Summary

Please provide a brief summary of the proposed new regulation, amendments to an existing regulation, or the regulation being repealed. There is no need to state each provision or amendment or restate the purpose and intent of the regulation, instead give a summary of the regulatory action and alert the reader to all substantive matters or changes. If applicable, generally describe the existing regulation.

This regulatory action is needed in order to establish appropriate and necessary permitting requirements for discharges of wastewater from car wash operations. These discharges are considered to be point sources of pollutants and thus are subject to regulation under the VPDES

permit program. The existing general permit expires on October 15, 2002. The general permit is being reissued in order to continue making it available for car washes after that date. This is a reissuance of an existing regulation, and changes to the regulation are designed to clarify the intent of the regulation. The changes and rationale are: (1) the EPA reopener special condition was removed because car wash facilities are not listed as primary industry in accordance with 40 CFR Part 122, Appendix A; (2) the notification levels special condition was added because it is required by the VPDES Permit Regulation, 9 VAC 25-31-200 A for all-manufacturing, commercial, mining and silvicultural dischargers; (3) Part II, K.1.Registration Statement was revised to reflect changes in signature requirements in accordance with the VPDES Permit Regulation. The final text is unchanged from the proposal.
