Briana Thomas	VDH/ Care Services	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Meeting start time: 12:15 pm

The Committee acknowledged Dr. David Wheeler's resignation from the ADAP Advisory Committee (AAC). Dr. Wheeler is an infectious disease provider in the northern Virginia area who devoted nearly 20 years of his time and clinical expertise to serving on the AAC.

The Committee voted to update the scope of work with new language regarding the in-person requirements for state public meetings and to expand the Chair-Elect responsibilities in case the Chair is unable to fulfill duties.

The Committee voted to merge the Ryan White Part B and ADAP formularies. This change becomes effective February 1, 2025 as part of the medication access transition for uninsured clients.

The HCS Clinical Coordinator reviewed the Virginia Medication Assistance Program (VA MAP) drug utilization data.

- Bitarvy remains the most utilized single-dose antiretroviral treatment regimen for both insured and uninsured clients.

The Chair provided the committee with an overview of the REPRIEVE TRIAL, which concluded the use of daily statin drugs reduces the risk of cardiovascular disease in people living with HIV. On February 26, 2024, the Department of Health and Human Services Guidelines Panel released clinical recommendations for people with HIV who have low-to-high risk for atherosclerotic cardiovascular disease (ASCVD). VA MAP statin drug utilization data was reviewed. The Chair anticipates an increase

in the use of statin drugs as healthcare providers become informed about the new guidelines and patients are educated about their clinical benefits.

The Medication Access Program Manager provided an overview of the medication access transition affecting uninsured clients. Effective February 1, 2025, uninsured clients will access medications at Walgreens stores across Virginia. Mail delivery will also be available. Uninsured clients will no longer access medications at local health departments or other medication pick-up sites.

The Medication Access Program Manager provided an update on the upcoming 2025 open enrollment period. The committee was reminded of the unified eligibility requirement for clients and the eligibility initiative that is closing at the end of September. As of October 1, 2024, RWHAP B services will be suspended for clients that have no current eligibility in the Provide system. Communications were shared with clients, providers and community stakeholders.

The committee chair adjourned the meeting at 1:51 p.m.
