 - We first accepted all minutes from our two previous meeting due to no having quorum in our October meeting.
 - Membership and nomination reported out they need help with recruitment on members, especially consumers.
 - Ask the committee if they had any suggestion on what we could do more of to boost our consumers. We will be hosting a one-day retreat for our consumers to revitalize and energize them for new membership and thought for projects in the New Year. This will be held in March and we will have a larger retreat in August which Part B has state they would help us in making it a statewide retreat other than just for Eastern. Still working that out with the power that be. This is coming out of our Consumer Advisory Committee.
 - Discussed the outcome of the budget and how the spending went for 2019-2020 calendar and that Quality Improvement & Strategic Planning committee would set up a proposal to come up for vote in next planning council meeting on raising some caps in categories, so we can use the money in these categories more efficiently. That decision was made after we reviewed our expenditure report from Priorities, Allocation and Policies Committee and look at the categories that could benefit from raising the caps and allocating more money in those categories. The committee had great conversation on these topics and we adjourn 30 minutes later than our normal time. We also had our HOPWA report new up incoming projects for YR2020-2021 and the projects are going to be for our younger adults. We are eager to see this roll out and how our consumers use the program.
