## **STAFF REPORTS**

*Executive Director's Report – Corie E. Tillman Wolf, JD, Executive Director*

*Welcome and Congratulations*

Ms. Tillman Wolf discussed ongoing Board initiatives in 2024 to include continued collaboration with the AIT Workgroup, the Business Process Reengineering recommendations for the licensure process, and the continued efforts to streamline and update applications while focusing on the public-facing information and resources. She also noted that continued efforts will be made to provide additional guidance for those beginning the licensure process.

### *NAB Updates*

Ms. Tillman Wolf reported that the National Association of Long Term Care Administrator Boards (NAB) Annual Meeting was held on June 5-7, 2024, and Ms. Kirby attended on behalf of the Board.

She reported on the ongoing NAB discussion items and committees including the future of NAB Meetings Task Force and discussions surrounding mobility of licensure.

### *Discipline Cases Rough Data*

Ms. Tillman Wolf provided rough data related to cases involving Assisted Living Facility (ALF) Administrators-in-Training (AITs) and Acting Assisted Living Facility Administrators-in-Training. She stated that the data had not been through a quality assurance process but was based on information available at that time through the licensure database. She provided takeaways from the review of this information.

Ms. Kirby inquired if facility information could be tracked based on the complaints and violations. Ms. Tillman Wolf responded that Board staff could manually review the facility information as it applies to Administrators-in-Training, but for the licensees, it would be harder to track specific data since the Board does not track the facilities where licensed administrators are employed.

### *2024 Board Meeting Schedule*

Ms. Tillman Wolf reminded Board Members of the remaining 2024 Board meeting dates:

- September 17, 2024
- December 3, 2024

Ms. Brathwaite asked if that information would be included in future conversations. Ms. Tillman Wolf said that the AIT Workgroup conversations would be a good place to discuss the issue of funding.

Mr. Novak reviewed the process for a petition for rulemaking and stated that Virginia Regulatory Town Hall provides the public with notice of the petition and an opportunity for comment. He explained that the Board must issue a written decision granting or denying the petition. The decision must include the reasons for the Board's decision, and it must appear in Town Hall and be published in the Register.

Mr. Novak noted that 40 comments were received on Town Hall during the open comment period. He stated that 37 comments were in support of the petition, and three (3) comments did not indicate a position or were unclear in their position.

Annual Estimates of the Resident Population: July 1, 2022  
Source: U.S. Census Bureau, Population Division

This report contains the results of the 2024 Nursing Home Administrator (NHA) Workforce Survey. In total, 805 NHAs voluntarily participated in this survey. The Virginia Department of Health Professions' Healthcare Workforce Data Center (HWDC) administers the survey during the license renewal process, which takes place every March for NHAs. These survey respondents represent 83% of the 969 NHAs licensed in the state and 100% of renewing practitioners.

The HWDC estimates that 762 NHAs participated in Virginia's workforce during the survey time period, which is defined as those who worked at least a portion of the year in the state or who live in the state and intend to return to work in the profession at some point in the future. Virginia's NHA workforce provided 804 "full-time equivalency units," which the HWDC defines simply as working 2,000 hours per year.

More than three out of every five NHAs are female, including 65% of those NHAs who are under the age of 40. In a random encounter between two NHAs, there is a 39% chance that they would be of different races or ethnicities, a measure known as the diversity index. This diversity index increases to 47% for those NHAs who are under the age of 40. For Virginia's population as a whole, the comparable diversity index is 60%. Close to half of all NHAs grew up in a rural area, and 28% of NHAs who grew up in a rural area currently work in a non-metro area of Virginia. In total, 17% of all NHAs work in a non-metro area of the state.

Among all NHAs, 86% are currently employed in the profession, 87% hold one full-time job, and 47% work between 40 and 49 hours per week. Two-thirds of all NHAs work in the for-profit sector, while another 29% of NHAs work in the non-profit sector. More than half of all NHAs are employed at a skilled nursing facility as their primary work location, while another 18% are employed at an assisted living facility. The typical NHA earns between \$130,000 and \$140,000 per year. In addition, 95% of all NHAs receive at least one employer-sponsored benefit. Among all NHAs, 95% are satisfied with their current work situation, including 61% who indicated that they are "very satisfied."

## Summary of Trends

---

In this section, all statistics for the current year are compared to the 2014 NHA workforce. The number of licensed NHAs in Virginia has increased by 11% (969 vs. 873). In addition, the size of the NHA workforce has increased by 14% (762 vs. 667), and the number of FTEs provided by this workforce has grown by 5% (804 vs. 763). Virginia's renewing NHAs are more likely to respond to this survey (100% vs. 90%).

The percentage of Virginia's NHAs who are female has increased (61% vs. 59%), a trend that has also occurred among NHAs who are under the age of 40 (65% vs. 58%). At the same time, the diversity index of Virginia's NHA workforce has increased as well (39% vs. 22%). The diversity index has also increased among those NHAs who are under the age of 40 (47% vs. 24%). NHAs are more likely to have grown up in a rural area (45% vs. 40%), but NHAs who grew up in a rural area are less likely to work in a non-metro area of Virginia (28% vs. 32%). In total, the percentage of all NHAs who work in a non-metro area of the state has fallen (17% vs. 19%).

Virginia's NHA workforce is more likely to be employed in the for-profit sector (66% vs. 59%) than in the non-profit sector (29% vs. 37%). In addition, NHAs are less likely to have worked at their primary work location for more than two years (43% vs. 57%). Instead, NHAs have become more likely to start work at a new location (37% vs. 27%). NHAs are more likely to work between 40 and 49 hours per week (47% vs. 43%) than between 50 and 59 hours per week (31% vs. 35%).

The median annual income of Virginia's NHAs has increased (\$130k-\$140k vs. \$100k-\$110k). However, NHAs are slightly less likely to receive at least one employer-sponsored benefit (95% vs. 96%). There were particularly noticeable declines among NHAs who have access to paid sick leave (75% vs. 85%) and group life insurance (69% vs. 76%). On the other hand, NHAs are more likely to have access to dental insurance (79% vs. 78%) and a retirement plan (72% vs. 69%). The percentage of NHAs who indicated that they are satisfied with their current work situation has fallen slightly (95% vs. 96%). The decline among NHAs who indicated that they are "very satisfied" was larger (61% vs. 69%).

### FTEs per 1,000 Residents

Annual Estimates of the Resident Population: July 1, 2022  
Source: U.S. Census Bureau, Population Division

This report contains the results of the 2024 Assisted Living Facility Administrator (ALFA) Workforce Survey. In total, 526 ALFAs voluntarily participated in this survey. The Virginia Department of Health Professions' Healthcare Workforce Data Center (HWDC) administers the survey during the license renewal process, which takes place every March for ALFAs. These respondents represent 77% of the 680 ALFAs licensed in the state and 97% of renewing practitioners.

The HWDC estimates that 633 ALFAs participated in Virginia's workforce during the survey time period, which is defined as those who worked at least a portion of the year in the state or who live in the state and intend to return to work in the profession at some point in the future. Virginia's ALFA workforce provided 716 "full-time equivalency units," which the HWDC defines simply as working 2,000 hours per year.

Nearly four out of every five ALFAs are female, and the median age of the ALFA workforce is 51. In a random encounter between two ALFAs, there is a 49% chance that they would be of different races or ethnicities, a measure known as the diversity index. For ALFAs who are under the age of 40, this diversity index falls to 48%. For Virginia's overall population, the comparable diversity index is 60%. More than two out of every five ALFAs grew up in a rural area, and 22% of ALFAs who grew up in a rural area currently work in a non-metro area of Virginia. In total, 12% of all ALFAs work in a non-metro area of the state.

Among all ALFAs, 88% are currently employed in the profession, 84% hold one full-time job, and 42% work between 40 and 49 hours per week.
