Ms. Burtner called the meeting to order and reminded members that the focus of the meeting would be Part XIII, the fees section.

She noted that a separate subcommittee had been meeting to address technical criteria.

Ms. Burtner referenced the *Working Draft for Part XIII of the Stormwater Regulations*. Copy included as Attachment #1.

Mr. Hill reviewed the document.

Ms. Burtner noted that, after Mr. Hill's initial review, the committee would work through the document section by section.

Ms. Burtner walked the committee through the document.

**4VAC50-60-700. Purpose.**

There were no comments.

**4VAC50-60-710. Definitions.**

This section was deleted as definitions are included elsewhere.

**4VAC50-60-720. Authority.**

Ms. Burtner noted that this was existing language.

**4VAC50-60-730. Applicability.**

Under part B a member asked the purpose for requiring an individual permit after a general permit is lost.

Mr. Hill explained that if the situation required the revocation of the coverage under general permit, the developer would need to apply for an individual permit to address the areas of concern.

A member noted that certain localities will be issuing general coverage under the permit, but only the state could issue individual permits. The member asked if DCR would be developing protocol for local governments. What consistency will there be for determining noncompliance.

Mr. Hill said that general noncompliance would not automatically mean revocation of coverage under the general permit.

**4VAC50-60-740. Exemptions.**

A member noted that the section did not specify who decided what constitutes a minor modification.

It was noted that the EPA has specific language regarding minor modifications.

Mr. Hill noted that the definition was in the Regulations.

**4VAC50-60-750. Due dates for Virginia Stormwater Management Program (VSMP) Permits.**

A member asked if this is the first time the committee was seeing permit maintenance fees.

A member noted that DEQ requires this for individual permits.

Mr. Dowling noted that this would be addressed in the fee tables. There is a placeholder for that fee, but the current amount was set at zero.

A member asked for clarification on the term “maintenance fees.”

Mr. Hill said that the maintenance fee would apply when a project continues for more than a year. A maintenance fee would be assessed on the project approval anniversary date.

**4VAC50-60-760. Method of payment.**

Mr. Hill noted that this section may be re-titled.

**4VAC50-60-770. Incomplete payments and late payments.**

Mr. Hill said the intent of this section was to give localities every opportunity to collect the fees.

It was noted that this section came originally from the DEQ regulations to deal with nonpayment.

**4VAC50-60-780 Deposit and use of fees.**

Members expressed concern about the amount of fees and the percentage to be forwarded to DCR.

DCR staff agreed to collect additional data on this section.

**4VAC50-60-790. General.**

A member asked for an explanation of what was covered in the permit.

It was noted that the language in this section needed additional edits.

At this time, the committee took a break. Upon return from the break, Ms. Burtner noted that the remainder of the document dealt with fee schedules.

Ms. Burtner referenced two additional documents that dealt with how staff arrived at the fees.

First was a handout from the August 29 subcommittee meeting entitled "Time Estimates for General Permit and Stormwater Management Programs General Permit for Construction Activities."

A copy of this document is included as Attachment #2.

A member noted it was difficult to state specifically how many hours were spent on a project.

Mr. Street gave an overview of the subcommittee meeting held on October 12. Minutes from that meeting are available from DCR.

Mr. Street said the purpose was to determine what methods were available for dealing with nitrogen and phosphorus. In addition the committee examined the cost of in lieu of fees and pro rata shares.

Mr. Street said that some issues still need to be further developed.

He said the subcommittee would continue to meet and work on this issue.

Following lunch the committee resumed discussion of the working draft.

**4VAC50-60-800. Fee schedules for VSMP Municipal Separate Storm Sewer System new permit insurance.**

A member suggested breaking the fees into a graduated scale based on the type of MS4.

**4VAC50-60-810. Fee schedules for major modification of MS4 individual permits requested by the permittee.**

There were no comments regarding this section.

**4VAC50-60-820. Fees for individual or general permits issued by the permit-issuing authority for discharges of stormwater from construction activities.**

A member suggested that the title should read from “construction and post-construction” activities.

It was noted that rounding the numbers would make the administration of the fees simpler.

**4VAC50-60-825. Fees for the modification of individual permits or the modifications or transfer of Registration statements for the General Permit for Discharges of Stormwater from Construction Activities.**

It was noted that the title and the narrative were inconsistent. This will be edited.

**4VAC50-60-830. Permit maintenance fees.**

Concerns were expressed about the amount of fees. DCR staff will review this section.

At the conclusion of the document review, Ms. Burtner noted that a full meeting of the TAC was scheduled for October 26.

Mr. Dowling thanked members for their participation. He said that staff would be in contact with the group as issues moved forward.

The meeting was adjourned.
