Cost Benefit Analysis

Complete Tables 1a and 1b for all regulatory actions. You do not need to complete Table 1c if the regulatory action is required by state statute or federal statute or regulation and leaves no discretion in its implementation.

Table 1a should provide analysis for the regulatory approach you are taking. Table 1b should provide analysis for the approach of leaving the current regulations intact (i.e., no further change is implemented). Table 1c should provide analysis for at least one alternative approach. You should not limit yourself to one alternative, however, and can add additional charts as needed.

Report both direct and indirect costs and benefits that can be monetized in Boxes 1 and 2. Report direct and indirect costs and benefits that cannot be monetized in Box 4. See the ORM Regulatory Economic Analysis Manual for additional guidance.

Table 1a: Costs and Benefits of the Proposed Changes (Primary Option)

(1) Direct & Indirect Costs & Benefits (Monetized)	The Re-entry Targeted Case Management (RTCM) Supplement has been added to the Mental Health Services and Addiction and Recovery Treatment Services (ARTS) Manuals. The RTCM supplement describes provider and service requirements for RTCM, a new targeted case management service being implemented July 1, 2026 in accordance with Item 288.GGGG of the 2025 Appropriation Act. RTCM is designed to assist eligible individuals involved in the carceral system transition to the community by coordinating needed medical, behavioral health, social, educational, and other services during the period immediately prior to and following release. The benefits of these revisions are that they provide clarity to the regulatory community. There are no costs associated with the changes.
