of implant disease and other complications in the past few years. I have found many of the implant problems that I see are due to poor management of the implant site by dentists with limited training and were avoidable.

The problem of dentists advertising as having specialty training without having attended an ADA recognized specialty program affects all of the dental specialties and the public health: In the best interests of the public, I strongly urge you to oppose removing restrictions on specialty advertising. Failure to do so, will lead to unnecessary harm to our patients.

Respectfully,
Douglas H. Mehn, D.D.S.
Periodontist, Manassas, VA

Dental Specialty Designation
8/8/18 5:28 pm

I would like to voice my strong opinion against allowing non-residency trained dentists to advertise and indicate to the public that they have specialty training and certification.

The American board of dental specialties is a unofficial organization that claims to have certification in specialty credentials. The "requirements" that this so-called board pretends to be valid are laughable in comparison to the requirements by the ADA Commission on Dental Accreditation. Legitimate, state-authorized licensure and credentialing and accreditation developed in the 18th century to protect the public from frauds and charlatans. Our system of state boards and licensing and accreditation of true training programs are a continuation of that process, which has resulted in a very high standard of dental and medical care in this country.

Allowing dentists to claim specialty designation when they have only a fraction of the clinical and didactic training demanded of fully trained specialists is a terrific abuse of public trust. It is your responsibility in the Department of Health to ensure that our citizens receive the best possible care by the best trained practitioners. Bowing to the pressure of threatened lawsuits and other assaults on dental professionalism helps no one. If anything, as technology continues to advance at a rapid rate, the requirements of training accreditation will need to increase, not decrease. Please shut the door on this outrageous proposal to make specialty designation meaningless. Better yet, shine a light on this non-transparent organization that aims to destroy the quality of the dental profession from within, and let the public know how reckless and irresponsible and financially unprincipled their movement has become.

Commenter: Elizabeth A. Alcorn, DDS
Advertising of Dental Specialties
8/8/18 9:04 am

I do not support changing the current regulation for advertising of dental specialties. There is too much financial pressure on dentists that is leading too many to push the limits of their training to perform treatments that should be performed by a specialist.

Patients have no way of knowing the skills of the dentist they see and by keeping the current regulation as it is allow a small but important protection to the patient.

Commenter: Joshua Fein, DDS, MS

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
Strongly opposed

I would like to add my opposition to the excellent posts already listed.

Dental specialty training is a rigorous multi-year undertaking that leads to clear improvements in outcomes and most importantly, improved safety for our patients. The public cannot be expected to know the difference between a properly trained specialist and one advertising as such with no formal training. This regulation change would lead to widespread confusion and misinformation that would end in harm to patients and would discourage graduating specialists from coming to Virginia for fear that their hard earned specialty certificate would be undervalued.

This proposal is outrageous, irresponsible, and harmful to the people of Virginia.

Commenter: Natalie Powell

Strongly Opposed

I also am strongly opposed to this proposed change. All specialists go through years of advanced training and there is a difference in the quality of care and management of complications provided by the education learned over years of advanced training versus a few weekend courses.

Commenter: Robert LeNoir, Brown Reynolds Snow LeNoir Dentistry

Strongly opposed

This opens up the ability for the public to misled and to create a distrust among the public for the profession.

Commenter: Nicholas Lichyshyn, DDS

Oppose Amendment

Having practiced nine years as a generalist and over 34 years as a periodontist, the proposed amendment would not serve the public well. The rigorous standards of the ADA Commission on Dental Education cannot be supplanted by other competing entities aimed at conflating the definition of a specialist.

Commenter: Mark R Zemanovich, DDS

Strongly Oppose!

The fact that this proposed change is even up for consideration is disheartening and down right scary. The practice of dentistry is complicated (and has become much more complicated over the years) and current 4 year dental education does an overall fair job at best for preparing dentists to be competent at even the most basic skills and treatment planning. Allowing undertained practitioners to claim specialty status will, without a doubt, lead to patient harm and continue to degrade the profession into the future. I strongly oppose this change!
Commenter: Frank Grogan DDS

Strongly Oppose Amendment to Advertising Dental Specialties

As a general dentist for 38 years, I have been impressed with the consistent quality of care provided by those dentists practicing in the recognized dental specialties. The term 'Specialty' implies care that is more focused in a specific area, provided by a dentist that has received more education and clinical experience in order to meet a prescribed and tested level of patient care. The dentist has been recognized by peer review for excellence in a specific area of dentistry. If the proposed Amendment is put in place, most of the general public will continue to assume that the professional definition of a dental specialist has not changed; but it will have completely changed. This will take the dental profession more into the area of becoming an occupation and less of a profession that exhibits self control. Passing this Amendment is not consistent with the Board’s duty to protect the public from inferior dental care. Thanks for consideration of my position.

Frank Grogan DDS

Commenter: Mayer G. Levy, DDS

Deleting from section 80 requirement to be appropriately recognized: definite opposition. It is not

Type over The Board was established to enhance the professionalism of Dentistry, not to demean it. I strongly oppose this change. text and enter your comments here. You are limited to approximately 3000 words.

Commenter: Matthew Stephens, DDS, Dental Associates

Opposed

The specific prohibition should remain. 18VAC80-21-80 G is well written to keep both our patients and practitioners safe. A true specialist has earned the right to advertise as such and as a profession we should hold that right in high regard.

Commenter: Chris R. Richardson, DMD, MS

Oppose this potential change

It is truly disheartening to see that this regulatory action is being considered. The American Board of Dental Specialties has hired an exceptional attorney to make every effort to move this through each state. The threat of legal action has made this even more distasteful. To be honest, the legal threat is the only thing moving this forward. If you review the CODA requirements for specialty training for the existing dental specialties, they far outweigh the tremendously minimal requirements of the ABDS recognized specialties. In fact, their requirements are roughly equivalent to one month of a 3-5 year specialty program. Imagine going to see a dentist thinking that they are specialty trained and you find out it is a very watered down version, if that.

You should take the time to read the dissent opinion by Judge James Graves of the 5th Circuit Court of Appeals. This legislation was approved from a fear of First Amendment Rights regarding Freedom of Speech. This is ridiculous and Judge Graves states in his opposing opinion that "Misleading Speech" is not covered under the Rights of The First Amendment. Those that would claim specialty status based on a weekend continuing education course are in fact misleading the public regarding their abilities. Sadly, the public will not know the difference. The Virginia Board of

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
Dentistry is charged with protecting the Commonwealth’s public from an oral health perspective. This legislation does not live up to that charge. Please don’t misunderstand, the current regulations in place are very well done. A dentist may claim that his/her practice is limited to a certain arena, however, they must also state that they are providing this limited scope of care as a general dentist.

The ADA recently established The ADA Commission on Specialty Recognition. The first meeting of this commission was in May this year. Interestingly, The commission is made up of ONE specialist representative from the nine ADA recognized specialties and NINE general dentist. A very fair representation. These general dentists see the value in recognizing specialists for what they bring to patient care with regards to skills, predictability, long term prognosis, patient management, and ability to treat difficult problems. My advice to the Virginia Board of Dentistry is to wait and see what this commission decides and how they will, without conflict of Interest, position the recognition of specialties in dentistry.

Finally, this legislation will be a heavy burden for the young clinicians who seek to become the most well-educated specialists in the field of Dentistry. These young people have invested 4 years of college, 4 years of dental school training, and 3-6 years in an ADA recognized and CODA accredited Specialty Training Program. Imagine spending 11-14 years of your life to become the very best and at the end of the day, anyone else who took a weekend course can claim specialty status. Not to mention the Time, Energy, and Stress related to that training, but also the financial commitment. Student debt is astounding and for a specialty trained student, the current graduate debt load is anywhere from $360,000.00-1,000,000.00 dollars. YES, you read that correctly. Please make the correct ETHICAL and MORAL decision regarding this proposed legislation. PLEASE DO NOT make this change to Specialty Advertising in Virginia. If it helps you to know, tremendous strides in defeating this have occurred in IOWA, NEW JERSEY, and NORTH CAROLINA. I appreciate your attention.

Commenter: Adam Ta, DDS

Strongly Opposed to removing restrictions on specialist advertising

It is pretty absurd to think that there is any justification for misleading the public and allowing a general practitioner (or even for a specialist advertising outside of their specialty) to falsely advertise expertise in a specialty field without graduating from an accredited residency training program. Patients, their families (parents), and even their insurance carriers are paying specialist fees, investing their time, money, and trust into that dental practitioner, with a certain expectation for level of care and competence. It’s practically fraudulent to market and advertise for patients to come receive dental care at an orthodontist practice and not be seen by an orthodontist, or go to a pediatric dentist and not see a pediatric dentist. If a general practitioner wants to offer those services outside the scope of their typical training, I think that’s up to them and their comfort level, but they certainly should not be able to mislead the public and advertise as a specialist. Would you be upset if your brought your child with heart disease to a cardiology practice to be evaluated by a non-cardiologist? Or would you trust the care of your loved one undergoing chemotherapy at an oncology practice to treatment by a non-oncologist? Seems obvious to me, but if we allow this type of deceit and misinformation to become commonplace, the already skeptical public will lose even more trust in their healthcare practitioners.

Commenter: Shravan Renapurkar

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
Strongly oppose removal of restrictions

Recognition of a specialty should be under the guidelines and authority of a state/federal agency and not a subjective matter. I strongly oppose removal of restrictions on advertising as a specialist of any sort.

Commenter: Jonathan L Wong, Coastal Pediatric Dental & Anesthesia

A Mislead Uproar - How to make specialties and specialists less biased and actually carry weight

While I support the ADA and the VDA, there have been some egregious behaviors that have occurred in specialty recognition that few seem to have a complete understanding of. In 2012, dentist anesthesiologists applied for specialty recognition with the ADA. This was not the first attempt at specialty recognition. However, during this attempt, the ADA, CODA, and the Board of Trustees agreed that all specialty requirements were indeed met. Nevertheless, the final phase in approval was a vote by the ADA House of Delegates. At that time, emotion and politics outweighed logic. A campaign was launched stating that anesthesia and sedation would no longer be allowed by anyone other than dentist anesthesiologist, insurance would not pay for sedation and anesthesia unless it was provided by a separate anesthesiologist, and that dentist anesthesiologist were unsafe in their practice of itinerant anesthesia. Websites were launched saying anesthesia was a right for all dentists, such as www.anesthesiaware.org. AAOMS and its oral surgeons were single handedly able to prevent specialty recognition. In addition, standard meeting protocols for the House were allowed to be breached so that the oral surgeons could "have the floor" to express why the specialty should be denied.

As you are aware, there have been successful Federal lawsuits surrounding the protectionist and political nature of the above described proceeding. Even the ADA has openly recognized the flaws of this process, even before the first lawsuit in Texas was decided. More and more State Dental Boards are changing their position or are being met with legal action. Furthermore, the American Board of Dental Specialties has emerged as an alternative to the ADA, a trade organization, being the official and sole determinant of dental specialties.

The American Board of Dental Specialties mirrors the events that created American Board of Medical Specialties. It was born out of a determination that a trade group, in their case the American Medical Association, could not and would not determine medical specialties without bias. Therefore a 3rd party was created as the certifying organization.

The ADA, in an attempt to rectify their self-acknowledged bias and systematic flaws, unanimously approve House Resolution # 65 and created a new Council for Specialty Recognition. House Resolution # 65 states, "A dentist may ethically announce as a specialist to the public in any of the dental specialties recognized by the American Dental Association including dental public health, endodontics, oral and maxillofacial pathology, oral and maxillofacial radiology, oral and maxillofacial surgery, orthodontics and dentofacial orthopedics, pediatric dentistry, periodontics, and prosthodontics, and in any other areas of dentistry for which specialty recognition has been granted under the standards required or recognized in the practitioner's jurisdiction, provided the dentist meets the educational requirements required for recognition as a specialist adopted by the American Dental Association or accepted in the jurisdiction in which they practice. Dentists who choose to announce specialization should use "specialist in" and shall devote a sufficient portion of their practice to the announced specialty or specialties to maintain expertise in that specialty or those specialties. Dentists whose practice is devoted exclusively to an announced specialty or specialties may announce that their practice is limited to that specialty or those specialties. Dentists who use their eligibility to announce as specialists to make the public believe that specialty services rendered in the dental office are being rendered by qualified specialists when such is not the case are engaged in unethical conduct. The burden of responsibility is on specialists to avoid any inference that general practitioners who are associated with specialists are

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
qualified to announce themselves as specialists."

Although the petition brought by Dr. Mayberry is being described by others as an attempt to circumvent the ADA and force the Virginia Dental Board to accept the American Board of Dental Specialties (ABDS), this was not what was proposed in the regulatory change. Instead § 54.1-2718
would have remained unchanged and the regulations changed such that the "specialist" must not advertise an "unsubstantiated claim." I had proposed that the regulation be changed to reflect the House Resolution # 65 and get rid of the reference to the antiquated Ethical Code that the regulation was based on. The Dental Board did not haphazardly adopt Dr. Mayberry's petition or ADA House Resolution # 65. Instead, it was well considered and thoroughly evaluated by Virginia legal counsel and announced in this fashion. Perhaps it is more prudent to recognize both the ADA and ABDS as authorities, as there are inherent flaws that have yet to be proven rectified in the ADA's Specialty Recognition.

Having said all of the above, I also understand the voiced concerns of patient safety and the risk of dentists misleading their patients. However, it appears that many dentists are advertising as cosmetic dentists, sleep dentists, sedation dentists without much concern. However, when someone whom the State has recognized as having true advanced training required to obtain a general anesthesia permit attempts to promote their services, it is "unethical and illegal." In addition, barring the public from knowing what advanced training someone has, can actually be detrimental to patient safety. Why should patients not know that they have access to dentists anesthesiologists? Why should patients have to settle for a dentist that went to a weekend sedation or anesthesia course? Why does the public not know about anesthesia providers in dentistry? Basically, it is because of these antiquated regulations. A great example of how this protectionist mindset can backfire is the recent media storm involving Dr. Goyal in AZ, whom was able to falsify anesthesia credentials. One of the reasons this is was able to occur was because there is not official recognition by the ADA and their state components of the CODA accredited anesthesia training programs as anything more than general dental training – much like a CE course a dentist may purchase and attend.

I hope that this letter may help elucidate the complexities that surround this issue. In full disclosure of the above, I am a dentist anesthesiologist by training. I have 5 years of post-graduate training in hospitals at CODA accredited and GME accredited residencies. However, I am a general dentist with the requisite training for a State recognized anesthesia permit. My own society's parameters of care restrict us from practicing dentistry while providing deep sedation or general anesthesia, therefore I must limit my practice to anesthesia, yet I am required to say I am a general dentist and not an anesthesiologist.

Thank you,

Commenter: Jonathan L Wong, Coastal Pediatric Dental & Anesthesia

A common theme among dissenters

After thoroughly reading the dissenters' opinions, there seems to be a theme. All of them seem to
sugget that advanced CODA accredited training should give specialty recognition.

Why is it then that graduates of CODA accredited residencies in Orofacial Pain, Oral Medicine, and Anesthesia are forced off the ADA list of 9 exclusive specialties? These graduates face the exact burden that was discussed by Dr Richardson as being unfair.

The problem with the proposed text is the legal argument of what would constitute an unsubstantiated claim? Does this need to be defined further? This is part of what the American Board of Dental Specialties (ABDS) has done, mostly because CODA accredited graduates were being excluded from what is being argued as the definition of a specialist.

The one exception to this might be Implant Dentistry, which from my understanding has fellowship programs, however they are not CODA accredited. However, the ABDS states, "Certifying boards seeking Dental Specialty must require a minimum of two (2) full-time, formal, advanced educational programs that are a minimum of two (2) years in duration and are presented by recognized educational institutions: Any alternate pathway must demonstrate it is equivalent with didactic, clinical, and completed cases to their two-year post-graduate training program."

Strongly opposed to the proposed Specialty Advertising proposal.

It is truly disheartening to see such proposed action being discussed. in the interest of the patient population of Virginia, I oppose the proposed change. It is misleading and dangerous to the public for a practitioner to advertise as specialist in any area without the necessary formal training. Residency programs that are CODA accredited provide the necessary Knowledge, Skills AND attitudes that constitute a specialist!

In case that this proposed change goes through, I am concerned that the Virginia Dental Board will face significant increase in patient complaints and possible malpractice lawsuits that will undermine the public's trust to Doctors of our state.

As a young father, I am considering a scenario where my child would need specialty care. It is my right to truly know if the Doctor has gone through rigorous accredited training prior to claiming he is a specialist! I am sure you feel the same. I urge you to oppose the proposed change on Specialty advertising.

Commenter: Dr. Robert A. Strauss  
8/13/18 4:50 pm

Opposed

I stand opposed to this amendment. Specialty recognition requires that the specialty be UNIQUE and taught at a higher level. This amendment would allow self-appointed "specialties" which are neither unique (dental implants, currently performed well by multiple different groups and therefore, by definition, not unique) nor regulated (based on the ABDS rules one could be a specialist just based on CE only with no formal training). This loose set of definitions would lead to every practitioner self-describing themselves as specialists. It would seem to me that this would not be in the interest of protecting the public, the primary purpose of the Board.

As to CODA recognition for non-specialties (such as anesthesia and oral medicine) it should be recognized that ANY group can request CODA recognition, they do not have to be a specialty. Just because a group has requested and paid CODA for recognition, that does not indicate that that group is a specialty (as it has not met the criteria of uniqueness and advanced level of training). ADA specialties are so designated because they have proven that their area of practice is NOT performed by other practitioners (eg maxillofacial surgery, advanced peri, public health, etc) and is taught in a structured advanced training program.

Thanks for your attention and all you do for our profession.

Opposed

Thank you for the opportunity to voice my opinion.

It appears to me that the Amendment to Restriction on Advertising Dental Specialties would introduce the risk to de-quantify the effort spent in order to become a specialist. It is likely that the amount of sacrifice - including time, effort, expenses, declined opportunities - currently paid by a resident in one of the recognized specialties is in danger to dissipate as soon as one can call themselves a specialist after attending a less regulated program. The gain in knowledge and skills over a number of years, that currently characterizes a formal specialty training program cannot be matched by expedited training, regardless of the granting agency. For the best interest of the public, please reject the Amendment to Restriction on Advertising Dental Specialties.

Commenter: Lloyd Vakay  
Dental Specialists  

I believe it is wrong to mislead the public on the professional credentials of non-certified dentists by allowing them to hold themselves out as specialists.

Commenter: Christabel Sweeney DDS  
Oppose this change  

Commenter: Pandora Wojnarowsky  
Strongly oppose  
I strongly oppose this change.

Commenter: Jason Margolis  
Strongly opposed  
Strongly opposed to this amendment. To pass this amendment will allow non-specialists to pose as an individual which would be misconstrued for someone with advanced formal training. We as healthcare providers took an oath to "do no harm". This amendment allows those individuals seeking to advertise themselves as something they are not, which in turn would undoubtedly lead to doing harm to the public.

This amendment will only allow less regulation, devolve our credibility as a healthcare profession and increase the risk to the general public. As a whole, our profession is upstanding and work together to maintain the highest standard of care toward our patients as a team approach, working side-by-side with the general dentists and their respective specialists.

The few individuals whom want to mislead the general public by advertising a specific skill by which they are not formally trained is deceitful, immoral and unethical. I challenge those individuals to consider re-entering the formal educational process of an ADA CODA-accredited specialty to
obtain the rigorous formal training and better their knowledge and skill to provide the highest standard of care as opposed to modifying this amendment to a play on words.

Thank you for your consideration in maintaining the integrity of our dental healthcare standards for the general public's safety.

Commenter: Mariano Polack

Strongly opposed

It is a disservice to the public and the profession to allow dentists that have not attended an ADA accredited specialty program to advertise as specialists. Would anyone choose to have their kidney removed by a physician who is not a surgeon, but advertise as a specialist in surgery? How is this protecting the public?

All dentists should be allowed to perform all procedures they are legally allowed and trained to do, but not to advertise as something they are not. Depending on the specialty program, 400 hours of training at an accredited institution are covered in just the first couple of months. Equating 400 hours of training to 3, 4 or more years of full time residency training diminishes the profession and confuses the public.

Commenter: Gavin Aaron DDS, MS

Strongly opposed

As a lifelong Virginian who lives and practices in Roanoke, I am surprised and taken aback by this outlandish amendment. I can't believe the proposed amendment has made it this far. What ever happened to common sense? If a law/rule change makes things less safe for the public, common sense would tell you that's bad, right?

So now Virginia is willing to change the law to make dental care potentially more dangerous to the public because a lobbying group paid enough money? Is that what this is really about? Because I don't see how any argument to allow non-ADA trained dental specialists to promote themselves as such would stand on its merits alone. Is that what this is really about? By allowing this amendment to pass, the Virginia legislature is basically saying to the dentists that relatively new fringe organizations have as much clout as the ADA, as long as the price is right. The ADA, the American Dental Association, has guided the educational standards for dentists and dental specialists since the beginning.

What's next? A mail security organization getting the laws changed so security guards can patrol our neighborhoods in cop cars?

The higher-ups may think these changes in dentistry may not make an impact, but dental specialists - as well as general dentists - see the aftermath of inadequately trained dentists performing advanced dental procedures all the time. And while not life-threatening, the poor outcomes can literally change an individual's appearance, oral function, and self-esteem for the rest of his/her life. Not to mention the physical pain and financial impact.

What gives me pride as a resident of this state is the conservative governing principles and resistance to potentially dangerous changes in state law. I realize that my comments may come across as unprofessional, but I don't know how else to convey my passion against this completely unacceptable amendment.
Commenter: John Unger, VCU School of Dentistry

Strongly Opposed

I am strongly opposed to the proposed amendment as I believe it would mislead and confuse patients. The current guidelines provide patients with the assurance that the specialist they would see is educated and trained in the specialty and has completed a rigorous course of study that is subject to periodic reviewed by the Council on Dental Accreditation. We owe our patients nothing less.

Commenter: Herb Hughes DDS

Protect the public and oppose the amendment

I strongly oppose the amendment to restriction on advertising dental specialties for the simple reason is that it puts the general public at risk. It is our duty to create and maintain rules and regulations that have the philosophy of “Do No Harm”. Throughout my 32 year career, I’ve seen numerous cases where non-specialists have attempted to treat patients with clear aligners only to find out after the fact that it was improperly diagnosed and treated. I recently had an orthodontic transfer case from Houston where a general dentist spent over 3 years and 13 refinements in an attempt to correct an anterior crossbite only to find out she had failed to make the proper diagnosis and as a result, the patient is in the process of having orthognathic surgery in order to establish a normal bite relationship. Protect the public and oppose the amendment.

Commenter: Scott Berman

R u kidding me?? Why would u want to mislead the citizens more than current advertising does? WTHeck

Commenter: Nitika Mittal DDS MSD

Opposed

This eliminates the need for specialists across the state. It would destroy the careers of thousands of individuals, causing them to become bankrupt, leave the state of Virginia, and thus would reduce access to care. Specialists are there for a reason. They have gone through extra training. Have paid for it. Have taken board exams to qualify to call themselves specialists. It's not a title which is self-appointed, you're reducing the specialty practice to a dog and pony show.

Commenter: Elizabeth Jones

Strongly opposed

Strongly opposed. This will lead to patient/consumer misunderstanding and confusion in making informed decisions and consent.

Commenter: Brandon Johnson DMS MS  
Strongly Oppose

It's in the public's best interest to create honest, transparent demarcation between dental health professionals regarding training/certification. The public has no other easily accessible resource to differentiate between providers and it could cause confusion and mistrust between patient and provider.

Commenter: Thomas Waldrop, Professor, Director Graduate Periodontics, VCU  
Amendment to restriction on advertising dental specialties

I strongly oppose this action as it is mis leading to the public and and insult to those that have trained in those specialties recognized by the ADA and specialty boards and to patients that seek out the expertise of specialists for a specified treatment. In medicine and dentistry physicians and
dentist seek out specialty training to become experts in a specific field and patients seek out those specialties knowing they are getting highly trained experts in a specific modality. I would ask those who are in favor of this amendment "would you go to a physician who took a weekend course on heart surgery do your bypass procedure?" I would think not. If we as dentists go down this road to dilute the word specialist as it was meant to mean in dentistry and medicine we are doing a great disservice to the public. As health care providers our primary mission is to serve the public and provide the highest level of care. Having been in education for over 35 years and trained over a hundred residents and given multiple surgical CE to general dentist I can ensure you that the level of training differs. Hence, the care provided to the public differs. I would not be opposed to someone doing a specific procedure if they have had good CE but I do oppose someone calling themselves a specialist unless they have had advanced training in an ADA accredited program. The ADA has established the The ADA Commission on Specialty Recognition and I would suggest Virginia consider the results from this governing body to see what it decides. I would hope Virginia has the ethical and moral fortitude to make the right decision on this proposed legislation and not make the change to Specialist Advertising in Virginia. Thank you for the opportunity to comment on this proposal.

Commenter: David Lee DDS MS

Commenter: Dr. Scott Frey
Avoid inviting fraud

While there is a need to reform the current law to recognize focused training in areas outside the 9 already established dental specialties, the board must enact the reforms in a way that avoids inviting fraudulent behavior and undermining informed patient consent. Where recognized specialties already exist, it is important to the public interest whether or not their doctor is a recognized or board certified specialist in those areas. Removing that requirement would be very unwise. In areas of dentistry that do not overlap or conflict with the currently recognized specialties where dentists might seem focused training the board must outline standards for required training in these new areas in order to continue to promote a high level of patient care. It is important that "specialization" mean something to the public both for the existing specialties and

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
for new areas that VA may decide to allow in the future.

This is NOT in the best interest of the safety and well are of the public. Specialists have highly regulated certification requirements and the line between specialists and generalists should not be blurred.

Commenter: Craig E. Vigliante M.D., D.M.D.  
8/16/18 10:18 pm

What are we doing???

Forgive me but I really do not see the logic in this at all. I can't even believe this is even coming to a vote. I am genuinely not opposed to general dentists performing procedures that they are adequately trained to do. There are many well trained dentists placing implants, performing Invisalign, taking out teeth, performing root canal therapy, etc. However, they are not held to the same standards as Specialists or Board Certified Specialists. That's why we have specialists. Specialists have their craft day in and day out consistently achieving the highest standards of care for their patients. This is why patients seek out specialists. It is also the reason why general dentists seek out specialists. This amendment would be a complete disservice to the all of the specialists in Dentistry and the patients they serve. There is a reason specialists go on for further training of 2 - 6 years after dental school. Dentistry is not easy. Being a specialist is not easy. In fact, practicing Dentistry and Medicine today is more costly and more difficult on many fronts than it was many years ago. Today we have technology on our side in our offices, but look at how the Internet and the regulations can make things very costly and very complicated. Those who seek a specialist in a specific field do so to receive a consistently high standard of care. Stripping the public of this knowledge is wrong. Medicine has specialists for a reason and so do we. I hope we all can use some common sense here....

Commenter: Albert Parulis, DMD  
8/16/18 10:31 pm

Strongly opposed

The unethical practice of advertising specialty level care as a non-board certified/eligible specialist is a true disservice to the patient population that deserves the board's responsibility as their number one priority, which is to protect the patient. Fortunately, the vast majority of dental professionals practice safely, and defer care to those better suited for their patients' care to experienced, educated specialists when appropriate. As a board certified OMFS, there are numerous occasions when I refer patients to ENT, Plastic and Reconstructive Surgery, other dental specialists, etc., if it is in the patient's best interest. I implore you to not weaken the dental profession by encouraging unethical advertising, it will only hurt the profession. Thank you.

Oppose

oppose.

Commenter: Matt Joosse

8/17/18 8:41 am

Strongly Oppose

I am writing in opposition of the proposed change to advertising as a dental specialist.

I practiced general dentistry for 5 years, including AEGD training, and I loved general dentistry. As a general dentist, I knew the limits of my abilities when it came to different specialty areas and I referred accordingly. After my specialty training, I realized how little I actually knew about orthodontics. When I was a practicing general dentist, I had some training in orthodontics and practical limited orthodontics. Any specialist will tell you that specialty training enhanced their knowledge and performance of that specialty (that they are better at whatever it is because of their specialty training). This isn’t to say that all specialist work is always superior to those of generalists, but there needs to be a clear distinction, for the public, between who is specialty trained and who is not.

You would be very disappointed to learn that your primary care doctor is about to perform open heart surgery on your family member...similarly, the public should be clear on who has the knowledge, skill set, and ability to perform work at the highest quality of dental professions.

Thank you for your consideration,

Matt Joosse, DMD, MSEd, MSD

Are we going to ignore that this is likely to result in very poor and irresponsible (not to mention in some cases, unethical) patient care? The Board is supposed to help protect patients and also protect healthcare providers from ourselves (and financial temptation). There's already enough compromised/poor care happening already and you're advocating even more. Patients don't know any better. We should.

Commenter: Erika Sachno

Strongly Oppose

Strongly Opposed to this change.

Commenter: Dawn Crandall, DDS

Strongly Oppose Advertising Changes

As a pediatric dentist I strongly oppose any changes to the current advertising legislation in the VA Board of Dentistry. I do not feel the General public is not educated enough to understand the difference of a general dentist saying they do specialty dentistry services. I feel that it would be detrimental to the health and well-being of many children if this change in amendments occurred.

Commenter: David Burns

Inaccurate promotion of specialty status is deceiving and harmful to the public

Allowing dentists to promote themselves as having specialty training when they have not completed rigorous, multiyear, full-time didactic and clinical training in that specialty area will deceive the public and could prove harmful to public safety. The Board must protect the public and a decision to allow dentists to promote specialty recognition without adequate specialty training will jeopardize public safety.

Commenter: Zach Casagrande

Oppose this action for obvious reasons

2 questions:
1. Would you want a family physician surgically removing your appendix? Or would you want a surgeon?
2. Would you unknowingly want a family physician removing your appendix whom you thought was a surgeon?

I say surgeon to #1 and known surgeon to #2
Commenter: Jonathan Wong, DMD; Coastal Pediatric Dental & Anesthesia

Interesting Perspectives

As one can see this is quite possibly the most participation we have seen from Virginia Dentists in a Town Hall. This is a very unpopular proposal, and organized dentistry has been very powerful in encouraging participation.

Here are two additional facts:

1) There is only one CODA residency that must be completed in nearly all states in order to legally practice deep sedation and general anesthesia (again aside from the OMFS exemption). You simply cannot legally deliver this type of care without completing this specialized training, which consists of 3 years of anesthesia training. This training does not include any "dental surgery procedures" but instead focuses on anesthesia and sedation for both medical and dental procedures. It met all standards for specialty recognition except for a vote by the House of Delegates. This process has always been biased, and receives a response much like this Notice has. Those that are trying to make comparisons to medicine need only Google the differing opinions of the American Medical Association and the American Board of Medical Specialties to see the flaws in their argument and the conflict of interest that would be present if the AMA was the sole determinant of medical specialty education and specialty recognition. There is a reason the AMA and ABMS are co-members in an Independent Accreditation Council of Graduate Medical Education, because it helps separate the conflict of interest and lays out the standards for education and specialty (and subspecialty) recognition.  
https://www.boardcertifieddocs.com/pdf/Resources_BCDInformation.pdf & 
https://www.abms.org/media/120037/wed_2_briehm_addressingevolving.pdf

2) There have been many arguments discussing medical specialists voiced by others in the Town Hall. Let me also present this fact: Arguments regarding misleading advertising as cardiologists or other subspecialties does not carry weight. For example the cardiologist. Cardiologists are not specialists, they are subspecialists under the specialty of internal medicine. Now no one would say that a cardiologist should not advertise his advanced training to the public as a cardiologist. But the current regulation if applied to cardiology, would state that the cardiologist would have to disclose to everyone that they are a cardiologist by training, but that their actual specialty is internal medicine. How many people would have much faith in that cardiologist then? For more details about these designations in medicine please see:  

The political nature of these processes and decisions have caused us to be in this current dilemma. I only ask that the Board recognize the flaws in the current system and the fact that most of the concerns being voiced are not based on facts. My position is obviously not popular, but the need for change is, in my opinion, based on facts.

I completely agree that specialists deserve specialty recognition. I agree that general dentists should not be allowed to advertise as specialists by merely taking a CE course. However, the current regulations don't seem to be stopping this anyway, but it is preventing those that have completed said "residency training" from ethically advertising what they do because the ADA House of Delegates chose not to vote to approve other CODA accredited residency programs as specialists.

Hello, According to CODA guidelines there are dental specialties that have been established. They go through strict accreditation criteria which involves a certain number of faculty, didactic time, clinical time and a robust curriculum which takes an individual 24-36 months of full time commitment. This is 4000-6000 hrs of supervised education by multiple faculty. This is what makes them a specialist. Any other 'course' that does not meet these standards cannot be a 'specialist' course. Would you like your baby delivered by a doctor who went for a 100 hr weekend course? Would you like your angiography done by a doctor who has attended remote learning courses? It is ludicrous to consider taking the definition of specialist out.

Must think about the least ethical in our profession.

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
As you know, there are a wide range of ethics in our profession. It is the least ethical member (and corporations) that will take advantage of any confusion about who is actually a specialist and who has never actually completed an orthodontic case. Parents want the best for their children and the expense of orthodontics will probably be the single largest individual expense they will incur while raising that child. Make sure that they have some way to make an informed decision about who is best qualified to treat their child. The profession of dentistry feels that it is important that becoming an orthodontic specialist requires at least 2 years of intensive additional training AFTER dental school. Don't you think that the public should be aware that this is the feeling of the vast majority of dental professionals across the country? Make sure that holding a Virginia dental license does not become a license to mislead parents about who is qualified to care for the most valuable thing in their life. Give them some way to differentiate between a ADA approved specialist and a dentist who has decided to start doing orthodontics with possibly little or no training. Protect the public against the least ethical among our profession.

Informed consent is one of the most important steps in initiating treatment with a patient. It involves an honest, clear, and documented discussion between clinician and patient. It is both an ethical and a legal matter that can protect the patient from making a decision on a matter in which they are unfamiliar or uneducated. What message are we sending the public when we allow dentists to advertise as a specialist without disclosing that they are not a specialist, but instead a general dentist that has limited their practice to a specialty? This is at its best misleading, and at its worst dangerous to the public. If we are required to inform the patients about their procedures to protect them, then shouldn’t we also be ensuring that they are not misled in advertising?

Commenter: Andrew Glassick

Strongly oppose

I strongly oppose this proposed regulatory action as I share the sentiments of most of the previous responders. One of the main roles of the Dental Board is to help protect the citizens of Virginia and this proposal will obviously not aid in the protection of our patients.

Commenter: Steven J Lindauer, VCU School of Dentistry

Strongly Opposed

Given that the ADA has recently appointed a commission to decide how to designate new specialties in dentistry, I believe it would be appropriate for the Virginia Board of Dentistry to hold off on making changes to its policies regarding advertising for dental specialists until the ADA finishes its study. The current Virginia regulation requires that those who advertise as “specialists” must have successfully completed a post-doctoral advanced dental educational program of at least two full-time years in a program accredited by the Commission on Dental Accreditation (CODA). This is a logical way to define a specialist and facilitates effective communication with the public. The public is best protected when they know more about a practitioner’s qualifications than when they are intentionally not informed.

Strongly opposed to the proposed specialty advertisement regulation

Dear Board Members,

I am writing to voice my strong opinion against the proposed regulation [18 VAC 60-21] that will remove restrictions on specialty advertising. The current Virginia regulation requires that those who advertise as "specialists" must have successfully completed a post-doctoral advanced dental education program of at least two full-time years in a program accredited by the Commission on Dental Accreditation (CODA). A CODA accreditation standard assures Virginia citizens that an individual who truthfully holds himself or herself out as a specialist has met high standards for education and training. The public is best protected when they know their practitioner's qualifications. With the removal of the specialty advertising, Virginia citizens will not be able to make the best decision about their health care as it will obscure important distinctions between dental professionals as far as their respective educational and training backgrounds. The mission of the Virginia Dental Board is to protect the public, and therefore, I am strongly opposed to the removal of the specialty advertising rule.

Commenter: Maduaka E Ekoh

The death of truth in dentistry

THE DEATH OF ORTHODONTIC TRUTH AND THE GUARDIAN DISCOMBOBULATION.

I once challenged a colleague of a different specialty of his intentions regarding an advertisement soliciting people to come to his office to learn how to practice his specialty. My criticism was on the fact that societal greed has clouded his professional etiquette as there are many qualified people already practicing the art and many more in the pipeline in so many schools.

The concept is not new and has been the bane of human existence, at our core we have cherished values and on our periphery, we have reserved emotions. The posterity of any society both in micro and macro forms lies on how these two are balanced. The problem sometimes is what I call the intellectual quagmire, this is where a few abandon the truth of the core values in other to embrace the emotions of the periphery. We can change our emotions with different stimuli, but we cannot change our core values without first changing who we are.

The specialty of orthodontics is at such a time where a few intellectuals are determined to affirm the emotional periphery to the detriment of the truth in our specialty. Truth by definition is exclusive and absolute, and such must be logically consistent, empirically adequate and have experiential relevance. It must correspond and cohere to reality.

When applied to our specialty as was intended one can easily see how perfect a fit it is but when applied to the sporadic sprouting of different treatment quackery like monthly smiles, weekly seminars, fast treatment, plastics for all, at home treatment, colleagues teaching in-office courses and many more it breaks down and dies the death of a thousand qualifications. While all these may have value in themselves at best they constitute the emotional periphery and cannot replace.

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
the truth of our profession.

It is quite embarrassing that the "praetorian guards" acted like the rider of a lion who was chasing her prey without regard and upon finally having consumed all the prey's the lion turned his gaze on the rider. All of our intellect never led us to protect the truth as we all have killed it, are we now moving forward and backward and in all directions. Are we not now waking up from a self-inflicted demise? Are we not straying to infinite nothing as we ride the lion that is killing all of our own?

Can we now smell of the stench from the mess that we have caused? Orthodontic truth is dead and we all are guilty? Are we not in a professional quandary?

How shall we now comfort ourselves and the generation after us? The light which our fathers placed in our palme has fallen, who will wipe away the tears? Which association and board certification do we need to create to deliver us? Is this not too great for us to cope with as we jostle for relevance in the cacophony of our mental gymnastics. There has never been a greater effect in our profession; and whoever is coming after us for the sake of this effect will look back in disdain. He will question his knowledge, wisdom and himself. The institution that created him, now sepulchers of the truth in the past. Orthodontic truth is dead and we are all guilty.

Very Strongly Opposed

This proposed change will simply embolden those who already push the envelope as to what is considered ethical advertising, etc. Unless the Board would like to take on many more complaints and cases to work on they should not make this amendment. This is not rational by any consideration.

Commenter: William Dabney

strongly against this change

what are you thinking? we need to protect the public from inaccurate statements

Commenter: Paul White, White Orthodontics

Strongly Opposed

In order to preserve the health and safety of the public, I am strongly opposed to the current Notice of Intended Regulatory Action (NOIRA) to amend Virginia's specialty advertising regulations.

Commenter: Frank Iuorno

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
Vehemently Opposed

Unfortunately, fear of litigation is driving the Board’s decision to quickly change this law, and when fear acts as an impetus for change, the results are rarely positive. In light of this, the ADA is taking steps to re-evaluate it’s specialty recognition and credentialing processes inclusive of the American Board of Dental Specialties. Please allow the ADA along with the ABDS to come up with guidelines that protect all patients and include all those specialties worthy of this recognition. A knee-jerk reaction to the threat of litigation will endanger the public, increase patient complication rates and result in more work for this Board in the future.

Commenter: Dr. Chen

Strongly oppose

The proposed change will hugely harm public’s health. I agree with the comments sent by American Association of Orthodontics

Commenter: Alyssa G. Ricci

STRONGLY OPPOSED

As a current second year resident at VCU Orthodontics, I can tell you that we put in countless hours of work to become specialists in our field. I’ve known I wanted to be an orthodontist since I was a middle school teenager; therefore, I did research in the field of orthodontics during my undergraduate education and worked to learn as much as I could about orthodontics throughout my four years of dental school as well. However, I would never have felt ready to practice Orthodontics without attending a post-graduate Orthodontic residency program. I’ve been exposed to hundreds of patient cases, starting ~130 of my own cases and treating ~100 transfer cases. I’ve been taught by orthodontists who are experts in the field and have been practicing for many decades. There is a reason we are called specialists. We have worked tirelessly to become the best in our field so that we can serve our patients the way they deserve to be served. It would be a disservice to our community to go through with this regulation. It would be completely misleading and could lead to harm of patients who are putting their trust in their doctor.

Commenter: Carolyn Bradford

STRONGLY opposed

As a 2nd year resident in the VCU orthodontics graduate program, I can honestly say that this proposed legislation frightens me. I went to a very highly regarded dental school prior to residency, yet I received very limited orthodontic training over the course of my 4 years in dental school. I believe I put in courses on a patient once, and I had only a few, spare lectures. Prior to deciding that I wanted to pursue orthodontics as a career, I naively thought that I could take some weekend CE courses and maybe dabble in ortho as a general dentist. 14 months into my residency program, I can accurately appreciate how dangerous such dabbling can be. There is no possible way that a weekend or online course could prepare anybody to thoroughly diagnose, treatment plan, and treat patients to the same high degree as somebody who completed a multi-year training program.

My opposition is not so much a ”protection of the specialty” as it is an impassioned plea for protection of the patients & patients’ right to make informed decisions. We cannot possibly expect the general public to understand or appreciate the nuances of a dental education

http://townhall.virginia.gov/L/ViewComments.cfm?stagedid=8235
that is then followed by additional training in a specialty field. Thus, it is the duty of the state dental boards to translate these facts into information and terminology that patients can understand. Preventing a specialist's ability to use clear & accurate language to convey their qualifications directly violates the pledge that we all take as doctors — the pledge to do no harm.

Strongly opposed

I am strongly opposed to this change. It is not logical, and does not further the purpose of protecting the public. I agree with all the comments submitted in opposition to this change by my fellow colleagues, many of whom are specialists and respected educators in specialty programs. I also agree with formal statements submitted by specialty organizations such as the American Association of Orthodontists. It makes sense that specialists would be the most likely to comment on this change, but is my hope that members of the general public comment as well, or are solicited for input beyond this comment section if few respond. I doubt that many members of the public would think it appropriate that the dental organization designed to protect them supports the ability to advertise as a dental specialist without being a dental specialist. Go survey 100 on the streets of downtown Richmond, and ask them this question: "If you picked an oral surgeon for an emergency, how would you feel if you later found out that the doctor was not actually an oral surgeon as they advertised?" See what answers you are given, and make your decision based upon those answers.

Strongly Opposed

Dear Virginia Citizens and Lawmakers,

First, as a currently recognized dental specialist, I realize that am speaking with some bias in my opinions. Initially, I read this proposed change to be a threat to the public's ability to distinguish my dental practice from others in that I have attended a recognized Commission on Dental Accreditation approved dental residency program in orthodontics, and would like the public to be able to distinguish this clearly and easily. However, after reading the intent behind this proposed change, in the "Alternatives" section of the NOIRA, I now understand this to be a desire for dentists with significant training in currently "un-recognized" areas of specialization, such as Implantology, to be able to have the same recognition and ability to advertise, as those of us in the recognized specialties. The American Dental Association has recently responded to this concern with the formation of a commission to oversee the decision making process for recognizing dental specialties. This will no-doubt become a political debate involving turf wars over which procedures belong to which specialties, fueled no-doubt by economic as well as academic motivations. As, I am sure several currently recognized dental specialties will lay claim to the implant placement procedures as part of their residency training. Therefore, in the interest of making the best decision for the general public in the long-run, I strongly oppose this "fast-tracked" legislation in order to allow the process to be properly vetted through the ADA's newly formed commission, as this is NOT a legislation change that will substantively improve the Virginia public's ability to access dental health.

Commenter: Paul H. Patterson, DDS, MS
8/22/18 1:50 pm

Opposition

It is obvious that the preponderance of responses in opposition to the proposed change in
specially advertising is rooted in members of the orthodontic community. So it would not be much of a stretch to infer that they are self-serving in this vociferous opposition. On the contrary, this proposed change is one of the most absurd proposals that the Board has had the opportunity to consider in recent memory. One step forward...ten steps back....back to the days of tooth drawers, snake oil and absolute deregulation. If approved, it would be a irreversible blot on the profession of dentistry and its attendant ethical standards.

8/23/18 10:36 am
Specialist are.....?
I strongly disagree with the proposed advertising changes which would allow any doctor to indicate that they were a specialist without having the commererate training and education that would pertain to that degree or certificate. It would definitely confuse the public who could be duped by wording or ommission of factual Specialists as you know undergo years of additional training and education. A weekend course or merely completing a dental program does not make one a “specialist.” Under this logic a physician would be able to perform heart surgery without any additional training or education! Absurd! Would a general dentist be allowed to do a Lefort Orthoganthic Surgical procedure? Why would our state board allow such? It makes no logical sense and discounts or eliminates the need for proper training under certifed institutions. Please vote down this ridiculous proposal.

Commenter: Nikoloy Molov, DDS, MS
8/23/18 2:05 pm
Strongly Opposed
There are several important traits that distinguish a specialist - namely, the ability to properly diagnose and treat any sort of cases as well as deal with complications and be able to inform the patients of what is a reasonable/ realistic outcomes. Allowing anyone to promote him/herself as a specialist would put the general population at risk for treatment that is simply not presented or done as thoroughly or accurately as a specialist can. Sure some cases would turn out ok, but there will be many that won't and only a specialist be able to determine why and how to correct the unexpected outcomes. Specialties are there for a reason and it's to provide the highest possible care for the general public. This is our job as doctors and we need to protect that privilege.

Commenter: Dan W. Lee DDS
8/23/18 2:37 pm
Strongly Oppose!!!
The previous rules on advertising has kept many deceptive dentists from flooding the public with

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
misinformation and thinly veiled bait-and-switch tactics. If you remove this existing protection, you are opening a Pandora's box that will strongly erode the public's already weakened trust in dental professionals. Please consider the motive of whoever is suggesting such nonsense. Does it come from a place of improving the quality of care for the public? Or is it another way to whiten their pocket books? If the board sincerely considers the well being of the public, I believe you all will quickly shoot this down.

Very strongly opposed

This change in regulation is tremendously damaging to the health of our nation. Are you going to allow any MD who graduated from medical school and just WATCHED one or two heart surgeries to perform one such surgery on your mother? Or will you look for the most specialized and experienced heart surgeon you can find in the world for your dear one needing such surgery? And how are you to find him or her if there would be no difference between how the specialist and non specialist can advertise? Basically this change would allow lying to the public plain and simple. Legalizing a lie is not the direction our country should go. It's doesn't help anyone. The health of our mouth mirrors the health of our entire bodies. There is tremendous evidence of the relationship between the health of our mouth and general diseases such as diabetes, cardiovascular disease, etc. Why would we then allow non-specialists to hurt the most precious gift we have - our general health?

Commenter: David Jones
8/24/18 6:57 am
Obviously Oppose

This is the most hilarious and idiotic proposal I've ever heard. What's the point in having specialty residencies if this passes? This would not only hurt the professionals who have spent endless amounts of time and money becoming experts in their specialty, but this will also hurt the general public with false advertising and misleading information. If this passes, I look forward to the onslaught of lawsuits and complaints the board will have to deal with.

Commenter: Danielle Robb, DDS
8/24/18 9:49 am
Very Strongly Oppose

I am in disbelief that there are people who believe that the changes that have been suggested to specialty advertising feel that this in any way further or improves the quality of standard of care for Virginia patients. People we see on a daily basis are already misled and confused by the division and meaning of dental specialties. Further dilution of the term "specialty" in our advertising is harmful, and if passed there WILL be cases where the public's lack of knowledge about our educational processes and experience will be taken advantage of, risking injury as a result.

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
Commenter: Karen S McAndrew

Strongly oppose

The proposal to amend specialty recognition in the dental profession strongly concerns me. As a Prosthodontist, I can attest to the countless hours of specialty training, extensive review of the literature, and daily interaction with complex patient needs. As a specialist, prosthodontists are trained to treat extensive trauma and syndromic patients, treat those prosthetically who have undergone cancer treatment, and prosthetically rehabilitate oral conditions. Allowing those to advertise as a specialist, without sanctioned specialty training, to rehabilitate complex oral conditions and without certified training in these areas, is not only misleading to the public but a serious danger to the well being of patient care.

A CODA approved and sanctioned specialty program has undergone rigorous criteria to meet and uphold the training and standards within each of the specialty programs. This certification upholds the necessary training and certification of care received by the public. Patients deserve and expect care to be provided by specifically trained individuals having gone through specialty training programs for their unique challenging oral needs - especially if they advertise as such. They rely on dentistry and Virginia regulations to uphold these standards for their safety and care and not to be misled as to the training and certification each practitioner holds. Virginia has a wonderful array of dental practitioners who provide much needed services to the general patient population. Unique oral care situations present with challenges treated by those specifically trained through CODA approved specialty programs. It is a supplement to oral health care, not a competition of services.

The ADA established The ADA Commission on Specialty Recognition to specifically address these issues of oral health care delivery. Let's allow this commission to complete their job regarding Specialty Training Programs and evaluate their position, without conflict of interest, on the position of recognition of specialties in dentistry. The care of the public depends on us to provide them this information on specialty care.

Commenter: Dr. Tierney Winberg

VERY STRONGLY OPPOSED

As an endodontist, I completed three years of post graduate training after dental school in order to refer to myself as "specialist" in doing root canal treatment. Endodontists have significantly more training, experience, and ability to handle and prevent complications than any weekend course or unsupervised clinical experience can provide.

Commenter: Dr. Mark Vegnelli

STRONGLY OPPOSE

I understand that primarily this extends to General Dentists wanting to advertise that they are somehow specialized in placing implants. While I concur with the other comments that this skill should require a full residency type education in order to be proficient, my worry also extends to other dental specialty training. As an Endodontist, I see mostly very difficult root canal cases and surgeries that a General Dentist would not and should not attempt. Giving any leeway in advertising to patients that although they are "experts" in a certain specialties without residency training is fraud at best.

Would this even be considered with medical doctors? Do you go to your family physician for a

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
colonoscopy? What if he / she took a weekend course a month ago and now advertised that they offered this procedure...would that instill trust or ensure proficiency?

Why Dentistry Needs an Implant Specialty

Why a new Dental Implant Specialty Is Needed.

Despite all the opposition expressed to this new specialty, there is nothing more needed in dentistry than this change. Much of this opposition is based on misinformation and deceit, and it is my intention to clarify as much of this as possible.

I have been licensed to practice dentistry in the Commonwealth since 1977. I graduated from MCV under the guidance of dean John DiBiaggio, one of the greatest educators in the world. Dean DiBiaggio was the individual who inspired me to want to become the best dentist I could be. I placed my first Implant in 1983. Today, 35 years later, my practice is dedicated completely to dental implant treatment. As a result of recent Federal Court decisions, if my practice was located in Texas, Florida, California, New Jersey, or Massachusetts, I would be permitted to market myself as a dental implant specialist. It was for this reason and because too many patients in Virginia have been mistreated and harmed, that the Virginia Board of Dentistry was petitioned to make a change to allow qualified doctors to call themselves dental implant specialists. All the comments that have been made in opposition to this measure were the same ones made in the other states where it is now legal for Diplomates of the American Board of Oral Implantology/Implant Dentistry to advertise themselves and specialists, and in the end the Imperial courts agreed that we are Implant Specialists, despite all the opposing rhetoric.

American Academy of Implant Dentistry

The AAID is the oldest dental implant organization in the United States, it was founded in 1951, it was organized to promote dental implant treatment and education, and is composed of Oral Surgeons, Periodontists, Prosthodontists, and General Dentists. The Academy is the sponsor of the ABOI and all the efforts to develop this new specialty and one of the founding organizations that established the American Board of Dental Specialties. This organization was founded to remove the bias and collusion of the ADA which has prevented any new dental specialties unless they were not in competition with the existing surgical specialties. The Academy has been the leader in comprehensive dental implant education and has made this education available to any doctor with a desire to learn. It’s certifications are based on valid and verifiable testing criterion, not a system of pay the money and get a certificate with no verifiable measure of the candidates knowledge and understanding. There are many other organizations promoting excellent implant education and provide certificate of participation that appear impressive, but lack any valid testing criterion of the doctors knowledge and understanding. I joined the AAID and have been a member since 1983. Over the many years of my involvement with the Academy there has been one unchanging goal, that has been seeing that dental implant treatment becomes a recognized dental specialty.

Over the last 30 years the Academy petitioned the American Dental Association, a biased trade organization, on two separate occasions, years apart, to accept and allow development of a dental implant specialty. These petitions were accepted and studied at the ADA, and the ADA’s own council on education recommended acceptance of the measures to the House of Delegates citing the public need for this specialty. Each time the petitions came up for a vote they were turned down by the members of the House of Delegates. Because the House of Delegates was
composed of a majority of surgeon specialists. It was believed that these voting members did not believe a new competing surgical specialty was in their best interest and that was why the measure was not accepted.

The Court Decisions

It was this very real and ongoing problem at the ADA, common within similar commercial trade groups, that led Diplomates of the American Board of Oral Implantology/Implant dentistry (www.aboi.org/) to sue the Boards of Dentistry in California, Florida, and Texas, in the Federal Courts. The dental boards of the states mentioned had threatened to revoke the licenses of the doctors in those states because they were accused of advertising themselves as dental implant specialists. In each of these states the same reasons for opposing this specialty were made and in all three decisions, the courts, found for the plaintiffs saying they were truthful in their declarations and that their certifications were based upon valid and Bona Fide testing criteria. They determined that the ADA’s restrictions and opposition to any new specialty applications was an unfair restriction of trade, and against the law. They ruled that that the doctors certified as Diplomates of the ABOI should not be restricted from declaring themselves as specialists just because the ADA, a biased trade organization, had not recognized Implant Dentistry as a specialty. This led to the formation of the American Board of Dental Specialties, an organization similar to those in medicine, where the bias of the AMA, another trade organization would not have influence. The American Board of Dental Specialties is composed of the American Board of Oral Implantology, the American Board of Oral Medicine, The American Board of Orofacial Pain, and The American Dental Board of Anesthesiology. See www.dentalspecialties.org/. The ABOI examination process is open to any qualified doctor desiring to take the examination. Diplomates of the ABOI include oral surgeons, periodontists, prosthodontists, and general dentists.

Winning in the Federal Courts was the only way to effect a change in ADA opposition policy. After the court decisions came down the Federal Trade Commission approached the ADA’s surgeon leadership. These individuals were taken to task for their collusion to prevent a competing surgical specialty in Implant Dentistry. They were told if they continued to oppose this new specialty they could be personally held accountable. A new specialty in Implant Dentistry has been sorely needed to better serve the public for many years. The leadership in the ADA house of Delegates had previously turned down two petitions by the American Academy of Implant Dentistry, (AAID) over the past 30 years to allow implant dentistry, the most complex and demanding practice in dentistry, to become a specialty. The specialty applications were turned back in the House of Delegates despite the ADA’s own councils recommending approval because there was clearly a need and benefit for the public. All three of the Federal Court cases found in favor of allowing certified, Diplomates of the American Board of Oral Implantology/Implant Dentistry to advertise themselves as specialists. This was only possible after the courts determined that the candidates receiving certification from the Board’s testing procedures were indeed valid and Bona Fide, and similar to the Board’s testing candidates in other specialties. Court cases in California, Florida, Texas, resulted with damages that awarded to the American Academy of Implant Dentistry in the amount of $15,000,000. Since then, other states have already adopted regulations similar to the one now prepared to be enacted in the Commonwealth. New Jersey, Massachusetts, Indians, and Ohio have changed their regulations to allow or not interfere with Diplomates advertising as Implant Specialists, or they are currently in the process of change now.

An Implant Specialty Would Establish a Standard of Care

A new specialty is not to say implants should not be placed by anyone except specialist, but without a specialty there is no Standard of Care, no rules.

I have seen existing ADA recognized specialists say they are surgical implant specialists, but before the recent changes in the ADA’s definition of ethical behavior, they were restricted to the surgical phase only. Today, as a result of the ABOI court decisions and FTC interventions at the ADA, recognized ADA surgical specialists are no longer considered unethical when they perform prosthetic procedures, even with little prosthetic training and experience. Likewise, ADA recognized prosthodontic specialists are not considered unethical when they perform implant or other surgical procedures. Implant dentistry is a prosthetic discipline with a surgical component,
the prosthetics determine the surgical component. Modern specialist training in the ADA recognized surgical residencies have only a small portion of their training devoted to dental implants and then only the surgical components, yet is that to be considered sufficient to be an implant specialist when implant dentistry is primarily a prosthetic discipline? Who is more qualified as the implant specialist, an ADA recognized specialist with limited experience in prosthetics or a GP with thousands of Implant specific CE hours and 35 years of clinical experience in all aspects of implant dentistry? Proper treatment planning, providing patients with all options of implant care, based upon the patient’s prognosis is sorely missing in the majority of implant treatment provided today. Today the vast majority of dental implant treatment plans are based upon what the patient thinks they want or what the doctor’s knowledge and ability can offer. In both of these situations the treatment plans offered are typically lacking needed decision-making information, patient education and understanding of what the future holds for them.

An Implant Specialty Would Improve Treatment Plans and Patient Prognosis

Personally, I have treated thousands of patients using all types of dental implant techniques, and materials. I have placed blade implants, superperiosteal implants, root form implants, buried implants and immediately loaded implants. I have performed sinus augmentation procedures, and treated the complications associated with these procedures when needed. I’ve performed mandibular nerve transpositions, to allow implant placement when required. I have recognized soft tissue complications associated with implant treatment and provided soft tissue grafting procedures to obtain the tissue required to maintain long term implant stability. I have recognized and treated occlusal load complications that left unrecognized and without preventive treatment would have led to eventual painless implant failure. For the last few years my practice has been devoted to implant treatment focusing on full mouth implant restorations, “All on 4” or more implant cases, and the long-term management of these cases. I have provided years of post-treatment maintenance of implant cases recognizing potential problems before they led to case failure and treated them accordingly to prevent failure. Many failing implant cases result because of prosthetic problems not surgical problems. I have a 35-year perspective looking back at implant patients and what happened after their implant treatment was completed. My perspective is very different today from what it was ten or fifteen years ago, this is only because I have seen what happens with patients after the implants and prosthetics have been placed and paid for. A specialty in implant dentistry would go a long way in helping inexperienced dentists placing implants avoid many of the problems they will face in the future. Without an understanding of what the future will bring to the patient and the treating doctor, a set of problems that will not benefit the doctor or patient. Not understanding the prognosis and explaining to the patient what will most likely be encountered, can set the doctor and patient up for costly future problems that could have been avoided with proper initial treatment planning and patient education. This is something that for the most part is not being considered by many doctors today placing dental implants. Understanding proper treatment planning and prognosis is the single most important factor with any dental implant treatment plan, it is something that would be elucidated with a dental implant specialty, and something missing in most of the treatment being provided today.

An Implant Specialty Will Better Serve Dentistry and The Public.

Suffice it to say I do not treat patients today the same way I did 35 years ago, I have made all the mistakes possible because I did not know what I did not understand then. I see patients today asking for second opinions or corrective treatment that are shocked when they learn what is required and the associated cost. Such problems are the result of little or no understanding of implant treatment and lack of patient education. Because of the problems associated with such treatment errors I have explained to patients that the doctors providing their previous treatment were doing the best they could at the time, but for many patients harmed by implant treatment gone wrong and determined to sue there is little anyone can do. These cases are not limited to general practitioners but from more often than not, ADA recognized specialists providing less than ideal treatment. Today I see patients come in for 2nd opinions who were treated by GP’s and specialists, who only have a rudimentary knowledge of implant dentistry. They have been taught by manufacturers reps and bone salesmen, who want to sell them products. Today bone grafting techniques are so overdone and promoted to inexperienced doctors “as required” by bone
salesmen when all these grafts do is add unnecessary cost to patients and slow down treatment time. I've seen cases where nothing but greed, was the motivating factor behind the treatment plan. A patient was treated by a surgeon who attempted to put as many implants in place as humanly possible, placed them so close together that failure was the only possible outcome. It was obvious that the surgeons fee was based on the maximum number of implants that could be placed. Implants that were placed in the maxillary plate that were so far out of position to make them unreasonable, but which still generated a surgeon's fee. Once the implants were placed the restorative doctor was told that he had a wonderful foundation to build anything the patient wanted as a prosthesis which was far from the truth.

I have another patient who was told by his general dentist that he needed a sinus graft for implant placement when in fact the proposed treatment could have been accomplished with no graft at all. His general dentist referred him to another general dentist who was supposed to be a dentist experienced with sinus augmentations. The patient went as recommended to this general dentist sinus expert, but who had no credentials at all, and had the procedure. The procedure failed, and the sinus opened up as it failed. The patient went back to the doctor who told him he would need a rescue procedure and the patient agreed, and paid again, only to have the mismanaged rescue procedure fail too. By the time I saw the patient most of the damage had been done. The lateral wall of the maxillary sinus was gone, leaving a huge defect with a patent opening into the patient's nose. Every time he drank something it went into his nose. I spoke with the doctor who performed these surgeries. He claimed to have done many of these surgeries without a problem and would take no responsibility for what went wrong with this patient. I tried to get him to settle with the patient out of court, but he refused, and now the case is going to the courts. All this because these doctors were unskilled in their treatment plans and diagnostic abilities.

I could go on with many more examples, but the fact of the matter is that recognized specialists and GPs are at fault equally. This problem is a result of no separate recognized dental implant specialty where standards of care could be developed that would give all doctors involved in implant treatment some guidelines. Today there are no guidelines, no standard of care that would be in the patient's and the profession's best interest. Today, implant dentistry is being damaged in the eyes of the public because of the internecine turf battles and the ADA's previous focus on what has been good for surgeons and damn the public welfare. Treatment planning is the most important aspect of any implant case, but often it turns out to be an afterthought. I've seen one implant placed into an arch of periodontally involved teeth destined for failure, where no prognosis for the patient's overall need in the future was even considered. Too often the public sees this lack of honesty as a stain on the profession, sometimes from a doctor's ignorance but more often out of greed. This affects all of us and our standing in the community and would be discussed and dealt with properly if there was an implant specialty established that could be depended upon for guidance.

Opposition to an Implant Specialty

I have read the comments of those opposing an implant specialty and most have a common thread, the lack of education, not CODA approved, a threat to the public, real specialists have years of residency training, lack of experience, and on and on. Adding a specialty will do nothing to limit the numbers of patients seeking care, or the opportunity for practitioners to provide it. But it will improve the nature of the treatment and magnify the benefits of implant treatment in the eyes of the public and profession. Today that's not the case, today implant treatment in general is developing a negative connotation, primarily because there is no specialty. Any new developing specialty needs growth and development, but it needs to be declared a specialty before that can happen. The problems with implant treatment as practiced in general today are hurting the public and the profession. I and many others have devoted their dental careers to fostering implant dentistry, I am confident that I have more complete dental implant experience than anyone commenting on this forum. Today my practice is devoted to implant treatment, and associated care based around dental implants. I consider myself a specialist in implant dentistry despite what anybody else thinks or believes. I provide all aspects of dental implant treatment, from diagnosis and treatment planning to long term follow up maintenance. I have 35 years of implant specific experience and a Credential from the ABOI that has been thoroughly examined, tested, and
upheld in the Federal Courts, against opposing state dental boards across the country. Doctors like myself had to turn to the courts when biased factions within organized dentistry determined they would not support such a move. They had their own reasons for their opposition, and the public interest and welfare was not one of them. The Virginia Board of Dentistry has the obligation to protect the public from harm and by permitting Certified doctors to advertise themselves accordingly will do exactly that.

Rodney S. Mayberry DDS
Diplomate, American Board of Oral Implantology/Implant Dentistry

Commenter: E Richard HUGHES
Amendment to specialty advertising

I agree with the amendment. Those that have been educated and trained to the standards and successfully challenge the examinations of the American Board of Dental Specialties certainly have proved their knowledge and skill. The ADA is a trade organization period

Commenter: Dr. Matthew Cline
Strongly Oppose

This ultimately comes down to patient safety and public perception of the profession of dentistry. As a practitioner who spent several years as a general dentist who then completed a specialty program, I have been on both sides of this argument and strongly oppose this idea. General dentists should be able to perform procedures that they feel comfortable doing and for which they have received adequate training and can deliver excellent results, but in no way should they be able to call themselves specialists. Completion of a few weekend courses is no substitute for a multi-year specialty training program. A specialist is someone who limits their practice to one specific field and that is all they do all day. They have devoted all of their time to one field. A general dentist who dabbles in a particular specialty does not have the volume and experience to deliver excellent results every day. Allowing them to call themselves specialists will only confuse the general public who already doesn't understand the difference between a general dentist and a true specialist. As a profession, we need to work together to educate the public on who is properly trained to perform excellent results; not mislead them. Otherwise, the profession will be opening itself up to more botched results, which will lead to distrust from the public, more

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
complaints to the board, and potential lawsuits. Ultimately this is harmful to the public and to the profession.

Commenter: Ursula Kostermeyer, Prosthodontist

Strongly oppose inaccurate dental specialty advertisement

As a dental specialist in the field of prosthodontics we have invested three years of rigorous training in an accredited dental school residency program. This involves performing increasingly complex prosthetic procedures always under direct supervision of qualified dental specialists. The successful completion of this program qualifies us to independently perform complex prosthetic procedures. Our patients would be misled if someone without this specialty training would advertise and work complex cases without this accredited qualification. A weekend course or learning on patients without supervision is not equivalent with the structured and formal training of a residency. The quality of care for our patients would diminish significantly.

With the indiscriminate use of specialty designations how can patients determine if a dentist has the appropriate skillset to treat their specific condition?

It would be inaccurate to promote a specialty status, if someone did not undergo a formal residency program and this would be harmful for the public and the entire field of dentistry.

Commenter: Dr. A B Hammond

STRONGLY OPPOSE

I vehemently oppose “the amendment to restriction on advertising dental specialties.”

All of us in Dentistry have seen cases treated by underqualified dentists that have caused serious harm to the health of patients. If this amendment is passed by the VA Board of Dentistry, patients will have no way to differentiate between those dentists who practice have 2-5 years of approved specialty training and practice their specialty every day versus those dentists who have limited or no specialty training and experience. This is clearly not in the best interest of the citizens of Virginia whom you are charged with protecting.

I urge you to do the right thing for public health and safety and vote against this amendment.

Thank you for your consideration and for your service to citizens of the Commonwealth of Virginia.

A B Hammond III DDS MA

Commenter: Josh Hanson

Must be approved to protect the public from harm

As you are aware, there have been multiple successful Federal lawsuits surrounding the protective and political nature of dental specialty recognition. Even the ADA has openly recognized the flaws of this process, even before the first lawsuit in Texas was decided. More and more State Dental
Boards are changing their position or are being met with legal action. Furthermore, the American Board of Dental Specialties has emerged as an alternative to the ADA, a trade organization, being the official and sole determinant of dental specialties. The American Board of Dental Specialties mirrors the events that created American Board of Medical Specialties. It was born out of a determination that a trade group, in their case the American Medical Association, could not and would not determine medical specialties without bias. Therefore a 3rd party was created as the certifying organization.

Implant dentistry is a prosthetic discipline with a surgical component, and as such you can only be a specialist if you perform both procedures. The AAID (American academy of implant dentistry) has oral surgeons, prosthodontics, periodontist and general dentist as members and ensures the appropriate skills and knowledge is present through the ABOI (American Board of Oral Implantology).

It is false advertising when an oral surgeon or periodontist advertises they are specialist in implants. They only do the surgical part. Without doing and knowing the prosthetic part you cant be a specialist in implants. Is it simply not possible.

Of course all the specialist here are opposing it. They have their own reasons for their opposition, and the public interest and welfare it not one of them. Having a recognized implant specialty through the ABOI would mean they finally would not be able to advertise as implant specialist without taking the credentialing exam and presenting cases form start to finish. Again implants is a prosthetic discipline with a surgical component.

In my daily practice I see implants placed poorly by both general dentist and specialist alike. Many residency programs have oral surgeons or periodontist place less than 50 implants. Does that make you a specialist just because you did a residency, never restored anything prosthetically and managed to put 50 implant or less in bone. That is the easy part. And what about dentist that graduated specialty programs before implants even came around. Do you automatically become an implant specialist just because you did a residency but never was taught implants.

The same applies to the American Board of General Dentistry (ABGD) so I strongly suggest they should be Included as well. They have not been mentioned yet. They already have federal approval since they are recognized by all the armed forces. If you become a diplomate of the American Board of General Dentistry in the armed forces you automatically get a pay increase because you are considering a specialist in your field – general dentistry just like internal medicine. They get a pay increase just like the other already ADA approved specialties. This has been a standard for over 30 years despite what the ADA says. A legal no mans land as they already are federally recognized for 30+ years as a specialty certification, yet the ADA does not endorse the ABGD. By not including them would create a legal problem with federal vs state law.

The changes does not suggest getting rid of a certifying body. It just allow us to mirror medicine. You would have a general dentistry specialist like in internal medicine. You would have a specialist in implants, anesthesiaology etc. The resolution does not allow dentist to advertise being a prosthodontist, endodontist, oral surgeon, orthodontist etc. without proper training.

The Virginia Board of Dentistry has the obligation to protect the public from harm and by permitting Certified doctors to advertise themselves accordingly will do exactly that. Allowing specialists to shut this rule change down will do just the opposite.

Commenter: William S Dodson Jr DMD

Expect my complete state association withdrawal.

If you deregulate restrictions on specialty advertising expect quite a few of us to withdraw from the state association. I expect that the state association will have to fold.

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
Commenter: Russell Mullen, DDS MS

Oppose

I strongly oppose the proposed amendment to restriction on advertising dental specialties.

I write today as a dentist, but also as a husband, a father, a brother, and a citizen of the state of Virginia. When I welcome a new patient into my office, I do a thorough clinical exam, then collect necessary radiographs, etc in order to come up with a treatment plan to address the problems I see with a patient's teeth. When doing this, there is almost never only one single, best plan for addressing the patient's problems. I make sure to sit with the patient and present all viable treatment options to them, discussing the risks, benefits, and alternatives for each is. This informed consent is an essential part of the decision making process for a patient, and withholding information from someone would violate their personal autonomy, and would be a violation of professional ethics. I feel that allowing a practitioner who has not had adequate training to advertise to the public as being a 'specialist' is a violation of the patient's personal autonomy - it is misleading and doesn't allow a layperson to be fully informed about the doctor who is treating him.

Giving patients less information is seldom in their best interest, and I hope that the Board of Dentistry will continue to do an outstanding job of protecting the health and well-being of the citizens of Virginia by not eliminating the regulations about who can advertise as a specialist.

Commenter: Southside Endodontics PC

Oppose

1) State Boards of Dentistry have a responsibility to protect the public from misleading advertising of specialty expertise by dentists who are not adequately trained and experienced in the advertised specialty.

2) Endodontists have completed two or more years of training beyond dental school. This training distinguishes endodontists from general dentists in the following ways:
   - Endodontists are experts in diagnosis, treatment and relief of oral and facial pain;
   - Endodontists have specialized training in administering anesthesia;
   - Endodontists are trained in and used advanced technology, such as operating microscopes, rotary instrumentation, digital radiography, cone beam computed tomography; and
   - Endodontists use microsurgical techniques to improve patient comfort and save natural teeth.

3) Completion of weekend courses or even a few hundred hours of specialty training does not equate with the long term comprehensive education and training received by specialists. Deregulation of specialty advertising poses a danger to the public in that it would allow for specialty claims by dentists based on inadequate training.

4) The Virginia State Dental Board should define what it regards as the minimum training and experience that dentists should have in order to claim themselves as specialists, rather than removing itself from this issue.

http://townhall.virginia.gov/L/ViewComments.cfm?stagecid=8235
Commenter: Dr. Adam Hogan DDS

Strongly in favor

Dear Sir or Ma'am,

Those opposed to this amendment are either unaware of the education and certification process of the AAID/ABOI and/or they reap financial benefit from the current "standards" of specialty care. Those standards are adopted by the trade organization known as the ADA. While I support the ADA and some good regulations and recommendations to standardize dentistry and protect the public. We also recognize the ADA as a top-heavy organization run by current "specialties" with financial incentive to continue the old system. A supreme court has recently ruled that the ADA does not have the authority to regulate and define specialties in dentistry, that the ADA is hindering the first amendment and that the leadership of the ADA is overwhelmingly specialists with financial incentive to continue their old system.

When I was a general dentist coming out of the Navy, I researched specialty programs. With strong affinity and skill for surgery and desire to learn more, I called several programs and spoke with many residents in periodontics and oral surgery. I heard a unanimous, cohesive, and synonymous cry from residents whose programs touted the placement of 25, 50 or even 75 implants over 2-3 years. But in reality, they barely placed half that number and got credit for other implant placement simply by watching their fellow residents place them while they took credit. In contrast, I found a mentor who placed 50 implants per month. I studied under him, I took the AAID Maxi course. I studied, submitted cases for review and passed my Associate Fellow exam. I studied, took written exams, submitted more cases and sat for oral boards to pass my Fellow exam and Diplomate of the ABOI. Now I teach dental implants to colleagues and am a board examiner for the AAID. My training and experience justifies my ability to be called a "dental implant specialist" far more than a resident who just placed (and did not restore) 20 or 40 implants over 3 years.

One has to consider that there are non-traditional and sometimes better ways that dentists seek specialty status. Our legislative branch should recognize the hard work and achievements of our general membership.

If the Virginia Board of Dentistry is not already aware, the AAID, ABOI and ABDS have already won supreme court cases in several states. This is a first amendment right issue. Unless the VA Board wishes to spend a substantial amount of money and time fighting a hopeless Constitutional fight that California, Florida and Texas have already lost, then I would recommend that they adopt an amendment and allow specialty advertising by those with the proper education and credentials.

Commenter: George Sabol DDS

opposed to changes to specialty advertising regulations

I am writing to express my strong disapproval of the proposed changes to Virginia's specialty advertising regulations. The proposed changes would only serve to confuse the public about the differences between a dentist who has at best taken some CE and a dentist who has spent 2-5 years studying in a rigorous CODA accredited advanced specialty program. Can you imagine thinking that you scheduled an appointment with a cardiologist only to find out that the treating doctor is a family physician that took some CE and now is advertising that they specialize in Cardiology? I know that you, members of the BOD, would demand the services of a cardiologist that attended an accredited specialty residency.

The current Virginia regulations clearly state who can advertise as a dental specialist and insure that a dental specialist has indeed had 2 plus years of continuous advanced education at a CODA accredited program. The primary purpose of the BOD is protect the health and safety of the public.
and the acceptance of the proposed changes would be a direct abandonment of your duty to the citizens of the Commonwealth of Virginia.

The BOD should not be involved in determining what level of education and training qualifies one to practice as a specialist. The National Commission on Recognition of Dental Specialties and Certifying Boards was recently created by the ADA House of Delegates in October 2017 to do so and it would be prudent for the BOD to postpone decisions on this matter until the Commission has had adequate time to study this issue and report their recommendations.

Lastly, I fully support the comments and suggestions that the American Association of Orthodontist recently submitted to the Virginia Board of Dentistry. I trust you will make these comments available for the public and hope that the BOD will postpone any decisions until the National Commission on Recognition of Dental Specialties and Certifying Boards has a chance to report their recommendations.

Commenter: Adam Foleck

Strongly In Favor

I agree with those opposed that a weekend warrior course should not enable a dentist to be listed as someone with board certified credentials. Luckily, the AAID and ABOI do not allow these hours to be counted as the only type of continuing education towards their credentials. Both organizations require that the C.E. hours come from a continuum and the amount of hours for the ABOI are considerably more. The MaxiCourse sponsored by the AAID has been recognized by several Universities and used as an adjunct for training their specialists, including Dental Schools in Georgia, Florida, New Jersey and California and are being looked at by other states as well. Oral Surgeons, Periodontists, and Prosthodontists have recognized these two organizations and have become Diplomates, Assoc. Fellows and Fellows. Many of whom are leading implant educators around the world. The FCC and Federal Courts have recognized that advertising these credentials are actually in the patient's best interest when looking for a qualified implantologist. Neither of these organizations "give" out credentials, and general dentists and specialists do not understand the qualifications or psychometric testing done with these organizations. The ABOI allows for board certified specialists to forgo the written test and only participate in the oral examination. Finally the ABSDS is an independent specialty board that allows all specialties in dentistry the opportunity to apply. The Specialty Board In Medicine (the ABMS) is not associated with the AMA as it is a conflict of interest and not serving the publics best interest; by applying those same rules for dentistry, the Specialty Board In Dentistry should have no affiliation with the ADA. With an understanding of the ABOI, AAID and ABSDS it only makes sense for Virginia to allow advertising so that patients are allowed to do their due diligence and research the credentials of their implantologist.

Commenter: Dr. Liliana Calkins

STRONGLY OPPOSE

Dear Virginia Board of Dentistry,

The attempt to deregulate the specialty of orthodontics, allowing general dentists to implement orthodontic procedures in our patients is poorly thought.

As specialists we take years of education, clinical practice and seminars to understand the implications of our treatment. I have seen the damage done when our treatment outcomes are not well understood or executed.

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
Please respect our education and the imperative need to keep providing exceptional care to our patients.

Thank you,
Dr. Calkins.

Commenter: Dr. Suzanne R Dennis
8/27/18 3:23 pm

Very strongly oppose

Specialists undergo years of advanced training and specialty practice to offer the public the best choices for their specialty dental care. The public has so little information to make informed choices now, loosening the restriction on advertising allows anyone to infer that they have specialty training and it allows third parties to capitalize on this also. Dental insurance companies and businesses that would profit from reduced fees for services will continue to try to reduce the quality of specialty services to the public and make it harder for the public to discern the difference.

Commenter: Owais Naeem DDS, VCU Orthodontics
8/27/18 3:24 pm

Strongly Oppose

"Do no harm" is a core tenant of dental ethics. As a recent graduate, I cannot express how many times this was stressed to us throughout dental school. This proposed legislation is terrifying. Throughout dental school, the most I ever did on a patient orthodontically in a clinical setting was to untie their braces so that they could brush. I had a passion for orthodontics from early on, and sought out orthodontic experiences, but I know for a fact that my colleagues who were focused on graduating had little to no experience over their 4 years of dental school. A simple weekend course is not nearly enough to be able to claim that you are competent at treatment planning, treating, and educating patients in regards to their orthodontic treatment.

A patient is not aware of the amount of time and effort that goes into learning these topics throughout dental school. The board of dentistry's job is to provide patients with information in a way that they can understand. In order to protect the patient from being misinformed, there must be a way to differentiate doctors who are qualified and those who just claim they are. This is the only way to ensure we are not harming our patients.

Commenter: Alfred C Griffin, Jr. DDS, Harvard School of Dental Medicine
8/27/18 3:30 pm

Opposed! Protect the Public!

sincerely yours,

Dear Virginia Board of Dentistry,

I have practiced dentistry in Virginia for over 30 years as an Orthodontic specialist. My father practiced as a general dentist for 30 years in Virginia before me, as has my brother, wife and now soon my son. We all have witnessed the deterioration of trust our profession has experienced because of the eroding public confidence. Allowing dentists who have not completed recognized specialty training to advertise as specialists will only further confuse the public. In the last year, I have had patients seek second opinions in concert with legal action against a general dentist performing comprehensive orthodontic treatment with disastrous results. All three of them did not know that the dentist was not a specialist. Please do not legalize this fraud on the public!

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
Sincerely yours,

Alfred C Griffin, Jr DDS
Warrenton, Virginia

Commenter: Dr. Ignacio Biasi

Strongly Oppose

I agree with the comments sent by the AAO to the Board of Dentistry.

Commenter: Edward Snyder / Dr. Edward P. Snyder

Strongly Oppose

8/27/2018

RE: NOIRA concerning Amendment to restriction on advertising dental specialties

Dear Virginia Board of Dentistry Members,

My name is Edward P. Snyder. I previously served on the Board of Dentistry and I truly appreciate your time and efforts spent as you continue to monitor the practice of dentistry in the Commonwealth of Virginia.

I strongly oppose the proposed language in the NOIRA removing an essential public protection. Removing a definition of specialist would allow individual dentists to advertise as a 'specialist' when they have not completed at least 2 years of full time 'approved' education and training in the specialty.

The citizens of Virginia deserve the ability to easily distinguish dentists who have completed 2+ years of full time specialty education/training in their field from those dentists who have not. The regulation, 54.1-2718 and 54.1-2720, G., 3 and 4, recognize that specialties exist and this recognition should be maintained to protect the citizens of Virginia by providing appropriate information about the advertising dentist's educational background, or lack thereof.

I understand that questions have been raised concerning how the current specialties are designated by CODA. However, work is currently in progress to create a board independent of the ADA to certify what a specialty is and what a dentist must do, in terms of education, to achieve a specialty designation.

If the Virginia Board of Dentistry eliminates section 3 and 4 and relies only on sections 1 and 2 to govern advertising, then how will the Board determine what qualifies as appropriate education/training for a specialist. I do not believe the Board would want to spend the time necessary to determine each individual case of an individual dentist who claims 'specialty' status.

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
I fully support the comments and suggestions that the American Association of Orthodontists recently submitted to the Virginia Board of Dentistry.

Finally, the state of Louisiana has adopted language that I believe the State of Virginia should consider. The state of Louisiana has developed language essentially defining a specialist as one who has completed 2+ years of full time post-doctoral education and is accredited by an accreditation agency that is recognized by the United States Department of Education.

Sincerely,

Edward P. Snyder, DDS

Commenter: Sean Murphy, Attorney for the American Association of Orthodontists (AAO)  [8/27/18 6:33 pm]

Comments in opposition to changes being proposed to 18VAC60-21

Dear Ms. Reen and Members of the Virginia Board of Dentistry,

These comments are sent on behalf of the American Association of Orthodontists ("AAO") and its Virginia members to provide comments regarding the substantive changes being proposed to 18VAC60-21 (hereinafter referred to as "specialty laws"). We appreciate this opportunity.

Revising Virginia's Specialty Laws At This Time May Be Unnecessary

The AAO presumes the parties requesting revisions to Virginia's specialty laws take issue with the current laws recognizing only the ADA specialties, and the fact that the ADA's House of Delegates has had a say on what specialties are recognized. As you likely know, however, the National Commission on Recognition of Dental Specialties and Certifying Boards ("Commission") has recently been created. Our understanding is that the Commission alone will be deciding whether a new specialty should be recognized or not, without requiring final approval from the ADA's House of Delegates. This new Commission may very well address the issues identified by those requesting revisions to Virginia's current laws. As such, the AAO requests that the Virginia Board of Dentistry ("Board") delay any revisions to Virginia's specialty laws until the Commission is able to get fully up and running.

The AAO Supports Specialty Laws That Require CODA Accreditation

To the extent the Board does not want to delay this issue, the AAO supports Virginia's regulations that require those who are advertising as "specialists" to have successfully completed a post-doctoral advanced dental educational program of at least two full-time years and which program is accredited by the Commission on Dental Accreditation (CODA).

A CODA accreditation standard assures Virginia citizens that an individual who truthfully holds himself or herself out as a specialist has met high standards for education and training. If a dentist was able to advertise as a "specialist" without completing a multi-year CODA accredited program, it would dilute Virginia's "speciality" laws and allow providers, who do not have years of supervised clinical and didactic training and/or who have not satisfied extensive criterion, to advertise on par with those providers who have long-term, comprehensive education and training through CODA accredited programs. Such dilution could threaten the health and safety of Virginia patients by obscuring important distinctions between dental professionals as far as their respective educational and training backgrounds. It is important to remember that out of the 13 groups most involved with this issue (the 9 ADA recognized specialties and 4 from the American Board of Dental Specialties ("ABDS")), 12 have CODA accredited programs and would have members able to satisfy a CODA accreditation requirement. The only group whose members cannot currently satisfy a CODA accreditation standard are the implantologists. Removing a provision solely to accommodate the implantologists, and allow dentists who have graduated from non-CODA accredited programs to advertise on par with those who have graduated from CODA accredited programs, does not seem in the best interests of Virginia patients.
Given the foregoing, the AAO is opposed to the suggested removal of the provision prohibiting "(i) advertising a claim of a dental specialty unless it is approved by the National Certifying Boards for Dental Specialists of the American Dental Association," to the extent it would no longer require those advertising as specialists to have successfully completed a post-doctoral advanced dental educational program of at least two full-time years and which is accredited by CODA.

**AAO's Response To The Proposed Removal of the Dental Disclaimer**

The AAO is also opposed to the removal of the provision prohibiting "(ii) representation by a dentist who does not hold specialty certification that his practice is limited to providing services in such specialty area without disclosing that he is a general dentist." Virginia law currently requires a "general dentist who limits his practice to a dental specialty or describes his practice by types of treatment shall state in conjunction with his name that he is a general dentist providing certain services (e.g., orthodontic services)." 18VAC 80-21-80. If the proposed removal took place, the "general dentist" disclosure under 18VAC 80-21-80 would no longer be required.

Given the current language, a general dentist advertising that his or her practice is limited to orthodontic services has to state something along the lines of "John Doe, general dentist, practice limited to orthodontics." Given that requirement, Virginia patients now know exactly what education and degree the advertising dentist has – i.e. whether they are a general dentist or an orthodontist specialist. On the other hand, the proposed removal would have the unintended consequence of no longer requiring that general dentist disclosure, so the same advertisement could read "John Doe, practice limited to orthodontics." If that is all the advertisement said, it is easy to foresee how Virginia consumers might conclude (albeit incorrectly) that John Doe is a specialist in orthodontics or even an orthodontist, rather than a general dentist practicing orthodontics. And as you can imagine, Virginia consumers who relied on such advertisements to choose dental services, would not be pleased if they were injured and found out after the fact that the dental provider they thought was a specialist or orthodontist, was rather a general dentist. The cause for concern is also not just limited to Virginia patients seeking orthodontic care, but any patient seeking care from a dental specialist (e.g. pediatric dentists, endodontists, periodontists, oral surgeons, etc.).

**Conclusion**

In closing, if Virginia adopts regulatory revisions that dilute the meaning of a specialist, it would seem to allow the situation in which a graduate from a non-CODA accredited, specialty program could advertise as a "specialist" or not use a general dentist disclaimer, a patient could rely upon that advertisement when choosing that provider, the patient might suffer an injury, and then the patient might claim he was not protected under Virginia's laws because they allowed his doctor to advertise in the same manner as a doctor who completed a multi-year, CODA accredited program. That regrettable scenario should not be given the opportunity to play out, especially if it comes at a cost to Virginia patients. The AAO strongly believes that those dentists who identify and advertise as "specialists" or advertise that their practice is limited to specialty treatment, should have an advanced level of training and education, and any changes to Virginia's specialty laws should clearly recognize that. With that in mind, Virginia may wish to follow the lead of Louisiana, which made changes to its specialty laws that can be found at 46 LA ADC Pt. XXXIII, § 122.

The AAO respectfully requests that the Virginia Board of Dentistry consider these comments during its review. If the Board needs any further information or has questions for the AAO, please feel free to contact me.

Thank you for your time and attention to this matter.

Sincerely,

Sean Murphy
Attorney for the American Association

Commenter: Deirdre Meuli

Strongly Oppose

Allowing nonspecialists to advertise as specialists is misleading to the public, undermines their trust in the dental profession, and puts their health at risk. I am dumbfounded and greatly disappointed that this amendment is even being seriously considered.

Commenter: Steve Haverkos

Strongly Oppose

I strongly oppose this change because I believe it puts the public health at risk of fraud and increases the potential risk to harm a patient. In my limited experience of a little more than a year, I have already seen and discussed many patient cases where they were defrauded. The patients were made to believe they were receiving quality care from someone who had undergone the appropriate amount of training. Many of the patients were ultimately harmed by a practitioner that was providing care beyond their training and skill level. It disheartens me to think that this can happen when we all took an oath to do no harm. I am afraid that changing such a regulation will only make it that much easier to confuse and defraud a patient and potentially cause irreparable harm. For this reason, I hope this regulation change does not take place.

Commenter: Juan Loza

Strongly oppose

This amendment is sending the wrong message to the general public and to the dentists in our state. The practice of the different dental specialties is getting more sophisticated than ever. We need to maintain the highest standards of service in our profession. By passing this amendment, we will lower the qualifications of the dental practitioners, and thus, we will bring the quality of service down.

If this amendment goes through, I would not want to be associated with the Virginia Dental Association. Many specialists might not find any use for the Association.

Don't lower the standards that assure best practices in our profession. Juan Loza

Commenter: Tegwyn Brickhouse DDS PhD, VCU School of Dentistry

Oppose

As a Pediatric Dentist who strives to provide optimal oral health care to all children. To do this, I have received additional training to treat young children and adolescents with special needs. Caregivers may receive misleading or ambiguous advertising by providers who claim they are "KIDS", "children" dentists yet they do not have the adequate training necessary to successfully treat these patients who have complex dental or behavioral/medical needs. I believe this is an
ethic obligation to ensure the safest and best care for this vulnerable population and a valid
regulation by the VBD that protects the public. I ask that VBD reconsider this proposal, as it is
clearly not in the best interest of our patients.

Commenter: Sooyeon Ahn

Strongly oppose

A specialist’s extensive training and education should be respected.
The public should not be misled and should be protected from potential injury.

Commenter: David Hughes

Opposed. Patients come first.

For Virginians today, the distinction between orthodontic specialists and general practice
orthodontic service providers is already somewhat confusing. Our patients and our profession
share a mutual interest in dispelling this misunderstanding, not erasing the distinction altogether.
Already in my office, an increasingly steady stream of in-town patient transfer consultations have
revealed the failings of seemingly straightforward orthodontic treatment unsupported by
comprehensive diagnosis and treatment planning by non-specialists. Yes, we orthodontists take
great pride in our work and in our credentials, but we also know that we require the trust and
cooperation of our patients as well as our education and experience to achieve the best clinical
outcomes.

Please consider the public in choosing to clarify the distinction between an orthodontist and a
general practice dentist by preserving advertising standards that clearly acknowledge the special
skills set that results from completing a multi-year specialty residency program in orthodontics. To
neglect this duty toward transparency seems to me to be clearly unethical.

Respectfully,

David R. Hughes, DDS

Commenter: Erica Brecher DMD, MS, VCU School of Dentistry

Strongly Oppose

As a board-certified pediatric dental specialist, I am strongly opposed to this change. This will
invoke significant confusion for our patients as they seek the most appropriate care for their
children. Patients should understand the level of credentials of the provider they are seeking care
from so they can make an informed decision. A dentist who limits their practice to children but lacks
adequate training will be unable to care for children with more complex issues that are outside the
scope of a general dentists. We risk the oral health of our patients and their overall health in terms
of advance behavior guidance techniques such as sedation and general anesthesia that may be
used inappropriately by those without proper training.

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
Commenter: Mary Foley, Piedmont Regional Dental Clinic

Strongly Oppose

PRDC works with predominantly underserved, low income patients. Our patients don’t have the knowledge and sophistication to understand the difference between a general dentist that treats children and the care that can be provided by a board certified pediatric dentist. The existing regulations protect our patient base by prohibiting advertising that seeks to blur the distinction and fool patients into thinking it is ‘all the same’.

If we have specialists in dental practice we need to be able to communicate the benefits of being treated by those specialists. This proposal confuses the message and, by extension, the patient. Strongly oppose.

Commenter: Barrett W. R. Peters, DDS, MSD - Virginia Society Pediatric Dentistry

Title 18. Professional and Occupational Licensing

August 29, 2018

Ms. Sandra Reen
Executive Director
Virginia Board of Dentistry
9960 Maryland Drive, Suite 300
Richmond, Virginia 23233
E-mail: sandra.reen@dhp.virginia.gov

Subject: Title 18. Professional and Occupational Licensing

Dear Ms. Reen:

The Virginia Society of Pediatric Dentistry (VSPD) and the American Academy of Pediatric Dentistry (AAPD) are writing to express our concern that the Virginia Board of Dentistry (VBD) is considering amending the regulations governing the practice of dentistry by replacing the regulatory provisions specific to advertising.

As organizations supporting optimal children’s oral health whose members have received additional training to treat young children and adolescents, including those with special healthcare needs, we feel it is important to retain and update the current provision to prohibit advertising a claim of dental specialty status without having approval by the National Commission on Recognition of Dental Specialties and Certifying Boards (NCRDSCB). Otherwise families who may already have some confusion over the various dental specialties could receive additional misleading or ambiguous advertising by providers who claim they are dental specialists yet do not have the adequate training necessary to successfully treat patients who have complex dental or behavioral/medical needs. The VSPD and the AAPD believes this is an ethical obligation to ensure the best care for this vulnerable population and is a valid regulation by the VBD that protects the public.

The VSPD and AAPD respectfully ask that VBD reconsider this proposal, as it is clearly not in the best interest of the patients we serve.

If Virginia adopts revisions that dilute the meaning of a specialist, patients (children) may receive

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8235
improper treatment from general dentists who treat children, including but not limited to the following: poor diagnosis; poor treatment planning; failure to assess growth and development anomalies; poor patient interaction. Pediatric dentistry requires a residency with advanced training after dental school to learn to manage, diagnose, treat, and interact with the developing child. I strongly believe that providers who market themselves as "children's dentists" or "kid's dentists" should all have the same advanced level of training, that is, a pediatric dental residency from an accredited CODA institution. I have personally seen numerous clinical cases of children who received improper treatment from general dental providers.

Commenter: Dan Stewart DMD MSD
Strongly oppose
I see absolutely no advantage to the general public to allow this verbal slight of hand to work it's way into law. It is unfortunate that this is even up for consideration.

Commenter: Riley Hunsaker DDS, VCU Orthodontics
Strongly Oppose
I strongly oppose these changes being considered and I am very disheartened to see that this topic has somehow found its way into the category of "debatable." These unwanted changes put the general population at risk, leaving them ill-informed about the educational background of their potential dental provider. That's not fair to anyone involved. These proposed changes are trying to solve a specific problem in a very generalized way, which will easily lead to disastrous consequences for dentistry and the population as a whole.

Commenter: Michael Payne DMD, VAOD
Stringly oppose. Misleading
This action serves no purpose but to allow deceptive dentists to lie to the public. How can anything positive for the public come out of this? The board of dentistry has a mandate to protect the people, not help dentists. If you vote for this you are a classic government bureaucrat who is looking out for the interested of the governed instead of the governed. I am ashamed that this is even being discussed.

Commenter: Ernest E. Wooden, III
DISAGREE STRONGLY/MISLEADING
Although a dentist may be capable of doing any specialty procedure well, it is extremley misleading to the public to allow that dentist to advertise as a specialist. The ADA has always had requirements for specialists in order to protect the public and changing that would be wrong.

Commenter: Steve J Lan
Oppose in the strongest possible terms
If this proposal is passed it will only open doors for potential unethical advertisement and treatment. We have pledged to provide the highest standard of care to our patients, and this will be counter productive. I do not see any logical reasons as to why we would allow providers who have not received standardized training as a specialist to proclaim as such. No other health care professions would permit such action, and dentistry should not be the first. This will only degrade our profession, and cause public confusion and mistrust. At the end of the day, we will only do a disservice to the public we are trying to serve.
Comments on Notice of Intended Regulatory Action

Board of Dentistry – Dental Specialties

Dear Ms. Yeatts,

I am a practicing dentist in the state of Virginia. Recently, I was informed that an independent organization from the ADA, the American Board of Dental Specialties, is attempting to change the current law, as to who can advertise to the public that they are specialists in the dental medicine. The proposed current specialties from the American Board of Specialties, are not ADA recognized. The ADA works very hard to protect patients/public from flawed and confusing advertisements, that ultimately hurt the public; they set standards and educational requirements and safeguard the public. It allows for proper training of practitioners and ultimately, safety for our patients. If this is allowed, not only will it allow for false advertisement in our profession but will cause irreparable harm to our patients. How can we allow for this? Thank you for taking your time to read this email.

Thank you,
Anna Sidor
Prestige Dental Specialists

Dear Mrs. Yeatts,

I am sending you this email to voice my concern about the changes that Board of Dentistry is forced to do. I have been a dental specialties in Virginia for the past 26 years and I strongly believe that our board needs to protect us against practitioners or organizations who want less restrictions on what the non-specialists can advertise. We have only YOU as our protector who can fight for our rights.

Thank you.

Best regards,

Dr. Ali Ghati

Senior Policy Analyst, Virginia Department of Health Professions
Re: Opposing Removal of Restrictions on Dental Specialty Advertising in Virginia

Dear Ms. Yeatts,

I was recently informed that the Virginia Board of Dentistry proposed removing restrictions on specialty advertising. I was informed that this proposal was in response to lobbying from dental groups that are not affiliated with the American Dental Association (ADA). Removing restrictions on dental specialty advertising places the public health at risk. Let me briefly explain why.

There are currently 9 ADA recognized specialties. To achieve recognition as an ADA recognized specialist, dentists must complete years of training under strict guidelines of their
parent specialty organization. This includes intensive specialty literature review, supervision of the treatment aspects of their specialty and examinations. It has been my experience that the general public is not well informed about some of the dental specialties. Even with orthodontics, a specialty most are aware of, they do not realize the training required to make a proper diagnosis and performance of their care.

A recent problem is the dramatic rise in the number of general dentists placing dental implants. Often their training is extremely limited, lasting only a weekend to a week. This limited training would allow them to advertise as having specialty training if restrictions to advertising were removed. Removing restrictions, therefore, would place patients at increased risk for an invasive surgical procedure that could have irreversible consequences. A study published in the Journal of the American Dental Association in 2014, Outcomes of Implants and Restorations placed in general dental practices, concluded that “Implant success rates in general practices may be lower than those reported in studies conducted in academic or specialist settings.” Please note that the ADA is an organization that is primarily concerned with the needs of the general dentist, not the specialist.

As a periodontist, I can tell you that the American Academy of Periodontology is very concerned about the considerable rise in cases of dental implant disease. I have found many of the implant problems that I treat are due to poor management of the implant site by general dentists and were avoidable.

In the best interests of the public, I strongly urge you to oppose removing restrictions on specialty advertising. Failure to do so, will lead to unnecessary harm to our patients.

Respectfully,

Douglas H. Mahn, D.D.S.

Dear Mr. Van Leuven,

I am writing to voice my concerns about removing restrictions on specialty advertising. I believe this would be a significant detriment to the health of Virginia dental patients. The amount of training received from CODA accredited residency programs far exceeds those of non-CODA accredited courses in EVERY aspect of patient care and science behind the procedures being performed. I strongly oppose removing the restrictions on specialty advertising and ask that you veto to keep them in place.

Thank you,

Bryan Saunders DDS, MS

I would like to voice my strong opinion against allowing non-residency trained dentists to advertise and indicate to the public that they have specialty training and certification. The American Board of Dental Specialties is a chain organization that claims to have certification in specialty credentials. The “requirements” that this so-called board pretends to be valid are laughable in comparison to the requirements by the ADA Commission on Dental Accreditation. Legitimate, state-authorized literature and credentialing and accreditation developed in the 1980’s to protect the public from frauds and charlatans. Our system of state boards and licensing and accreditation of true training programs are a continuation of that process, which has resulted in a very high standard of dental and medical care in this country. Allowing dentists to claim specialty designation when they have only a fraction of the clinical and didactic training demanded of fully trained specialists is a terrible abuse of public trust. It is your responsibility in the Department of Health to ensure that our citizens receive the best possible care by the best trained practitioners. Bowing to the pressure of threatened lawsuits and other assaults on dental professionalism helps no one. If anything, as technology continues to advance at a rapid rate, the requirements of training accreditation will need to
Dear Elaine,

Thank you for reaching out to all of us (Specialists). My opinion on this matter is that we as Specialists took years of education and research to get where we are. We earn the title. Having someone who took just a weekend course to be able to advertise themselves as Specialists is absolutely absurd. It would create confusion to the public. Some dentist would end up with multiple titles. If anyone can advertise themselves as a Specialist, what are we then?

Dr. Norachal Phlsuthikul

I am Dr. Barry Griffin a periodontist in Richmond Va. I would like to express my concern to the board about changing the specialty advertisement requirements. I have been teaching at the dental school for 31 years and understand the importance of advanced education in the field of Dentistry. The extensive postgraduate residency training program really prepares the doctor for all involved dental procedures. This can not be gathered in mini or shorten weekend training courses. I feel that this change would not serve the public well and lead to not ideal dental treatment outcomes.

Good morning Mrs. Yeatts,

My name is Erin Block, and I am currently a resident in the Periodontics post-doctoral program at Virginia Commonwealth University. I am writing in regards to the proposed changes in the Virginia code to remove restrictions on specialty advertising. As someone who has decided to continue my education through a post-doctoral residency and therefore invested three years of my time in committing to a specialty, I do not agree with this. I strongly believe that if this motion passes, then it will be a detriment to the dental health of Virginians. The educational requirements and oversight of these certifying boards are meager compared to the CODA requirements of Advanced Education Programs, such as the program I am currently in.

Please consider this when moving forward with this motion. I appreciate you taking time from your day to read this. It is something that I am passionate about and feel strongly about.

Sincerely,

Hi Mrs. Yeatts,

I am emailing to voice my strong opposition to the amendment that would allow non-specialists to advertise as ADA accredited specialists.

The American Dental Association has worked for decades to establish the proper curriculum to become a proficient and safe dental specialist. I had to sacrifice 3 years of working as a dentist to obtain my specialty degree in periodontics. I am glad I did because the formal education about the biology of healing and gum and bone was just as important as learning the surgical techniques.
Having several years of experience as a Science and Technology rep for Oral B as well as working as the Community Relations Manager in a large specialty dental office that employs six dental specialists who extended their full-time professional training by 2-6 years beyond dental school graduation at much personal and financial sacrifice to gain expertise in the fields of orthodontics or pediatric dentistry in order to work specifically within those fields to deliver the highest quality results for everyone including young children and individuals with special needs that embraces emotional, intellectual, behavioral and physical disabilities using expensive technology to provide the best results, I feel qualified to comment. My concern has always for the patients who trust general dentists with their specialized care and I have a professional and personal reason for commenting. General dentists are important for cleaning and restorative but advanced treatment options should always be under the care of a dedicated specialist. Just as I shouldn’t trust my family doctor to treat a specialized medical condition, general dentists should not be allowed to confuse the general public by advertising as the specialists they are not. We see many DIY treatments on the internet that entice or confuse consumers about who they can trust to deliver the outcome they desire. While many general dentists do successfully treat pediatric patients, I talk to many parents of pediatric patients who came to us after having had very bad experiences with a general dentist who was unable to manage a particular behavior, disability or other challenge. Sometimes this results in a patient not returning for dental care. As a seven-year-old child in 1963 (long before pediatric specialists) I was slapped across the face by my dentist when I refused to open my mouth. Some people couldn’t handle the child challenge even back then and my parents’ dentist certainly could not answer that call. We run the risk of preventing individuals to seek treatment for certain conditions when it becomes commonly believed the success and satisfaction rate has been compromised by providers who basically have not received the training to deliver the desired results. The general public does not understand the difference in a general dentist and specialist.

Smiles,
April Shuck
Community Relations Manager
Dr. Richard L. Byrd & Associates
Amendment to restriction on advertising dental specialties

18VAC80-21-80. Advertising.

A. Practice limitation. A general dentist who limits his practice to a dental specialty or describes his practice by types of treatment shall state in conjunction with his name that he is a general dentist providing certain services (e.g., orthodontic services).

B. Fee disclosures. Any statement specifying a fee for a dental service that does not include the cost of all related procedures, services, and products that, to a substantial likelihood, will be necessary for the completion of the advertised services as it would be understood by an ordinarily prudent person shall be deemed to be deceptive or misleading. Where reasonable disclosure of all relevant variables and considerations is made, a statement of a range of fees for specifically described dental services shall not be deemed to be deceptive or misleading.

C. Discounts and free offers. Discount and free offers for a dental service are permissible for advertising only when the nondiscounted or full fee, if any, and the final discounted fee are also disclosed in the advertisement. In addition, the time period for obtaining the discount or free offer must be stated in the advertisement. The dentist shall maintain documented evidence to substantiate the discounted fee or free offer.

D. Retention of advertising. A prerecorded or archived copy of all advertisements shall be retained for a two-year period following the final appearance of the advertisement. The advertising dentist is responsible for making prerecorded or archived copies of the advertisement available to the board within five days following a request by the board.
E. Routine dental services. Advertising of fees pursuant to this section is limited to procedures that are set forth in the American Dental Association's "Dental Procedures Codes," published in Current Dental Terminology in effect at the time the advertisement is issued.

F. Advertisements. Advertisements, including but not limited to signage, containing descriptions of the type of dentistry practiced or a specific geographic locator are permissible so long as the requirements of §§ 54.1-2718 and 54.1-2720 of the Code are met.

G. False, deceptive, or misleading advertisement. The following practices shall constitute false, deceptive, or misleading advertising within the meaning of subdivision 7 of § 54.1-2709 of the Code:

1. Publishing an advertisement that contains a material misrepresentation or omission of facts that causes an ordinarily prudent person to misunderstand or be deceived, or that fails to contain reasonable warnings or disclaimers necessary to make a representation not deceptive;

2. Publishing an advertisement that fails to include the information and disclaimers required by this section;

3. Publishing an advertisement that contains a false an unsubstantiated claim of professional superiority, contains a claim to be a specialist, or uses any terms to designate a dental specialty unless he is entitled to such specialty designation under the guidelines or requirements for specialties approved by the American Dental Association (Requirements for Recognition of Dental Specialties and National Certifying Boards for Dental Specialists, November 2013), or such guidelines or requirements as subsequently amended; or

4. Representation by a dentist who does not currently hold specialty certification that his practice is limited to providing services in such specialty area without clearly disclosing
that he is a general dentist **Publishing an advertisement that is not in compliance with § 54.1-2718 of the Code of Virginia.**
Code of Virginia  
Title 54.1. Professions and Occupations  
Chapter 27. Dentistry  

§ 54.1-2718. Practicing under firm or assumed name.

A. No person shall practice, offer to practice, or hold himself out as practicing dentistry, under a name other than his own. This section shall not prohibit the practice of dentistry by a partnership under a firm name, or a licensed dentist from practicing dentistry as the employee of a licensed dentist, practicing under his own name or under a firm name, or as the employee of a professional corporation, or as a member, manager, employee, or agent of a professional limited liability company or as the employee of a dental clinic operated as specified in subsection A of § 54.1-2715.

B. A dentist, partnership, professional corporation, or professional limited liability company that owns a dental practice may adopt a trade name for that practice so long as the trade name meets the following requirements:

1. The trade name incorporates one or more of the following: (i) a geographic location, e.g., to include, but not be limited to, a street name, shopping center, neighborhood, city, or county location; (ii) type of practice; or (iii) a derivative of the dentist’s name.

2. Derivatives of American Dental Association approved specialty board certifications may be used to describe the type of practice if one or more dentists in the practice are certified in the specialty or if the specialty name is accompanied by the conspicuous disclosure that services are provided by a general dentist in every advertising medium in which the trade name is used.

3. The trade name is used in conjunction with either (i) the name of the dentist or (ii) the name of the partnership, professional corporation, or professional limited liability company that owns the practice. The owner’s name shall be conspicuously displayed along with the trade name used for the practice in all advertisements in any medium.

4. Marquee signage, web page addresses, and email addresses are not considered to be advertisements and may be limited to the trade name adopted for the practice.

Agenda Item: Board action on administration of sedation & anesthesia

Included in your agenda package are:

Minutes of Regulatory Advisory Panel (met on 12/1/17 and 2/2/18)

Minutes of Regulatory/Legislative Committee – 3/8/18

Copy of NOIRA

Copy of comments on the NOIRA received to date (8/30/18) – comment period ends on 9/5/18; additional comments will be distributed as a handout at the meeting

Copy of amended regulation as recommended by the Panel and reviewed by the Committee

Board action:

To adopt the regulation as proposed or as amended based on comments received.
APPROVED

BOARD OF DENTISTRY
MINUTES OF THE REGULATORY ADVISORY PANEL ON THE
CONTROLLED SUBSTANCES, SEDATION AND ANESTHESIA REGULATIONS
Friday, December 1, 2017

TIME AND PLACE: The meeting of the Regulatory Advisory Panel (RAP) of the Board of Dentistry was called to order on December 1, 2017 at 1:45 p.m. at the Department of Health Professions, 6980 Maryland Drive, Suite 201, Training Room 1; Henrico, Virginia.

PRESIDING: John Alexander, D.D.S., Chair

PANEL MEMBERS PRESENT: David Sarrett, D.D.S.
Malinda Huseon, D.D.S.
Jacquees Riveux, D.D.S.
Carol Russek, JD

ESTABLISHMENT OF QUORUM: All members of the Panel were present.

STAFF PRESENT: Sandra K. Reen, Executive Director
Kelley W. Palmetier, Deputy Executive Director
Sheila Bead, Executive Assistant
Elaine Yeatts, DHP Policy Analyst

Ms. Reen gave the instructions for evacuating the building in case of emergency.

OPEN FORUM: Dr. Alexander explained the Forum is an opportunity for speakers to address their questions, concerns and recommendations for the Board of Dentistry’s regulations. He noted that speakers have about five minutes to address their concerns. He then called on members of the audience who had signed the attendance sheet to make their comments. Other members of the audience also made comments. The transcript of the comments received are attached to these minutes.

PANEL DISCUSSION: Following a brief break, Dr. Alexander asked the panel how it would like to proceed with its review. Discussion followed about topics that should be considered in addition to the ones identified by the public.

Ms. Yeatts suggested the panel take time to go over the ADA guidelines and our current regulations along with the transcript from the open forum.

After identifying a number of topics of interest, the panel agreed to defer discussion of regulatory changes to a subsequent meeting in order to review all the comments received. In addition, staff was asked to send the full text of the Regulations Governing the Practice of Dentistry, the American Academy of Pediatric Dentistry sedation guidelines and the American Society of Anesthesiologists practice guidelines.
NEXT MEETING: Ms. Reen noted that Friday, February 2, 2018 had been reserved if a second meeting was needed. The Panel agreed to meet that day.

ADJOURNMENT: With all business concluded, Dr. Alexander adjourned the meeting at 3:44 p.m.

John M. Alexander, D.D.S., Chair

Sandra K. Reen, Executive Director

Date: [Signature] 2/2/2018 Date: 2/2/2018
VIRGINIA BOARD OF DENTISTRY

MINUTES OF THE REGULATORY ADVISORY PANEL ON THE CONTROLLED SUBSTANCES, SEDATION, AND ANESTHESIA REGULATIONS
FEBRUARY 2, 2018

TIME AND PLACE: The meeting of the Regulatory Advisory Panel (RAP) of the Board of Dentistry (Board) was called to order on February 2, 2018 at 1:56 p.m., at the Department of Health Professions, 9960 Mayland Drive, Suite 201, Board Room 4, Henrico, Virginia.

PRESIDING: John M. Alexander, D.D.S., Chair

PANEL MEMBERS PRESENT:
- Malinda Husson, D.D.S.
- Carol Russek, J.D.
- David Sarrett, D.D.S.

PANEL MEMBERS ABSENT:
- Jacques Riviere, D.D.S.

OTHERS PRESENT:
- Augustus A. Petticolas, Jr., D.D.S.

STAFF PRESENT:
- Sandra K. Reen, Executive Director
- Donna Lee, Discipline Case Manager

ESTABLISHMENT OF A QUORUM:
With four members of the RAP present, a quorum was established.

Ms. Reen read the emergency evacuation procedure.

APPROVAL OF MINUTES:
The December 1, 2017 minutes were accepted as presented by consensus.

PUBLIC COMMENT:
Catherine Harrison, CRNA, stated that she was present to clarify any questions concerning sedation provided by CRNAs in dental practices.

PANEL DISCUSSION:
Dr. Alexander expressed his appreciation for the information and recommendations the RAP received at the December 1, 2017 Open Forum. He explained that the draft of Part VI of the Regulations Governing the Practice of Dentistry provided for discussion includes the recommendations received throughout the text as well as the notes that he and Dr. Sarrett had added.
Ms. Reen noted that a number of changes in the draft address provisions for moderate sedation to conform to the 2016 ADA Guidelines for Teaching Pain Control and Sedation to Dentists and Dental Students. She said these changes do not need discussion because they are being addressed in a regulatory action currently in process.

Dr. Alexander facilitated a page-by-page review and discussion of the draft. Recommendations the RAP agreed to advance included:

- Requiring a review of medication use and a focused physical examination in patient evaluation requirements.
- Noting that the guidelines that address sedation of pediatric patients issued by the American Academy of Pediatric Dentistry and the American Academy of Pediatrics should be considered.
- Adding the provision on special needs patients in the ADA Guidelines for the Use of Sedation and General Anesthesia by Dentists.
- Clarifying the supervision of certified registered nurse anesthetists.
- Clarifying the provisions on minimal sedation.
- Permitting consideration of extenuating patient circumstances in the monitoring and discharge requirements.
- Adding oxygen saturation to the monitoring requirements.
- Requiring a 3 person treatment team for moderate sedation.

NEXT STEPS: Ms. Reen said the proposed changes will be made to a new draft of Part VI of the Regulations and sent to the RAP for review. She recommended that each panelist submit comments on the draft for Dr. Alexander’s review so he might decide if it is necessary to convene the RAP for further discussion. She added that once the RAP proposal is complete the recommendations will go to the Regulatory-Legislative Committee for review.

ADJOURNMENT: With all business concluded, Dr. Alexander adjourned the meeting at 5:15 p.m.

John M. Alexander, D.D.S, Chair

Sandra K. Reen, Executive Director

UNAPPROVED

VIRGINIA BOARD OF DENTISTRY
REGULATORY-LEGISLATIVE COMMITTEE MINUTES

March 8, 2018 Department of Health Professions Henrico, VA 23233

CALL TO ORDER: Dr. Augustus A. Petticolas, Jr. called the meeting of the Regulatory-Legislative Committee to order at 9:11AM. With 5 Board members present, a quorum was established.

MEMBERS PRESENT: Augustus A. Petticolas, Jr., D.D.S., Chair
Tonya A. Parris-Wilkins, D.D.S.
Tammy C. Ridout, R.D.H.
Sandra J. Catchings, D.D.S.
John M. Alexander, D.D.S.

MEMBERS ABSENT: James D. Watkins, D.D.S.

STAFF PRESENT: Sandra K. Reen, Executive Director
Sheila Beard, Executive Assistant
Elaine Yeatts, DHP Policy Analyst

PUBLIC COMMENT: Benita A. Miller, DDS – Objecting to fast track action to amend the restriction on advertising dental specialties
Karen McAndrew, DMD, MS - Objecting to fast track action to amend the restriction on advertising dental specialties
Kassie Schroth, McGuire Woods Consulting – Asking that the Board conforms its regulations to more closely reflect the statute addressing the requirement for permits for sedation and anesthesia; specifically, who can provide or administer sedation.
Frank Iworno, DDS, MS - Objecting to fast track action to amend the restriction on advertising dental specialties
Stephanie Voth - Objecting to fast track action to amend the restriction on advertising dental specialties
Thomas Glazier, DDS, MSD - Objecting to fast track action to amend the restriction on advertising dental specialties
Ben Ross, DMD - Objecting to fast track action to amend the restriction on advertising dental specialties
Ursula Klostermyer, DDS, PhD - Objecting to fast track action to amend the restriction on advertising dental specialties
Tamika Atkins - Objecting to fast track action to amend the restriction on advertising dental specialties
Danielle McCormick, DDS, MS - Objecting to fast track action to amend the restriction on advertising dental specialties
Sorin Uram-Tuculescu, DDS - Objecting to adding PGY-1 Pathway for Licensure.
Daniel Bartling, DDS - Objecting to fast track action to amend the restriction on advertising dental specialties

APPROVAL OF MINUTES:

Dr. Catchings moved to accept the minutes of June 30, 2017 as written. The motion was seconded and passed.

LEGISLATION AND REGULATORY

Ms. Yeatts explained to the Committee that due to the change in administration, all regulatory actions waiting to be signed were sent back to the Secretary’s office for review, which will not take place until the current session of the General Assembly is ended. A more detailed regulatory report will be provided at the Full Board Business Meeting on March 9, 2018.

A status report was provided about following regulatory actions:

- Change in renewal schedule – waiting for Secretary Action.
- Conforming rules to ADA guidelines on moderate sedation – propose that the Board adopt as final.
- Reduction in renewal fees – In effect on February 21, 2018.
- Continuing education for practice by remote supervision – proposed regulation is in effect; final regulations need to be in place by May 12, 2019.

COMMITTEE DISCUSSIONS:

Amending the restriction on Advertising Dental Specialties -
Ms. Yeatts advised that given the comments received on this action, the standard process will need to be followed. The Committee adopted a motion for the Board that this regulatory action be withdrawn as a Fast Track Action and that a NOIRA be submitted to start the standard regulatory process.

C.E. Credit for attending Board Meetings –
At the December 15, 2017 Board meeting, Dr. Alexander referred consideration of granting C.E. credit for attending Board meetings to the Regulatory-Legislative Committee for review. The Committee was not in favor of pursuing granting C.E. Credit for attending Board meetings and adopted a motion for the Board that the Board not pursue this.

Adding PGY-1 Pathway for Licensure –
Questions were raised at the December 15, 2017 Board meeting about eliminating the clinical exam requirement for applicants who have completed an advanced general dentistry or specialty program since the Board only issues general dental licenses. The Board referred this proposal to the Regulatory-
Legislative Committee for further discussion. The Committee adopted a motion for the Board that the Board not pursue adding PGY-1 as a pathway to licensure.

**Regulatory-Advisory Panel Recommendations on Sedation Recommendations**

Proposed changes to Part VI of the Regulations Governing the Practice of Dentistry from the RAP was reviewed by the Committee. Ms. Reen explained to the Committee the intention of the RAP is to assist the Board in understanding changes needed to clarify the regulations. This process is a "pre" regulatory process. The regulatory process will begin once a NOIRA has been adopted.

After review of the panel’s recommendations, the Committee adopted a motion for the Board that the Board issue a NOIRA to revise the Sedation Regulations.

**ADJOURNMENT:** With all business concluded, Dr. Petticolas adjourned the meeting at 10:32AM.

NOTICES OF INTENDED REGULATORY ACTION

TITLE 12. HEALTH

STATE BOARD OF BEHAVIORAL HEALTH AND
DEVELOPMENTAL SERVICES

Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 2.2-4007.01 of the Code of Virginia that the State Board of Behavioral Health and Developmental Services intends to consider amending 12VAC35-105, Rules and Regulations for Licensing Providers by the Department of Behavioral Health and Developmental Services. The purpose of the proposed action is to comply with the quality and risk management system requirements of the U.S. Department of Justice’s Settlement Agreement with Virginia (United States of America v. Commonwealth of Virginia, Civil Action No. 3:12cv059-JAG) and develop and implement a system to ensure that individuals in the Settlement Agreement population who are receiving services in Virginia’s public system of services receive a level of care that is good quality, meets individuals’ needs, and helps individuals achieve positive outcomes. Quality improvement measures are required of community services boards for services they provide, but those services are not currently in the Department of Behavioral Health and Developmental Services (DBHDS) licensing regulations for providers. The proposed amendments will clarify and expand the requirements for the quality practices for the health, safety, care, and treatment for adults who receive services from DBHDS service providers.

The agency intends to hold a public hearing on the proposed action after publication in the Virginia Register.

Statutory Authority: §§ 37.2-302 and 37.2-400 of the Code of Virginia.

Public Comment Deadline: September 5, 2018.

Agency Contact: Emily Bowles, Legal Coordinator, Office of Licensing, Department of Behavioral Health and Developmental Services, 1220 Bank Street, P.O. Box 1797, Richmond, VA 23218, telephone (804) 225-3281, FAX (804) 692-0066, TTY (804) 371-8977, or email emily.bowles@dbhds.virginia.gov.

V.A.R. Doc. No. R18-4381; Filed July 12, 2018, 9:52 a.m.

TITLE 18. PROFESSIONAL AND
OCUPATIONAL LICENSING

BOARD OF DENTISTRY

Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 2.2-4007.01 of the Code of Virginia that the Board of Dentistry intends to consider amending 18VAC60-21, Regulations Governing the Practice of Dentistry. The purpose of the proposed action is to replace regulatory provisions specific to the advertising of dental specialties with reference to the statutory language regarding the use of trade names. Specifically being considered for removal are provisions prohibiting (i) advertising a claim of a dental specialty unless it is approved by the National Certifying Boards for Dental Specialists of the American Dental Association and (ii) representation by a dentist who does not hold specialty certification that his practice is limited to providing services in such specialty area without disclosing that he is a general dentist. The prohibition of a claim of professional superiority remains in the regulation.

The agency intends to hold a public hearing on the proposed action after publication in the Virginia Register.

Public Comment Deadline: September 5, 2018.

Agency Contact: Sandra Reen, Executive Director, Board of Dentistry, 9960 Mayland Drive, Suite 300, Richmond, VA 23233, telephone (804) 367-4437, FAX (804) 527-4428, or email sandra.reen@dhp.virginia.gov.

V.A.R. Doc. No. R18-5206; Filed July 5, 2018, 9:12 p.m.

Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 2.2-4007.01 of the Code of Virginia that the Board of Dentistry intends to consider amending 18VAC60-21, Regulations Governing the Practice of Dentistry. The purpose of the proposed action is to amend regulations relating to administration of sedation or anesthesia in dental offices. The goals of the proposed action are greater consistency and clarity of the requirements, depending on the level of sedation and the risk to the patient, and closer alignment with the American Dental Association Guidelines for the Use of Sedation and General Anesthesia. The board intends to amend provisions that are problematic to dentists, such as compliance with current regulations regarding special needs patients. The board intends to incorporate guidelines and best practices for sedation and anesthesia, such as the use of a three-person team in the operatory during administration of moderate sedation.

The agency intends to hold a public hearing on the proposed action after publication in the Virginia Register.

  *sedation regulatulons*

  This comment is in response to the possible requirement of a 3rd person needed in the room during sedation. This is an absolutely absurd recommendation. In fact it would actually increase potential problems and distractions. I only allow sedation certified assistants with me in the room during a procedure and have never had the need for a 3rd person. This also is an increase in overhead to us and our patient. Properly trained personnel can do the job!!!!

  If a dentist wants a 3rd person in the operatory then they can do that. The mandating of this is what I am totally opposed to.

  2. Administration of Sedation and Anesthesia

  The last sentence states - "....a three-person team in the operatory during administration of Moderate sedation." This is incorrect per many national guidelines. It should state 3 individuals for Deep sedation. Therefore, the statement should be changed to reflect and be congruent with national guidelines.

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8292
Clarification of ASA and Associated ADA Sedation Guidelines—OPPOSED TO 3-PERSON RECOMMENDATION

This will be very simple. I have a letter from Dr. James Toms, DDS, MS, FACP. Dr. Toms serves as both the American Dental Association (ADA) and American Society of Dentists Anesthesiologists (ASDA) representative to the American Society of Anesthesiologists (ASA) Task Force on the 2018 PRACTICE GUIDELINES FOR MODERATE PROCEDURAL SEDATION AND ANALGESIA. The letter clearly states that the current two-person delivery of IV Moderate Conscious Sedation is NOT, I REPEAT, NOT being changed in the ADA nor ASA guidelines. This letter is of public record and I have copied it here. PLEASE READ and appreciate the contents:

April 25, 2018

As both the American Dental Association (ADA) and American Society of Dentists Anesthesiologists (ASDA) representative to the American Society of Anesthesiologists (ASA) Task Force on the 2018 Practice Guidelines for Moderate Procedural Sedation and Analgesia, I want to make exceedingly clear the intent and recommendations on specific language in a section of the Guidelines that is entitled “Availability of an Individual Responsible for Patient Monitoring” (pg. 443, second column).

In regards to the first bullet-point stipulated in the recommendation, where in the Guidelines it states,

• The individual responsible for monitoring the patient should be trained in the recognition of apnea and airway obstruction and be authorized to seek additional help.

We agree that this responsibility is fulfilled by any dental assistant with basic life support (BLS) training. Recognition of unconsciousness, apnea, airway obstruction, cardiac arrest, and the summoning of emergency medical services has been a long held competency in all current BLS certificate courses. A dental assistant, whether a registered dental assistant or otherwise, by virtue of BLS training and certification, can adequately perform these tasks.

Secondly, in regards to the subsequent bullet-point in the Guidelines which state,

• The designated individual should not be a member of the procedural team but may assist with minor, interruptible tasks once the patient’s level of sedation/analgesia and vital signs have stabilized, provided that adequate monitoring for the patient’s level of sedation is maintained.

The intent of this statement is to assure that at least one individual can assist the operating dentist in monitoring the moderately sedated patient AND concurrently be involved in minor, interruptible tasks such as suctioning, light-curing, tissue or tongue retraction, etc. Note carefully that this statement contains a “should” statement that is emphasizing that this individual should not be involved with the conduct of the procedure or surgery, but instead act in a supplemental role that assists in patient monitoring and minor surgical/procedural tasks. Akin to Commission on Dental Accreditation (CODA) standards, a “should” statement is NOT a requirement, but rather presents an intent statement that implies “highly desirable, but not mandatory” as per CODA definition of terms.

We discussed this issue at great length at the ASA Task Force meetings to ensure that not only the dental profession can continue to practice to current ADA Moderate Sedation Guidelines which only require the presence of one other individual beside the operating dentist to assist in monitoring, but also that various other physician disciplines may operate in settings where the physician providing the moderate sedation can rely on the assistance of only one nurse, respiratory therapist, physician’s assistant, etc.

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8292
When I presented the draft document to the ADA for scrutiny, it was carefully examined for this exact issue and found to be congruent with existing 2017 ADA Guidelines, which explicitly state:

- At least one additional person trained in Basic Life Support for Healthcare Providers must be present in addition to the dentist.

With this understanding, the ADA gave expressed sponsorship and published endorsement of the 2018 ASA Guidelines as reinforcing and supporting past and present dental moderate sedation guidelines. The 2018 ASA Guidelines also concur with the American Academy of Pediatrics/American Academy of Pediatric Dentistry (AAP/AAPD) Guidelines for Monitoring and Management of Pediatric Patients Before, During, and After Sedation for Diagnostic and Therapeutic Procedures: Update 2016 wherein the authors (one of which is also an author of the ASA Guidelines) state the following:

- Support personnel. The use of moderate sedation shall include the provision of a person, in addition to the practitioner, whose responsibility is to monitor appropriate physiologic parameters and to assist in any supportive or resuscitation measures, if required. This individual may also be responsible for assisting with interruptible patient-related tasks of short duration, such as holding an instrument or troubleshooting equipment. (AAP/AAPD p. 223)

To clarify even more and remove all ambiguity, the ASA Guideline document includes a “Summary of Recommendations” found in Appendix 1 (pg. 450, column two). Within the section found on page 450 and continuing on to page 451, within the subheading of “Availability of an Individual Responsible for Patient Monitoring,” language is clear in requiring only “a designated individual other than the practitioner performing the procedure is present to monitor the patient throughout the procedure.” Further, this individual is only responsible for monitoring the patient for signs of apnea and airway obstruction AND “may assist with minor, interruptible tasks.” The summary removes the “should” statement and for brevity and clarity, and stipulates only one additional person other than the practitioner needs to be present to assist in monitoring.

I wanted to assure you and others that the traditional dental model of only requiring one dental assistant while the operating dentist performs the procedure and administers moderate sedation is strongly supported by these ASA Guidelines. As a dental educator that provides a long-standing parenteral moderate sedation certification course for general practitioners and dental specialists from all over the nation, I made great efforts to promote the safety and continued use of this practice model to the ASA Task Force.

There is no effort underway or planned to require a third individual to be a sole monitor in moderate sedation practice in dentistry or medicine.

Please feel free to contact me at any time regarding this issue or any other issues involving patient safety, sedation, or anesthesia in general dental or specialty dental practice.

Respectfully,

Jimmy

Difficulty for the public to truly review proposed changes

I would like to make a technical comment, which will be separate from my professional comment, on this proposal. I believe that it has been made unnecessarily difficult for the general public to ascertain the true changes that are being made to the regulations because there is currently the "Conforming rules to ADA guidelines on moderate sedation" changes that are also in their final stage and Governor's review. These changes also affect the definitions in the proposal made that is up for commentary. As such, it takes a careful review of the definitions minimal and moderate sedation to completely grasp the meaning of the proposed text that we have been asked to comment on.

As such, I would strongly encourage anyone to also read and incorporate the changes from "Conforming rules to ADA guidelines on moderate sedation" into their read of this proposal. The final text is available here: http://townhall.virginia.gov/L/ViewXML.cfm?textid=12408

Thank you,

Jonathan L Wong, DMD, DADBA, DNDBA, FADSA *

Correction needed

The last sentence states "...a three-person team in the operatory during administration of Moderate sedation.". This is incorrect per many national guidelines. It should state 3 individuals for Deep sedation. Therefore, the statement should be changed to reflect and be congruent with national guidelines.

Commenter: Benjamin T. Watson DDS, MAGD

Sedation Regulation

I started providing oral conscious sedation in 2001-2002. At that time there were virtually no regulations except have a DDS or DMD degree. As more dentists began to use oral sedation regulations were developed to ensure safety of the patient. These regulations included courses designed in airway management as well as sedation procedures. I fully supported these
regulations as patient safety cannot be jeopardized. Then in about 2011 or there about, more regulations were made. You had to have taken a 3 day course in sedation. Well because my original course was only 2 days I had to go back and retake a whole new course even though I had been doing oral sedation for 10 years. Also, because The Board could not guarantee that my 3 day course would be approved (it eventually was) I had to take another course by a dental anesthesiologist to insure it would be accepted. Then came the Moderate Sedation Permit. I got the permit even though virtually all my sedations are "minimal sedation." I kept the permit so my patient's would know that I went through the training to perform oral sedation and just in case The Board questions at some time if a patient was minimal or moderate. I can see where The Board is trying to go, that is eventually requiring any dentist doing any kind of sedation to have an IV permit. This would be totally absurd. I go all out (as most dentists) in making sure my patients under sedation are safe. It starts with a complete health history and medications they are on. The meds are run through LexiComp for any possible interactions. I then do what I call a sedation pre-assessment which includes all vital signs, Malampati, tonsile, ASA classification, height, weight, BMI, as well as listening to their lungs. If there are any questions as to health concerns then I don't sedate or at minimum have a medical consult. I have all the required medical equipment. I use a pulse ox as well as capnography on each patient. You can see I go above and beyond what The Board requires. My patients appreciate the fact that I offer oral sedation. It has benefited many patients who would not have had dentistry. I have invested many years and finances in oral sedation. Regulations are good, I endorse most but the direction The Board is going (example requiring a 3 member team) is simply wrong. I sincerely hope The Board uses common sense in what they require. If you are heading in the direction of requiring all sedations to have an IV permit (which is what I have heard) I hope you change course. This would hurt so many patients who would benefit from oral sedation.

Further clarification of number of personnel needed for moderate ("conscious") sedation

August 10th, 2018

Dear Virginia Board of Dentistry,

In reference to a copy of a letter I drafted to clarify some misconceptions regarding the mandate of a 3rd individual being present during the performance of moderate sedation in a dental office-based setting, I was asked to re-iterate some of the points that currently exist in not only the American Society of Anesthesiologists (ASA) 2018 Moderate Procedural Sedation and Analgesia Guidelines, but also in the newly affirmed American Academy of Pediatrics/American Academy of Pediatric Dentistry (AAP/AAPD) Guideline for Monitoring and Management of Pediatric Patients Before, During, and After Sedation for Diagnostic and Therapeutic Procedures: Update 2018.

I've maintained and continue to maintain that the intent and goals of all of the authors of the ASA 2018 Guidelines, which were comprised of not only dentists, but also pediatric physician anesthesiologists, a gastroenterologist, a cardiologist, an emergency medicine physician, an Interventional radiologist, and other physician anesthesiologists, were to establish the two-person model of moderate sedation provision as the de facto standard of care, regardless of the setting.

If the sedation provider truly intends for the patient to be in moderate sedation, in which patients purposefully respond to verbal stimulation and are awake during the procedure, you, in essence, already have three individuals present to ensure a minimum level of safety in monitoring and response: 1) The treating dentist, who is providing the sedation, 2) the dental assistant, who is monitoring the patient along with the treating dentist, and 3) the patient themselves who is providing verbal and purposeful response to the dentist and assistant during the procedure to indicate safe levels of sedation.

I would respectfully urge the Virginia Board of Dentistry to reconsider the proposed language to mandate 3 individuals needed for the safe provision of moderate sedation as unnecessarily

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8292

160
exceeding established and researched national guidelines. Given the greater context of patients undergoing procedural moderate sedation in different healthcare venues outside of dentistry, the proposed mandate goes well beyond the intent of guideline committees specifically tasked to examine this matter.

As others have already stated, 3 individuals are required for the delivery of deep sedation and/or general anesthesia in a dental setting. The current ASA, ASDA, and AAP/AAPD positions on deep sedation/general anesthesia for pediatric patients in dental settings require the third individual to be a dedicated and independent anesthesia provider (DDS, MD/DO, or CRNA) not involved in the conduct of the procedure. (see: https://www.cshaq.org/docs/default-source/default-document-library/asa-statement-on-sedation-anesthesia-administration-in-dental-office-based-settings-(1).pdf?sfvrsn=0 and http://www.aapd.org/media/Polices_Guidelines/BP_AnesthesiaPersonnel.pdf)

Comments and rationales for modification of proposed changes

Thank you for the efforts to update the sedation and anesthesia guidelines for the Commonwealth of Virginia. Although I agree with a majority of the changes in the proposed text, there are some additional comments I wish the Board to consider.

First under the definitions in 18VAC80-21-10 I would ask that you consider the following changes:

1) Under section D, it may not be necessary to delete the definition of enteral. Although moderate sedation is changing in order to not distinguish between enteral and parenteral routes of administration (and appropriately so), the definition of enteral may still come into play, especially when discussing maximum recommended doses in minimal sedation.

2) A point of clarification is that under Deep Sedation and General Anesthesia, the definitions mention "ventilator functions", this should state ventilatory function. A ventilator is the mechanical machine that provides ventilatory support, the body has ventilatory and cardiovascular functions in these two definitions.

3) Please consider defining the "maximum recommended dose" as this will be a very debatable definition that practitioners will argue when defining the line between minimal and moderate sedation, as stated in 18VAC80-21-280 Section F 4. The ADA defines this in their guidelines as follows: "maximum FDA-recommended dose of a drug, as printed in FDA-approved labeling for unmonitored home use." As a point of comment - this definition even by the ADA may be challenged by some providers as Xanax (alprazolam) allows for a higher FDA recommended maximum dose if titrated by the practitioner over time to the desired effect. Some may choose to use the actual highest dosage allowed of 10mg per day, even though the FDA recommends dosing increases at intervals of 3-4 days and when increased should not be increased more than 1mg per day.

1) Section K1 - it allows delegation of monitoring to "another dentists, anesthesiologists, or certified registered nurse anesthetist (CRNA)." In all other instances where a CRNA is mentioned, it is under the direction of the dentist, but in this single instance it is not. According to the regulations, the CRNA must practice under the direction of a dentist with the appropriate level of sedation / anesthesia permit. Therefore, a CRNA should also be under the direction of the dentist like the aforementioned assistant, hygienist, or nurse in this section.

2) Section M - Instead of "Special needs patients", this should read "Patients with Special Healthcare Needs". This is a matter of political correctness. In addition, the provisions here should also apply to pediatric patients that are uncooperative for IV placement prior to induction. Although this is mentioned in the section, the section heading makes it sound as if it only applies to Patients with Special Healthcare Needs.

18VAC80-21-279 Under section D - this section mentions the required equipment that shall be in working order and available, therefore item # 5 should not allow a pulse oximeter to not be available in the facility, therefore the section should simply read pulse oximeter.

18VAC80-21-280 Section 4.b.1 I would encourage the Board to consider changing the language of "at the timing that training occurred." The ADA Guidelines for Teaching Pain Control and Sedation to Dentists and Dental Students have been developed to increase patient safety by ensuring that training and update / refresher courses meet the new standards, especially in terms of the competency of rescuing the airway and establishing parenteral access. The American Society of Anesthesiologists' 2018 Task Force on Procedural Sedation found that it was critical that a member of the team be competent in IV access. (http://anesthesiology.pubs.asahq.org/article.aspx?articleid=2870190) Practitioners should be held responsible for updating their training, especially in sedation and anesthesia as that person is responsible for the safety of the patient's life and the management of any complication that might arise.

Under 18VAC80-21-291

1) Section B.11 does not need to state parenteral administration any longer as this is all part of moderate sedation now and ECG should be required.

2) Section C - there is already a lot on input regarding this, but I would like the Board to consider verbiage such as this. "There shall be a two person team in the room with the patient at all times." I believe the Board's intent was to ensure that two people were always present at the time, and as the AAPD and ADA guidelines state, the person monitoring the patient may have minor interruptible tasks. In many practices, this might include an immediately available third assistant to function as a "circulator" much like a circulating nurse in the OR. Nevertheless, the established standard is a two person team. The only other explanation I have heard to justify this is the AADMS Parameters of Care that state in Deep Sedation or GA that if the person monitoring the patient have no other responsibilities. However, this is Deep Sedation or GA.

Finally, it may be prudent for the Board to consider when a patient may be considered adequately recovered for these teams to leave the room with a designated staff member. Unfortunately there have been numerous reports and associated morbidity and mortality when the sedation or anesthesia provider moves on to the next patient and leaves a patient with an "monitoring assistant." The ADA guidelines require that the patient return to a state of minimal sedation prior to leaving them with a dental assistant. This may vary if the delegated individual were say an RN or a CRNA whom is licensed and has the adequate training to thoroughly monitor say the moderately sedated patient in recovery.

Thank you for your time and consideration of the above comments,

NFPA 99 Considerations while updating sedation regulations

The National Fire Protection Association has had national standards on medical gas systems which are codified in the NFPA 99. NFPA 99 has included dental offices performing any form of sedation, anesthesia, and analgesia since at least 1996. However, these rules have been seldomly enforced in dental offices. In a discussion with members of the Virginia Society of Oral and Maxillofacial Surgeons, I was made aware that they have now made certification by an American Society of Sanitary Engineers (ASSE) 6030: medical gas verifier as part of their anesthesia self inspections for any new or renovated gas system. Given the unfortunate issues that have arisen in the past in Virginia, I would ask that the Board also consider these National Safety Standards when updating the sedation and anesthesia regulations.

In addition, the Dental Board has included by reference the American Academy of Pediatric Dentistry’s (AAPD) Guidelines on Monitoring and Management of Pediatric Patients During and After Sedation for Diagnostic and Therapeutic Procedures. However, there is no reference to AAPD Policy on the Use of Deep Sedation and General Anesthesia in the Pediatric Dental Office. In this policy it states, "The pediatric dentist is also responsible for establishing a safe environment that complies with local, state, and federal rules and regulations, as well as the Guideline for Monitoring and Management of Pediatric Patients During and After Sedation for Diagnostic and Therapeutic Procedures for the protection of the patient.‖ The NFPA 99 is the ANSI (Federal) standard for medical gas systems. In addition it is also adopted by reference in the International Plumbing Code and International Fire Code, which are adopted by the Statewide Building Code (State). Local enforcement of this has been variable, but the policy set forth by the AAPD and now by VSOMS suggests that the dentist is responsible for ensuring this step toward compliance is followed.

In addition, such great concern for patient safety In dentistry from lack of compliance with NFPA 99 exists, that the NFPA has included a new chapter in the 2018 revision of the NFPA 99 code. This chapter, Chapter 15, is solely about dental offices.
Virginia Regulatory Town Hall View Comments

I would ask that the Board consider these issues when changing the regulations on sedation and anesthesia. They may not be currently enforced in dentistry, but with the new 2016 changes they certainly will be in the future. I am uncertain if this is something that the Board of Dentistry wishes to address at this time while comment is open on these regulations, or if this should be left to Building Inspectors and Fire Marshals. Nevertheless, I believe it prudent to consider.

Sincerely,

clarification needed

Under section 18VAC80-21-280 K.2e and under section 18VAC80-21-291 D.2c we need clarification as to how often the vital signs has to be recorded. You can't record blood pressure every second, the machine takes longer than that to take it. Why did you get rid of the every 5 minutes. It is impossible to do it every second. You need a time measure, every 5 min for instance. If you don't have a specified time measure you open yourself up to people doing it every 10 min, 15 min etc.

Under section 18VAC80-21-280 C required staffing. I agree with the other commenters. For this level of sedation 2 people is sufficient. Requiring 3 people is against other national guidelines and would mean the dental board of Virginia is establishing their own national guidelines. The eds guidelines also only support a 2nd person not a 3rd.

Commenter: Dr. Kim Kitchen, Old Town Smiles  [8/28/18 1:27 pm]
Minimal Sedation Restriction Proposal

Drs., I am writing to voice my strong opinion on what your proposal to limit our sedation options. Oral Sedation has been proven to be one of the safest modalities. The ADA guidelines and the commonwealth states don't have as restrictive guidelines that you are proposing. My whole team has been ACLS certified and I have gone to multiple DOCS courses to prepare us for oral conscious sedation. Our patients feel that this is a huge benefit for them. Frankly, some of them wouldn't be seeing a dentist unless this is an option. These are the dental and needle phobic patients that depend on being sedated to have their work done. I am taking time to write you for you to please reconsider your proposal. This would impact so many of my needy patients.

Sincerely, Dr. Kim Kitchen

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8292
Commenter: Dr. Austin Westover

This will negatively affect the patients who need it the most

Making it more difficult to provide minimal sedation will harm the patients who need it the most. We have many patients whose finances are tight, and who are terrified of the dentist. The cheapest method of sedation available is for them to pick up a valium at the local pharmacy and take it a few hours before their appointment. Many of these patients arrive still very fearful and need something further. This leaves us with 2 options. Option 1 is to add some nitrous, which allows us to quickly titrate them to a precise mild sedation level. It's safe, effective, fast, and expelled from the body quickly. Option 2 is to add more pills, which is harder to titrate, slow, and requires significant post op observation time. It also carries an increased risk of oversedation that is much more difficult to correct. This increases the overall cost of the visit, which eliminates dental care for many of the needy. Making mild sedation more expensive and difficult will decrease the overall publics oral health, increase dental ER visits, and reduce access to care. Please do not make VA the most difficult state in the US to offer minimal sedation.

Commenter: Tontra Lowe, DDS

Opposition to Minimal Sedation Restrictions Proposal

First, thank you for listening to my comments. As a practicing general dentist who includes sedation dentistry as a part of my practice to help those in fear of the dentist, I implore you to reconsider the restrictions being proposed for MINIMAL sedation. Having a fear of the dentist is like having a fear of snakes. Could you imagine being in a den of slithering snakes and you hate snakes? That is what patients have described as the heart-pounding experience they have even from simply picking up the phone to call our office. These patients are dying inside from their lack of oral care and all is compounded by systemic disease working in synergy to their early demise. They need our help to SAFELY and EASILY gain access to care through sedation.

Your proposal would require IV sedation equivalent training for perhaps only a quadrant of dentistry. I am a fan of continual learning, but it has to make sense. Oral sedation is already proven to be the most safe method for helping phobic patients. If the ADA guidelines are not this restrictive, why are Virginia's? The best way to increase patient safety is not with arbitrary regulation and dosage requirements, but with adequate training, equipment, and patient monitoring. How does IV sedation training equate to safer oral sedation administration? My goal is minimal sedation if at all possible, but the patient has to be comfortable. Nitrous oxide in addition to the sedative is key to realizing lower dosages of medications. However, some patients just will need more than this proposal allows, and that is bad for the patient if this regulation passes.

Tooth pain is real and so is the fear of the dentist. Please do not pass these restrictions that will make it even harder for patients to receive and afford these services to improve their health. If dentists are required to attend these expensive courses for additional, unnecessary training, the cost is passed along to the patients. Patients can be safe and healthy WITHOUT these hefty restrictions and extra fees. My colleagues should be able to perform minimal sedation including nitrous oxide safely to improve access to care without arbitrary dose requirements. Please reconsider, and thank you for your time.

Commenter: Smiles for Life Dental Care - Dr Joseph McIntyre DDS

Proposed regulations changing the guidelines for oral sedation

http://townhall.virginia.gov/L/ViewComments.cfm?stageid=8292
Dear VA Dental Board,

Regulations Governing the Practice of Dentistry [18 VAC 60-21]

I am writing to voice my opposition to the proposed changes with oral conscious sedation. Our office has been oral sedation certified for almost 3 years and we have treated over 150 sedation patients without any incident. This is already a proven safe modality of treatment when the current regulations are followed. These patients are people that have avoided dental treatment for years—sometimes decades—due to their great fear of dentistry and often of needles. The availability of oral sedation has made it possible for them to move forward with care to improve their health and eliminate infection.

We generally use a combination of nitrous and Triazolam—generally about .5mg of Triazolam and sometimes up to .75mg if the patient is large. The proposed limiting of dosage and limiting sedation to just one medicine would limit the successfulness of sedation. The dosage of Triazolam that is needed for sedation varies according to the patient’s size, other medicines they are taking and their reaction to the sedation medicine. However, by using nitrous in combination with Triazolam, we don’t have to use as much Triazolam. By limiting the dosage or only allowing one of the meds, that will mean some patients are not adequately sedated to eliminate their anxiety about dental care and they will not have a comfortable, positive experience.

Our patients mostly choose oral sedation because they don’t like an IV needle and the cost for oral sedation is significantly lower which makes access to dental care more affordable. If there are concerns about any specific incidents, then that office should be visited to make sure the current guidelines are being adhered to. If more training is needed, then more training is a better way to increase patient safety rather than restricting the dosage of sedation meds. When the current guidelines are correctly followed, oral sedation is safe and allows access to care for many people that otherwise wouldn’t get dental care.

I would like to voice my feeling that this regulation would actually limit patient safety because people may not seek needed dental care if they have to have IV sedation. I feel these restrictive guidelines are not needed and do not increase patient safety and add a barrier to access of care for many people.

Thank You,

Dr. Joseph McIntyre DDS

Regulations Governing the Practice of Dentistry [18 VAC 60-21]

Dear VA Dental Board,

Regulations Governing the Practice of Dentistry [18 VAC 60-21]

I am writing to voice my opposition to the proposed changes with oral conscious sedation. Our office has been oral sedation certified for almost 3 years and we have treated over 150 sedation patients without any incident. This is already a proven safe modality of treatment when the current
regulations are followed. These patients are people that have avoided dental treatment for years - sometimes decades - due to their great anxiety associated with dentistry and needles. I fear that without this option we will create an unnecessary barrier to care preventing patients from receiving the help they need. The availability of oral sedation has made it possible for many patients to move forward with care.

In our office, we generally use a combination of nitrous and Triazolam - generally about .5mg of Triazolam and sometimes up to 7.5mg if the patient is large. The proposed limiting of dosage and limiting sedation to just one medicine would limit the successfulness of sedation as one dose does not fit all patients. The dosage of Triazolam that is needed for sedation varies according to the patient's size, other medicines they are taking and their reaction to the sedation medicine. However, by using nitrous in combination with Triazolam, we don't have to use as much Triazolam. By limiting the dosage or only allowing one of the medications, that will mean some patients are not adequately sedated to eliminate their anxiety about dental care and they will not have a comfortable, positive experience.

Our patients mostly choose oral sedation over IV sedation because they don't like an IV needle. Additionally the cost for oral sedation is significantly less than IV sedation allowing access to dental care to many who more are financially challenged. If there are concerns about any specific incidents, then that office should be visited to make sure the current guidelines are being adhered. A much better way to increase patient safety is to do more training rather than restricting the dosage of sedation medications. When the current guidelines are correctly followed, time has proven oral sedation is safe and allows access to care for many people that otherwise wouldn't get dental care. If we hope to improve public dental health we should be aware of our patients needs and the barriers they face when seeking treatment.

I would like to voice my feeling that this regulation would actually limit patient safety because people may not seek needed dental care, perpetuating a state of unhealthiness if their only option is to have IV sedation. I feel these restrictive guidelines are not the answer, not needed, and do not increase patient safety.

Best,

Minimal Sedation

To Whom it May Concern:

I would respectfully request that the board reconsider the suggested provision to minimal sedation. This new provision is more restrictive than in any other state & the ADA guidelines. Being able to provide our patients with minimal sedation greatly improves their access to care, especially for phobic patients. Some patients simply need more than this proposed dosage restriction allows and fear will keep them from seeking the treatment they need. These patients will continue to bombard ERs and Urgent care as they avoid treatment due to fear and the excessive cost associated with IV and General Anesthesia. Oral sedation is incredibly safe & I believe that the best way to increase patient safety is via training, equipment, team, and monitoring, not with arbitrary dosage restrictions.

Thank you for your time and consideration

Proposed regulations changing the guidelines for oral sedation

Regulations Governing the Practice of Dentistry [18 VAC 60 - 21]

I am writing to voice my opposition to the proposed changes with oral conscious sedation. Our office has been oral sedation certified for almost 3 years and we have treated over 150 sedation patients without any incident. This is already a proven safe modality of treatment when the current regulations are followed. These patients are people that have avoided dental treatment for years – sometimes decades - due to their great anxiety associated with dentistry and needles. I fear that without this option we will create an unnecessary barrier to care preventing patients from receiving the help they need. The availability of oral sedation has made it possible for many patients to move forward with care.

In our office, we generally use a combination of nitrous and Triazolam – generally about .5mg of Triazolam and sometimes up to .75mg if the patient is large. The proposed limiting of dosage and limiting sedation to just one medicine would limit the successfulness of sedation as one dose does not fit all patients. The dosage of Triazolam that is needed for sedation varies according to the patient's size, other medicines they are taking and their reaction to the sedation medicine.

However, by using nitrous in combination with Triazolam, we don't have to use as much Triazolam. By limiting the dosage or only allowing one of the medications, that will mean some patients are not adequately sedated to eliminate their anxiety about dental care and they will not have a comfortable, positive experience.

Our patients mostly choose oral sedation over IV sedation because they don't like an IV needle. Additionally the cost for oral sedation is significantly less than IV sedation allowing access to dental care to many who more are financially challenged. If there are concerns about any specific
Incidents, then that office should be visited to make sure the current guidelines are being adhered. A much better way to increase patient safety is to do more training rather than restricting the dosage of sedation medications. When the current guidelines are correctly followed, time has proven oral sedation is safe and allows access to care for many people that otherwise wouldn't get dental care. If we hope to improve public dental health we should be aware of our patient’s needs and the barriers they face when seeking treatment.

I am opposed to the proposed guideline of having 3 people in the sedation operatory. We always have 2 people there but a third person is not needed. The ADA guidelines just recommend 2 people. There are always others in the office that are close by and could come to the room if needed.

I would like to voice my feeling that this regulation would actually limit patient safety because people may not seek needed dental care, perpetuating a state of unhealthiness if their only option is to have IV sedation. I feel these restrictive guidelines are not the answer, not needed, and do not increase patient safety.

Reconsider provision to minimal sedation

This email is written for a request to reconsider the change in the provision for minimal sedation. There are no states with a minimal sedation provision this restrictive. The ADA guidelines, also, do not have a provision as restrictive.

This provision will take away an option to many patients who seek comfort and anxiety relief from the dental environment. It will deter patients from seeking care for simple routine treatment which will eventually lead to more invasive and costly procedures in the future.
18VAC80-21-10. Definitions.

A. The following words and terms when used in this chapter shall have the meanings ascribed to them in § 54.1-2700 of the Code of Virginia:

"Board"

"Dental hygiene"

"Dental hygienist"

"Dentist"

"Dentistry"

"License"

"Maxillofacial"

"Oral and maxillofacial surgeon"

B. The following words and terms when used in this chapter shall have the following meanings unless the context clearly indicates otherwise:

"AAOMS" means the American Association of Oral and Maxillofacial Surgeons.

"ADA" means the American Dental Association.
"Advertising" means a representation or other notice given to the public or members thereof, directly or indirectly, by a dentist on behalf of himself, his facility, his partner or associate, or any dentist affiliated with the dentist or his facility by any means or method for the purpose of inducing purchase, sale, or use of dental methods, services, treatments, operations, procedures, or products, or to promote continued or increased use of such dental methods, treatments, operations, procedures, or products.

"CODA" means the Commission on Dental Accreditation of the American Dental Association.

"Code" means the Code of Virginia.

"Dental assistant I" means any unlicensed person under the direction of a dentist or a dental hygienist who renders assistance for services provided to the patient as authorized under this chapter but shall not include an individual serving in purely an administrative, secretarial, or clerical capacity.

"Dental assistant II" means a person under the direction and direct supervision of a dentist who is registered by the board to perform reversible, intraoral procedures as specified in 18VAC50-21-150 and 18VAC60-21-160.

"Mobile dental facility" means a self-contained unit in which dentistry is practiced that is not confined to a single building and can be transported from one location to another.

"Nonsurgical laser" means a laser that is not capable of cutting or removing hard tissue, soft tissue, or tooth structure.

"Portable dental operation" means a nonfacility in which dental equipment used in the practice of dentistry is transported to and utilized on a temporary basis at an out-of-office location, including patients' homes, schools, nursing homes, or other institutions.
"Radiographs" means intraoral and extraoral radiographic images of hard and soft tissues used for purposes of diagnosis.

C. The following words and terms relating to supervision as used in this chapter shall have the following meanings unless the context clearly indicates otherwise:

"Direct supervision" means that the dentist examines the patient and records diagnostic findings prior to delegating restorative or prosthetic treatment and related services to a dental assistant II for completion the same day or at a later date. The dentist prepares the tooth or teeth to be restored and remains immediately available in the office to the dental assistant II for guidance or assistance during the delivery of treatment and related services. The dentist examines the patient to evaluate the treatment and services before the patient is dismissed.

"Direction" means the level of supervision (i.e., immediate, direct, indirect, or general) that a dentist is required to exercise with a dental hygienist, a dental assistant I, or a dental assistant II, or a certified registered nurse anesthetist or the level of supervision that a dental hygienist is required to exercise with a dental assistant to direct and oversee the delivery of treatment and related services.

"General supervision" means that a dentist completes a periodic comprehensive examination of the patient and issues a written order for hygiene treatment that states the specific services to be provided by a dental hygienist during one or more subsequent appointments when the dentist may or may not be present. Issuance of the order authorizes the dental hygienist to supervise a dental assistant performing duties delegable to dental assistants I.

"Immediate supervision" means the dentist is in the operator to supervise the administration of sedation or provision of treatment.
"Indirect supervision" means the dentist examines the patient at some point during the appointment and is continuously present in the office to advise and assist a dental hygienist, or a dental assistant, or a certified registered nurse anesthetist who is (I) delivering hygiene treatment, (II) preparing the patient for examination or treatment by the dentist, or (III) preparing the patient for dismissal following treatment, (iv) or administering topical local anesthetic, sedation or anesthesia, as authorized by law or regulation.

"Remote supervision" means that a supervising dentist is accessible and available for communication and consultation with a dental hygienist during the delivery of dental hygiene services but such dentist may not have conducted an initial examination of the patients who are to be seen and treated by the dental hygienist and may not be present with the dental hygienist when dental hygiene services are being provided. For the purpose of practice by a public health dental hygienist, "remote supervision" means that a public health dentist has regular, periodic communications with a public health dental hygienist regarding patient treatment, but such dentist may not have conducted an initial examination of the patients who are to be seen and treated by the dental hygienist and may not be present with the dental hygienist when dental hygiene services are being provided.

D. The following words and terms relating to sedation or anesthesia as used in this chapter shall have the following meanings unless the context clearly indicates otherwise:

"Analgesia" means the diminution or elimination of pain.

"Conscious/moderate sedation" or "moderate sedation" means a drug-induced depression of consciousness, during which patients respond purposefully to verbal commands, either alone or accompanied by light tactile stimulation. Reflex withdrawal from a painful stimulus is not considered a purposeful response. No interventions are required to maintain a
patent airway, and spontaneous ventilation is adequate. Cardiovascular function is usually maintained.

"Continual" or "continually" means repeated regularly and frequently in a steady succession.

"Continuous" or "continuously" means prolonged without any interruption at any time.

"Deep sedation" means a drug-induced depression of consciousness during which patients cannot be easily aroused but respond purposefully following repeated or painful stimulation. Reflex withdrawal from a painful stimulus is not considered a purposeful response. The ability to independently maintain ventilatory function may be impaired. Patients may require assistance in maintaining a patent airway, and spontaneous ventilation may be inadequate. Cardiovascular function is usually maintained.

"Enteral" means any technique of administration in which the agent is absorbed through the gastrointestinal tract or oral mucosa (i.e., oral, rectal, sublingual).

"General anesthesia" means a drug-induced loss of consciousness during which patients are not arousable, even by painful stimulation. The ability to independently maintain ventilator function is often impaired. Patients often require assistance in maintaining a patent airway, and positive pressure ventilation may be required because of depressed spontaneous ventilation or drug-induced depression of neuromuscular function. Cardiovascular function may be impaired.

"Inhalation" means a technique of administration in which a gaseous or volatile agent, including nitrous oxide, is introduced into the pulmonary tree and whose primary effect is due to absorption through the pulmonary bed.

"Inhalation analgesia" means the inhalation of nitrous oxide and oxygen to produce a state of reduced sensation of pain with minimal alteration of consciousness.
"Local anesthesia" means the elimination of sensation, especially pain, in one part of the body by the topical application or regional injection of a drug.

"Minimal sedation" means a drug-induced state during which patients respond normally to verbal commands. Although cognitive function and physical coordination may be impaired, airway reflexes, and ventilator and cardiovascular functions are unaffected. Minimal sedation includes "anxiolysis" (the diminution or elimination of anxiety through the use of pharmacological agents in a dosage that does not cause depression of consciousness) and includes "inhalation analgesia" when used in combination with any anxiolytic agent administered prior to or during a procedure.

"Moderate sedation" (see the definition of conscious/moderate sedation).

"Monitoring" means to observe, interpret, assess, and record appropriate physiologic functions of the body during sedative procedures and general anesthesia appropriate to the level of sedation as provided in Part VI (18VAC80-21-280 et seq.) of this chapter.

"Parenteral" means a technique of administration in which the drug bypasses the gastrointestinal tract (i.e., intramuscular, intravenous, intranasal, submucosal, subcutaneous, or intraocular).

"Titration" means the incremental increase in drug dosage to a level that provides the optimal therapeutic effect of sedation.

"Topical oral anesthetic" means any drug, available in creams, ointments, aerosols, sprays, lotions, or jellies, that can be used orally for the purpose of rendering the oral cavity insensitive to pain without affecting consciousness.
Part VI

Controlled Substances, Sedation, and Anesthesia

A. Application of Part VI. Part VI of this chapter:

1. This part applies to prescribing, dispensing, and administering controlled substances in dental offices, mobile dental facilities, and portable dental operations and shall not apply to administration by a dentist practicing in (i) a licensed hospital as defined in § 32.1-123 of the Code, (ii) a state-operated hospital, or (iii) a facility directly maintained or operated by the federal government.

2. Addresses the minimum requirements for administration to patients of any age. Guidelines for Monitoring and Management of Pediatric Patients During and After Sedation for Diagnostic and Therapeutic Procedures, issued by the American Academy of Pediatrics and American Academy of Pediatric Dentistry should be consulted when practicing pediatric dentistry.

B. Registration required. Any dentist who prescribes, administers, or dispenses Schedules II through V controlled drugs must hold a current registration with the federal Drug Enforcement Administration.

C. Patient evaluation required.

1. An appropriate medical history and patient evaluation including medication use and a focused physical exam shall be performed before the decision to administer controlled drugs for dental treatment is made. The decision to administer controlled drugs for dental treatment must be based on a documented evaluation of the health history and current medical condition of the patient in accordance with the Class I through V risk category classifications of the American Society of Anesthesiologists (ASA) in effect at the time of...
treatment. The findings of the evaluation, the ASA risk assessment class assigned, and any special considerations must be recorded in the patient's record.

2. Any level of sedation and general anesthesia may be provided for a patient who is ASA Class I and Class II.

3. A patient in ASA Class III shall only be provided minimal sedation, conscious/moderate sedation, deep sedation, or general anesthesia by:
   a. A dentist after he has documented a consultation with the patient's primary care physician or other medical specialist regarding potential risks and special monitoring requirements that may be necessary;
   b. An oral and maxillofacial surgeon who has performed a physical evaluation and documented the findings and the ASA risk assessment category of the patient and any special monitoring requirements that may be necessary; or
   c. A person licensed under Chapter 29 (§ 54.1-2900 et seq.) of Title 54.1 of the Code who has a specialty in anesthesia.

4. Minimal sedation may only be provided for a patient who is in ASA Class IV by:
   a. A dentist after he has documented a consultation with the patient's primary care physician or other medical specialist regarding potential risks and special monitoring requirements that may be necessary; or
   b. An oral and maxillofacial surgeon who has performed a physical evaluation and documented the findings and the ASA risk assessment category of the patient and any special monitoring requirements that may be necessary.

5. Conscious/moderate sedation, deep sedation, or general anesthesia shall not be provided in a dental office for patients in ASA Class IV and Class V.
D. Additional requirements for patient information and records. In addition to the record requirements in 18VAC80-21-90, when conscious/moderate sedation, deep sedation, or general anesthesia is administered, the patient record shall also include:

1. Notation of the patient’s American Society of Anesthesiologists classification;

2. Review of medical history and current conditions, including the patient’s weight and height or, if appropriate, the body mass index;

3. Written informed consent for administration of sedation and anesthesia and for the dental procedure to be performed;

4. Preoperative vital signs;

5. A record of the name, dose, and strength of drugs and route of administration including the administration of local anesthetics with notations of the time sedation and anesthesia were administered;

6. Monitoring records of all required vital signs and physiological measures recorded every five minutes continually; and

7. A list of staff participating in the administration, treatment, and monitoring including name, position, and assigned duties.

E. Pediatric patients. No sedating medication shall be prescribed for or to be administered to a patient 12 years of age or younger prior to his arrival at the dentist office or treatment facility.

F. Informed written consent. Prior to administration of any level of sedation or general anesthesia, the dentist shall discuss the nature and objectives of the planned level of sedation or general anesthesia along with the risks, benefits, and alternatives and shall obtain informed, written consent from the patient or other responsible party for the administration and for the treatment to be provided. The written consent must be maintained in the patient record.
G. Level of sedation. The determinant for the application of the rules for any level of sedation or for general anesthesia shall be the degree of sedation or consciousness level of a patient that should reasonably be expected to result from the type, strength, and dosage of medication, the method of administration, and the individual characteristics of the patient as documented in the patient's record. The drugs and techniques used must carry a margin of safety wide enough to render the unintended reduction of or loss of consciousness unlikely, factoring in titration and the patient's age, weight, and ability to metabolize drugs.

H. Emergency management.

1. If a patient enters a deeper level of sedation than the dentist is qualified and prepared to provide, the dentist shall stop the dental procedure until the patient returns to and is stable at the intended level of sedation.

2. A dentist in whose office sedation or anesthesia is administered shall have written basic emergency procedures established and staff trained to carry out such procedures.

I. Ancillary personnel. Dentists who employ unlicensed, ancillary personnel to assist in the administration and monitoring of any form of minimal sedation, conscious/moderate sedation, deep sedation, or general anesthesia shall maintain documentation that such personnel have:

1. Training and hold current certification in basic resuscitation techniques with hands-on airway training for health care providers, such as Basic Cardiac Life Support for Health Professionals or a clinically oriented course devoted primarily to responding to clinical emergencies offered by an approved provider of continuing education as set forth in 18VAC80-21-250 C; or

2. Current certification as a certified anesthesia assistant (CAA) by the American Association of Oral and Maxillofacial Surgeons or the American Dental Society of Anesthesiology (ADSA).
J. Assisting in administration. A dentist, consistent with the planned level of administration (i.e., local anesthesia, minimal sedation, conscious/moderate sedation, deep sedation, or general anesthesia) and appropriate to his education, training, and experience, may utilize the services of a dentist, anesthesiologist, certified registered nurse anesthetist, dental hygienist, dental assistant, or nurse to perform functions appropriate to such practitioner's education, training, and experience and consistent with that practitioner's respective scope of practice.

K. Patient monitoring.

1. A dentist may delegate monitoring of a patient to a dental hygienist, dental assistant, or nurse who is under his direction or to another dentist, anesthesiologist, or certified registered nurse anesthetist. The person assigned to monitor the patient shall be continuously in the presence of the patient in the office, operatory, and recovery area (i) before administration is initiated or immediately upon arrival if the patient self-administered a sedative agent, (ii) throughout the administration of drugs, (iii) throughout the treatment of the patient, and (iv) throughout recovery until the patient is discharged by the dentist.

2. The person monitoring the patient shall:

   a. Have the patient's entire body in sight;

   b. Be in close proximity so as to speak with the patient;

   c. Converse with the patient to assess the patient's ability to respond in order to determine the patient's level of sedation;

   d. Closely observe the patient for coloring, breathing, level of physical activity, facial expressions, eye movement, and bodily gestures in order to immediately recognize and bring any changes in the patient's condition to the attention of the treating dentist; and

   e. Read, report, and record the patient's vital signs and physiological measures.
L. A dentist who allows the administration of general anesthesia, deep sedation, or conscious/moderate sedation in his dental office is responsible for assuring that:

1. The equipment for administration and monitoring, as required in subsection B of 18VAC60-21-291 or subsection C of 18VAC60-21-301, is readily available and in good working order prior to performing dental treatment with anesthesia or sedation. The equipment shall either be maintained by the dentist in his office or provided by the anesthesia or sedation provider; and

2. The person administering the anesthesia or sedation is appropriately licensed and the staff monitoring the patient is qualified.

M. Special needs patients.

If a patient is mentally or physically challenged, and it is not possible to have a comprehensive physical examination or appropriate laboratory tests prior to administering care, the dentist is responsible for documenting in the patient record the reasons preventing the recommended preoperative management. In selected circumstances, sedation or general anesthesia may be utilized without establishing an intravenous line. These selected circumstances include very brief procedures or periods of time, which may occur in some patients; or the establishment of intravenous access after deep sedation or general anesthesia has been induced because of poor patient cooperation.

18VAC60-21-270. Administration of local anesthesia.

A dentist may administer or use the services of the following personnel to administer local anesthesia:

1. A dentist;

2. An anesthesiologist;
3. A certified registered nurse anesthetist under his medical direction and indirect supervision;

4. A dental hygienist with the training required by 18VAC80-25-100 C to parenterally administer Schedule VI local anesthesia to persons 18 years of age or older under his indirect supervision;

5. A dental hygienist to administer Schedule VI topical oral anesthetics under indirect supervision or under his order for such treatment under general supervision; or

6. A dental assistant or a registered or licensed practical nurse to administer Schedule VI topical oral anesthetics under indirect supervision.

18VAC80-21-279. Administration of only minimal sedation inhalation analgesia (nitrous oxide only).

A. Education and training requirements. A dentist who utilizes nitrous oxide shall have training in and knowledge of:

1. The appropriate use and physiological effects of nitrous oxide, the potential complications of administration, the indicators for complications, and the interventions to address the complications.

2. The use and maintenance of the equipment required in subsection D of this section.

B. No sedating medication shall be prescribed for or to be administered to a patient 12 years of age or younger prior to his arrival at the dental office or treatment facility.

C. Delegation of administration.

1. A qualified dentist may administer or use the services of the following personnel to administer nitrous oxide:

   a. A dentist;
b. An anesthesiologist;

c. A certified registered nurse anesthetist under his medical direction and indirect supervision;

d. A dental hygienist with the training required by 18VAC60-25-100 B and under indirect supervision; or

e. A registered nurse upon his direct instruction and under immediate supervision.

2. Preceding the administration of nitrous oxide, a dentist may use the services of the following personnel working under indirect supervision to administer local anesthesia to numb an injection or treatment site:

a. A dental hygienist with the training required by 18VAC60-25-100 C to parenterally administer Schedule VI local anesthesia to persons 18 years of age or older; or

b. A dental hygienist, dental assistant, registered nurse, or licensed practical nurse to administer Schedule VI topical oral anesthetics.

D. Equipment requirements. A dentist who utilizes nitrous oxide only or who directs the administration by another licensed health professional as permitted in subsection C of this section shall maintain the following equipment in working order and immediately available to the areas where patients will be sedated and treated and will recover:

1. Blood pressure monitoring equipment;

2. Source of delivery of oxygen under controlled positive pressure;

3. Mechanical (hand) respiratory bag; and

4. Suction apparatus; and

5. Oxygen saturation with pulse oximeter, unless extenuating circumstances exist and are documented in the patient's record.
E. Required staffing. When only nitrous oxide/oxygen is administered, a second person in the operatory is not required. Either the dentist or qualified dental hygienist under the indirect supervision of a dentist may administer the nitrous oxide/oxygen and treat and monitor the patient.

F. Monitoring requirements.

1. Baseline vital signs, to include blood pressure and heart rate, shall be taken and recorded prior to administration of nitrous oxide analgesia, intraoperatively as necessary, and prior to discharge, unless extenuating circumstances exist and are documented in the patient's record.

2. Continual clinical observation of the patient's responsiveness, color, respiratory rate, and depth of ventilation shall be performed.

3. Once the administration of nitrous oxide has begun, the dentist shall ensure that a licensed health care professional or a person qualified in accordance with 18VAC60-21-260 I monitors the patient at all times until discharged as required in subsection G of this section.

4. Monitoring shall include making the proper adjustments of nitrous oxide/oxygen machines at the request of or by the dentist or by another qualified licensed health professional identified in subsection C of this section. Only the dentist or another qualified licensed health professional identified in subsection C of this section may turn the nitrous oxide/oxygen machines on or off.

5. Upon completion of nitrous oxide administration, the patient shall be administered 100% oxygen for a minimum of five minutes to minimize the risk of diffusion hypoxia.

G. Discharge requirements.

1. The dentist shall not discharge a patient until he exhibits baseline responses in a post-operative evaluation of the level of consciousness. Vital signs, to include blood pressure
and heart rate, shall be taken and recorded prior to discharge, unless extenuating circumstances exist and are documented in the patient's record.

2. Post-operative instructions shall be given verbally and in writing. The written instructions shall include a 24-hour emergency telephone number.

3. Pediatric patients shall be discharged with a responsible individual who has been instructed with regard to the patient's care.

18VAC80-21-280. Administration of minimal sedation.

A. Education and training requirements. A dentist who utilizes minimal sedation shall have training in and knowledge of:

1. The medications used, the appropriate dosages, the potential complications of administration, the indicators for complications, and the interventions to address the complications.

2. The physiological effects of minimal sedation, the potential complications of administration, the indicators for complications, and the interventions to address the complications.

3. The use and maintenance of the equipment required in subsection D of this section.

B. No sedating medication shall be prescribed for or administered to a patient 12 years of age or younger prior to his arrival at the dental office or treatment facility.

C. Delegation of administration.

1. A qualified dentist may administer or use the services of the following personnel to administer minimal sedation:

   a. A dentist;

   b. An anesthesiologist;
c. A certified registered nurse anesthetist under his medical direction and indirect supervision;

d. A dental hygienist with the training required by 18VAC80-25-100 C & B only for administration of nitrous oxide/oxygen with the dentist present in the operatory under indirect supervision; or

e. A registered nurse upon his direct instruction and under immediate supervision.

2. Preceding the administration of minimal sedation, a dentist may use the services of the following personnel working under indirect supervision to administer local anesthesia to numb an injection or treatment site:

   a. A dental hygienist with the training required by 18VAC80-25-100 C to parenterally administer Schedule VI local anesthesia to persons 18 years of age or older; or

   b. A dental hygienist, dental assistant, registered nurse, or licensed practical nurse to administer Schedule VI topical oral anesthetics.

3. If minimal sedation is self-administered by or to a patient 13 years of age or older before arrival at the dental office or treatment facility, the dentist may only use the personnel listed in subdivision 1 of this subsection to administer local anesthesia.

D. Equipment requirements. A dentist who utilizes minimal sedation or who directs the administration by another licensed health professional as permitted in subsection C of this section shall maintain the following equipment in working order and immediately available to the areas where patients will be sedated and treated and will recover:

1. Blood pressure monitoring equipment;

2. Source of delivery of oxygen under controlled positive pressure;

3. Mechanical (hand) respiratory bag;
4. Suction apparatus; and

5. Pulse oximeter.

E. Required staffing. The treatment team for minimal sedation shall consist of the dentist and a second person in the operatory with the patient to assist the dentist and monitor the patient. The second person shall be a licensed health care professional or a person qualified in accordance with 18VAC80-21-260 L.

F. Monitoring requirements.

1. Baseline vital signs to include blood pressure, respiratory rate, and heart rate, and oxygen saturation shall be taken and recorded prior to administration of sedation and prior to discharge.

2. Blood pressure, oxygen saturation, respiratory rate, and pulse shall be monitored continuously during the procedure unless extenuating circumstances exist and are documented in the patient’s record.

3. Once the administration of minimal sedation has begun by any route of administration, the dentist shall ensure that a licensed health care professional or a person qualified in accordance with 18VAC80-21-260 L monitors the patient at all times until discharged as required in subsection G of this section.

4. If nitrous oxide/oxygen is used in addition to any other pharmacological agent, monitoring shall include making the proper adjustments of nitrous oxide/oxygen machines at the request of or by the dentist or by another qualified licensed health professional identified in subsection C of this section. Only the dentist or another qualified licensed health professional identified in subsection C of this section may turn the nitrous oxide/oxygen machines on or off deeper levels of sedation or general anesthesia may be produced, and the regulations for the induced level shall be followed. The administration
of one drug in excess of the maximum recommended dose or of two or more drugs, with or without nitrous oxide, exceeds minimal sedation and requires compliance with the regulations for the level of sedation induced.

5. Monitoring shall include making the proper adjustments of nitrous oxide/oxygen machines at the request of or by the dentist or by another qualified licensed health professional identified in subsection C of this section. Only the dentist or another qualified licensed health professional identified in subsection C of this section may turn the nitrous oxide/oxygen machines on or off.

6. If any other pharmacological agent is used in addition to nitrous oxide/oxygen and a local anesthetic, requirements for the induced level of sedation must be met.

G. Discharge requirements.

1. The dentist shall not discharge a patient until he exhibits baseline responses in a post-operative evaluation of the level of consciousness. Vital signs, to include blood pressure, respiratory rate, and heart rate, and oxygen saturation shall be taken and recorded prior to discharge unless extenuating circumstances exist and are documented in the patient's record.

2. Post-operative Instructions shall be given verbally and in writing. The written instructions shall include a 24-hour emergency telephone number.

3. Pediatric patients shall be discharged with a responsible individual who has been instructed with regard to the patient's care.

18VAC60-21-290. Requirements for a conscious/moderate sedation permit.

A. After March 31, 2013, no dentist may employ or use provide or administer conscious/moderate sedation in a dental office unless he has been issued a permit by the board. The requirement for a permit shall not apply to an oral and maxillofacial surgeon who maintains
membership in the American Association of Oral and Maxillofacial Surgeons (AAOMS) and who provides the board with reports that result from the periodic office examinations required by AAOMS. Such an oral and maxillofacial surgeon shall be required to post a certificate issued by AAOMS.

B. Automatic qualification. Dentists who hold a current permit to administer deep sedation and general anesthesia may administer conscious/moderate sedation.

C. To determine eligibility for a conscious/moderate sedation permit, a dentist shall submit the following:

1. A completed application form indicating one of the following permits for which the applicant is qualified:

   a. Conscious/moderate sedation by any method;

   b. Conscious/moderate sedation by enteral administration only; or

   c. Temporary conscious/moderate sedation permit (may be renewed one time);

2. The application fee as specified in 18VAC60-21-40;

3. A copy of a transcript, certification, or other documentation of training content that meets the educational and training qualifications as specified in subsection D of this section, as applicable; and

4. A copy of current certification in advanced cardiac life support (ACLS) or pediatric advanced life support (PALS) as required in subsection E of this section.

D. Education requirements for a permit to administer conscious/moderate sedation.

1. Administration by any method. A dentist may be issued a conscious/moderate sedation permit to administer by any method by meeting one of the following criteria:
a. Completion of training for this treatment modality according to the ADA's Guidelines for Teaching the Comprehensive Control of Anxiety and Pain in Dentistry in effect at the time the training occurred, while enrolled in an accredited dental program or while enrolled in a post-doctoral university or teaching hospital program; or

b. Completion of a continuing education course that meets the requirements of 18VAC80-21-250 and consists of (i) 60 hours of didactic instruction plus the management of at least 20 patients per participant, (ii) demonstration of competency and clinical experience in conscious/moderate sedation, and (iii) management of a compromised airway. The course content shall be consistent with the ADA's Guidelines for Teaching the Comprehensive Control of Anxiety and Pain in Dentistry in effect at the time the training occurred.

2. Enteral administration only. A dentist may be issued a conscious/moderate sedation permit to administer only by an enteral method if he has completed a continuing education program that meets the requirements of 18VAC80-21-250 and consists of not less than 18 hours of didactic instruction plus 20 clinically oriented experiences in enteral or a combination of enteral and nitrous oxide/oxygen conscious/moderate sedation techniques. The course content shall be consistent with the ADA's Guidelines for Teaching the Comprehensive Control of Anxiety and Pain in Dentistry in effect at the time the training occurred. The certificate of completion and a detailed description of the course content must be maintained.

3. A dentist who self-certified his qualifications in anesthesia and moderate sedation prior to January 1989 may be issued a temporary conscious/moderate sedation permit to continue to administer only conscious/moderate sedation until May 7, 2015. After May 7, 2015, a dentist shall meet the requirements for and obtain a conscious/moderate sedation permit to administer by any method or by enteral administration only.
E. Additional training required. Dentists who administer conscious/moderate sedation shall:

1. Hold current certification in advanced resuscitation techniques with hands-on simulated airway and megacode training for health care providers, such as ACLS or PALS as evidenced by a certificate of completion posted with the dental license; and

2. Have current training in the use and maintenance of the equipment required in 18VAC60-21-291.

18VAC60-21-291. Requirements for administration of conscious/moderate sedation.

A. Delegation of administration.

1. A dentist who does not hold a permit to administer conscious/moderate sedation shall only use the services of a qualified dentist or an anesthesiologist to administer such sedation in a dental office. In a licensed outpatient surgery center, a dentist who does not hold a permit to administer conscious/moderate sedation shall use a qualified dentist, an anesthesiologist, or a certified registered nurse anesthetist to administer such sedation.

2. A dentist who holds a permit may administer or use the services of the following personnel to administer conscious/moderate sedation:

   a. A dentist with the training required by 18VAC60-21-290 D 2 to administer by an enteral method;

   b. A dentist with the training required by 18VAC60-21-290 D 1 to administer by any method;

   c. An anesthesiologist;

   d. A certified registered nurse anesthetist under the medical direction and indirect supervision of a dentist who meets the training requirements of 18VAC60-21-290 D 1; or
e. A registered nurse upon his direct instruction and under the immediate supervision of a dentist who meets the training requirements of 18VAC60-21-290 D 1.

3. If minimal sedation is self-administered by or to a patient 13 years of age or older before arrival at the dental office, the dentist may only use the personnel listed in subdivision 2 of this subsection to administer local anesthesia. No sedating medication shall be prescribed for or to be administered to a patient 12 years of age or younger prior to his arrival at the dentist office or treatment facility.

4. Proceeding the administration of conscious/moderate sedation, a permitted dentist may use the services of the following personnel under indirect supervision to administer local anesthesia to anesthetize the injection or treatment site:

   a. A dental hygienist with the training required by 18VAC60-25-100 C to parenterally administer Schedule VI local anesthesia to persons 18 years of age or older; or

   b. A dental hygienist, dental assistant, registered nurse, or licensed practical nurse to administer Schedule VI topical oral anesthetics.

5. A dentist who delegates administration of conscious/moderate sedation shall ensure that:

   a. All equipment required in subsection B of this section is present, in good working order, and immediately available to the areas where patients will be sedated and treated and will recover; and

   b. Qualified staff is on site to monitor patients in accordance with requirements of subsection D of this section.

B. Equipment requirements. A dentist who provides or administers conscious/moderate sedation shall have available the following equipment in sizes for adults or children as appropriate
for the patient being treated and shall maintain it in working order and immediately available to
the areas where patients will be sedated and treated and will recover:

1. Full face mask or masks;

2. Oral and nasopharyngeal airway management adjuncts;

3. Endotracheal tubes with appropriate connectors or other appropriate airway
management adjunct such as a laryngeal mask airway;

4. A laryngoscope with reserve batteries and bulbs and appropriately sized
laryngoscope blades;

5. Pulse oximetry;

6. Blood pressure monitoring equipment;

7. Pharmacologic antagonist agents;

8. Source of delivery of oxygen under controlled positive pressure;

9. Mechanical (hand) respiratory bag;

10. Appropriate emergency drugs for patient resuscitation;

11. Electrocardiographic monitor if a patient is receiving parenteral administration of
sedation or if the dentist is using titration;

12. Defibrillator;

13. Suction apparatus;

14. Temperature measuring device;

15. Throat pack Airway protective device;

16. Precordial or pretracheal stethoscope; and

17. An end-tidal carbon dioxide monitor (capnograph); and
18. Equipment necessary to establish intravenous or intramuscular access.

C. Required staffing. At a minimum, there shall be a two-person three-person treatment team for conscious/moderate sedation. The team shall include the operating dentist and a second, one person to monitor the patient as provided in 18VAC80-21-260 K, and one person to assist the operating dentist as provided in 18VAC80-21-260 J, both all of whom shall be in the operatory with the patient throughout the dental procedure. If the second person is a dentist, an anesthesiologist, or a certified registered nurse anesthetist who administers the drugs as permitted in 18VAC80-21-291 A, such person may monitor the patient.

D. Monitoring requirements.

1. Baseline vital signs to include blood pressure, oxygen saturation, respiratory rate and heart rate shall be taken and recorded prior to administration of any controlled drug at the facility and prior to discharge.

2. Blood pressure, oxygen saturation, and end-tidal carbon dioxide, and pulse shall be monitored continually during the administration and recorded every five minutes unless precluded or invalidated by the nature of the patient, procedure or equipment.

3. Monitoring of the patient under conscious/moderate sedation is to begin prior to administration of sedation or, if pre-medication is self-administered by the patient, immediately upon the patient’s arrival at the dental facility and shall take place continuously during the dental procedure and recovery from sedation. The person who administers the sedation or another licensed practitioner qualified to administer the same level of sedation must remain on the premises of the dental facility until the patient is evaluated and is discharged.

E. Discharge requirements.
1. The patient shall not be discharged until the responsible licensed practitioner determines that the patient's level of consciousness, oxygenation, ventilation, and circulation blood pressure and heart rate are satisfactory for discharge and vital signs have been taken and recorded.

2. Post-operative instructions shall be given verbally and in writing. The written instructions shall include a 24-hour emergency telephone number.

3. The patient shall be discharged with a responsible individual who has been instructed with regard to the patient's care.

4. If a separate recovery area is utilized, oxygen and suction equipment shall be immediately available in that area.

5. Since re-sedation may occur once the effects of the reversal agent have waned, the patient shall be monitored for a longer period than usual if a pharmacological reversal agent has been administered before discharge criteria have been met.

F. Emergency management. The dentist shall be proficient in handling emergencies and complications related to pain control procedures, including the maintenance of respiration and circulation, immediate establishment of an airway, and cardiopulmonary resuscitation.

18VAC60-21-300. Requirements for a deep sedation/general anesthesia permit.

A. After March 31, 2013, no dentist may employ or use provide or administer deep sedation or general anesthesia in a dental office unless he has been issued a permit by the board. The requirement for a permit shall not apply to an oral and maxillofacial surgeon who maintains membership in AAOMS and who provides the board with reports that result from the periodic office examinations required by AAOMS. Such an oral and maxillofacial surgeon shall be required to post a certificate issued by AAOMS.
B. To determine eligibility for a deep sedation/general anesthesia permit, a dentist shall submit the following:

1. A completed application form;

2. The application fee as specified in 18VAC80-21-40;

3. A copy of the certificate of completion of a CODA accredited program or other documentation of training content which meets the educational and training qualifications specified in subsection C of this section; and

4. A copy of current certification in Advanced Cardiac Life Support for Health Professionals (ACLS) or Pediatric Advanced Life Support for Health Professionals (PALS) as required in subsection C of this section.

C. Educational and training qualifications for a deep sedation/general anesthesia permit.

1. Completion of a minimum of one calendar year of advanced training in anesthesiology and related academic subjects beyond the undergraduate dental school level in a training program in conformity with the ADA's Guidelines for Teaching the Comprehensive Control of Anxiety and Pain in Dentistry in effect at the time the training occurred; or

2. Completion of an CODA accredited residency in any dental specialty that incorporates into its curriculum a minimum of one calendar year of full-time training in clinical anesthesia and related clinical medical subjects (i.e., medical evaluation and management of patients) comparable to those set forth in the ADA's Guidelines for Graduate and Postgraduate Training in Anesthesia in effect at the time the training occurred; and

3. Current certification in advanced resuscitative techniques with hands-on simulated airway and meagascode training for health care providers, including basic electrocardiographic interpretations, such as courses in ACLS or PALS; and
4. Current training in the use and maintenance of the equipment required in 18VAC60-21-301.

18VAC60-21-301. Requirements for administration of deep sedation or general anesthesia.

A. Preoperative requirements. Prior to the appointment for treatment under deep sedation or general anesthesia the patient shall:

1. Be informed about the personnel and procedures used to deliver the sedative or anesthetic drugs to assure informed consent as required by 18VAC60-21-260 F.

2. Have a physical evaluation as required by 18VAC60-21-260 C.

3. Be given preoperative verbal and written instructions including any dietary or medication restrictions.

B. Delegation of administration.

1. A dentist who does not meet the requirements of 18VAC60-21-300 shall only use the services of a dentist who does meet those requirements or an anesthesiologist to administer deep sedation or general anesthesia in a dental office. In a licensed outpatient surgery center, a dentist shall use either a dentist who meets the requirements of 18VAC60-21-300, an anesthesiologist, or a certified registered nurse anesthetist to administer deep sedation or general anesthesia.

2. A dentist who meets the requirements of 18VAC60-21-300 may administer or use the services of the following personnel to administer deep sedation or general anesthesia:

   a. A dentist with the training required by 18VAC60-21-300 C;

   b. An anesthesiologist; or

   c. A certified registered nurse anesthetist under the medical direction and indirect supervision of a dentist who meets the training requirements of 18VAC60-21-300 C.
3. Preceding the administration of deep sedation or general anesthesia, a dentist who meets the requirements of 18VAC80-21-300 may use the services of the following personnel under indirect supervision to administer local anesthesia to anesthetize the injection or treatment site:

   a. A dental hygienist with the training required by 18VAC60-25-100 C to parenterally administer Schedule VI local anesthesia to persons 18 years of age or older; or

   b. A dental hygienist, dental assistant, registered nurse, or licensed practical nurse to administer Schedule VI topical oral anesthetics.

C. Equipment requirements. A dentist who provides or administers deep sedation or general anesthesia shall have available the following equipment in sizes appropriate for the patient being treated and shall maintain it in working order and immediately available to the areas where patients will be sedated and treated and will recover:

1. Full face mask or masks;

2. Oral and nasopharyngeal airway management adjuncts;

3. Endotracheal tubes with appropriate connectors or other appropriate airway management adjunct such as a laryngeal mask airway;

4. A laryngoscope with reserve batteries and bulbs and appropriately sized laryngoscope blades;

5. Source of delivery of oxygen under controlled positive pressure;

6. Mechanical (hand) respiratory bag;

7. Pulse oximetry and blood pressure monitoring equipment available and used in the treatment room;

8. Blood pressure monitoring equipment;
8.9. Appropriate emergency drugs for patient resuscitation;

9.10. EKG monitoring equipment;

40.11. Temperature measuring devices;

44.12. Pharmacologic antagonist agents;

42.13. External defibrillator (manual or automatic);

43.14. An end-tidal carbon dioxide monitor (capnograph);

44.15. Suction apparatus;

45.16. Threat-pack Airway protective device; and

46.17. Precordial or pretracheal stethoscope; and

18. Equipment necessary to establish intravenous or intraosseous access.

D. Required staffing. At a minimum, there shall be a three-person treatment team for deep sedation or general anesthesia. The team shall include the operating dentist, a second person to monitor the patient as provided in 18VAC60-21-260 K, and a third person to assist the operating dentist as provided in 18VAC60-21-260 J, all of whom shall be in the operatory with the patient during the dental procedure. If a second dentist, an anesthesiologist, or a certified registered nurse anesthetist administers the drugs as permitted in subsection B of this section, such person may serve as the second person to monitor the patient.

E. Monitoring requirements.

1. Baseline vital signs shall be taken and recorded prior to administration of any controlled drug at the facility to include: temperature, blood pressure, pulse, oxygen saturation, EKG, and respiration.

2. The patient’s vital signs, end-tidal carbon dioxide (unless precluded or invalidated by the nature of the patient, procedure, or equipment), and EKG readings, blood pressure,
pulse, oxygen saturation, temperature, and respiratory rate shall be monitored, continually, and recorded every five minutes, and reported to the treating dentist throughout the administration of controlled drugs and recovery. When a depolarizing medication or inhalation agent other than nitrous oxide is administered, temperature shall be monitored constantly continually.

3. Monitoring of the patient undergoing deep sedation or general anesthesia is to begin prior to the administration of any drugs and shall take place continually during administration, the dental procedure, and recovery from anesthesia. The person who administers the anesthesia or another licensed practitioner qualified to administer the same level of anesthesia must remain on the premises of the dental facility until the patient has regained consciousness and is discharged.

F. Emergency management.

1. A secured intravenous line must be established and maintained throughout the procedure.

2. The dentist shall be proficient in handling emergencies and complications related to pain control procedures, including the maintenance of respiration and circulation, immediate establishment of an airway, and cardiopulmonary resuscitation.

G. Discharge requirements.

1. If a separate recovery area is utilized, oxygen and suction equipment shall be immediately available in that area.

4-2. The patient shall not be discharged until the responsible licensed practitioner determines that the patient's level of consciousness, oxygenation, ventilation, and circulation are satisfactory for discharge and vital signs have been taken assessed and
recorded, unless extenuating circumstances exist and are documented in the patient's record.

3. Since re-sedation may occur once the effects of the reversal agent have waned, the patient shall be monitored for a longer period than usual before discharge if a pharmacological reversal agent has been administered before discharge criteria have been met.

2.4. Post-operative instructions shall be given verbally and in writing. The written instructions shall include a 24-hour emergency telephone number for the dental practice.

3.5. The patient shall be discharged with a responsible individual who has been instructed with regard to the patient's care.
Agenda Item: Board Action on Regulations for Remote Supervision

Included in your agenda package are:

A copy of amendments adopted as a Fast-track action – due to become effective on 9/20/18

Copy of comment received to date (8/30/18) – any additional comment received by close of comment period (9/5/18) will be distributed at the meeting

Board action:

No action is required; regulation will become effective unless 10 or more persons object
CE Requirement for Dental Hygiene Remote Supervision

There is a critical need for additional training or certification for RDH's to adequately perform the duties required for remote supervision. In my clinical experience, only about 20% of the RDHs I have hired have the diagnostic/examination skills required when seeing a patient without a licensed dentist present.

Apparently, current hygiene training programs in Virginia are failing to teach basic dental diseases, diagnoses, and treatment to their students. Hygienists should be able to recognize decay and periodontal pathology clinically and on radiographs, know how to recognize pulpotitis and cracked teeth, and easily identify an abscessed tooth through observation of a fistula or a sudden increase in a periodontal pocket from a previous visit.

My experience has found the majority of hygienists in the Commonwealth lacking in these basic skills. Two hours of CE will not cover this lack of training. A better idea would be a proctored online test of clinical diagnostic skills. Therefore the RDH's that have these skills would not be penalized. Should a hygienist fail the test, they should have their license put on probation until they take an 8 hour CE class at their expense and pass the proctored online test.

Dentists in Virginia have for too long had to put up with very poor performing dental hygienists that do not meet the standards of their training. They demand top pay and fail to regularly perform periodontal exams, recognize dental problems and work with the DDS to take needed radiographs and diagnostic records, and too many don't understand dental disease and treatment in order to educated our patients.

Dentistry in Virginia is under extreme stress with lagging, low reimbursement from insurance companies, a severe shortage of licensed hygienists outside of the urban areas and outside of a 45 mile radius of a dental hygiene schools. Well trained and good performing dental hygienists are vitally needed to help dentists keep their patients cared for and to help keep general practices financially viable.

I believe the Board would be surprised if they sent out a survey to general dentists about the skills
and quality of the hygienists available here in Virginia. Having practiced 30 years in the Commonwealth, I have unfortunately seen the quality and quantity of RDH’s continue to decline, forcing dentists to compromise the quality of care offered to their patients.

Commenter: Nicholas Ilchyshyn, DDS

CE for practice by remote supervision

The 2 hour CE requirement for hygienists practicing under remote supervision guidelines is inadequate primarily due to the deficiencies in certain undergraduate training programs. Even 4 year programs offering BS and RDH degrees manifest shortcomings in: 1. understanding the concept of therapeutic endpoints in periodontal disease management, 2. communicating basic prevention concepts (understanding that one-size does not fit all), 3. critical acknowledgement as to one’s limits in “hygiene therapy”, which in essence should be periodontal therapy, 4. Understanding the concept of the hygienist as a co-therapist versus a substitute for a trained specialist with post-graduate certification and qualifications. According to §54.1-2722F “A dental hygienist...may continue to treat a patient for 90 days. After such 90-day period, the supervising dentist...shall either conduct an examination of the patient or refer the patient...”. However, under 18VAC80-25-60 "A licensed dentist assumes ultimate responsibility for determining with the patient or his representative the specific treatment the patient will receive...". So how does one reconcile the conflict that the dentist assumes the “ultimate responsibility” but without the requirement to assess the patient prior to delivery of treatment in the remote supervision scenario? I would not want to place myself in that position. This perspective comes from one who has practiced for over 40 years, has served as an adjunct clinical instructor in dental hygiene programs, and serves in free clinics where remote supervision applies. To summarize, CE for remote supervision is indeed indicated and necessary, but it would need to be within a meaningful context of comprehensive education supplanting the current educational shortcomings. Two hours does not satisfy that need.
18VAC60-25-190. Requirements for continuing education.

A. In order to renew an active license, a dental hygienist shall complete a minimum of 15 hours of approved continuing education. Continuing education hours in excess of the number required for renewal may be transferred or credited to the next renewal year for a total of not more than 15 hours.

1. A dental hygienist shall be required to maintain evidence of successful completion of a current hands-on course in basic cardiopulmonary resuscitation for health care providers.

2. A dental hygienist who monitors patients under general anesthesia, deep sedation, or conscious/moderate sedation shall complete four hours every two years of approved continuing education directly related to monitoring of such anesthesia or sedation as part of the hours required for licensure renewal.

3. Up to two hours of the 15 hours required for annual renewal may be satisfied through delivery of dental hygiene services, without compensation, to low-income individuals receiving health services through a local health department or a free clinic organized in whole or primarily for the delivery of those services. One hour of continuing education may be credited for three hours of providing such volunteer services, as documented by the health department or free clinic.

B. An approved continuing education program shall be relevant to the treatment and care of patients and shall be:

1. Clinical courses in dental or dental hygiene practice; or
2. Nonclinical subjects that relate to the skills necessary to provide dental hygiene services and are supportive of clinical services (i.e., patient management, legal and ethical responsibilities, risk management, and recordkeeping). Courses not acceptable for the purpose of this subsection include, but are not limited to, estate planning, financial planning, investments, and personal health.

C. Continuing education credit may be earned for verifiable attendance at or participation in any course, to include audio and video presentations, that meets the requirements in subdivision B 1 of this section and is given by one of the following sponsors:

1. The American Dental Association and the National Dental Association and their constituent and component/branch associations;

2. The American Dental Hygienists' Association and the National Dental Hygienists Association and their constituent and component/branch associations;

3. The American Dental Assisting Association and its constituent and component/branch associations;

4. The American Dental Association specialty organizations and their constituent and component/branch associations;

5. A provider accredited by the Accreditation Council for Continuing Medical Education for Category 1 credits;

6. The Academy of General Dentistry and its constituent and component/branch associations;

7. Community colleges with an accredited dental hygiene program if offered under the auspices of the dental hygienist program;
8. A college or university that is accredited by an accrediting agency approved by the U.S. Department of Education or a hospital or health care institution accredited by the Joint Commission on Accreditation of Healthcare Organizations;

9. The American Heart Association, the American Red Cross, the American Safety and Health Institute, and the American Cancer Society;

10. A medical school accredited by the American Medical Association’s Liaison Committee for Medical Education or a dental school or dental specialty residency program accredited by the Commission on Dental Accreditation of the American Dental Association;

11. State or federal government agencies (i.e., military dental division, Veteran’s Administration, etc.);

12. The Commonwealth Dental Hygienists’ Society;

13. The MCV Orthodontic Education and Research Foundation;

14. The Dental Assisting National Board and its affiliate, the Dental Auxiliary Learning and Education Foundation;

15. The American Academy of Dental Hygiene, its constituent and component/branch associations; or

16. A regional testing agency (i.e., Central Regional Dental Testing Service, Northeast Regional Board of Dental Examiners, Southern Regional Testing Agency, Council of Interstate Testing Agencies, or Western Regional Examining Board) when serving as an examiner.

D. Verification of compliance.

1. All licensees are required to verify compliance with continuing education requirements at the time of annual license renewal.
2. Following the renewal period, the board may conduct an audit of licensees to verify compliance.

3. Licensees selected for audit shall provide original documents certifying that they have fulfilled their continuing education requirements by the deadline date as specified by the board.

4. Licensees are required to maintain original documents verifying the date and the subject of the program or activity, the sponsor, and the amount of time earned. Documentation shall be maintained for a period of four years following renewal.

5. Failure to comply with continuing education requirements may subject the licensee to disciplinary action by the board.

E. Exemptions.

1. A licensee is exempt from completing continuing education requirements and considered in compliance on the first renewal date following the licensee's initial licensure.

2. The board may grant an exemption for all or part of the continuing education requirements due to circumstances beyond the control of the licensee, such as temporary disability, mandatory military service, or officially declared disasters. A written request with supporting documents must be submitted at least 30 days prior to the deadline for renewal.

F. The board may grant an extension for up to one year for completion of continuing education upon written request with an explanation to the board prior to the renewal date.

G. Continuing education hours required by board order shall not be used to satisfy the continuing education requirement for license renewal or reinstatement.

H. In order to practice under remote supervision in accordance with subsection F of § 54.1-2722 of the Code of Virginia, a dental hygienist shall complete a continuing education course of
no less than two hours in duration that is offered by an accredited dental education program or a
sponsor listed in subsection C of this section and that includes the following course content:

1. Intent and definitions of remote supervision;

2. Review of dental hygiene scope of practice and delegation of services;

3. Administration of controlled substances;

4. Patient records, documentation, and risk management;

5. Remote supervision laws for dental hygienists and dentists;

6. Written practice protocols; and

7. Settings allowed for remote supervision.
Agenda Item: Education & training of DAII

Included in your agenda package are:

Minutes from Regulatory Advisory Panel – January 5, 2017

NOIRA – Agency background document (substance of action on pages 3-5)

NOIRA notice in Register

Comments on NOIRA

Staff Note:

The substance of the proposed regulation has already been approved by the Panel, but there is a need to review and finalize recommendations on language. Therefore, rather than adopt proposed regulations at this meeting, staff is recommending convening an ad hoc committee for that purpose with a report to the Board prior to the December meeting.

Board action:

No action is necessary, if the Board is in agreement that adoption of proposed regulation will be on the agenda in December
UNAPPROVED

BOARD OF DENTISTRY
MINUTES OF REGULATORY-LEGISLATIVE COMMITTEE
Regulatory Advisory Panel Discussion on the
Education and Practice of Dental Assistants I & II

January 5, 2017

TIME AND PLACE: The meeting of the Regulatory-Legislative Committee of the Board of Dentistry and the Regulatory Advisory Panel (RAP) was called to order on January 5, 2017 at 9:07 a.m. at the Department of Health Professions, 9960 Maryland Drive, Suite 201, Board Room 4; Henrico, Virginia.

PRESIDING: Bruce S. Wyman, D.M.D., Chair

COMMITTEE MEMBERS PRESENT: John M. Alexander, D.D.S.
Tonya A. Parrie-Wilkins, D.D.S.
Tammy C. Ridout, R.D.H

COMMITTEE MEMBERS ABSENT: Augustus A. Petticois, Jr., D.D.S.

ESTABLISHMENT OF QUORUM: With four members of the committee present, a quorum was established.

STAFF PRESENT: Sandra K. Raen, Executive Director
Kelley W. Palmater, Deputy Executive Director
Christine M. Houchens, Licensing Manager

ADVISORY PANEL MEMBERS PRESENT:
Lori Turner, CDA - VCU School of Dentistry
Cheryl Evans, CDA, BSHA - Fortis College
Angela Smith - J. Sergeant Reynolds Community College
Misty Mesimer, RDH - Germanna Community College
Richard Taliaferro, D.D.S. - Past-President, Virginia Dental Association
Trish MacDougall, RDH - President, Virginia Dental Hygiene Association
Vickie Brett - ECPI University
Michelle Green-Wright, RN - Virginia Dept. of Education

PANEL MEMBERS ABSENT: Tina Bailey, CDA - Virginia Dental Assistants Association

OTHERS PRESENT: Elaine Yeatts, DHP Policy Analyst

PUBLIC COMMENT: None

DISCUSSION ON POSSIBLE REVISIONS TO THE REQUIREMENTS FOR DENTAL ASSISTANT II REGISTRATION: Dr. Wyman opened the meeting, indicating the RAP is asked to address the regulatory changes needed to establish competency based education requirements for Dental Assistants II (DAsII). He then asked each member of the panel to state their recommendations for revising the requirements.
Ms. Meelmer recommended that the DAII curriculum be changed to competency based requirements. She also recommended revising the regulations for Dental Assistants I to require certification in Infection Control in addition to the requirement for radiation certification. She requested that the Board provide more details on the content for the didactic courses on "dental anatomy" and "operative dentistry" to specify the topics that must be covered so there is consistency across programs.

Ms. Smith recommended revising the regulations to include minimum education standards for Dental Assistants I. She agreed with changing to a competency based curriculum and recommended that the Board define who can teach the DAII programs.

Ms. Evans noted that she agrees with all of the recommendations stated by Ms. Smith and Ms. Meelmer. She added that schools need to know the Board's required credentials for those who can teach the DAII program. She also noted that she supports a competency based curriculum.

Ms. Turner said the regulations should be revised to require Dental Assistants I to hold the Certified Dental Assisting credential available through the Dental Assisting National Board. She recommended that Dental Assistants II be required to have training in all the delegate procedures. She also encouraged that the clinical experience be overseen by someone other than an employer and that it should be completed at the school rather than an employer's dental office.

Dr. Tallaferrero stated he supports a competency based curriculum and recommended having independent clinical examinations for each procedure, especially composites and amalgams.

Ms. MacDougall agreed with all the recommendations of the previous speakers.

Mrs. Green-Wright supported the recommendations for a competency based curriculum and added that students completing the dental assisting programs offered through the Department of Education could feed into the programs offered by community colleges for career advancement. She offered assistance in developing a competency based curriculum.

Ms. Britt also agreed with changing to a competency based curriculum, noting this is essential. She said she is concerned about the limited availability of DAII programs and questioned whether they should be restricted to schools with CODA accredited
programs.

Dr. Wyman questioned if there is a need for DASiI and if changing the regulations will lead to more training programs. He then said a universal approach to revising the regulations is needed and facilitated a discussion of the recommendations. There was general agreement that:

* There are dentists and dental assistants who have reported interest in having a DASiI program in their area.
* The requirement that DASiI programs be offered by an educational institution that maintains a CODA accredited dental assisting, dental hygiene or dental program should be maintained.
* The didactic dental anatomy and operative dentistry coursework should be two courses and the content of each course should be specified for uniformity across programs.
* Requirements to teach DASiI programs should be addressed in regulation. Instructors should be at or above the DASiI level and have appropriate experience.
* The clinical experience component of the program should be supervised by a dentist who has successfully completed a calibration exercise.
* All the delegable duties should be taught to every enrolled student.
* Competence in each delegable duty should be established by completing a clinical examination.
* There is concern about the lack of uniformity across programs when a dentist who employs a student also supervises and evaluates clinical competence.
* Education requirements for DASiI should be established. The need for training in infection control was stressed and DANB was identified as the source for this training. There was support for requiring that CDA certification by DANB be obtained over a specified period of time so that all DASiI would be required to hold the credential. Concerns about the need for and cost of such a requirement were raised. The possibility of using workforce development grants for training current DASiI was noted.
* Requirements for clinical experience settings DASiI should be addressed for consistency across programs. Options identified included not for profit settings, clinics that operate in conjunction with the CODA accredited program, and a hybrid program for completion at the school and in dental offices.
* The Board could elect to undertake program accreditation and set the standards to assure consistency across programs.
* Objective competency assessment tools should be established for consistency across programs.
Dr. Wyman asked Ms. Reen to review the current regulations for the DAII program to identify the provisions where changes are recommended. During this review these additional items were also generally agreed to:

- The homework provision for laboratory training should be deleted. All training should be completed in the program's laboratory.
- Laboratory training should be mannequin based.
- The number of successful procedures required for the laboratory training in amalgam restorations and in composite resin restorations should be set for each class of restoration, with 12 required for Class I, 12 required for Class II, 5 required for Class III, 5 required for Class IV and 5 required for Class V.
- The number of successful procedures for final impressions should be 4 and for the use of non-oxygen should be 2.
- The number of successful procedures required for the laboratory training in final cementation of crowns should be 5 and in final cementation of bridges should be 2.
- The number of hours for clinical experience should be reduced to a total of 120 hours and a required number of successful procedures should be set for each procedure.
- Strike the requirement for a practical examination at the conclusion of each module of laboratory training.

Ms. Reen said all the recommendations made today will be presented to the Regulatory-Legislative Committee for discussion. She said the ones addressing the DAII program requirements will be included in a discussion draft of the regulations which she will send to all the panel members for review in advance of the next meeting of the Committee. She invited their comments on the draft for the Committee's consideration.

NEXT MEETING: TBD

ADJOURNMENT: With all business concluded, Dr. Wyman thanked everyone for their contributions and adjourned the meeting at 12:12 pm.

Bruce S. Wyman, D.M.D. Chair

Sandra K. Reen, Executive Director

This information is required for executive branch review and the Virginia Registrar of Regulations, pursuant to the Virginia Administrative Process Act (APA), Executive Orders 17 (2014) and 58 (1999), and the Virginia Register Form, Style, and Procedure Manual.

Subject matter and intent

Please describe briefly the subject matter, intent, and goals of the planned regulatory action.

At its meeting on September 15, 2017, the Board voted to initiate rulemaking to modify the educational qualifications for registration of a dental assistant II by moving to a competency-based program in which basic didactic course work is followed by clinical training under the direction and supervision of a dentist who has successfully completed a calibration exercise on evaluating the clinical skills of a student. The intent is to make entry into the profession more accessible to students and ensure greater consistency in their training and assurance of competency.

Legal basis
Regulations are promulgated under the general authority of Chapter 24 of Title 54.1 of the Code of Virginia, Section 54.1-2400, which provides the Board of Dentistry the authority to promulgate regulations to administer the regulatory system:

§ 54.1-2400 - General powers and duties of health regulatory boards
The general powers and duties of health regulatory boards shall be:

1. To establish the qualifications for registration, certification or licensure in accordance with the applicable law which are necessary to ensure competence and integrity to engage in the regulated professions.

2. To examine or cause to be examined applicants for certification or licensure. Unless otherwise required by law, examinations shall be administered in writing or shall be a demonstration of manual skills.

3. To register, certify or license qualified applicants as practitioners of the particular profession or professions regulated by such board.

...  
6. To promulgate regulations in accordance with the Administrative Process Act (§ 9-6.14:1 et seq.) which are reasonable and necessary to administer effectively the regulatory system. Such regulations shall not conflict with the purposes and intent of this chapter or of Chapter 1 (§ 54.1-100 et seq.) and Chapter 25 (§ 54.1-2500 et seq.) of this title. ...

Specific authority for regulation of the profession of dental assisting is found in Chapter 27 of Title 54.1:

§ 54.1-2729.01. Practice of dental assistants.
A. A person who is employed to assist a licensed dentist or dental hygienist by performing duties not otherwise restricted to the practice of a dentist, dental hygienist, or dental assistant II, as prescribed in regulations promulgated by the Board may practice as a dental assistant I.
B. A person who (i) has met the educational and training requirements prescribed by the Board; (ii) holds a certification from a credentialing organization recognized by the American Dental Association; and (iii) has met any other qualifications for registration as prescribed in regulations promulgated by the Board may practice as a dental assistant II. A dental assistant II may perform duties not otherwise restricted to the practice of a dentist or dental hygienist under the direction of a licensed dentist that are reversible, intraoral procedures specified in regulations promulgated by the Board.
Purpose

Please describe the specific reasons why the agency has determined that the proposed regulatory action is essential to protect the health, safety, or welfare of citizens. In addition, please explain any potential issues that may need to be addressed as the regulation is developed.

The proposed regulatory action is to amend the educational requirements to become a dental assistant II from a program based on completion of required hours to a competency-based program based on satisfactory completion of didactic course work and clinical experiences. The expanded duties permitted for practice by a DAII in Virginia are outside the scope of practice for dental assistants in most other states. However, the current qualifications for a DAII appear to be more burdensome and costly that most dental assistants can afford. Therefore, the Board is proposing to modify the qualifications to a competency-based model that would allow a well-trained assistant to complete the coursework and clinical training in fewer hours. To ensure some standardization in the determination of competency by supervising dentists, they will be required to undergo a calibration of the procedures in which they are training. The combination of didactic hours, competency determination in specific procedures, and both written and clinical examination should provide evidence of competency to protect the public health and safety.

Substance

Please briefly identify and explain the new substantive provisions that are being considered, the substantive changes to existing sections that are being considered, or both.

Following recommendations from the Regulatory Advisory Panel, the Board intends to amend the educational requirements to become a dental assistant II from a program based on completion of required hours to a competency-based program based on satisfactory completion of didactic course work and clinical experiences.

There will be a new section (18VAC60-30-116) to specify the requirements for educational programs training persons for registration as dental assistants II, which will likely include the following:

1. The program shall be provided by an educational institution which maintains a program accredited by the Commission on Dental Accreditation of the American Dental Association.
2. The program shall have a program coordinator who is registered in Virginia as a dental assistant II or licensed in Virginia as a dental hygienist or dentist. The program coordinator shall have administrative responsibility and accountability for operation of the program.
3. The program shall have a clinical practice advisor who must be a licensed dentist in Virginia. The clinical practice advisor shall assist in the laboratory training component of the program and conduct the calibration exercise for dentists who supervise the student clinical experience.
4. A dental hygienist who assists in teaching the laboratory training component of the program must have a minimum of two years' experience in performing clinical dental assisting.

5. The program shall enter into a participation agreement with any dentist who agrees to supervise clinical experience. The dentist shall successfully complete a calibration exercise on evaluating the clinical skills of a student. The dentist supervisor may be the employer of the student.

6. Each program shall enroll practice sites for clinical experience which may be a dental office, non-profit dental clinic or at an educational institution clinic.

7. All treatment of patients shall be under the direct and immediate supervision of a licensed dentist who is responsible for the performance of duties by the student. The dentist shall attest to successful completion of the clinical competencies and restorative experiences.

The Board intends to amend Section 120 by making the following changes from completion of a certain number of hours to a competency-based program:

A. A prerequisite for entry into an educational program preparing a person for registration as a dental assistant II shall be current certification as a Certified Dental Assistant (CDA) conferred by the Dental Assisting National Board.

B. To be registered as a dental assistant II, a person shall complete the following requirements a competency-based program from an educational institution that maintains a program in dental assisting, dental hygiene or dentistry accredited by CODA meets the requirements of 18VAC60-30-116 and includes all of the following:

1. At least 50 hours of didactic Didactic course work in dental anatomy and operative dentistry that may be completed online that includes basic histology, understanding of the periodontium and temporal mandibular joint, pulp tissue and nerve innervation, occlusion and function, muscles of mastication and any other item related to the restorative dental process.

2. Didactic course work in operative dentistry to include materials used in direct and indirect restorative techniques, economy of motion, fulcrum techniques, tooth preparations, etch and bonding techniques and systems, and luting agents.

2.3. Laboratory training that may be completed in the following modules with no more than 20% of the specified instruction to be completed as homework in a dental office:

a. At least 40 hours of placing, packing, carving, and polishing of amalgam restorations and pulp capping procedures and no less than 6 class I and 6 class II restorations completed on a manikin simulator to competency.

b. At least 60 hours of placing and shaping composite resin restorations and pulp capping procedures and no less than 12 class I, 12 class II, 5 class III, 5 class IV, and 5 class V restorations completed on a manikin simulator to competency.

c. At least 20 hours of taking making final impressions and use, placement of a non-epinephrine retraction cord, and final cementation of crowns and bridges after preparation, adjustment and fitting by the dentist and no less than 4 crown impressions, 2 placements of retraction cord, 5 crown cementations, and 2 bridge cementations on a manikin simulator to competency.
d. At least 30 hours of final cementation of crowns and bridges after adjustment and fitting by the dentist.

3-4. Clinical experience applying the techniques learned in the preclinical coursework and laboratory training that may be completed in a dental office, in the following modules:

a. At least 80 30 hours of placing, packing, carving, and polishing of amalgam restorations and no less than 6 class I and 6 class II restorations completed on a live patient to competency;

b. At least 120 60 hours of placing and shaping composite resin restorations and no less than 6 class I, 6 class II, 5 class III, 3 class IV and 5 class V restorations completed on a live patient to competency;

c. At least 40 hours of taking final impressions and use of a non-equipinephrine retraction cord; and At least 30 hours of making final impressions, placement of non-equipinephrine retraction cord, and final cementation of crowns and bridges after preparation, adjustment and fitting by the dentist and no less than 4 crown impressions, 2 placements of retraction cord, 5 crown cementations, and 2 bridge cementations on a live patient to competency.

d. At least 60 hours of final cementation of crowns and bridges after adjustment and fitting by the dentist.

4-5. Successful completion of the following competency examinations given by the accredited educational programs:

a. A written examination at the conclusion of the 50 hours of didactic coursework; and

b. A practical examination at the conclusion of each module of laboratory training; and

c. A comprehensive written examination at the conclusion of all required coursework, training, and experience for each of the corresponding modules. A clinical competency exam.

C. All treatment of patients shall be under the direct and immediate supervision of a licensed dentist who is responsible for the performance of duties by the student. The dentist shall attest to successful completion of the clinical competencies and restorative experiences.

In adoption of proposed regulations, the Board will determine whether the didactic course work required as a prerequisite for the clinical experiences may be completed on-line or in a classroom setting.

The Board also intends Section 140 on Registration by endorsement as a dental assistant II to specify that an applicant must hold a registration or credential in another U. S. jurisdiction with qualification substantially equivalent to those set out in Section 120.

Finally, the Board will consider any editorial changes necessary for clarity.

Alternatives

Please describe any viable alternatives to the proposal considered and the rationale used by the agency to select the least burdensome or intrusive alternative that meets the essential purpose of the action. Also, include discussion of less intrusive or less costly alternatives for small businesses, as defined in § 2.2-4007.1 of the Code of Virginia, of achieving the purpose of the regulation.

The Board has been concerned that only 18 persons are currently registered as dental assistants II and has discussed the need to re-examine the requirements to determine whether they could be
made less burdensome and costly. Public comment was received at the October, 2016 meeting of the Regulatory-Legislative Committee recommending that the DAIH eligibility requirements be changed to a competency-based program which addresses the classification levels of procedures. It was further recommended that dentists should be calibrated in teaching the procedures to ensure a better understanding of competency.

Accordingly, a Regulatory Advisory Panel (RAP) was convened in January of 2017. It consisted of dentists and a dental hygienist who are board members; instructors from VCU School of Dentistry, Fortis College, J. Sargeant Reynolds Community College, Germanna Community College, and ECPI University; a Past-President of the Virginia Dental Association; President of the Virginia Dental Hygiene Association; and a representative of the Virginia Department of Education. The RAP agreed upon recommendations for a competency-based program that could reduce the time and cost associated with qualifying as a DAIH but would include better standardization of the clinical training by calibration of supervising dentists in teaching of procedures and making the determination of competency.

Public participation

Please indicate whether the agency is seeking comments on the intended regulatory action, including ideas to assist the agency in the development of the proposal and the costs and benefits of the alternatives stated in this notice or other alternatives. Also, indicate whether a public hearing is to be held to receive comments. Please include one of the following choices: 1) a panel will be appointed and the agency's contact if you're interested in serving on the panel is ______; 2) a panel will not be used; or 3) public comment is invited as to whether to use a panel to assist in the development of this regulatory proposal.

The agency is seeking comments on this regulatory action, including but not limited to: ideas to be considered in the development of this proposal, the costs and benefits of the alternatives stated in this background document or other alternatives, and the potential impacts of the regulation.

The agency is also seeking information on impacts on small businesses as defined in § 2.2-4007.1 of the Code of Virginia. Information may include: projected reporting, recordkeeping, and other administrative costs; the probable effect of the regulation on affected small businesses; and the description of less intrusive or costly alternatives for achieving the purpose of the regulation.

Anyone wishing to submit comments may do so via the Regulatory Townhall website, www.townhall.virginia.gov, or by mail, email or fax to Elaine Yeatts, Agency Regulatory Coordinator, 9960 Mayland Drive, Henrico, VA 23233 or elaine.yeatts@dhp.virginia.gov or by fax to (804) 527-4434. Written comments must include the name and address of the commenter. In order to be considered comments must be received by the last day of the public comment period.

A public hearing will be held following the publication of the proposed stage of this regulatory action and notice of the hearing will be posted on the Virginia Regulatory Town Hall website (http://www.townhall.virginia.gov) and on the Commonwealth Calendar website.
(https://www.virginia.gov/connect/commonwealth-calendar). Both oral and written comments may be submitted at that time.

A regulatory advisory panel (RAP) was used to develop the substance of the NOIRA. Unless there are substantial comments on the NOIRA, the proposed regulations will follow the substance in the NOIRA document.
Notices of Intended Regulatory Action

Statutory Authority: §§ 54.1-2400 and 54.1-2709.5 of the Code of Virginia.

Public Comment Deadline: September 5, 2018.

Agency Contact: Sandra Reen, Executive Director, Board of Dentistry, 9960 Mayland Drive, Suite 300, Richmond, VA 23233, telephone (804) 367-4437, FAX (804) 527-4428, or email sandra.reen@dhp.virginia.gov.

V.A.R. Doc. No. R18-5513; Filed July 5, 2018, 5:13 p.m.

Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 2.2-4007.01 of the Code of Virginia that the Board of Dentistry intends to consider amending 18VAC60-21, Regulations Governing the Practice of Dentistry; 18VAC60-25, Regulations Governing the Practice of Dental Hygiene; and 18VAC60-30, Regulations Governing the Practice of Dental Assistants. The purpose of the proposed action is to change the license renewal schedule from the set date of March 31 to renewal in the licensee’s birth month. The change will occur in the calendar year after the effective date of the regulation. The intent is to distribute the workload associated with renewal across a calendar year and to make the renewal deadline easier for licensees to remember.

The agency does not intend to hold a public hearing on the proposed action after publication in the Virginia Register.

Public Comment Deadline: September 5, 2018.

Agency Contact: Sandra Reen, Executive Director, Board of Dentistry, 9960 Mayland Drive, Suite 300, Richmond, VA 23233, telephone (804) 367-4437, FAX (804) 527-4428, or email sandra.reen@dhp.virginia.gov.

In favor of proposal

Higher standards of competency are achieved by definite callibration and consistency.

Commenter: Josh Hanson  8/26/18 7:58 pm

Make a dental assistant 2 and 3

I suggest making a level 2 or 3 or a level 2a and 2b. For instance Iowa has different levels of expanded functions and different requirements. Their level 1 expanded functions can do among other place gingival retraction, make temporaries, take final impressions, preliminary charting etc. Only their level 2 expanded functions can place fillings.

See link here:
https://dentalboard.iowagov/practitioner/expanded-functions/dental-assistants-expanded-functions

I think if you made a level that allowed dental assistants to be expanded functions to what most dentist utilize them for, like final impressions, temporaries, cord packing etc and make this a smaller course.

Most dentist do not want their assistants placing fillings. So having this as a separate options like Iowa means a lot more assistants would be able to get certified in what dentist wants them to do. Making the training requirements so hard because they need to know how to place fillings still keeps it too hard to get them certified and does not solve the underlying problem. You need to divide it up into basic and advanced expanded functions to make it functional.

Agenda Item: Request for extension of Opioid Regulations

Staff note:

The emergency regulations for prescribing of opioids by dentists expire on October 23, 2018. The Boards cannot adopt final regulations for at least 15 days after the close of the comment period on proposed regulations (comment closes on September 7, 2018). The Board will adopt final regulations at its December meeting.

Therefore, it is not possible to have final regulations in effect before the October 23rd expiration date.

A request must be filed to extend the emergency regulation for another six months to allow completion of the promulgation of replacement regulations.

Action:

Motion to approve the request to extend the emergency regulations for prescribing of opioids medications for six months beyond the expiration of November 7, 2018.
Agenda Item: Petition for rulemaking:

Included in your package are:

- Copy of petition from Dr. Ilchyszyn
- Copy of Comments on the petition
- Copy of applicable regulation

Board action:

The Board has the option to:

1) Initiate rulemaking with publication of a NOIRA, or
2) Deny the petitioner's request
Petition for Rule-making

The Code of Virginia (§ 2.2-4007) and the Public Participation Guidelines of this board require a person who wishes to petition the board to develop a new regulation or amend an existing regulation to provide certain information. Within 14 days of receiving a valid petition, the board will notify the petitioner and send a notice to the Register of Regulations identifying the petitioner, the nature of the request and the plan for responding to the petition. Following publication of the petition in the Register, a 21-day comment period will begin to allow written comment on the petition. Within 90 days after the comment period, the board will issue a written decision on the petition.

Please provide the information requested below. (Print or Type)

Respond to the following questions:

1. What regulation are you petitioning the board to amend? Please state the title of the regulation and the section/sections you want the board to consider amending. Regulations Governing the Practice of Dentistry 18VAC60-21-250. Requirements for continuing education. Item # A 5

2. Please summarize the substance of the change you are requesting and state the rationale or purpose for the new or amended rule.

I am writing to petition the Board regarding consideration of granting Continued Education credits for volunteer dentists who serve as preceptors to senior VCU dental students at community/ free clinics.

Medical providers do get CE credit for their preceptorship / mentoring of medical and pharmacy students, as has been the actuality at the Chesapeake Care Clinic. This is above and beyond the credit that they receive for delivery of medical services. This benefit or acknowledgement is not afforded the dental preceptors based on Dental Board Regulations.

In essence, the educator, volunteer preceptor interaction that the students receive at these community clinics is as relevant and valuable as the didactic and practical education that they receive at their dental school. The medical profession recognizes this preceptorship / mentoring service by their volunteer colleagues and affords them CE credit for such.

Commenter: Pedro L. Casingal Jr., DDS
CE credit for volunteering at free dental clinics

This would be a great incentive for Dentists to volunteer. There is a need for Dental Volunteers especially Dentist.

I am one of the preceptors at Chesapeake Care Free Dental Clinic. I find it rewarding to pay it forward.

Thanks
Pedro Casingal Jr

Commenter: Zaneta T. Hamlin, DDS
Petition for volunteer CEUs

I am currently a preceptor for the VCU senior dental students and a clinical volunteer at the Chesapeake Care Clinic. Providing CEUs for volunteers would be a great incentive and opportunity for other clinicians to volunteer. We could definitely use the help!

Commenter: Walter Malvin DMD
Public Petition for Rulemaking: CE credit for volunteer dentists serving as preceptors

I believe that dentists who provide preceptor ships especially at Free or Low cost clinics for Dental School students (example VCU) should be allowed to take more CE credit than is currently allowed (2 CEUs). Mentoring students is rewarding but demanding particularly if there are 3-4 students present at the same time (as is the case at Chesapeake Care Clinic) By offering more CE credits this will encourage dentists to do more mentoring at low cost or Free clinics and provide more dental care for patients in need. I support Dr Ilichyn's petition to increase CE credits for volunteer dentists who serve as preceptors.

Virginia Board of Dentistry
9960 Maryland Drive, Suite 300
Henrico, VA 23233-1463

Dear Board Members,

I am writing to support Dr. Ilchyshyn’s proposal that Continuing Education hours be granted to volunteer dentists who serve as preceptors to senior dental students at community/free clinics.

I have done many hours of volunteering in dentistry for underserved populations, and since there are not enough dentists who are willing to perform this work, it would be advantageous to provide any cost-free incentives you are willing to grant. This should increase participation.

I have enclosed paperwork needed to help this initiative.

Sincerely,

Eric Forsbergh DDS

Virginia Board of Dentistry
9960 Maryland Drive, Suite 300
Henrico, VA 23233-1463

Dear Board Members,

I am writing to petition the Board regarding consideration of granting Continued Education credits for volunteer dentists who serve as preceptors to senior VCU dental students at community/free clinics.

I have been serving as a volunteer at the Chesapeake Care Dental Clinic (CCDC) since the summer of 2017, upon retirement from private practice in Northern Virginia. Approximately two days a week are devoted to either actual dental treatment of the disadvantaged population or as a preceptor to the senior VCU dental students.

As a member of the executive committee of the Chesapeake Care clinic, which encompasses medical and dental components, it was revealed that the medical providers do get CE credit for their preceptorship/mentoring of medical and pharmacy students from Liberty University College of Medicine and Hampton U. School of pharmacy, respectively. This is above and beyond the credit that they receive for delivery of medical services. This benefit or acknowledgement is not afforded the dental preceptors based on Dental Board Regulations. This was confirmed by Ms. Sandra Reen the Board of Dentistry executive director.

Volunteer preceptors have to qualify for the opportunity to mentor the next generation of dental practitioners. Our curriculum vitae, licenses, credentials, specialty board memberships, etc. have to be submitted and vetted. Our duties as preceptors entail interacting with students on patient care: from reviews of medical and dental histories, proper examination, documentation as well as treatment planning, education of patients, patient and practice management and execution of treatment. At times instructors intervene in treatment if challenges occur for the novice practitioners. In many instances mini seminars are presented during our

Received
AUG 14 2018
Board of Dentistry

231
lunch breaks in order to further expand the students’ horizons as to long
term actual cases, multidisciplinary dentistry and unique, unusual cases.

In essence, the educator interaction that the students receive at these free
clinics is as relevant and valuable as the didactic and practical education
that they receive at their dental school. I would surmise that forty to fifty
percent of their dental exposure in their senior year is at these free
clinics?

So, some acknowledgment of the preceptors’ contribution to dental
education would be apropos. The non-for-profit clinics do not get any
financial support from VCU for the altruistic service we provide to the
communities as well as for the students.

As such, I respectfully request that the Board consider affording CE
credits to the volunteer dental preceptors for their service, which would
be comparable to what our medical colleagues are afforded. It would
represent an equitable acknowledgement.

With Best Regards,

Nicholas Ilchynshyn, D.D.S.
Diplomate, American Board of Periodontology (Ret.)

Received
AUG 14 2018
Board of Dentistry
18VAC60-21-250. Requirements for Continuing Education.

A. A dentist shall complete a minimum of 15 hours of continuing education, which meets the requirements for content, sponsorship, and documentation set out in this section, for each annual renewal of licensure except for the first renewal following initial licensure and for any renewal of a restricted volunteer license.

1. All renewal applicants shall attest that they have read and understand and will remain current with the laws and regulations governing the practice of dentistry and dental hygiene in Virginia.

2. A dentist shall maintain current training certification in basic cardiopulmonary resuscitation with hands-on airway training for health care providers or basic life support unless he is required by 18VAC60-21-290 or 18VAC60-21-300 to hold current certification in advanced life support with hands-on simulated airway and megacode training for health care providers.

3. A dentist who administers or monitors patients under general anesthesia, deep sedation, or conscious/moderate sedation shall complete four hours every two years of approved continuing education directly related to administration and monitoring of such anesthesia or sedation as part of the hours required for licensure renewal.

4. Continuing education hours in excess of the number required for renewal may be transferred or credited to the next renewal year for a total of not more than 15 hours.

5. Up to two hours of the 15 hours required for annual renewal may be satisfied through delivery of dental services, without compensation, to low-income individuals receiving health services through a local health department or a free clinic organized in whole or primarily for the delivery of those services. One hour of continuing education may be credited for three hours of providing such volunteer services, as documented by the health department or free clinic.

B. To be accepted for license renewal, continuing education programs shall be directly relevant to the treatment and care of patients and shall be:

1. Clinical courses in dentistry and dental hygiene; or

2. Nonclinical subjects that relate to the skills necessary to provide dental or dental hygiene services and are supportive of clinical services (i.e., patient management, legal and ethical responsibilities, and stress management). Courses not acceptable for the purpose of this subsection include, but are not limited to, estate planning, financial planning, investments, business management, marketing, and personal health.

C. Continuing education credit may be earned for verifiable attendance at or participation in any course, to include audio and video presentations, that meets the requirements in subsection B of this section and is given by one of the following sponsors:

1. The American Dental Association and the National Dental Association, their constituent and component/branch associations, and approved continuing education providers;

https://law.lis.virginia.gov/admincode/title18/agency60/chapter21/section250/
2. The American Dental Hygienists' Association and the National Dental Hygienists Association, and their constituent and component/branch associations;

3. The American Dental Assisting Association and its constituent and component/branch associations;

4. The American Dental Association specialty organizations and their constituent and component/branch associations;

5. A provider accredited by the Accreditation Council for Continuing Medical Education for Category 1 credits;

6. The Academy of General Dentistry, its constituent and component/branch associations, and approved continuing education providers;

7. A college or university that is accredited by an accrediting agency approved by the U.S. Department of Education or a hospital or health care institution accredited by the Joint Commission on Accreditation of Healthcare Organizations;

8. The American Heart Association, the American Red Cross, the American Safety and Health Institute, and the American Cancer Society;

9. A medical school accredited by the American Medical Association's Liaison Committee for Medical Education;

10. A dental, dental hygiene, or dental assisting program or advanced dental education program accredited by the Commission on Dental Accreditation of the American Dental Association;

11. State or federal government agencies (i.e., military dental division, Veteran's Administration, etc.);

12. The Commonwealth Dental Hygienists' Society;

13. The MCV Orthodontic Education and Research Foundation;

14. The Dental Assisting National Board and its affiliate, the Dental Auxiliary Learning and Education Foundation; or

15. A regional testing agency (i.e., Central Regional Dental Testing Service, Northeast Regional Board of Dental Examiners, Southern Regional Testing Agency, Council of Interstate Testing Agencies, or Western Regional Examining Board) when serving as an examiner.

D. The board may grant an exemption for all or part of the continuing education requirements due to circumstances beyond the control of the licensee, such as temporary disability, mandatory military service, or officially declared disasters. A written request with supporting documents must be submitted prior to renewal of the license.

E. The board may grant an extension for up to one year for completion of continuing education upon written request with an explanation to the board prior to the renewal date.

https://law.lis.virginia.gov/admincode/title18/agency60/chapter21/section250/
F. A licensee is required to verify compliance with the continuing education requirements in his annual license renewal. Following the renewal period, the board may conduct an audit of licensees to verify compliance. Licensees selected for audit must provide original documents certifying that they have fulfilled their continuing education requirements by the deadline date as specified by the board.

G. All licensees are required to maintain original documents verifying the date and subject of the program or activity, the sponsor, and the amount of time earned. Documentation shall be maintained for a period of four years following renewal.

H. A licensee who has allowed his license to lapse, or who has had his license suspended or revoked, shall submit evidence of completion of continuing education equal to the requirements for the number of years in which his license has not been active, not to exceed a total of 45 hours. Of the required hours, at least 15 must be earned in the most recent 12 months and the remainder within the 36 months preceding an application for reinstatement.

I. Continuing education hours required by board order shall not be used to satisfy the continuing education requirement for license renewal or reinstatement.

J. Failure to comply with continuing education requirements may subject the licensee to disciplinary action by the board.

Statutory Authority

§ 54.1-2400 of the Code of Virginia.

Historical Notes

Practice of a Dental Hygienist under Remote Supervision

References from § 54.1-2722 and §54.1-3408 of the Code of Virginia

1. **What is meant by “remote supervision”?**

"Remote supervision" means that a supervising dentist is accessible and available for communication and consultation with a dental hygienist during the delivery of dental hygiene services but such the supervising dentist may not have conducted an initial examination of the patients who are to be seen and treated by the dental hygienist and may The dentist need not be present with the dental hygienist when dental hygiene services are being provided.

2. **Who can supervise a dental hygienist to practice dental hygiene under the remote supervision?**

A dentist who holds an active, license issued by the Virginia Board of Dentistry and who has a dental office physically located in the Commonwealth, including dental offices maintained by a federally qualified health center, charitable safety net facility, free clinic, long-term care facility, elementary or secondary school, Head Start program, or women, infants, and children (WIC) programs, including a mobile dental clinic or portable dental operation that is operated by one of these settings.

3. **What qualifications are necessary for a dental hygienist to practice under remote supervision?**

The hygienist must have (i) completed a continuing education course designed to develop the competencies needed to provide care under remote supervision offered by an accredited dental education program or from a continuing education provider approved by the Board and (ii) at least two years of clinical experience, consisting of at least 2,500 hours of clinical experience.

4. **What is required for a continuing education course in remote supervision?**

The Board requires a remote supervision course to be no less than two hours in duration and to be offered by an accredited dental education program or an approved sponsor listed in the regulation. The required course content is: a) Intent and definitions of remote supervision; b) Review of dental hygiene scope of practice and delegation of services; c) Administration of controlled substances; d) Patient records/documentation/risk management; e) Remote supervision laws for dental hygienists and dentists; f) Written practice protocols; and g) Settings allowed for remote supervision.

5. **Are there other requirements for practice under remote supervision?**

A dental hygienist practicing under remote supervision shall have professional liability insurance with policy limits acceptable to the supervising dentist.
6. In what settings can a dental hygienist practice under remote supervision?

A hygienist can only practice dental hygiene under remote supervision at a community-health federally qualified health center, charitable safety net facility, free clinic, long-term care facility, elementary or secondary school, Head Start program, or women, infants, and children (WIC) program, including a mobile facility or portable dental operation that is operated by one of these settings.

7. What tasks can a dental hygienist practicing under remote supervision perform?

A hygienist practicing under remote supervision may (a) obtain a patient's treatment history and consent, (b) perform an oral assessment, (c) perform scaling and polishing, (d) perform all educational and preventative services, (e) take X-rays as ordered by the supervising dentist or consistent with a standing order, (f) maintain appropriate documentation in the patient's chart, (g) administer Schedule VI topical drugs including topical oral fluorides, topical oral anesthetics and topical and directly applied antimicrobial agents pursuant to subsections J and V of §54.1-3408 of the Code of Virginia, and (h) perform any other service ordered by the supervising dentist or required by statute or Board regulation.

Under the provisions of § 54.1-3408 V as referenced above, a dental hygienist is authorized to possess and administer topical fluoride varnish under a standing protocol issued by a dentist or a doctor of medicine or osteopathic medicine. Such administration is limited to children aged six months to three years who receive home visits from the Health Department or who are enrolled in Head Start programs or who are clients of safety-net healthcare facilities (e.g., rural health, community health centers, mobile dental clinics, and Health Department programs). The standing protocol must conform to the standards adopted by the Department of Health.

8. Is the dental hygienist allowed to administer local anesthetic or nitrous oxide or other Schedule VI drugs?

No. A dental hygienist practicing under remote supervision is not allowed to administer local anesthetic parenterally or to administer nitrous oxide. A dental hygienist practicing under remote supervision is not permitted to possess and administer topical oral fluorides outside the scope of the provisions of §54.1-3408 as addressed in question and answer number 7 above. Further, while practicing under remote supervision, a dental hygienist may not possess and administer topical oral anesthetics, topical and directly applied antimicrobial agents for treatment of periodontal pocket lesions or any other Schedule VI topical drug. Also see question and answer number 12.

9. What disclosures and permissions are required?

Prior to providing a patient dental hygiene services, a dental hygienist practicing under remote supervision shall obtain (1) the patient's or the patient's legal representative's signature on a statement disclosing that the delivery of dental hygiene services under remote supervision is not
10. **How is the dental hygienist required to involve the dentist when practicing under remote supervision?**

   a) After conducting an initial oral assessment of a patient, a dental hygienist practicing under remote supervision may provide further dental hygiene services following a written practice protocol developed and provided by the supervising dentist. Such written practice protocol shall consider, at a minimum, the medical complexity of the patient and the presenting signs and symptoms of oral disease.

   b) A dental hygienist practicing under remote supervision shall inform the supervising dentist of all findings for a patient. A dental hygienist practicing under remote supervision may continue to treat a patient for 90 days. After such 90-day period, the supervising dentist, absent emergent circumstances, shall either conduct an examination of the patient or refer the patient to another dentist to conduct an examination. The supervising dentist shall develop a diagnosis and treatment plan for the patient and either the supervising dentist and/or the dental hygienist shall provide the treatment plan to the patient.

   c) The supervising dentist shall review a patient’s records at least once every 10 months.

11. **Can a dental hygienist see a patient beyond 90 days if the patient has not seen a dentist?**

    Only if the supervising dentist authorizes such treatment to address an emergent circumstance requiring dental hygiene treatment. The practice protocol developed by the supervising dentist is the initial authorization for a hygienist to provide hygiene treatment under remote supervision for 90 days of treatment. After that 90-day period (absent emergent circumstances), the supervising dentist (or another dentist) must examine the patient, develop a diagnosis and establish the treatment plan for the patient which might address both future dental treatment and dental hygiene treatment and the time spent for such treatment. The dentist decides how often he will see a patient in accord with his professional judgment of the patient’s dental needs and the remaining treatment plan. In addition, by statute the dentist must review the patient’s records at a minimum of every 10 months. Treatment planning and record review are two distinct requirements.

12. **Is a dental hygienist who is practicing under remote supervision allowed to also practice dental hygiene under general supervision whether as an employee or as a volunteer?**

    Yes, the requirements of § 54.1-2722. F do not prevent practice under general supervision specifically states that “nothing in this subsection shall prevent a dental hygienist from practicing dental hygiene under general supervision whether as an employee or as a volunteer.”

13. **Are the requirements for remote supervision different for a public health dental hygienist employed by the Virginia Department of Health?**
Yes, remote supervision in a public health setting is defined in § 54.1-2722 E:

**F. For the purposes of this subsection, "remote supervision" means that a public health dentist has regular, periodic communications with a public health dental hygienist regarding patient treatment, but such dentist may not have conducted an initial examination of the patients who are to be seen and treated by the dental hygienist and may not be present with the dental hygienist when dental hygiene services are being provided.**

Notwithstanding any provision of law, a dental hygienist employed by the Virginia Department of Health who holds a license issued by the Board of Dentistry may provide educational and preventative dental care in the Commonwealth under the remote supervision of a dentist employed by the Department of Health. A dental hygienist providing such services shall practice pursuant to a protocol adopted by the Commissioner of Health on September 23, 2010, having been developed jointly by (i) the medical directors of the Cumberland Plateau, Southside, and Lenowisco Health Districts; (ii) dental hygienists employed by the Department of Health; (iii) the Director of the Dental Health Division of the Department of Health; (iv) one representative of the Virginia Dental Association; and (v) one representative of the Virginia Dental Hygienists' Association. Such protocol shall be adopted by the Board as regulations.
Standards for Professional Conduct In
The Practice of Dentistry

Preamble
The Standards for Professional Conduct for licensees of the Virginia Board of Dentistry establishes a set of principles to govern the conduct of licensees in the profession of dentistry. Licensees must respect that the practice of dentistry is a privilege which requires a high position of trust within society. The Board maintains that adherence to these standards will safeguard patients, uphold the laws and regulations governing practice, and maintain the public trust. The standards are an expression of types of conduct that are either required or encouraged and that are either prohibited or discouraged to provide further guidance on the requirements for practice set out in the Code of Virginia and the Regulations Governing the Practice of Dentistry and Dental Hygiene.

Scope of Practice
• Keep knowledge and skills current. The privilege, professional status, and a license to practice derive from the knowledge, skill, and experience needed to safely serve the public and patients.
• Seek consultation, if possible, whenever the welfare of patients will be safeguarded or advanced by utilizing the knowledge and skills of those who have special skills, knowledge, and experience, or advanced training.
• Do not prescribe treatment or use diagnostic techniques or diagnose, cure, or alleviate diseases, infections, or other conditions that are not within the scope of the practice of dentistry or that are not based upon accepted scientific knowledge or research.
• Do not treat or prescribe for yourself.

Treating or Prescribing for Family
• Only treat and prescribe based on a bona-fide practitioner-patient relationship, and prescribe by criteria set forth in §34.1-3303 of the Code of Virginia.
• Do not prescribe to a family member a controlled substance or a medicine outside the scope of dentistry.
• When treating a family member or a patient maintain a patient record documenting a bona-fide practitioner-patient relationship.

Staff Supervision
• Protect the health of patients by only assigning to qualified auxiliaries those duties which can be legally delegated.
• Prescribe and supervise the patient care provided by all auxiliary personnel in accordance with the correct type of supervision.
• Maintain documentation that staff has current licenses, certificates for radiology, up-to-date vaccinations, CPR training, HIPPA training, and OSHA training in personnel files.
• Display documents that are required to be posted in the patient receiving area so that all patients might see and read them.
• Be responsible for the professional behavior of staff towards patients and the public at all times.
• Avoid unprofessional behavior with staff
• Provide staff with a safe environment at all times.
• Provide staff with opportunities for continuing education that will keep treatment and services up-to-date and allow staff to meet continuing education requirements.
• Supervise staff in dispensing, mixing and following the instruction for materials to be used during treatment.
• Instruct the staff to inform the dentist of any event in the office concerning the welfare of the patient regarding exposures or blood borne pathogens.

Practitioner-Patient Communications
• Before performing any dental procedure, accurately inform the patient or the guardian of a minor patient of the diagnoses, prognosis and the benefits, risks, and treatment alternatives to include the consequences of doing nothing.
• Inform the patient of proposed treatment and any reasonable alternatives, in understandable terms to allow the patient to become involved in treatment decisions.
• Acquire informed consent of a patient prior to performing any treatment.
• Refrain from harming the patient and from recommending and performing unnecessary dental services or procedures.
• Specialists must inform the patient that there is a need for continuing care when they complete their specialized care and refer patients to a general dentist or another specialist to continue their care.
• Immediately inform any patient who may have been exposed to blood or other infectious material in the dental office of having a procedure about the need for post exposure evaluation and follow up and to immediately refer the patient to a qualified health care professional.
• Do not represent the care being provided in a false or misleading manner.
• Inform the patient orally and notify in the record any deviation in a procedure due to the dentist’s discretion or a situation that arises during treatment that could delay completion of treatment or affect the prognosis for the condition being treated.
• Inform the patient about the materials used for any restoration or procedure such as crowns, bridges, restorative materials, ingestibles, and topicals as to risks, alternatives, benefits, and costs, as well as describing the materials, procedures, or special circumstances in the patient’s notes.
• Refrain from removing amalgam restorations from a non-allergic patient for the alleged purpose of removing toxic substances from the body. The same applies to removing any other dental materials.

Patient of Record
• A patient becomes a patient of record when the patient is seated in the dental chair and examination and diagnosis of the oral cavity is initiated.
• In §54.1-2405(B) of the Code of Virginia, “current patient” means a patient who has had a patient encounter with the provider or his professional practice during the two-year period immediately preceding the date of the record transfer.

Patient Records
• Maintain treatment records that are timely, accurate, legible and complete.
• Note all procedures performed as well as substances and materials used.
• Note all drugs with strength and quantity administered and dispensed.
• Safeguard the confidentiality of patient records.
• Upon request of a patient or an authorized dental practitioner, provide any information that will be beneficial for the welfare and future treatment of that patient.
• On request of the patient or the patient's new dentist, timely furnish gratuitously or at a reasonable cost, legible copies of all dental and financial records and readable copies of x-rays. This obligation exists whether or not the patient's account is paid in full.
• Comply with §32.1-127.1:03 of the Code of Virginia related to the confidentiality and disclosure of patient records.
• Patient records shall only be destroyed in a manner that protects patient confidentiality, such as by incineration or shredding.
• Maintain records for not less than six years from the last date of treatment as required by the Board of Dentistry and maintain records for longer periods of time to meet contractual obligations or requirements of federal law.
• When closing, selling or relocating a practice, meet the requirements of §54.1-2405 of the Code of Virginia for giving notice and providing records.

Financial Transactions
• Do not accept or render “rebates” or split fees with other health professionals.
• Maintain a listing of customary fees and represent all fees being charged clearly and accurately.
• Do not use a different fee without providing the patient or third party payers a reasonable explanation which is recorded in the record.
• Return fees to the patient or third party payers in a timely manner if a procedure is not completed or the method of treatment is changed.
• Do not accept a third party payment in full without disclosing to the third party that the patient’s payment portion will not be collected.
• Do not increase fees charged to a patient who is covered by a dental benefit plan.
• Do not incorrectly describe a dental procedure in order to receive a greater payment or reimbursement or incorrectly make a non-covered procedure appear to be a covered procedure on a claim form.
• Do not certify in a patient’s record or on a third party claim that a procedure is completed when it is not completed.
• Do not use inaccurate dates that are to benefit the patient; false or misleading codes; change the procedure code to justify a false procedure; falsify a claim not having done the procedure, or expand the claim.
• Avoid exploiting the trust a patient has in the professional relationship when promoting or selling a product by: advising the patient or buyer if there is a financial incentive for
the dentist to recommend the product; providing the patient with written information about the product's contents and intended use as well as any directions and cautions that apply to its use; and, informing the patient if the product is available elsewhere.

- Do not misrepresent a product's value or necessity or the dentist's professional expertise in recommending products or procedures.

**Relationships with Practitioners**

- Upon completion of their care, specialists or consulting dentists are to refer back to the referring dentist, or if none, to the dentist of record for future care unless the patient expresses a different preference.

- A dentist who is rendering a second opinion regarding a diagnosis or treatment plan should not have a vested interest in the patient's care and should not seek to secure the patient for treatment unless selected by the patient for care.

**Practitioner Responsibility**

- Once a course of treatment is undertaken, the dentist shall not discontinue that treatment without giving the patient adequate notice and the opportunity to obtain the services of another dentist. Even if fees have not been paid, emergency care must be provided during the 30-day notice period to make sure that the patient's oral health is not jeopardized or to stabilize the patient's condition.

- Only prescribe, dispense, and utilize devices, drugs, dental materials and other agents accepted for dental treatment.

- Make reasonable arrangements for the emergency care of patients of record.

- Exercise reasonable discretion in the selection of patients. Dentists may not refuse patients because of the patient's race, color, sex, or national origin.

- Do not refuse to treat a patient because the individual has AIDS, is HIV positive, or has had hepatitis. Use a proper protocol in the office to protect the public and staff.

- Follow the rules and regulations of HIPAA, OSHA, FDA, and the laws governing health practitioners in the Code of Virginia.

- Follow the applicable CDC infection control guidelines and recommendations. See [https://www.cdc.gov/oralhealth/infectioncontrol/index.html](https://www.cdc.gov/oralhealth/infectioncontrol/index.html)

- Be knowledgeable in providing emergency care and have an acceptable emergency plan with delegated duties to the staff in written form, maintain accurate records and be current in basic CPR.

- Avoid interpersonal relationships with patients and staff that could impair professional judgment or risk the possibility of exploiting the veracity and confidence placed in the doctor-patient relationship.

**Advertising Ethics**

- Do not hold out as exclusive any devise agent, method, or technique if that representation would be false or misleading in any material respect to the public or patients.

- When you advertise, fees must be included stating the cost of all related procedures, services and products which to a substantial likelihood are necessary for the completion of the service as it would be understood by an ordinarily prudent person.

- Disclose the complete name of a specialty board or other organization which conferred certification or another form of credential.
Guidance Document: 60-15

- Do not claim to be a specialist or claim to be superior in any dental specialty or procedure unless you have attained proper credentials from an advanced postgraduate education program accredited by the Commission on Dental Accreditation of the American Dental Association.

Reports and Investigations
- Cooperate with any investigation initiated by an investigator or inspector from the Department of Health Professions on behalf of the Board and timely provide information and records as requested.
- Allow staff to cooperate with any investigation initiated by an investigator or inspector from the Department of Health Professions on behalf of the Board.
- Report the adverse reaction of a drug or dental device to the appropriate medical and dental community and in the case of a serious event to the Food and Drug Administration or Board of Dentistry.
- Provide expert testimony when that testimony is essential to a just and fair disposition of a judicial or administrative action.
- Become familiar with the special signs of child abuse and report suspected cases to the proper authorities.
- Report to the Board of Dentistry instances of gross or continually faulty treatment by other dentists.

Notice
This guidance document does not address every law and regulation which governs the practice of dentistry. To fully understand your legal responsibilities you should periodically review the laws, regulations, notices and guidance documents provided on the Board of Dentistry webpage, www.dhp.virginia.gov/dentistry.

Adopted: December 4, 2009
Revised: March 13, 2015, September 16, 2016
Virginia Board of Dentistry

Policy on Recovery of Disciplinary Costs

Applicable Law and Regulations

- §54.1-2708.2 of the Code of Virginia. The Board of Dentistry (the Board) may recover from any licensee against whom disciplinary action has been imposed reasonable administrative costs associated with investigating and monitoring such licensee and confirming compliance with any terms and conditions imposed upon the licensee as set forth in the order imposing disciplinary action. Such recovery shall not exceed a total of $5,000. All administrative costs recovered pursuant to this section shall be paid by the licensee to the Board. Such administrative costs shall be deposited into the account of the Board and shall not constitute a fine or penalty.

- 18VAC60-15-10 of the Regulations Governing the Disciplinary Process. The Board may assess:
  - the hourly costs to investigate the case,
  - the costs for hiring an expert witness, and
  - the costs of monitoring a licensee's compliance with the specific terms and conditions imposed up to $5,000, consistent with the Board's published guidance document on costs. The costs being imposed on a licensee shall be included in the order agreed to by the parties or issued by the Board.

Policy

1. Disciplinary costs will not be assessed for licensees receiving their first Board Order in which violations were found and sanctions were imposed.

2. The maximum cost assessment for a dentist is $5,000.

3. The maximum cost assessment for a dental hygienist is $1,250.

4. In a second or any subsequent Order against a licensee, in addition to the sanctions to be imposed, enters which might include a monetary penalty, the Board will specify the administrative costs to be recovered from a licensee in each pre-hearing consent order offered and in each order entered following an administrative proceeding. These administrative costs are in addition to the sanctions imposed which might include a monetary penalty.

5. The amount of administrative costs to be recovered will be calculated using the assessment of costs specified below and will be recorded on a Disciplinary Cost Recovery Worksheet (the worksheet). All applicable costs will be assessed as set forth in this guidance document. Board staff shall complete the worksheet and assure that the cost to be assessed is included in Board orders. The completed worksheets shall be maintained in the case file. Assessed costs shall be paid within 45 days of the effective date of the Order, unless a payment plan has been requested and approved.
Assessment of Costs
Based on the expenditures incurred in the state’s fiscal year which ended on June 30, 2018, the following costs will be used to calculate the amount of funds to be specified in a board order for recovery from a licensee being disciplined by the Board:

- $144 per hour for an investigation multiplied by the number of hours the DHP Enforcement Division reports having expended to investigate and report case findings to the Board.
- $150 per hour for an inspection conducted during the course of an investigation, multiplied by the number of hours the DHP Enforcement Division reports having expended to inspect the dental practice and report case findings to the Board.
- If applicable, the amount billed by an expert upon acceptance by the Board of his expert report.
- The applicable administrative costs for monitoring compliance with an order as follows:
  - $130.25 Base cost to open, review and close a compliance case
  - $73.25 For each continuing education course ordered
  - $19.00 For each monetary penalty and cost assessment payment
  - $12.00 For each practice inspection ordered
  - $38.00 For each records audit ordered
  - $114.00 For passing a clinical examination
  - $108.50 For each practice restriction ordered
  - $89.50 For each report required.

Inspection Fee
In addition to the assessment of administrative costs addressed above, a licensee shall be charged $350 for each Board-ordered inspection of his practice as permitted by 18VAC60-21-40 of the Regulations Governing the Practice of Dentistry.

Effective: November 21, 2018
Revised: September 14, 2018
Virginia Board of Dentistry

Policy on Dental Clinical Examinations Acceptable to the Board

Excerpts of Applicable Law, Regulation and Guidance

- An application for a license to practice dentistry shall be made to the Board in writing and shall be accompanied by satisfactory proof that the applicant, among other requirements, has successfully completed a clinical examination acceptable to the Board and has met other qualifications as determined in regulations promulgated by the Board, §54.1-2709.B(iv) and (v).
- The Board may grant a license to practice dentistry to an applicant licensed to practice in another jurisdiction if the applicant, among other requirements, meets the requirements of §54.1-2709.B, §54.1-2709.C(1).
- All applicants for dental licensure by examination shall have, among other requirements, passed a dental clinical competency examination that is accepted by the Board, 18 VAC 60-21-210.A(1)(b).
- All applicants for dental licensure by credentials shall have, among other requirements, successfully completed a clinical competency examination acceptable to the Board, 18 VAC 60-21-210.B(2).
- An original score card or report from the testing agency documenting passage of a clinical examination involving live patients is required. Candidate's score cards are not acceptable. All score cards or reports must be requested by the applicant. (Canadian exams are not accepted.) Certificates are not accepted.

Applications for dental licensure by Examination

- If applying by examination, the examination results accepted are: SRTA from any year; CRDTS, WREB (request a detailed report) or NERB/CDCA if taken after January 1, 2005; and CITDA if taken after September 1, 2007; and ADEX if taken after January 1, 2012.
- All examinations taken after December 7, 2012 Clinical examinations taken after January 1, 2019 must include, at a minimum, passage of all the following sections on: Endodontics; Prosthodontics; and operative dentistry consisting of a Posterior Class II and Anterior Class III restorations; and Periodontal.

Applications for dental licensure by Credentials

- If applying by credentials, the examinations results accepted are CRDTS, WREB, NERB/CDCA, CITDA and ADEX and the results of state administered examinations are accepted when the scorecard or report shows that testing included live patients. All examinations taken after December 7, 2012. Clinical examinations taken after January 1, 2019 must include, at a minimum, passage of all the following sections on: Endodontics, Prosthodontics, and operative dentistry consisting of a Posterior Class II and Anterior Class III restorations; and Periodontal.

1 At the December 7, 2012 Board Business Meeting, the Board voted that only the periodontal portion of the ADEX clinical examination not be required. As such, the periodontal portion is not required of any clinical examination accepted by the Virginia Board of Dentistry.
Disciplinary Board Report for September 14, 2018

Today's report reviews the 2018 calendar year case activity then addresses the Board’s disciplinary case actions for the fourth quarter of fiscal year 2018 which includes the dates of April 1, 2018 through June 30, 2018.

Before getting into the numbers below on the processing of patient care cases, these are a few examples of how patient care is defined: Impairment due to use of alcohol or drugs; dispensing drugs to patients for non medicinal purposes, excessive prescribing, dispensing without a practitioner/patient relationship; sexual assault; inappropriate termination of practitioner/patient relationship; improper/unnecessary performance of treatment; failure to diagnose; practicing beyond the scope of dentistry; practicing on a revoked, suspended, lapsed license, and aiding and abetting unlicensed activity; falsification/alteration of patient records; and disciplinary action by another state when the underlying conduct is a patient care case.

Calendar Year 2018

The table below includes all cases that have received Board action since January 1, 2018 through August 31, 2018.

Q4 FY 2018

For the fourth quarter of 2018, the Board received a total of 90 patient care cases. The Board closed a total of 98 patient care cases for a 109% clearance rate, which is down from 115% in Q3 of 2018. The current pending caseload older than 250 days is 29%, which is up from 25% in Q3 of 2018. The Board’s goal is 20%. In Q4 of 2018, 96% of the patient care cases were closed within 250 days, whereas 89% of the patient care cases were closed within 250 days in Q3 of 2018. The Board’s goal is 90% of patient care cases closed within 250 days.1

IN COMPARISON

Q4 FY 2017

For the third quarter of 2017, the Board received a total of 60 patient care cases. The Board closed a total of 66 patient care cases for a 110% clearance rate. The pending caseload older than 250 days was 34%. In Q4 of 2017, 87% of the patient care cases were closed within 250 days.
Other Health Professions Board Case Processing Times

When reviewing the time to close a case at the board level, overall it continues to slow for the Agency. This is the 5th consecutive quarter that the percent of cases disposed within 120 days has decreased. The Board of Nursing, which carries the majority of discipline cases in the agency, and therefore contributes heavily to agency-wide fluctuations, again saw a decline. However, the other “large” boards – Medicine, Dentistry and Pharmacy all showed improvement. Again, Dentistry’s percent of cases closed within 120 days (96) in Q4 2018 is at 96% versus overall of 79%.

License Suspensions

There was one mandatory suspension of a dental license between May 26, 2018 and August 31, 2018.

OMS Audits

The triennial OMS Cosmetic Procedures Audit has begun. Inspectors began conducting audits August 1, 2018. There are 38 Oral and Maxillofacial Surgeons who have a cosmetic procedure certification with the Board and of those only 28 performed cosmetic procedures during the audit period.

Student Observation

As you all have noticed at our informal conferences and formal hearings, we have many student observers from both dental and dental hygiene programs. For your review and contemplation are attached copies of two summaries that were submitted to their professors about Special Conference Committee performance.

Board Member concerns

Board staff would like to know if the Board members have any concerns about the way discipline matters are being handled? How is the probable cause review process working? Is there anything that could be done differently? Any concerns about informal conferences?
Virginia Department of Health Professions

Patient Care Disciplinary Case Processing Times (with Continuance Days):
Quarterly Performance Measurement, Q4 2014 - Q4 2018

"To ensure safe and competent patient care by licensing health professionals, enforcing standards of practice, and providing information to health care practitioners and the public."

DHP Mission Statement

In order to uphold its mission relating to discipline, DHP continually assesses and reports on performance. Extensive trend information is provided on the DHP website, in biennial reports, and, most recently, on Virginia Performs through Key Performance Measures (KPMs). KPMs offer a concise, balanced, and data-based way to measure disciplinary case processing. These three measures, taken together, enable staff to identify and focus on areas of greatest importance in managing the disciplinary caseload; Clearance Rate, Age of Pending Caseload and Time to Disposition uphold the objectives of the DHP mission statement. The following pages show the KPMs by board, listed in order by caseload volume; volume is defined as the number of cases received during the previous 4 quarters. In addition, readers should be aware that vertical scales on the line charts change, both across boards and measures, in order to accommodate varying degrees of data fluctuation. This report includes the number of days the case was in the continuance activity.

Clearance Rate - the number of closed cases as a percentage of the number of received cases. A 100% clearance rate means that the agency is closing the same number of cases as it receives each quarter. DHP's goal is to maintain a 100% clearance rate of allegations of misconduct. The current quarter's clearance rate is 102%, with 1171 patient care cases received and 1194 closed.

Age of Pending Caseload - the percent of open patient care cases over 250 business days old. This measure tracks the backlog of patient care cases older than 250 business days to aid management in providing specific closure targets. The goal is to maintain the percentage of open patient care cases older than 250 business days at no more than 20%. The current quarter shows 17% patient care cases pending over 250 business days with 2791 patient care cases pending and 473 pending over 250 business days.

Time to Disposition - the percent of patient care cases closed within 250 business days for cases received within the preceding eight quarters. This moving eight-quarter window approach captures the vast majority of cases closed in a given quarter and effectively removes any undue influence of the oldest cases on the measure. The goal is to resolve 90% of patient care cases within 250 business days. The current quarter shows 85% percent of patient care cases being resolved within 250 business days with 1169 cases closed and 938 closed within 250 business days.

Note: This measure may be off 1%-2% in Q4 2018

### Clearance Rate

**Nursing** - In Q4 2018, the clearance rate was 103%, the Pending Case load older than 250 business days was 18% and the percent closed within 250 business days was 65%.

**Q4 2018 Caseloads:**
- Received = 450, Closed = 483
- Pending over 250 days = 180
- Closed within 250 days = 293

---

**Nurses** - In Q4 2018, the clearance rate was 97%, the Pending Case load older than 250 business days was 16% and the percent closed within 250 business days was 59%.

**Q4 2018 Caseloads:**
- Received = 327, Closed = 318
- Pending over 250 days = 159
- Closed within 250 days = 169

---

**CNA** - In Q4 2018, the clearance rate was 118%, the Pending Case load older than 250 business days was 8% and the percent closed within 250 business days was 77%.

**Q4 2018 Caseloads:**
- Received = 123, Closed = 145
- Pending over 250 days = 21
- Closed within 250 days = 108

---

### Age of Pending Caseload

(percentage of cases pending over one year)

---

### Percent Closed in 250 Business Days

VA Board Summary

I attended a hearing for a Dr with allegations all in reference to one case and one patient. This case was drawn out over a few years because of a host of problems. A good portion of the allegations were in reference to the Doctors poor record keeping. The thing that made this hearing more surprising was that Dr. [redacted] had been accused of similar things 15 years ago and had to take CE to improve his record keeping. He didn’t seem to learn his lesson the first time around.

The first few allegations were about the doctors notes. His notes were very generalized and didn’t include many important parts such as diagnosis, anesthetic used, healthy history or treatment rendered. Some appointments didn’t even have a note associated with it. Most of the things the board pointed out were obvious mistakes that any practitioner should include but there were a few things that they called him out for that I have not included from time to time in my notes. It helped me realize the importance of truly having detailed notes and not skipping though them.

The other problem was that this doctor had several implants fail throughout the treatment. He kept placing implants, and then replacing them time after time. He never stopped and thought that that he was in over his head or that he should refer out to a specialist even as the treatment was not going the way he thought it would. As he spoke more and more about implants it became apparent that he had a very limited education on implants. I did not feel at
all confident in his knowledge or ability to do these procedures. Realize now that a lot of
doctors who are now practicing did not receive the same education we do now in dental
school. We have classes dedicated to treating patients with Implants so we have a decent
foundation to start on. Even with this I would want to receive more training before attempting
this type of procedure on my own. This doctor seemed like he had taken a weekend course and
then thought we was ready to place implants in patients. While this may work for some simple
cases, it did not prepare him for complicated cases or how to act when the treatment was not
going as planned. He should have realized after 8 implants failed there was something he was
not doing correctly. This was clearly a breach of the principle of non-maleficence. A doctor is
supposed to do no harm. Even after he had done harm he refuse to accept it and kept doing the
same harmful treatment over and over again.

In the end the doctor fined $5,000 and required to take 7 hours of CE for dental record keeping
and 8 hours of CE for placement and restoration of implants. I honestly think this man needs a
lot more education that 8 hours before I would feel comfortable with him placing implants in
me. Given the fact that this was his second time at the board for much of the same thing I think
they let him off pretty light.
Virginia Board of Dentistry Informal Conference

On [redacted], 2018, I attended the informal conference before a committee of the Virginia Board of Dentistry regarding various allegations of violations of board regulations by Dr. [redacted], DDS, as identified in Case No. [redacted]. The informal conference proceeding began with introductions of all parties present and involved, with Dr. [redacted] and his legal representation positioned in the front and center. As students, we sat behind Dr. [redacted] and his representation and observed the proceedings. The legal authority and jurisdiction were read, including the rights of Dr. [redacted]. The statement of allegations was presented, and Dr. [redacted] was invited to provide his explanation of what occurred and what decisions he made for the treatment of a particular patient. As the violations were individually discussed, the board members would question Dr. [redacted] in order to understand his decisions, practices, and knowledge regarding what occurred and what is currently acceptable under the law. Dr. [redacted]'s representation provided a closing statement, and after a brief break, a decision regarding Dr. [redacted] was made and an order given.

The conference was held to discuss a case regarding Patient A, who presented to Dr. [redacted] on what he described as a very busy day in the office as an emergency patient with pain, swelling, and obvious infection with exudate around tooth #32. His decision was to perform an emergency surgical extraction of tooth #32 on July 28, 2016. Written post-op Instructions that included a 24-hour emergency telephone number to call were allegedly not provided to the patient. The patient found Dr. [redacted]'s office phone number on his website, and left messages at that number for three days informing him of her pain and swelling. Dr. [redacted] stated in the conference that he sometimes gets dropped calls, and that he is not technologically savvy. Normally he receives his calls at home, and if he were at home, he would have received the calls. However, the calls were routed to his work office, and he did not receive them. The patient then presented to an urgent care facility, where she was given a prescription for Clindamycin due to infection and was recommended to go to the ER if symptoms continued. The patient then presented to Winchester Medical Center and was diagnosed with acute right-sided facial cellulitis/cervical lymphadenitis, and dehydration secondary to her difficulty with oral intake.

The first board regulation violated was Virginia Code 54.1-2706(5) and (9) and 18 VAC 60-21-280(5)(2). The violation alleges intentional or negligent conduct in the practice of dentistry which causes or is likely to cause injury to a patient. The board regulations states that "post-operative Instructions shall be given verbally and in writing. The written Instructions shall include a 24-hour emergency telephone number." When questioned whether written post-operative instructions were provided to the patient, Dr. [redacted] explained that the standard protocol in his office is to provide the patient with a post-operative kit or bag that includes gauze, a syringe, and usually an emergency telephone number. Verbal instructions are usually given by one of his assistants for the use of the syringe for site cleansing, though written instructions on its use are not included in the kit. He was unable to prove in this case whether a phone number was provided or not, or whether the patient was given the post-operative kit. While his home phone number was not given, he claims that it is readily available in the phone book. In this case, the violation was because he did not provide written post-operative instructions. In addition, he may not have included the phone number in her bag, and technological difficulties prevented him from receiving calls to his office on his home phone.

The second board regulation violation was also with regards to Virginia Code 54.1-2706(5) and (9), which alleges intentional or negligent conduct in the practice of dentistry which causes or is likely to cause injury to a patient. Following the extraction of Patient A's tooth #32, Dr. [redacted] failed to prescribe the proper antibiotic, and as such, the patient's infection was not properly controlled or resolved, which caused further harm to the patient. He prescribed a Z-pack, which is not FDA-approved for use for a dental infection. When questioned by the Board about why he would prescribe a Z-pack, Dr. [redacted] stated that the patient was allergic to penicillin and that the patient stated that "stronger antibiotics" made her stomach upset. When questioned what he meant by "stronger antibiotics," no clear explanation was given. He said that usually in a case with a penicillin allergy he
would use Clindamycin. However, she said she couldn’t take that and he took her word, prescribing a Z-pack in its
place with a defense that it was better than nothing. He knows that a Z-pack is not recommended. The Board
took some time to question Dr. about how he makes decisions on what to prescribe. It appears, in this
case, that Dr. was allowing the patient to make clinical decisions, especially with regards to
prescriptions. He said that usually he has “favorites” that he regularly prescribes and was not able to answer the
question from the Board about whether the antibiotics that he is prescribing are based on current evidence-based
recommendations.

The third board regulation violated was to Virginia Code 54.1-2706(5) and (9), as described in the first two
violations, which alleges intentional or negligent conduct in the practice of dentistry which causes or is likely to
cause injury to a patient, in addition to 18 VAC 60-21-90(B)(3), which states that the diagnosis and options must be
discussed, including the risks and benefits of treatment or non-treatment and the estimated cost of treatment
options. On the day that Dr. performed the emergency extraction of tooth #32, he failed to document
any diagnosis in the patient’s record that would justify the extraction and failed to document the risks and benefits
of treatment or non-treatment and the estimated expenses associated with the options. He said that since he saw
a lot of pus, he knew that it was infected, and that as evidenced in the radiographs, tooth #32 needed to be
extracted. However, the records were incomplete and did not provide the justification for the treatment provided.

The fourth violation was of Virginia Code 54.1-2706(9) and 18 VAC 60-21-90(B)(5) of the Regulations,
which states that there must be a list of drugs prescribed, administered, or dispensed and the route of
administration, quantity, dose, and strength should be recorded. While Dr. documented that he
administered nitrous to Patient A, he did not document the quantity or strength of it. In a letter to an Investigator
with the Department of Health Professions from December 2016, one of Dr. ’s assistants also stated that
Septocaine was administered, but that was also not documented in the patient’s record. When questioned why
the nitrous and Septocaine were not documented, Dr. explained that his standard protocol is to give
50/50 nitrous to the patient and he never documents that. He did not have record of whether or not Septocaine
was administered. He commonly gives nitrous during injections to calm the patient, and he remembered that this
patient was anxious. He claims that 50/50 nitrous is not strong. However, since there is no documentation of the
quantity or strength of the nitrous administered, we don’t know if it was a harmful amount for that patient.

The final violations were of Virginia Code 54.1-2706(5) and (9), as explained above, and 18 VAC 60-21-
280(F)(1) and (2) and 18VAC 60-21-280(G)(1) of the Regulations, which states that baseline vital signs should
include blood pressure, respiratory rate, and heart rate, and that they should be taken and recorded prior to
administration of sedation and prior to discharge. Dr. does not routinely take vital signs, and judges
whether patients are okay based on how they visibly looked prior to discharge. He did not realize that it was the
law to take vital signs.

Overall, the ADA principle most violated was non-maleficence, to do no harm to the patient. We have a
duty to protect our patients from harm and to provide them with the necessary information and instructions to
care for a healing surgical site. Should there be an emergency, the patient needs a way to contact us. We need to
know the appropriate regulations for prescribing antibiotics, be knowledgeable about their use and
contraindications, and not let the patient make clinical decisions that we should be making as their healthcare
provider. The strength and dosage of the administered drugs need to be properly recorded to know whether or
not the amount was harmful. The ADA principle of autonomy was also breached in this case. It is important to
properly inform and educate the patient with regards to procedures, risks, benefits, and recommended
prescription medications. Also related is the ADA principle of veracity, or being truthful in gathering facts and
relaying them to the patient. In this manner, the patient will be able to make more informed decisions regarding
their care. We must be knowledgeable about the administration of nitrous oxide, be consistent in our taking and
recording vital signs, and always be thorough in our documentation and justification of the treatment that we
provide. As we take baseline vital signs, we will be better able to minimize harms and maximize benefits for the
patient. As we follow regulations, we will be applying the ADA ethical principle of beneficence, in seeking to do
good for others and benefit them.
When Dr. [redacted] was asked if he had changed anything in his behaviors or documentation since the time of this incident approximately two years ago, he stated that he had not. After a brief deliberation, the Board's decision was to order Dr. [redacted] to provide written proof of completion of 7 credit hours of continuing education in dental record keeping and risk management. Dr. [redacted]'s representation promised to provide him with a list of all current recommendations. He was instructed that he is required to take vital signs on his patients and must have accurate and complete documentation on his patients. It appeared that Dr. [redacted] understood the importance of the changes that need to be made, and he promised to practice according to the law.

Based on the board regulations that were violated and the ethical principles that were breached, there are a few things that should have been done differently, that perhaps would have produced different outcomes for the patient and for Dr. [redacted]. First of all, the patient was not prescribed the approved antibiotic for a dental infection, which may have resolved the patient's pain and swelling before it progressed to a more serious condition requiring emergency medical care. He could have been more firm in his decisions on what to prescribe the patient, or consulted the patient's physician if he had concerns about what the patient's allergies were since the description was unclear to him. Perhaps if he had done so, he would have prescribed the correct antibiotic for the situation. In addition, the patient was unable to get in contact with Dr. [redacted], and if the line of communication had been functioning properly, the patient could have been seen by Dr. [redacted] and given post-operative care that was apparently necessary in this case that would have resolved the infection. In general, if Dr. [redacted] had taken the patient's vital signs and recorded all required drug information, not only would it have avoided several board violations and consequences, but he would also have more complete patient records and be able to better assess the care provided to his patient.

I found this case to be very informative, and it made me reflect on the importance of always keeping a complete patient record. Several of the violations were because details were lacking in documentation. I also learned how important it is to stay current with the laws and regulations governing the appropriate prescribing of antibiotics, requirements for vital signs, and the administration of nitrous oxide. It was interesting that Dr. [redacted] did not realize that he was letting patients dictate how he was prescribing medications. In this case, I would not have prescribed a Z-pack, and would have prescribed Clindamycin or an FDA-approved antibiotic for use for a dental infection. Another issue was the fact that the patient was not provided written post-operative instructions. I believe that after we provide verbal instructions so many times, it may begin to feel routine; however, we cannot only verbally tell someone what to do and assume that they comprehend the instructions and will remember them. We must educate our patients and educate our staff about how to instruct the patients as well. And we need to provide the patients with our contact information and a 24-hour emergency telephone number that functions should they need it. Even when we have a busy day in the office, we have a responsibility to do good and care individually for our patients. We need to ensure they are provided with the information they need, that they have been prescribed the correct medications, and that we have complete documentation. As we do so, and learn from the mistakes that Dr. [redacted] made in this particular patient case, we will be able to provide high quality care for our patients, build relationships with them based on trust and communication, and uphold the laws, board regulations, and principles of ethical practice.
