Cost Benefit Analysis

Complete Tables 1a and 1b for all regulatory actions. You do not need to complete Table 1c if the regulatory action is required by state statute or federal statute or regulation and leaves no discretion in its implementation.

Table 1a should provide analysis for the regulatory approach you are taking. Table 1b should provide analysis for the approach of leaving the current regulations intact (i.e., no further change is implemented). Table 1c should provide analysis for at least one alternative approach. You should not limit yourself to one alternative, however, and can add additional charts as needed.

Report both direct and indirect costs and benefits that can be monetized in Boxes 1 and 2. Report direct and indirect costs and benefits that cannot be monetized in Box 4. See the ORM Regulatory Economic Analysis Manual for additional guidance.

| (1) Direct &Indirect Costs &Benefits(Monetized) | In response to a petition for rulemaking, the Board is amending regulation to allow a pharmacist at a central distribution company to verify Schedule VI drugs to be placed in an automated dispensing device prior to delivery and pharmacy technicians at the hospital to load the drugs directly into the automated dispensing device without further verification by a pharmacist at the hospital. This is an extension of existing pilot programs in several hospital systems. | | | | |
