Cost Benefit Analysis

Complete Tables 1a and 1b for all regulatory actions. You do not need to complete Table 1c if the regulatory action is required by state statute or federal statute or regulation and leaves no discretion in its implementation.

Table 1a should provide analysis for the regulatory approach you are taking. Table 1b should provide analysis for the approach of leaving the current regulations intact (i.e., no further change is implemented). Table 1c should provide analysis for at least one alternative approach. You should not limit yourself to one alternative, however, and can add additional charts as needed.

Report both direct and indirect costs and benefits that can be monetized in Boxes 1 and 2. Report direct and indirect costs and benefits that cannot be monetized in Box 4. See the ORM Regulatory Economic Analysis Manual for additional guidance.

Table 1a: Costs and Benefits of the Proposed Changes (Primary Option)

(1) Direct & Indirect Costs & Benefits (Monetized)	<p>Direct Costs: Changes to this regulation will likely have no direct costs to mineral mining operators because cyanide is not largely used in mineral processing. Cyanide is a key ingredient in the extraction of gold and gold mining is unlikely to occur in the Commonwealth on a large scale.</p> <p>Indirect Cost: Changing this regulation will have no direct costs.</p> <p>Direct Benefits: Changing this regulation will have potential environmental and health benefits.</p> <p>Indirect Benefits: Changing this regulation will have no indirect benefits.</p>	
(2) Present Monetized Values	Direct & Indirect Costs	Direct & Indirect Benefits
