

VOSH Program Directive: 12-231 (e-version)

ISSUED: January 30, 1989

SUBJECT: Amendment Concerning Servicing of Single Piece and Multi-Piece Rim Wheels

A. Purpose.

This directive transmits an Amendment Concerning Single Piece and Multi Piece Rim Wheels to field personnel.

B. Scope.

This directive applies to VOSH Safety Personnel.

C. Action.

The Assistant Commissioner, Directors and Supervisors shall assure that employers comply with the requirements of the Amendment.

D. Expiration Date.

Not Applicable

E. Summary of the Amendment.

The amendment adds a reference in the standard indicating the availability of revised charts on rim wheel servicing. In addition, the current charts, which were prepared by the National Highway Traffic Safety Administration (NHTSA), will continue to be acceptable, as well as rim wheel manuals and other publications.

F. Background.

On November 14, 1988, the Virginia Safety and Health Codes Board adopted an identical version of Federal OSHA's Amendment Concerning Servicing of Single Piece and Multi-Piece Rim Wheels, 1910.177, as published in the Federal Register on September 8, 1988 (53 Fed. Reg. 34736).

On September 8, 1988, Federal OSHA published in the Federal Register an Amendment Concerning Servicing of Single Piece and Multi-Piece Rim Wheels, 1910.177 (53 Fed. Reg. 34736). The amendment references revised charts which provide piece and multi-piece rim wheels.

Federal OSHA recently revised the above-referenced charts to provide employers and employees with a more up-to-date listing of the acceptable combinations of multi-piece rim wheel components, and to identify wheel components which are no longer being manufactured. Information pertaining to the safe servicing of single piece rim wheels is included in the charts along with information on the requirements

of 1910.177 (53 Fed. Reg. 34736).

[Note: “The substantive requirement for charts or rim manuals to be available in the servicing workplace, which is being changed.” (53 Fed. Reg. 34736)]
