Brief Summary

Provide a brief summary (preferably no more than 2 or 3 paragraphs) of this regulatory change (i.e., new regulation, amendments to an existing regulation, or repeal of an existing regulation). Alert the reader to all substantive matters. If applicable, generally describe the existing regulation.

The Virginia Marine Resources Commission (VMRC) is amending Chapter 4 VAC 20-490-10 et seq., "Pertaining to Sharks", to establish a prohibition on the retention of shortfin mako shark within Virginia state waters. On July 5th, 2022, the National Oceanic and Atmospheric Administration (NOAA) Fisheries published a final rule that no shortfin mako sharks may be landed or retained in any U.S. Atlantic highly migratory species (HMS) fishery until further notice. The proposed amendment will maintain consistency with federal waters and alleviate any issues of recreational and commercial fishermen that do not hold a federal permit from stating they caught a shortfin mako shark within state waters.

Mandate and Impetus

Identify the mandate for this regulatory change and any other impetus that specifically prompted its initiation (e.g., new or modified mandate, internal staff review, petition for rulemaking, periodic review, or board decision). For purposes of executive branch review, "mandate" has the same meaning as defined in the ORM procedures, "a directive from the General Assembly, the federal government, or a court that requires that a regulation be promulgated, amended, or repealed in whole or part."

[Mandate] VMRC is authorized by § 28.2-201 of the Code of Virginia to promulgate regulations and guidelines necessary to carry out the provisions of Title 28.2, including marine fisheries regulations.

[Impetus] On July 5th, 2022, the National Oceanic and Atmospheric Administration (NOAA) Fisheries published a final rule that no shortfin mako sharks may be landed or retained in any U.S. Atlantic highly migratory species (HMS) fishery until further notice.
