Cost Benefit Analysis

Complete Tables 1a and 1b for all regulatory actions. You do not need to complete Table 1c if the regulatory action is required by state statute or federal statute or regulation and leaves no discretion in its implementation.

Table 1a should provide analysis for the regulatory approach you are taking. Table 1b should provide analysis for the approach of leaving the current regulations intact (i.e., no further change is implemented). Table 1c should provide analysis for at least one alternative approach. You should not limit yourself to one alternative, however, and can add additional charts as needed.

Report both direct and indirect costs and benefits that can be monetized in Boxes 1 and 2. Report direct and indirect costs and benefits that cannot be monetized in Box 4. See the ORM Regulatory Economic Analysis Manual for additional guidance.

Table 1a: Costs and Benefits of the Proposed Changes (Primary Option) There are no direct or indirect costs of the change to the agency. There

|--|---|--|--|
| (Frontier) | This change likely adds costs for law enforcement entities and prosecution entities in the Commonwealth, because the number of substances that it is illegal to possess or use increases. The cost for this change is unquantifiable by the Board, however, because the changes are speculative and involve agencies and entities in the Commonwealth with their own financial considerations of which the Board is not aware. Due to this limitation, no costs or benefits are provided below. | | |

Changes to Number of Regulatory Requirements

Table 5: Regulatory Reduction

For each individual action, please fill out the appropriate chart to reflect any change in regulatory requirements, costs, regulatory stringency, or the overall length of any guidance documents.
