

ICF Presents the Results of its Energy Economic Modeling Analysis Looking at Implementation of Executive Directive 11

At their recent meetings, both the Air Pollution Control Board and the Regulatory Advisory Panel (RAP) for the CO2 Trading Regulation discussed a desire to learn more about the modeling analyses carried out by ICF for Georgetown Climate Center at the direction of Virginia Department of Environmental Quality. Members of the Air Pollution Control Board, the RAP, and the public are invited to a webinar on the topic hosted by the Georgetown Climate Center.

Public Informational Webinar

Date: Friday, October 20, 2017

Time: 10:00 to 11:30 AM Eastern

Presenters: [Chris MacCracken, ICF](#)

Topic: *ICF Presents the Results of its Modeling Analysis
Looking at Implementation of Executive Directive 11*

Description: This webinar is being held for members of the Regulatory Advisory Panel (RAP) for the CO2 Trading Regulation (Revision C17) and the Air Pollution Control Board, as well as interested member of the public. ICF International has conducted energy economic modeling analysis to project future business-as-usual and possible ED 11 implementation scenarios for Virginia. Chris MacCracken of ICF will report on the results of that modeling analysis and take questions from the webinar audience. This webinar is being hosted by the Georgetown Climate Center (GCC).

Webinar event. A webinar recording will be available on GCC's website Recording: after the event.

Register: Please register with GCC at this [link](#).
Please register no later than c.o.b. October 19, 2017.

REGISTRATION IS REQUIRED TO TAKE PART IN THE WEBINAR
