

VIRGINIA FIRE SERVICES BOARD

Fire Prevention and Control Committee
Friday, June 16, 2023
Virginia Department of Fire Programs
8:30 AM

Minutes

A regular meeting of the Fire Prevention and Control Committee was held at the Virginia Department of Fire Programs in Glen Allen, Virginia. The meeting was called to order by Chair Ernie Little and a quorum was present.

COMMITTEE MEMBERS PRESENT

Ernie Little, Committee Chair – Virginia Fire Prevention Association
Dennis Linaburg – Virginia Chapter of IAAI
JM Snell II – Board of Housing and Community Development
Steven Sites – Virginia Municipal League
Keith Johnson – Virginia Fire Chief’s Association

COMMITTEE MEMBERS ABSENT

Scott Garber – Local Fire Marshal
John Miller – Department of Forestry

AGENCY MEMBERS PRESENT

Billy Hux, Chief State Fire Marshal
Spencer Willett, Government Affairs Manager

GUESTS PRESENT

CHANGES IN THE AGENDA

No changes in the agenda

PUBLIC COMMENTS

No public comment

CONSENT AGENDA

- a. Approval of the minutes of the previous meeting (February 2023)
Motion: To approve the minutes of the February 2023 meeting of the Fire Prevention and Control Meeting
Motion: Linaburg, **Second:** Reedy
Discussion on the Motion: No discussion
Vote: Unanimous
Action: Minutes approved

VIRGINIA FIRE SERVICES BOARD

Fire Prevention and Control Committee
Friday, June 16, 2023
Virginia Department of Fire Programs
8:30 AM

REPORT FROM THE VIRGINIA STATE FIRE MARSHAL

Chief State Fire Marshal Billy Hux presented a report on the State Fire Marshal's Office. Chief Hux's report included information on the addition of the Virginia Fire Marshal Academy under the State Fire Marshal's Office, information on the curriculum update for NFPA 1031, and provided an update on the NFPA 1033 class. Chief Hux spoke about basic law enforcement training (BLE) and the location of the training. An environmental investigations course was canceled because of a lack of instructors. This is being remedied and four additional classes will occur in 2023. These will occur in Winchester, Richmond, Chesapeake, and Salem.

The State Fire Marshal's Office (SFMO) is hiring four positions to backfill the positions created for the special operations division. The primary duties for the special operations division include explosives, fireworks, the hotel/motel task force, and possibly joining Virginia Department of Emergency Management SAR teams. Chief Hux explained that there was an effort to have one State Fire Marshal in each Virginia Fire Marshal Academy class. Radios have been integrated into the office and are issued to every State Fire Marshal. Radios also give the SFMO interoperability with localities.

June 30th is the last day to complete annual mandates in the 63 counties that SFMO is responsible for. This deadline will be met by SFMO. Chief Hux spoke about a plan to meet with a representative from the Department of Housing and Community Development to create a better working relationship regarding the building code and Statewide Fire Prevention Code.

CODES AND STANDARDS SUBCOMMITTEE

No report from Codes and Standards Subcommittee

COMMENTS FROM THE COMMITTEE CHAIR

Committee Chair Ernie Little spoke about the MOU/MOA with the Board of Housing and Community Development (BHCD). Keith Johnson suggested resending the letter to BHCD and reviewing the letter more closely before it is sent. Chair Little spoke about the need to update the document since the current version is from 2012. Chair Little asked that this be included on the September agenda.

Spencer Willett offered to send out the document to committee members for review.

Steven Sites asked if there has been any discussion at BHCD regarding the letter. Snell stated that it was in his report at the last BHCD meeting. Snell stated that one paragraph of the document does not give a solution for a tie. He suggested editing the document to clarify what occurs in a tie. Johnson and Snell discussed the history of the joint committees and what

VIRGINIA FIRE SERVICES BOARD

Fire Prevention and Control Committee
Friday, June 16, 2023
Virginia Department of Fire Programs
8:30 AM

currently occurs when there is a tie. Little spoke about the need for updates because of emerging issues such as lithium-ion battery storage and charging stations. Johnson, Snell, and Little all spoke to the need for changes to the document. Little reiterated that both BHCD and the VFSB should agree on changes since the *Code of Virginia* says the Statewide Fire Prevention Code is adopted by both boards.

UNFINISHED BUSINESS

Keith Johnson spoke about two workgroups. SB1305 Agritourism Event Structure Technical Advisory Committee continues to meet with Chris Barry representing the VFSB. This committee is examining potential code requirements for areas that are open to the public at agritourism businesses. SB1305 requires written emergency plans, a fire extinguisher, and signage that states the area does not meet the building code. SB1046 created a workgroup to discuss the inclusion of fire marshals under Title 9. This workgroup is slated to meet soon. Garrett Dyer is representing the VFSB on the workgroup.

Johnson also spoke about future BHCD meetings and that the final vote on proposed changes to the building code and Statewide Fire Prevention Code will occur in July.

NEW BUSINESS

a. Fire Prevention and Control Plan Updates

Chair Little spoke about the plan from 2019 and the need to update the plan to be more comprehensive. Little was concerned that the plan did not appear strategic and align with the statewide training plan.

Sites spoke about the need to partner with VDFP and SFMO to extract data for trends, fires, and community risks. He stated that by using this data, the plan could be updated and be useful for stakeholders. He also suggested that the group look at what the goal of the document is. Sites highlighted that Tennessee focused on residential sprinklers and that Virginia could refine their focus on fire prevention, such as sprinklers in townhomes. He spoke about the need to be clear in the recommendations.

Johnson spoke about defining the problem. He stated that without data, it is hard to back up the requests to improve live safety. He highlighted how national level changes are occurring to collect fire data. This should streamline data collection for fires. Johnson stated that the committee needed to define the fire problem and look at things like property lost. Sites agreed and offered that the plan should look at new building construction techniques and the health and safety of firefighters related to fire prevention.

VIRGINIA FIRE SERVICES BOARD

Fire Prevention and Control Committee
Friday, June 16, 2023
Virginia Department of Fire Programs
8:30 AM

Little spoke about the lack of reporting and how there is no requirement for fire departments to report. Little suggested that the VFSB should not award grants without fire departments reporting on incidents or calls. Johnson spoke about the effort of the U.S Fire Administrator to make reporting easier. He also spoke about how FEMA requires incident reporting for many of their grants. Willett reminded the committee that one grant awarded by the VFSB, the VFIRS hardware grant, requires reporting.

Johnson suggested looking at other states as a basis for the document. Little stated he had looked at Tennessee's document when the document was last revised in 2019. Sites suggested that Chief Hux reach out to the National Association of State Fire Marshals regarding plans in other states.

Little spoke about the difficulty of convening committee meetings because of the busy schedules of committee members. He also suggested that the purpose of the plan be reexamined.

Little spoke about a disconnect between VDFP, VFSB, and the SFMO. He spoke about concerns regarding the weekly newsletter from VDFP not including more on fire prevention.

Willett suggested creating a group that includes the Community Risk Reduction Coordinator, SFMO, and two committee members to revise the plan. Linaburg suggested that staff write the plan because constant staff support keeps momentum going on programs like this. Sites suggested bringing in stakeholders to include in the revisions, such as the Virginia Fire Prevention Association.

Little suggested looking at other plans and reexamining the purpose of the plan. He also suggested that the VFSB be more involved in changes being made overall by VDFP and SFMO. He stated that VDFP needed guidance from the VFSB at times because the VFSB represents the fire service in Virginia.

Little spoke about creating a group, including CRR Coordinator Ken Brown, JM Snell, a representative from the SFMO, himself, and Steve Sites as an alternate.

Snell spoke about the need for some changes to explain the more complex items that people outside the fire service may not understand. He supported comments made by Steve Sites earlier in the meeting.

VIRGINIA FIRE PREVENTION & CONTROL PLAN

Prepared Summer 2019

Prepared by:

**Virginia Department of Fire Programs
Virginia Fire Services Board**

This plan is a living document subject to change on a regular basis. It should be reviewed on an annual basis. As such, the Virginia Department of Fire Programs should keep the most current plan posted on their website to be accessible.

Chapter 5	Glossary	Page 9
Chapter 6	Acronyms	Page 10

1.0: INTRODUCTION

The Fire Prevention and Control Plan (Plan) provides a mechanism to address fire and life safety issues facing the Commonwealth and its fire services. The Plan addresses fire and life safety concerns and provides information regarding resources of all federal, state and local agencies. Through the versions of the Plan, many recommendations have been achieved, others have been addressed by the creation of additional committees, and new challenges have been identified.

Today, through the growth and development of the Virginia Fire Services Board (Board) in their committee processes along with the positive working relationship with the Virginia Department of Fire Programs (VD FP) and the Secretary of Public Safety and Homeland Security (SPSHS), there are new means to address most problems facing Virginia’s fire services.

The focus of the Plan has narrowed since its inception in an effort to reflect the needs of the Commonwealth’s fire services that can be addressed by the Virginia Fire Services Board and the Virginia Department of Fire Programs.

2.0: HISTORY

In 1977, the Virginia Advisory Legislative Council examined issues surrounding the coordination of Virginia’s fire prevention and protection activities. The Senate Joint Resolution (SJR 97) (SD 14, 1978) requesting the study noted that the state had a serious, but un-quantified fire loss problem. It also noted the absence of “orderly Plans for the development of priorities towards reducing fire losses within the Commonwealth.”

To answer this concern, the Department of Housing and Community Development (DHCD) published the Fire Prevention and Control Plan in 1987. DHCD staff wrote the Plan from the Office of the State Fire Marshal (SFMO) and Office of Policy Analysis and Research along with staff from the Virginia Department of Fire Programs (VD FP). In addition, there were considerable input from members of the fire service.

2019 Fire Prevention & Control Plan
Virginia Fire Services Board and the Virginia Department of Fire Programs

The 329-page document covered many aspects of the fire services and the problems associated with various issues in the mid 1980's. Subjects included, the collection of fire related data, training and certification, fire safety education, fire codes, fire insurance, arson and telecommunications (Emergency Dispatch Centers).

In 1998, at the request of the Board, a process was initiated to update the Plan but to concentrate on the issues dealing with fire and life safety. Through multiple meetings across the Commonwealth, fire and life safety individuals discussed and proposed changes for the future.

This iteration of the Plan replaces the previous version that was published on August 16, 2013.

3.0: VIRGINIA PARTNERS

This section addresses the organization of the fire services at the state level and the partnerships with fellow agencies and fire organizations found in the Commonwealth of Virginia. The cooperative effort between all the entities listed has enabled great strides to take place in providing better service to Virginia's fire service and the citizens of the Commonwealth of Virginia.

3.1: Virginia Fire Services Board

The Virginia Fire Services Board (the Board) as established is a policy board within the meaning of § [2.2-2100](#) in the executive branch of state government. It is created pursuant to § [9.1-202](#) of the Code of Virginia. The Board is comprised of 15 members appointed by the Governor to represent various fire service organizations throughout Virginia, as well as the general public. The VFSB is comprised of the following:

- An appointed representative of the insurance industry
- Two appointed members of the general public with no connection to the fire services, one of which shall be a representative of those industries affected by SARA Title III and OSHA training requirements

There must also be at least one representative from each of the following organizations:

- Virginia Fire Chiefs Association
- Virginia State Firefighters Association
- Virginia Professional Firefighters Association
- Virginia Fire Service Council
- Virginia Fire Prevention Association
- Virginia Chapter of the International Association of Arson Investigators
- Virginia Municipal League
- Virginia Association of Counties
- Local fire marshal, as defined by § [27-30](#)
- Certified Virginia fire services instructor

Of these appointees, at least one must be a volunteer firefighter.

In addition, the following are members of the VFSB;

- The State Forester
- A member of the Board of Housing and Community Development, to be appointed by the chair of that Board.

Each of the organizations represented submits names for the Governor's consideration in making these appointments.

3.2: Virginia Department of Fire Programs (VD FP)

The Virginia Department of Fire Programs (Agency) is one of eleven agencies within the [Secretary of Public Safety and Homeland Security](#). The Agency is organized into three branches with seven division offices throughout the Commonwealth. Moreover, the Agency's two primary functions are to distribute the Fire Programs Fund and to provide training to Virginia's firefighters. There are several other duties that the Agency undertakes as part of their role in state government and in carrying out the policies established by the Virginia Fire Services Board.

3.2.1: The Agency

The Agency has branches that directly report to an appointed Executive Director including State Fire Marshal's Office (SFMO), Agency Administration, and Training & Operations.

State Fire Marshal's Office (SFMO): SFMO provides many services to provide safety to life and property from fire for the citizens of the Commonwealth.

Training and Development: Training and Development coordinates and delivers fire emergency services education and training programs for the fire and emergency response community, public, law enforcement and industry for the purpose of protecting and defending the commonwealth against the loss of life and property. In addition to the various types of fire, related training, including Firefighter, Officer, Hazardous Materials, and specialty training - a position within VDFP is also assigned to the Virginia Fusion Center (VFC). Lastly, Training and Development is organized into General Fire Service Training and Specialized Training.

General Fire Service Training: VDFP coordinates and delivers fire emergency services education and training programs for the fire and emergency response community, public, law enforcement and industry for the purpose of protecting and defending the commonwealth against the loss of life and property. VDFP offers training programs across Virginia through our Division Offices.

Specialized Training: The Specialized Training Branch oversees, Aircraft Rescue Firefighting (ARFF), National Incident Management System (NIMS), and Technical Rescue (TR) Programs.

Agency Administration: Agency Administration is responsible for the administrative management activities of the Agency, to include all recruitment, personnel, and employee relations as they pertain to human resource management in conjunction with the Department of Human Resource Management. Agency Administration includes Finance, Information Technology, Statistics, Grants and Local Aid, and Government Affairs.

3.2.2: Cooperation with other Local, State and Federal Agencies

Cooperating agencies include;

- **Virginia Department of Emergency Management (VDEM):** The Agency shares common training venues in hazardous materials and incident management with VDEM. Additionally, VDFP provides staffing to the Virginia Emergency Operations Center (managed by VDEM) during times of regional or statewide disasters.
- **Virginia Department of Criminal Justice Services (DCJS):** VDFP in cooperation with DCJS has the authority to design, establish and maintain the required courses of instruction for fire marshals through such agencies and institutions as the Departments jointly may deem appropriate and to approve such other courses as such Departments determine appropriate.
- **Department of Housing and Community Development (DHCD):** VDFP collaborates with DHCD to assure consistent training of Virginia's fire inspectors who enforce the Statewide Fire Prevention Code. VDFP provides certification training for Fire Inspectors with DHCD providing the certification for the same.
- **Virginia Department of Forestry (VDOF):** VDOF is responsible for the protection, promotion and stewardship of the forest resources of the Commonwealth. Along with prevention and suppression of wildfire, VDOF also responds to and provides incident command for other emergencies. VDOF participates with VDFP on the creation of this report and other publications on fire and life safety. The agencies also partner for the training of firefighters across the Commonwealth in the area of wildland fire fighting. Through VDFP's partnership with VDOF each year, \$100,000 of the Fire Programs Fund is transferred to VDOF for the installation and maintenance of dry hydrants across the Commonwealth. There are more than 1,600 of these hydrants in service today. More important, after negotiations with the Insurance Services Office (ISO), these dry hydrants have been recognized and approved as a viable water source. In turn, this allows for the possible reduction in insurance rates for homes and businesses in proximity to these hydrants.

- **Other Agencies:** VDFP collaborates with other agencies including, Virginia State Police, Department of General Services, and Department of Juvenile Justices Services to complete the Agency's mission.

3.2.3: Cooperation with Fire Associations

There are various organizations that play a role in fire prevention and safety concerns by supporting fire related legislation, and providing venues for delivering training.

- [Virginia Fire Chiefs Association](#)
- [Virginia State Firefighters Association](#)
- [Virginia Professional Firefighters Association](#)
- Virginia Fire Services Council
- [Virginia Fire Prevention Association](#)
- [VA Chapter International Association of Arson Investigators](#)
- [Virginia Fire and Life Safety Coalition](#)

Chapter 4: Recommendations

Virginia's fire service responds to all types of events, including fires, rescue and emergency medical services, hazardous conditions, severe weather incidents, service calls, special incidents, and good intent calls, as well as false calls. Recommendations must be based on the analysis of the most relevant available data.

Complete, accurate and relevant statistical data is used for various initiatives including legislation, staffing, funding, etc. Statistical data also provides necessary facts to support fire prevention measures and code changes that are crucial to the prevention of fires and associated injuries and deaths.

4.1. Reporting

VDFP should compile an annual report summarizing national and state data to identify trends or significant fire related issues to be submitted to Virginia Fire Services Board.

4.2 Grants

VDFP should seek additional grant funding from other local, state, national and private sources that can be used for Public Fire and Life Safety Education. Such funding sources could be provided to Public Fire and Life Safety Educators in Virginia who need a dependable source of "seed" money to develop or implement local programs and to promulgate state and national programs in their jurisdictions or regions.

4.3 Virginia Fire Incident Reporting System (VFIRS)

Participation in VFIRS should be required of all fire and rescue departments in the Commonwealth. A related and vital part of this process is the necessity of updating this information as new information becomes available on each incident. This includes fire investigators, upon completing their work they would go back to VFIRS and input any new data on the fire origin and cause along with all supporting information such as first material ignited, etc.

4.3.1 Reporting of Fire deaths and Injuries

There is a need for a better system of reporting fire and fire related burn injury/death statistics from hospitals and healthcare. It is recommended that VDFP develop and implement the necessary policy and/or procedure regarding the reporting of such statistics by fire and rescue departments as well as hospitals and health care facilities. If a legislation need is identified, the Virginia Fire Services Board encourages it is recommended that the Virginia Department of Fire Programs VDFP to create such and to seek the Governors approval to support such legislation.

4.4 Uniform Statewide Building Code

Support the promulgation of the Uniform Statewide Building Code (USBC) that to contain requirements for the installation of residential sprinkler systems in all new residential occupancies. If necessary, the VFSB will support the fire prevention associations in their endeavors to seek legislation that would mandate residential sprinkler systems in new residential occupancies.

4.5 Accreditation

The VFSB support VDFP's efforts to have all VDFP programs meet national level of accreditation through the National Professional Qualifications System (ProBoard) and the International Fire Service Accreditation Congress (IFSAC).

4.5.1 Education, Training, and Certification of Fire Personnel

It is recommended that VFDP continue to provide certified training to emergency response personnel as well as update such training, as necessary, to have the individual curriculums in compliance with the most recent applicable training standard.

4.6 Fire Code Committee

VFSB must maintain an active Fire Code Committee to advocate the development of the Statewide Fire Prevention Code and areas of the Statewide Building Code that address fire safety issues. VDFP must provide staff to support including, a representative from the State Fire Marshal Office.

4.7 Statewide Fire Prevention Code

The method in which the Statewide Fire Prevention Code amendments are adopted, in conjunction with DCHD, must be reviewed and amended to allow the Commonwealth's Fire/Rescue Service to have more control in what amendments are made to the model code being reviewed.

It is recommended that the MOU or MOA between the two VFSB and BHCD Boards be reviewed to better define the code amendment process.

4.8 SFPC Adoption

Localities should be encouraged to adopt the Statewide Fire Prevention Code and employ staff (fire inspectors) in the same way they have in hiring inspectors for the Building Officials Offices.

4.9 Insurance

It is recommended that the VFS's representative from the insurance industry continue its participation in all aspects of VFSB activities.

4.10 Uniform Crime Report (UCR)

Every fire investigator must provide the relevant data to the Uniform Crime Reporting System once the fire is determined to be incendiary in nature. It is recommended that if there is no local fire marshal with investigative authority then the responsibility should be for the local law enforcement to complete the necessary reports.

4.11 Health and Safety

It is recommended that VDFP support other organizations and agencies that promote firefighter health and safety.

5.0: GLOSSARY

Board: Unless mentioned otherwise the Board shall refer to the Virginia Fire Services Board

Board of Housing and Community Development: A state Agency reporting to the Secretary of Commerce for the Commonwealth of Virginia. They have the responsibility to promulgate, in conjunction with the Virginia Fire Services Board, the Statewide Fire Prevention Code.

Coalition: Unless mentioned otherwise, Coalition shall refer to the Virginia Fire and Life Safety Coalition

Fire Prevention and Control Committee: A committee of the Virginia Fire Services Board members assigned to review prevention items including the oversight of the Fire Prevention and Control Plan.

International Fire Service Accreditation Congress (IFSAC): The International Fire Service Accreditation Congress (IFSAC) is a not-for-profit, peer-driven, self-governing system of both fire service certifying entities and higher education fire-related degree programs. IFSAC's mission is to plan and administer a high-quality, uniformly delivered accreditation system with an international scope.

K through 12: Refers to educational levels of kindergarten through a senior in High School.

NWCG: National Wildfire Coordinating Group

National Fire Protection Association (NFPA): A private, international, entity dedicated to fire prevention through the development of fire related codes and standards.

National Professional Qualifications System: A series of professional standards that outline expectations for a specific discipline in the fire service from firefighter through fire officers. These standards are written by Committee's established through NFPA, with specific guidance and oversight. Each committee on a specific discipline is comprised of experts from that specific field. Final documents are through a consensus vote, which is then offered up for vote by the NFPA membership at their annual meeting. All such documents are offered for peer review by the public.

National Board on Fire Service Professional Qualifications (Pro Board): The mission of Pro Board is to establish an internationally recognized means of acknowledging professional achievement in fire service and related fields. Their primary goal is to accredit organizations that certify "uniform" members of public fire departments, both career and volunteer.

Pro Board: The National Board on Fire Service Professional Qualifications

Virginia Department of Emergency Management: State Agency reporting to the Secretary of Public Safety for the Commonwealth of Virginia. They are responsible for coordinating the state's emergency preparedness, mitigation, response and recovery efforts.

Virginia Department of Fire Programs (VDFP): State Agency reporting to the Secretariat of Public Safety for the Commonwealth of Virginia. They are charge with many duties from distribution of the Fire Programs Fund to the delivery of training to Virginia's Fire Service.

Virginia Fire Incident Reporting System (VFIRS): The reporting system used by the fire service to document all calls and responses. These are detailed reports that allow for the collection of data to be used in prevention efforts and budget preparation. Data collected includes apparatus and equipment use, personnel and others involved in the fire as well as all aspects of the fire cause and actions of existing installed detection & suppression equipment. VFIRS is critical to the success of the modern fire service today.

Virginia Fire Services Board (Board): The Virginia Fire Services Board is created within the Virginia Department of Fire Programs pursuant to § 9-153.1 of the Code of Virginia as seen below. The Board is comprised of 15 members appointed by the Governor. Board members serve four-year terms.

6.0 ACRONYMS

BCI: Bureau of Criminal Investigations

CFFI: Certified Forensic Fire Investigator

DHCD: Department of Housing and Community Development

ED: Executive Director

IAFF: International Association of Fire Fighters

IASIU: International Association of Special Investigation Units

IFSAC: International Fire Service Accreditation Congress

OSHA: Occupational Safety and Health Administration or Occupational Safety and Health Act

IAAI: International Association of Arson Investigators

ISFSI: International Society of Fire Service Instructors

**2019 Fire Prevention & Control Plan
Virginia Fire Services Board and the Virginia Department of Fire Programs**

NWCG: National Wildfire Coordinating Group

SFMO: State Fire Marshal's Office

SARA: Superfund Amendments and Reauthorization Act

SBC: Statewide Building Code

SFPC: Statewide Fire Prevention Code

TTS: Training and Technical Services

UCR: Uniform Crime Report

USBC: Uniform Statewide Building Code

USFA: United States Fire Administration

VAHMRS: Virginia Association of Hazardous Materials Response Specialists

VDEM: Virginia Department of Emergency Management

VDFP: Virginia Department of Fire Programs

WUI: Wildland Urban Interface

COMMONWEALTH of VIRGINIA

Brad Creasy
EXECUTIVE DIRECTOR

Nicholas Nanna
DEPUTY DIRECTOR

Virginia Department of Fire Programs

Billy Hux
STATE FIRE MARSHAL

Memorandum

To: Brad Creasy, Executive Director
Virginia Fire Services Board Members

From: Billy Hux, State Fire Marshal

Date: June 1, 2023

Subject: Report on the Virginia State Fire Marshal's Office

VFMA

- 1031 Work group
 - The group met early may and will meet again on June 14th & 15th to complete the update to the exercises, workshops and powerpoints. This information will be in conjunction with the 2018 VSFPC
 - Test Bank will be the next item once the above is completed.
 - First schedule class with these updates is scheduled for Fauquier County in July, with the next class in October at VPSTC.
 - At this time we will continue to use the 4th Edition of the Damante's book along with the 2018 VSFPC & Building Code Manuals
- 1033 Program
 - The program has been updated to the current version of 921 and NFPA 1033 Standards, the test bank was gone thru to ensure that all of the questions were still applicable to the current versions.
 - Late January 2023 Completed
- Basic Law Enforcement
 - Work group is planned for July-August timeframe to update lesson plans and enhance our logistics
 - 5 Students from the last class will be added to the work group
 - Workgroups with DCJS to begin shortly (Chief Hux to Comment)
- Environmental Investigations Course

- May2023 (Staunton) class was postponed due to instructor availability
 - Will be scheduled for late Fall 2023
- 4 additional classes to be held in 2023
 - Winchester, Richmond (VPSTC), Chesapeake, Salem

SFMO

- Annual mandates if schools/college's/hospital's/nursing homes are complete
- Expansion of Special Operations (4) New Deputy III State Fire Marshals
 - Divisions 2/4/6/7
 - Primary Duties; Assistant in fire investigations to localities/VSP, Hazmat/Environmental Investigations, Explosives/fireworks, Hotel/Motel Task Force, Night Clubs, VDEM SAR, Primary for summons related issues, Special Event Planning and University related functions
- SFMO involvement in VFMA related classes Statewide
- STARS Radios
