

Guidelines for Specialized Health Care Procedures

See:

http://www.doe.virginia.gov/support/health_medical/specialized_health_care_procedures/intro.pdf

The document is intended to enhance the educational process of students with special health care needs by providing guidance to school nurses, teachers, and other staff regarding the medical care of the students within the school setting. The Guidelines are based on current nursing and medical protocols for the care of children with special health care needs.
