Cost Benefit Analysis

Complete Tables 1a and 1b for all regulatory actions. You do not need to complete Table 1c if the regulatory action is required by state statute or federal statute or regulation and leaves no discretion in its implementation.

Table 1a should provide analysis for the regulatory approach you are taking. Table 1b should provide analysis for the approach of leaving the current regulations intact (i.e., no further change is implemented). Table 1c should provide analysis for at least one alternative approach. You should not limit yourself to one alternative, however, and can add additional charts as needed.

Report both direct and indirect costs and benefits that can be monetized in Boxes 1 and 2. Report direct and indirect costs and benefits that cannot be monetized in Box 4. See the ORM Regulatory Economic Analysis Manual for additional guidance.

Table 1a. Costs and	Deficities of the Troposed CI	langes (i i imai y option)	
(1) Direct &Indirect Costs &Benefits(Monetized)	This is a simple change to reflect regulatory changes to supervisor CE hours that was recently approved. The regulatory changes reduced the amount of CE required to be obtained by supervisors following their initial 14 hour requirement to 7 hours of CE every five years. This is a reduction from 14 hours every five years.
