E. **Action.**

None. This Program Directive memorializes the Board Bylaws into the VOSH Program Directives System.
F. **Effective Date.**

July 1, 2007.

G. **Expiration Date.**

Not Applicable.

H. **Background.**

In 1986, the initial bylaws were developed at the request of then Commissioner Amato to provide a uniform set of procedures by which the Board would conduct business. At that time, a three-member subcommittee of the Board prepared draft bylaws which were presented to the Board and approved with some changes at its June 17, 1986 meeting.

The bylaws were revised and approved by the Board at its September 18, 1990 meeting to:

a. comply with statutory changes to § 40.1-22 of the *Code of Virginia* which mandated that the provisions of the Virginia Administrative Process Act would apply to the rules, regulations and proceedings of the Board; and

b. require all meetings to be governed by parliamentary procedures, as defined in *Robert’s Rules of Order*.

The bylaws were again amended at the July 30, 1991, meeting of the Board at the suggestion of then Commissioner Amato to remove the Commissioner of Labor and Industry as a member ex-officio of the Board and to add the Executive Director of the Department of Waste Management as a member ex-officio with the authority to designate a representative to sit in place of the Director with full Board membership status.

In 1992, a change to the *Code of Virginia* merged the Department of Waste Management, the State Water Control Board, the Department of Air Pollution Control and the Council of the Environment to create the Department of Environmental Quality (DEQ). Since that time, the Department of Waste Management’s ex-officio position has been filled by the Executive Director [now Director] of DEQ.

The 2004 revision was necessary because the bylaws no longer accurately or adequately reflect statutory and regulatory changes which have occurred that govern or otherwise impact the functioning of policy boards of the Commonwealth. Additionally, the current bylaws failed to include various administrative procedures, such as what to do if a quorum is not present, removal of officers and the procedure to execute the completed actions of the Board.
I. **Summary.**

The attached newly revised bylaws, originally presented to the Board for its initial consideration at its April 21, 2004 meeting, include all items in the existing bylaws, but are significantly more comprehensive in scope than the existing bylaws. Beyond updating the bylaws to reflect current statutory and regulatory requirements, this revision is a complete work-plan document in that it sets out the statutory responsibilities of the Board, the terms of member appointments, resignation of membership, procedures for the filling of vacancies, and reimbursement policy.

Other changes include greater detail as to the duties of the Board’s officers during meetings, elimination of the possibility of voting by proxy, reflects the impact of the internet on public participation in the regulatory process and the precedence of statutory and regulatory provisions dealing with issues, such as conflict of interest and freedom of information, and finally replacement of the ex-officio membership of the Director of what was the Department of Waste Management with the Department of Environmental Quality (DEQ).

This final revision of the bylaws includes a minor change for style and eliminates references directing actions to be undertaken by individuals or entities other than the Board itself.

Further, “All such rules and regulations shall be designed to protect and promote the safety and health of such employees. In making such rules and regulations to protect the occupational safety and health of employees, the Board shall adopt the standard which most adequately assures, to the extent feasible, on the basis of the best available evidence, that no employee will suffer material impairment of health or functional capacity. However, such standards shall be at least as stringent as the standards promulgated by the Federal Occupational Safety and Health Act of 1970 (P.L. 91-596).”

“In addition to the attainment of the highest degree of health and safety protection for the employee, other considerations shall be the latest available scientific data in the field, the feasibility of the standards, and experience gained under this and other health and safety laws. Whenever practicable, the standard promulgated shall be expressed in terms of objective criteria and of the performance desired.” (§ 40.1-22(5) of the Code of Virginia.)
