VIRGINIA STATE POLICE

COMMUNITY POLICING ACT
DATA COLLECTION

INSTRUCTIONS
AND
TECHNICAL SPECIFICATIONS

Version 5.4

Effective _____

Contents

*All data fields required to be collected except Virginia Crime Codes (VCCs).
However, the VCC column IS required for file layout even if the fields are left blank.
Only 'Valid Data Values' indicated are acceptable

Data Required

§ *52-30.2.* *Prohibited practices, collection of data.*

Reporting Requirements

§ *52-30.4.* *Reporting of state and local law-enforcement agencies required.*

§ *15.2-1609.10.* *Prohibited practices; collection of data.*

§ *15.2-1722.1.* *Prohibited practices; collection of data.*

Definitions

Investigatory Detention means a temporary deprivation of a person's liberty for investigative purposes based upon reasonable suspicion that the person has committed, is committing, or is about to commit a crime or infraction. The following items are investigative detentions which require data collection:
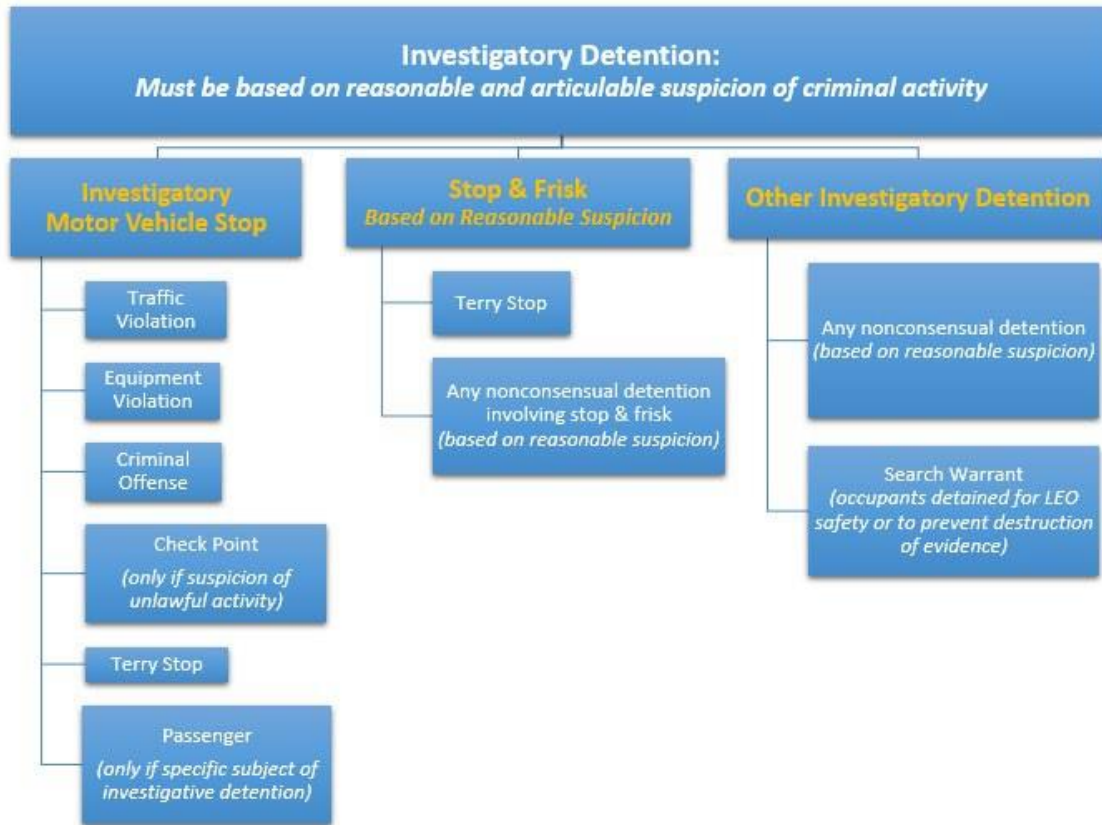

- all investigatory motor vehicle stops
- all stop-and-frisks of a person based on reasonable suspicion
- all other investigatory or temporary detentions of a person during any investigative stop

In the absence of a codified definition, an investigative detention is generally defined as a temporary seizure of a person for the purpose of determining, (1) whether there is probable cause to arrest the person, (2) whether further investigation is warranted, or (3) whether the officer's suspicions were unfounded. However, the underlying law is established and provided in United States v. Cortez, 449 U.S. 411 (1981) where the court held that a detention for investigative purposes is based on "reasonable suspicion of criminal activity" and the officer must have "a particularized and objective basis for suspecting the particular person stopped of criminal activity." Thus, the standard is clear that an investigative stop must be based on reasonable and articulable suspicion of criminal activity. That suspicion must be confirmed, in which case an arrest may be made based on probable cause, or dispelled and the person is released.

If a stop is not investigative in nature nor focused on suspicion of criminal activity, then it is not an investigatory detention for the purposes of determining whether to collect information under the Code. Each of the categories designated for the collection of data is merely a modification of an investigatory detention (i.e. an investigatory motor vehicle stop is an investigatory detention). Each of the categories demands the same standard of reasonable suspicion of criminal activity to be met, except as provided below. If a law enforcement function is based on civil enforcement authority or previously established probable cause, such as an eviction or the arrest of a person based on a warrant (during a police function which is not an investigatory stop or detention), then it does not meet the collection standard.

Where persons are temporarily detained by operation of law in the furtherance of an investigative matter rather than based on the particularized suspicion of criminal activity, data collection is required. This includes where law enforcement officers search a premises pursuant to a search warrant and detain the occupants for the purposes of officer safety or to prevent the destruction of evidence. See Michigan v. Summers, 452 U.S. 692 (1981). It also includes the affirmative detention of a passenger,

such as ordering and detaining an occupant from the vehicle, during a routine traffic stop for safety reasons, even if the officer has no reason to suspect the passenger of criminal behavior. See Pennsylvania v. Mimms, 434 U.S. 106 (1977). Lastly, it may also include the temporary detention of a driver or pedestrian, excluding fleeting stops which do not further a law enforcement purpose, pursuant to a non-discretionary stop plan, such as in the case of a traffic or perimeter checkpoint. See, e.g., Michigan Dep't of State Police v. Sitz, 496 U.S. 444 (1990).

The following instances will most likely not require data collection, <u>unless they meet the elements</u> of the CPA listed above:

Note: These are merely examples and they do not represent an all-inclusive list. Some situations may have different elements. Therefore, each situation will need to be evaluated to determine if it meets the requirements of the data collection.

Law-Enforcement Officer or State Police Officer is defined in § 9.1-101 of the Code of Virginia

Motor Vehicle is defined in § 46.2-100 of the Code of Virginia

Record ID - A unique record identifier for each submitted stop assigned by the reporting agency to uniquely identify the stop (e.g., the CAD number, stop number). Do not include officer's information. Because Record IDs identify a stop event, all individuals in a stop that are subject to an investigatory detention must have the same Record ID.

If a checking detail assignment has the same CAD/Record ID number for all stops, it will be accepted if the Reason for Stop is listed as "P" (Checkpoint) for all stops involved in the checkpoint.

Column Header: Record ID (also accepted: Record_ID, RecordID)
Format: Up to 32-Character Alphanumeric (ex. 1234)
                  Must contain a valid character combination of the following:
                  ● A–Z (capital letters only)
                  ● 0–9
                  ● Period (.), Hyphen (-), Parenthesis (), At symbol @, Slash (/)
                  ● No commas
Occurrence: Once
Mandatory: Yes

Stop Date - Indicate the date of the stop. Do not include a timestamp.
If entering manually on the Excel table, include forward slash (/). Date will convert to MMDDYY when tab to the next field.

Column Header: Stop Date (also accepted: Date, Stop_Date, StopDate)
Format: 6-Character Numeric (MMDDYY)
Occurrence: Once
Mandatory: Yes

ORI - Indicate the primary 9-digit ORI assigned to the agency of the officer making the stop.

If your agency does not have an ORI or you are unaware of the correct ORI, please let our office know via email.

Column Header: ORI (also accepted: Agency ORI, Agency_ORI, AgencyORI)
Format: 9-Character Alphanumeric (VAVSP0000)
                  Must contain a valid character combination of the following:
                  ● A–Z (capital letters only)
                  ● 0–9
Occurrence: Once
Mandatory: Yes

Location - Free text field to indicate interstate, address, intersection, or coordinates of location. GPS coordinates preferred (not required), separated by space.

PLEASE DO NOT USE:
- COMMAS
- STORE/RESTAURANT NAMES (I.E., TACO BELL)

Column Header: Location
Format: Up to 45-Character Alphanumeric
Intersection: STREET AT STREET (ex. BROAD ST AT BELVIDERE ST)
Address: BLOCK STREET (ex. 800 WEST BROAD STREET)
Highway/Interstate: DIRECTION HIGHWAY NUMBER EXIT/MILE MARKER
(ex. NB 95 EXIT 61)
Coordinates: lat long (ex. 37.1234 -77.1234)
Must contain a valid character combination of the following:
- A–Z (capital letters only)
- 0–9
- Period (.), Hyphen (-), Parenthesis (), At symbol @, Slash (/), Ampersand (&)
- No commas
Occurrence: Once
Mandatory: Yes

Jurisdiction Code - Indicate the jurisdiction code for the county or city in which the stop was initiated based on codes provided by Virginia Department of State Police.

(This code may or may not match the FIPS code)

Column Header: Jurisdiction Code
(also accepted: Jurisdiction, Jurisdiction_Code, JurisdictionCode)
Format: 3-Character Numeric (###) (ex. 041)
Occurrence: Once
Mandatory: Yes
Values: Applicable values on next page

Initial Reason for Stop - Indicate the initial reason for the stop. Conclusions of the stop will be gathered in a separate data element. Only data values below accepted.

Column Header: Initial Reason for Stop
                      (also accepted: Reason for Stop, Reason_for_Stop, ReasonforStop)
Format: 1-Character Alphabetic
Occurrence: Once
Mandatory: Yes
Values: Applicable values below

Valid Data Values	Value Name	Description
T	Traffic Violation	includes traffic violations, such as speeding, reckless driving, improper lane change, etc. *(Note: Traffic accidents are not required to be collected. If an agency decides to report accidents, the Reason for Stop must be "A", NOT "T".)*
E	Equipment Violation	includes violations involving defective or unsafe equipment
C	Calls for Service	includes stops initiated by a call for service/dispatch.
S	Terry Stop	response to unlawful or suspicious activity (examples: littering, brandishing a firearm, stopping a vehicle fitting the description of a stolen vehicle, stopping an individual fitting a suspect's description)
P	Checkpoint	traffic stops such as roadblocks and sobriety checkpoints where there is reasonable suspicion and/or objective facts that the person is involved in an unlawful activity *Scenarios for which stop data should be collected include, but are not limited to, further investigation into confirming identity, suspicion of driving under the influence, criminal investigation due to observations, and any time a summons is issued for any individual in the vehicle. Data collection is not required for fleeting stops (Ex: an individual stopped at a DUI checkpoint that does not appear to be intoxicated and is free to leave).*
O	Other Investigative Detention	any other reason for an investigative stop not included in another category
W	Warrant Service*	if the only reason for stop is to serve an outstanding warrant. If the individual is initially stopped for another reason, select the initial reason for stop (i.e., "T" traffic violation, even if an outstanding warrant is served at the conclusion of the stop)
A	Accident**	if the initial reason for stop is an accident. Please note that accidents are not required to be collected.

*Q: Warrant Service
If the only reason for stopping an individual is to serve an outstanding warrant, is stop data required to be collected?
A: No, if the only reason for stopping an individual is to serve an outstanding warrant, stop data is not required to be collected. However, if an agency chooses to report these interactions, the Initial Reason for Stop must be "W" for Warrant Service.

For instances where the initial reason for stop involves a motor vehicle stop, stop and frisk, or other investigatory detention, and it is discovered during the stop that the individual has an outstanding warrant, CP data must be collected. The initial reason for stop would be traffic violation, equipment violation, etc., and, if the outstanding warrant is served, Action Taken would be "A" for Arrest.

**Q: Accident
Are motor vehicle accidents considered "motor vehicle stops" for purposes of the Community Policing Act's data collection?
A: In most instances, the parties have already stopped and are voluntarily waiting for an officer to investigate the incident. Therefore, collection of community policing data on traffic accidents is not required. However, if an agency wishes to report traffic accidents, the Initial Reason for Stop must be "A" for Accident.

Q: Are there any restrictions on the type of stop data reported by a law enforcement agency?
A: Virginia State Police will accept all data submitted that complies with the Instructions and Technical Specifications where placement in any given category can be reasonably explained. While Virginia State Police does attempt to provide guidance on data collection, it is ultimately up to each agency to determine which scenarios meet the undefined criteria of the Community Policing Act.

Person Type - Indicate whether the person subject to the investigatory detention is a Driver, Passenger, or Other Individual. Data should only be collected on persons that are the direct subjects of an investigatory detention.

Valid Data Values	Description
D	Driver
P	Passenger
O	Other Individual (ex: pedestrian) *(Note: "F" will be accepted thru 6/30/24)*

Column Header: Person Type (also accepted: Person_Type, PersonType)
Format: 1-Character Alphabetic
Occurrence: Once
Mandatory: Yes

Q: Do we collect passenger information during a motor vehicle stop?
A: Passenger information is **only** collected if the passenger is the direct subject of an investigatory detention. Each person subject to a nonconsensual stop is a separate entry in the Community Policing data collection.

Q: Is data reporting required for non-motor vehicle related stops?
A: Based on the expanded definition of stops to be collected by Senate Bill 5030, stop data involving individuals that are subject to an investigatory detention, including pedestrians, are required as of July 1, 2021. Each person subject to an investigatory detention is a separate entry in the Community Policing data collection.

Race - Indicate the race of the Individual or Driver involved.

Column Header: Race
Format: 1-Character Alphabetic
Occurrence: Once
Mandatory: Yes

Valid Data Values	Description
W	White
B	Black or African American
I	American Indian or Alaska Native
A	Asian or Native Hawaiian or Other Pacific Islander
U	Unknown

The definitions of the racial designations are:

White—A person having origins in any of the original peoples of Europe/Middle East/North Africa
Black or African American—A person having origins in any of the black racial groups of Africa
American Indian or Alaska Native—A person having origins in any of the original peoples of North and South America (including Central America) and who maintains tribal affiliation or community attachment
Asian/Pacific Islander—A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam or a person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.

> Q: How do I determine race? I'm not comfortable making that determination.
>
> A: The Community Policing Act allows for either the subject's self-identification or the officer's determination. If you are uncomfortable asking that information, make a determination based on your observations. If you do ask, and the subject questions why that information is needed, you can briefly explain the mandatory collection pursuant to the Community Policing Act.

Ethnicity - Indicate the ethnicity of the Individual or Driver involved.

Column Header: Ethnicity
Format: 1-Character Alphabetic
Occurrence: Once
Mandatory: Yes

Valid Data Values	Description
H	Hispanic or Latino
N	Not Hispanic or Latino
U	Unknown

The ethnic designation of Hispanic or Latino includes persons of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

Age - Indicate the age of the Individual or Driver involved. If the specific age is unknown, an estimate is permitted.

Column Header: Age
Format: 2-Character Numeric
Occurrence: Once
Mandatory: Yes

Valid Data Values	Description
01 thru 98	Years Old (2 digit specific age; range not accepted)
99	Over 98 Years Old (if 99 or over, indicate 99)
00	Unknown

Gender - Indicate the gender of the Individual or Driver involved.

Column Header: Gender
Format: 1-Character Alphabetic
Occurrence: Once
Mandatory: Yes

Valid Data Values	Description
F	Female
M	Male
O	Other
U	Unknown

Q: How do I collect gender for non-binary or Gender-X?

A: For this purpose, gender will be based on the subject's identification information or officer's observation. Please use an "O" for non-binary (Gender X) persons.

English-Speaking - Indicate if the Individual or Driver speaks English.

Column Header: English-Speaking
                 (also accepted: English Speaking, English_Speaking, EnglishSpeaking)
Format: 1-Character Alphabetic
Occurrence: Once
Mandatory: Yes

Valid Data Values	Description
Y	Yes
N	No

Action Taken - Indicate the most serious action taken towards the Individual or Driver at the completion of the stop or as a result of the stop. Only data values below accepted.

Column Header: Action Taken (also accepted: Action_Taken, ActionTaken)
Format: 1-Character Alphabetic
Occurrence: Once
Mandatory: Yes

Valid Data Values	Value Name	Description
W	Warning Issued	Individual or Driver received a verbal or written warning
S	Citation/Summons	Individual or Driver received a citation or summons
A	Arrest	Individual or Driver was arrested (including warrant service)
N	No Enforcement Action	No enforcement action was taken

Q: Are we required to create written warning documentation?

A: No, but your agency is required to indicate the specific violation for which the individual or driver has been warned.

Specific Violation - Indicate the most serious violation warned, cited, or arrested at the completion of the stop or as a result of the stop, based on severity type (infraction, misdemeanor or felony) and degree. ONLY one Virginia Code Section can be accepted. **https://law.lis.virginia.gov/vacode/**

Column Header: Specific Violation (also accepted: Specific_Violation, SpecificViolation)
Format: Up to 20-Character Alphanumeric (ex. 46.2-870)
                 Must contain a valid character combination of the following:
                 ● A–Z (capital or lowercase letters)

- 0–9
- Hyphen, Period, Colon, Parentheses
- PLEASE DO NOT USE COMMAS.

Occurrence: Once
Mandatory: Conditional
                This data element is Mandatory when Data Element 'Action Taken'
                contains data values W, S, or A (any action other than N for 'No Enforcement
                Action').

Virginia Crime Code (VCC) – Optional - Indicate corresponding VCC code.

Column Header: Virginia Crime Code
                (also accepted: VCC, Virginia_Crime_Code, VirginiaCrimeCode)
Format: 9-Character Alphanumeric (ex. REC6646M1)
                Must contain a valid character combination of the following:
- A–Z (capital letters only)
- 0–9
- NO hyphens (-)

Occurrence: Once
Mandatory: No
                VCCs are not mandatory. However, the VCC field/data element is required for
                file layout.

Please use the UST table for Specific Violation & Virginia Crime Codes: Uniform Statute Table

Q: Is 'speeding' an acceptable specific violation?
A: No. Only Virginia statute codes are permitted in the "Specific Violation" field (i.e., 46.2-870).

Q: Do I enter multiple lines of data if a person is cited for multiple violations?
A: No. Individuals can only be entered once per stop in the CP database. Only the most egregious violation should be entered for Action Taken, followed by Specific Violation. The degree and severity of the charge determines the most egregious violation.

Q: What specific violation do I indicate for a person arrested based on a warrant?
A: Indicate the most serious violation listed on the warrant.

Person Searched - Indicate if the Individual subject to the investigative detention was searched as a result of the stop.
Column Header: Person Searched (also accepted: Person_Searched, PersonSearched)
Format: 1-Character Alphabetic
Occurrence: Once
Mandatory: Yes

Valid Data Values	Description
Y	Yes
N	No

Vehicle Searched - Indicate if the vehicle was searched as a result of the stop. If the stop involved an Other Individual (no Driver or Passenger), this field can be left blank.

A search should not be confused with an inventory of items once a vehicle is towed.

Column Header: Vehicle Searched (also accepted: Vehicle_Searched, VehicleSearched)
Format: 1-Character Alphabetic
Occurrence: Once
Mandatory: Conditional
               This data element is Mandatory when the Data Element 'Person Type' is equal to Driver (D) or Passenger (P) if the stop involves a vehicle.

Valid Data Values	Description
Y	Yes
N	No

Physical Force Used by Officer - Indicate if the law-enforcement officer or State Police officer used physical force against the specific subject of the investigative detention.

Column Header: Force Used by Officer
               (also accepted: Force_Used_by_Officer, ForceUsedbyOfficer)
Format: 1-Character Alphabetic
Occurrence: Once
Mandatory: Yes

Valid Data Values	Description
Y	Yes
N	No

Physical Force Used by Subject - Indicate if the subject used physical force against any officers.

Column Header: Force Used by Subject
               (also accepted: Force_Used_by_Subject, ForceUsedbySubject)
Format: 1-Character Alphabetic
Occurrence: Once
Mandatory: Yes

Valid Data Values	Description
Y	Yes
N	No

Residency - Indicate the residency of the subject stopped.

Special Note for Temporary Residents of a Jurisdiction:
- 4-Year College/University Students: If a law enforcement officer determines that the

15

subject is a student of a college/university in the jurisdiction of the stop, Residency should be coded as "Resident" regardless of license address or permanent residence. However, Community College students should be classified based on their current residence (due to the non-residential nature of the college).

- Military Personnel: If a law enforcement officer determines that the subject is military stationed in the jurisdiction of the stop, Residency should be coded as "Resident" regardless of license address or permanent residence.

Column Header: Residency
Format: 1-Character Alphabetic
Occurrence: Once
Mandatory: Yes

Valid Data Values	Description
R	Resident of city/county of stop
V	Other Virginia jurisdiction resident
O	Out of State resident
U	Unknown

Monthly File Submission

File Creation

There are two methods of creating a CP stop file:

1. Data extraction from CAD/RMS in **csv format**
                 OR
2. Update of an Excel spreadsheet provided by the Virginia Department of State Police
   a. **Save file as 'csv' prior to submitting**   Save as type: CSV (Comma delimited) (*.csv)

File Naming Convention

The file name should be as follows: **ORI_MONTH_YEAR**

Example: VA9999999_August_2023 or VA9999999_AUG_2023

File Submission Deadlines - Collected data elements must be submitted **monthly** on or by the 15th of the following month. (Ex: Stop data from July 1, 2023 to July 31, 2023 is due by August 15, 2023).

Once all data has been collected for a month, ensure the file is compliant with all file submission requirements listed on the next page. Then, email the monthly file to communitypolicingdata@vsp.virginia.gov.

File Submission Requirements

- Data must be saved as a .csv (comma delimited) file format.
  - IMPORTANT: Prior to saving file as a .csv (comma delimited) file format:
    - All data must be on **one tab**/sheet. If there are multiple tabs/sheets in your Excel workbook, all tabs will be deleted except for the first tab when you save the file as a .csv.
    - Please ensure there are **no commas** anywhere in the data. A comma anywhere in the data will throw off data in all subsequent columns. (See "Quality Control Tips" for an easy way to locate & delete commas).
- Please submit **one file** per agency per month, not individual officers.
- If a partial submission is necessary, please do not send stops already submitted. Send only the additional information in the next monthly file.
- **All data elements** must be included or the file will be rejected. (See current version of the Excel Sheet for proper layout).
- **Submission file must be sorted sequentially by Record ID.**
- All files must include a **header row** on Row 1. **Column label names must be exactly** as indicated in the Technical Specifications under "Column Header" for each data element. Stop data must start on Row 2. See below for file layout and column headers.

	Record ID	Stop Date	Agency ORI	Location	Jurisdiction Code	Reason for Stop	Person Type	Race	Ethnicity	Age	Gender	English Speaking	Action Taken	Specific Violation	Virginia Crime Code	Person Searched	Vehicle Searched	Force Used by Officer	Force Used by Subject	Residency
ROW 1 Header

Reporting "No Stops" (Zero Report)

If your agency did not have a qualifying stop during the reporting period, please send an email to communitypolicingdata@vsp.virginia.gov that states 'No Stop Data' with the month and year indicated.

For questions regarding this data collection, please contact VSP CJIS Data Analysis & Reporting Team (DART) at 804-674-2143 or 804-674-4654
