Cost Benefit Analysis

Complete Tables 1a and 1b for all regulatory actions. You do not need to complete Table 1c if the regulatory action is required by state statute or federal statute or regulation and leaves no discretion in its implementation.

Table 1a should provide analysis for the regulatory approach you are taking. Table 1b should provide analysis for the approach of leaving the current regulations intact (i.e., no further change is implemented). Table 1c should provide analysis for at least one alternative approach. You should not limit yourself to one alternative, however, and can add additional charts as needed.

Report both direct and indirect costs and benefits that can be monetized in Boxes 1 and 2. Report direct and indirect costs and benefits that cannot be monetized in Box 4. See the ORM Regulatory Economic Analysis Manual for additional guidance.

Table 1a: Costs and Benefits of the Proposed Changes (Primary Option)

(1) Direct & Indirect Costs & Benefits (Monetized)	<p>All of the text in the Podiatry Manual is being deleted. This manual text was very much out of date. It was reviewed carefully, and relevant portions have already been moved to the Practitioner Manual. There is no need to have a separate manual for this provider type.</p> <p>The manual revisions remove outdated language. The benefits are that outdated language will be removed and that the correct, up-to-date text (that already appears in the Practitioner Manual) will provide clarity to the regulatory community. There are no costs associated with the changes.</p> <p>Note: Although the Podiatry Manual is being eliminated, we did not include Chapters 1 & 3 as part of the review, because these chapters are 100% boilerplate and identical across all of DMAS' manuals. Therefore, they will continue to appear in all of DMAS' other provider manuals.</p>
