### Brief summary

*Please provide a brief summary (preferably no more than 2 or 3 paragraphs) of the proposed new regulation, proposed amendments to the existing regulation, or the regulation proposed to be repealed. Alert the reader to all substantive matters or changes. If applicable, generally describe the existing regulation.*

The purpose of this amendment to existing regulation is to update the procedure for the Disproportionate Share Hospital (DSH) payment calculations for inpatient psychiatric hospitals. Beginning July 1, 2017, the annual DSH payment will be calculated for each eligible hospital by dividing the total inpatient psychiatric hospital allocation by each hospital's percentage of the total uncompensated care costs for the most recent DSH audit year. Prior to July 1, 2017, the DSH per diem for state inpatient psychiatric hospitals was calculated by dividing the total state inpatient psychiatric hospital allocation by the number of DSH days and multiplying each hospital's DSH days by the DSH per diem.

CMS approved the changes contained in this regulatory package on December 13, 2017 with an effective date of July 1, 2017.

**Purpose**

*Please explain the need for the new or amended regulation. Describe the rationale or justification of the proposed regulatory action. **Describe the specific reasons the regulation is essential to protect the***

**health, safety or welfare of citizens.** Discuss the goals of the proposal and the problems the proposal is intended to solve.

The purpose of this action is to update the DSH payment methodology to inpatient psychiatric hospitals. The Centers for Medicare and Medicaid Services (CMS) has requested this change in order to avoid paying a hospital more than its uncompensated costs.

Prior to July 1, 2017, the DSH per diem for state inpatient psychiatric hospitals was calculated by dividing the total state inpatient psychiatric hospital allocation by the number of DSH days and multiplying each hospital’s DSH days by the DSH per diem.

Updating the reimbursement methodology effective July 1, 2017 will increase payments to Catawba Hospital and reduce payments to Piedmont Geriatric Hospital but leave unchanged total payments to Department of Behavioral Health and Developmental Services (DBHDS) facilities.

This regulation is essential to protect the health safety and welfare of Medicaid members in that it allocates limited Medicaid funds in a way to help ensure continued access to care across the Commonwealth.

**Rationale for using fast-track process**

Please **explain the rationale for using the fast-track process** in promulgating this regulation. Why do you expect this rulemaking to be noncontroversial?

This regulatory action is being promulgated as a fast track action because it is not expected to be controversial. CMS approved the change and the updated DSH payment methodology was used for payments made after July 1, 2017.

**Substance**

Please briefly identify and explain the new substantive provisions, the substantive changes to existing sections, or both. A more detailed discussion is provided in the “Detail of changes” section below.

Effective July 1, 2017, DSH payments will be calculated by multiplying the annual state inpatient psychiatric DSH allocation by the ratio of each hospital’s uncompensated cost for the most recent DSH audited year completed prior to the DSH payment year to the uncompensated care cost of all state inpatient psychiatric hospitals for the same audited year.

**Issues**

Please identify the issues associated with the proposed regulatory action, including: 1) the primary advantages and disadvantages to the public, such as individual private citizens or businesses, of implementing the new or amended provisions; 2) the primary advantages and disadvantages to the

agency or the Commonwealth; and 3) other pertinent matters of interest to the regulated community, government officials, and the public. If there are no disadvantages to the public or the Commonwealth, please indicate.

---

The primary advantage of this regulation is it helps ensure that DMAS does not pay a hospital more than its uncompensated costs.

These changes create no disadvantages to the public, the Agency, the Commonwealth, or the regulated community.

**Requirements more restrictive than federal**

*Please identify and describe any requirement of the proposal which is more restrictive than applicable federal requirements. Include a rationale for the need for the more restrictive requirements. There are no requirements more restrictive than federal contained in these recommendations.

**Localities particularly affected**

*Please identify any locality particularly affected by the proposed regulation. Locality particularly affected means any locality which bears any identified disproportionate material impact which would not be experienced by other localities.*

There will be no localities that are more affected than others as these requirements will apply statewide.

**Regulatory flexibility analysis**

*Pursuant to § 2.2-4007.1B of the Code of Virginia, please describe the agency's analysis of alternative regulatory methods, consistent with health, safety, environmental, and economic welfare, that will accomplish the objectives of applicable law while minimizing the adverse impact on small business. Alternative regulatory methods include, at a minimum: 1) the establishment of less stringent compliance or reporting requirements; 2) the establishment of less stringent schedules or deadlines for compliance or reporting requirements; 3) the consolidation or simplification of compliance or reporting requirements; 4) the establishment of performance standards for small businesses to replace design or operational standards required in the proposed regulation; and 5) the exemption of small businesses from all or any part of the requirements contained in the proposed regulation.*

---

This regulatory action is not expected to affect small businesses as it does not impose compliance or reporting requirements, nor deadlines for reporting, nor does it establish performance standards to replace design or operational standards.

---
