

## **Board for Barbers and Cosmetology**

### **GUIDANCE DOCUMENT**

**Amended Effective:** September 1, 2024

### **Non-Traditional or Online Instruction**

---

#### **I. Background**

On September 17, 2020, the Board approved a revision to the non-traditional or "online" instruction guidance document, permitting schools to offer online instruction for theory topics within a school-approved curriculum. School officials encountered challenges with the guidance document as certain schools struggled to distinguish between theory and practical subjects. This ambiguity created significant confusion, making it difficult to determine which subjects could be effectively taught online, in physical classrooms, or through a combination of both.

Recognizing these issues, on August 14, 2023, the Board for Barbers and Cosmetology amended the non-traditional or "online" instruction guidance document. The primary objective was to bring clarity to the distinction between theory and practical topics. To achieve this, the Board included an accompanying outline within the guidance document, designed to serve as a reference for school administrators in defining what qualifies as theory and practical subjects. The outline will eliminate confusion and incorporate consistency amongst all barber, cosmetology, nails, waxing, esthetics, and tattooing schools.

#### **II. Applicable Regulations and Minutes Excerpt**

Schools are mandated by the Board's regulations at 18 VAC41-20-200, 18 VAC 41-50-230, and 18 VAC 41-70-180 to submit their curricula for approval. The guidance document outlines the theory and practical training components necessary for curriculums in the fields of barbers, master barbers, cosmetology, nails, waxing, tattooing, permanent cosmetic tattooing, master permanent cosmetic tattooing, esthetics, and master esthetics.

### **III. Consideration of Board Policy**

During the Board meeting on August 14, 2023, the Board for Barbers and Cosmetology approved the modification of the non-traditional or "online" instruction guidance document, aiming to delineate theory and practical training components. This revision is imperative to clarify the theory and practical subjects specified within the curricula for barbers, master barbers, cosmetology, nails, waxing, tattooing, permanent cosmetic tattooing, master permanent cosmetic tattooing, esthetics, and master esthetics.

It's important to note that accredited schools and schools certified by SCHEV (State Council of Higher Education for Virginia) are exempt from adhering to this guidance document. This exemption is due to the stringent requirements imposed by accrediting agencies and SCHEV, which supersede the need for adherence to the guidance document.

### **IV. Guidance Document**

**In accordance with 18 VAC 41-20-200, 18 VAC 41-50-230, and 18 VAC 41-70-180 schools shall submit their curricula for Board approval and shall conduct classroom instruction in an area separate from the clinic area where practical instruction is conducted and services are provided.**

The Board is providing the following guidance in the interpretation or implementation of the aforementioned regulations:

The theory portions of the curriculum for all professions regulated by the Board may be offered online. Practical instruction must be obtained in a traditional brick and mortar classroom setting.

School should utilize technologies and practices that are effective in verifying the identity of distance-learning students who participate in class or coursework (such as a secure login and pass code) while protecting student privacy.

There is a measure of competency (examination) of the information the student is taught online which shall be completed in a traditional brick and mortar classroom.

Board staff may approve new or revised curriculum that contains the theory and practical training components identified on the attachment. Curriculum that does not conform to these components should be reviewed by the Board, unless the school is SCHEV certified or accredited by an accrediting agency approved by the U.S. Department of Education.

See enclosed guidance from the board outlining the practical and theory topics.

---

*The Board for Barbers and Cosmetology will be taking public comment on this proposed guidance document. A 30-day comment period will begin on July 29, 2024.*

*If you wish to comment on the proposed guidance document, you may do so via the Town Hall website or you may submit written comments so that they are received by August 28, 2024.*
