MEDICAID MEMO

TO: Preferred Office Based Opioid Treatment (OBOT) Programs, Managed Care Organizations (MCOs), and Magellan of Virginia Participating in the Virginia Medical Assistance Program

FROM: Karen Kimsey, Director
Department of Medical Assistance Services (DMAS)

DATE: TBD

SUBJECT: Allowance of Preferred Office-Based Opioid Treatment (OBOT) Services Delivery via Mobile Units

The purpose of this memorandum is to notify Preferred Office-Based Opioid Treatment (OBOT) Providers of an opportunity to provide OBOT services through a new mode of delivery called “Mobile Preferred OBOTs.”

The Mobile Preferred OBOT model shall allow Preferred OBOT providers to provide the same services in a Mobile Unit as in a traditional Preferred OBOT setting. As indicated by the Centers for Medicare and Medicaid Services (CMS), a “Mobile Unit” is designated as place of service (POS) 15 and is defined as a facility or unit that moves from place to place equipped to provide preventive, screening, diagnostic, and/or treatment services:

https://www.cms.gov/Medicare/Coding/place-of-service-codes/Place_of_Service_Code_Set

Providers using the Mobile OBOT settings shall have the ability to deliver time sensitive screenings, treatment and recovery services to Medicaid members with an Opioid Use Disorder (OUD). The goal is to expand access to evidence-based treatment for members with OUD, targeting higher-risk, vulnerable populations transitioning from an institutional or hospital setting such as emergency departments, residential, hospital settings as well as prisons, local and regional jails.

Settings for Mobile Preferred OBOTs

The following settings shall be permitted for Mobile Preferred OBOTs:

1. A Preferred OBOT shall be allowed to receive approval by DMAS to operate exclusively as a mobile unit. All required provider types as well as the Preferred OBOT model of care must meet the traditional Preferred OBOT model and shall be present in the mobile unit for DMAS to consider approval for this setting. Mobile OBOTs shall have a physical address attached to the mobile unit for billing purposes. When billing for services

provided in a Mobile OBOT, the place of service (POS) shall be listed as “015” for a mobile unit.

2. A mobile unit shall also be permitted to operate as an extension of an established Preferred OBOT’s primary location. This shall allow providers at a Preferred OBOT to also provide services in the community using the POS “015” for a mobile unit. Providers working in the Mobile OBOT setting shall provide services in-person as well as be permitted to utilize technology to provide telemedicine sessions with providers located at the Preferred OBOT’s primary location. Providers delivering services using telemedicine shall use the modifiers GT (interactive audio and video telecommunications system) or GQ (asynchronous telecommunications system) based on the guidance provided in the May 13, 2014 DMAS memo “Updates to Telemedicine Coverage” located on the DMAS Provider portal: www.viriniamedicaid.dmas.virginia.gov. Current Preferred OBOT Providers shall notify the Managed Care Organizations (MCOs) and Magellan of Virginia prior to providing services in a mobile unit.

Note that DMAS is following the Drug Enforcement Administration (DEA) authorities in regards to practitioners prescribing controlled substances to patients using telemedicine or telephonic assessment, without first conducting an in-person evaluation:

[https://www.deadiversion.usdoj.gov/GDP/\(DEA-DC-022\)\(DEA068\)%20DEA%20SAMHSA%20buprenorphine%20telemedicine%20\(Final\)%20+Esign.pdf](https://www.deadiversion.usdoj.gov/GDP/(DEA-DC-022)(DEA068)%20DEA%20SAMHSA%20buprenorphine%20telemedicine%20(Final)%20+Esign.pdf).

Thus, during the current public state of emergency due to COVID-19, DMAS shall allow the Preferred OBOT mobile unit to deliver services including prescribing buprenorphine to new and existing patients with OUD via telemedicine or telephone by otherwise authorized practitioners, without requiring such practitioners to first conduct an examination of the patient in-person. This additional flexibility under which authorized practitioners may prescribe buprenorphine to new patients on the basis of a telemedicine or telephone evaluation is in effect from March 31, 2020, until the public health emergency declared by the Secretary ends, unless DEA specifies an earlier date. At a time that the DEA determines the initial assessment for prescribing buprenorphine products shall be done in-person, Preferred OBOTs shall meet these DEA requirements.

DMAS is currently reviewing telemedicine policies for coverage after the end of the public health emergency. Any changes to telemedicine policies after the end of the public health emergency will also apply to any Preferred OBOT services provided via the mobile unit.
