## MISSION STATEMENT

Our mission is to ensure safe and competent patient care by licensing health professionals, enforcing standards of practice, and providing information to health care practitioners and the public.

## Meeting Minutes

Full Board Meeting
October 21, 2021

## Call to Order

The October 21, 2021, Virginia Board of Veterinary Medicine (Board) meeting was called to order at 10:01 a.m. at the Department of Health Professions (DHP), Perimeter Center, 9960 Mayland Drive, 2nd Floor, Board Room 4, Henrico, Virginia 23233.

Presiding Officer - Jeffrey B. Newman, DVM, President

## Board Members Present

Mary Yancey Spencer, JD, Secretary
Tregel Cockburn, DVM
Autumn Halsey, LVT
Ellen Hillyer, MPH, DVM
Thomas Massie, Jr., DVM
Members Not Present
Steve Karras, DVM

## Staff Present

Leslie L. Knachel, Executive Director
Kelli Moss, Deputy Executive Director
David E. Brown, D.C., Agency Director DHP
Barbara Allison-Bryan, MD, Chief Deputy Director DHP
Elaine Yeatts, Sr. Policy Analyst DHP
Charis Mitchell, Assistant Attorney General, Board Counsel
Heather Pote, Sr. Discipline Case Specialist
Taryn Singleton, Discipline Case Specialist
Laura Paasch, Administrative Assistant
Sylvia Robinson, Administrative Assistant
Melody Morton, Inspections Manager
Adina Pogue, Senior Inspector

## Public Present

Robin Schmitz, Virginia Veterinary Medical Association
Pattie Seeger, LVT, Virginia Association of Licensed Veterinary Technicians

## Establishment of Quorum

With six board members present, quorum was established.

## Emergency Egress

Ms. Knachel read the emergency egress procedures.

## Introductions

Ms. Knachel introduced new staff members Sylvia Robinson and Melissa Moore.

## Mission Statement

Dr. Newman read the Board's mission statement.

## Ordering of Agenda

The agenda was accepted as presented.

## Public Comment

There were no requests to provide public comment.

## Approval of Minutes

Dr. Newman opened the floor to any edits or corrections regarding the draft minutes for the July 29, 2021 Full Board Meeting and the July 20, 2021 Formal Hearing. Hearing none, Dr. Newman stated the minutes were approved as presented.

## Director's Report - David E. Brown, D.C., Director

Dr. Brown commended Ms. Knachel for her participation in the American Association of Veterinary State Boards and congratulated her on being elected as President-Elect. Dr. Brown provided updates on DHP's return to the office in January 2022. He indicated in 2022 that DHP will be updating the audio visual system used in the Conference Center. He reported that the agency has submitted a legislative proposal to allow for some virtual meetings and hearings.

## Legislative and Regulatory Report - Elaine Yeatts

Regulation Action to Accept Veterinary Nurse Degree- Effective 10/1/2021
Ms. Yeatts indicated that the regulatory change became effective on October 1, 2021. She stated the Board licenses veterinary technicians and acceptance of a veterinary nurse degree does not change the license type.

## Notice of Periodic Review

Ms. Yeatts stated that it was time to start a periodic review of the regulations and recommended that the Board issue a Notice of Periodic Review.

Ms. Halsey made a motion to issue a Notice of Periodic Review which was seconded by Dr. Cockburn. The motion carried unanimously.

Petitions for Rulemaking - Consideration of Penrod petition to recognize equivalent program for foreign-trained veterinary technicians
Ms. Yeatts provided information on the petitioner's request. Ms. Knachel indicated that the steps for completion of the PAVE program for veterinary technicians was available at their seats for review.

Ms. Halsey made a motion to accept the Petition for Rulemaking and amend 18VAC150-20-115 of the regulations to allow for the submission of verification of fulfillment of the program requirements for the American Association of Veterinary State Board's Assessment of Veterinary Education Equivalence (PAVE) for veterinary technicians in lieu of graduation from an accredited veterinary technology program and to define PAVE in 18VAC150-20-10. Dr. Cockburn seconded the motion. The motion carried unanimously.

## Consideration of Guidance Documents

Ms. Yeatts indicated that the guidance documents being presented did not contain any substantive changes and could be reaffirmed in a block except for 150-27 which needed to be repealed now that the regulatory change is effective.

Ms. Halsey moved to reaffirm the following guidance documents:

- 150-4 "Chip" clinics outside approved facilities
- 150-10 Allowances to Purchase, Possess, and Administer Drugs within a Public or Private Animal Shelter
- 150-14 Board Guidance on Process for Delegation of Informal Fact-Finding to an Agency Subordinate
- 150-19 Delegation of Dental Polishing and Scaling
- 150-20 Duties of an Unlicensed Veterinary Assistant
- 150-22 Veterinarians and Wildlife Rehabilitators
- 150-24 Processing Applications for Licensure

In addition, Ms. Halsey moved to repeal 150-27 Recognized Veterinary Technology Degrees.
Dr. Hillyer seconded the motion. The motion carried unanimously.
Policy Action - Consideration of Electronic Meeting Policy
Ms. Yeatts provided information on the purpose of the policy.
Ms. Spencer moved to adopt the Electronic Meeting Policy as presented. Ms. Halsey seconded the motion. The motion carried unanimously.

## Discussion Items

Veterinary-Client-Patient Relationship Definition for Veterinary Feed Directive
Ms. Knachel reported that the FDA reviewed Virginia's veterinary-client-patient relationship (VCPR) definition and determined that the federal definition applies in Virginia for the purposes of writing a veterinary feed directive or prescribing extralabel use.

## Board Counsel Report

Ms. Mitchell stated she had nothing to report.

## Board President's Report

Dr. Newman offered congratulations to Ms. Knachel for her leadership role in the AAVSB.

## Board of Health Professions Report

Ms. Knachel reported that the Board of Health Professions has not met since May, but will do so following receipt of new board member appointments.

## Report on the American Association of Veterinary State Boards' Annual Meeting

 Dr. Cockburn and Ms. Knachel provided a report on the 9/30/21-10/2/21 Annual Meeting of the AAVSB that was held in Denver, CO. The next annual meeting will be held in Charlotte, NC and starts on September 15, 2022.
## Staff Reports

Executive Director's Report

Ms. Knachel reported on the following:

- Board Statistics
- Outreach to licensees
- Meeting Calendar
- International Council for Veterinary Assessment 2021 Annual Report

Discipline Report
Ms. Moss reported that the Board's new process for completing Probable Cause Review is going well. She provided information on the number of open and closed disciplinary cases. Ms. Moss stated that the Board intends to implement in 2022 an Agency Subordinate process for certain Informal Conferences.

## New Business

## Elections

- President of the Board - Dr. Cockburn moved to nominate herself for President of the Board. Ms. Spencer seconded the motion. Ms. Halsey moved to nominate Dr. Hillyer for President of the Board. Dr. Hillyer requested to be withdrawn from consideration as her second term is up in June 2022. Roll call was taken on the motion to elect Dr. Cockburn as President. The motion carried unanimously.
- Vice President of the Board - Ms. Halsey moved to nominate herself for Vice President of the Board. Ms. Spencer seconded the motion. No additional nominations were received. The motion carried unanimously by roll call vote.
- Secretary of the Board - Dr. Cockburn moved to nominate Dr. Newman as Secretary of the Board. Dr. Hillyer seconded the motion. No additional nominations were received. The motion carried unanimously by roll call vote.

## Next Meeting

The next full board meeting is scheduled for March 3, 2022.

## Adjournment

With no objection, Dr. Newman adjourned the meeting at 11:25 a.m.

# Report of the 2022 General Assembly Board of Veterinary Medicine 

HB 53 Animal care; zoos and petting zoos, seizure of animals.

## Summary as introduced:

Animal care; zoos and petting zoos; seizure of animals. Raises from reasonable cause to probable cause the standard for a belief that animal cruelty laws are being violated for purposes of an application for a search warrant. The bill adds animals located at a zoo or petting zoo, defined in the bill, to agricultural animals as exceptions to the standards for seizure or impoundment of companion animals. The bill also requires that before a seizure can take place at a zoo or petting zoo, a direct and immediate threat to an animal must exist that cannot be corrected in a reasonable time or that the owner is unable or unwilling to correct. The bill requires humane investigators to be residents of the Commonwealth. The bill contains technical amendments.

02/14/22 House: Engrossed by House - committee substitute HB53H1
02/15/22 House: Read third time and passed House (52-Y 47-N)
02/15/22 House: VOTE: Passage (52-Y 47-N)
02/16/22 Senate: Constitutional reading dispensed
02/16/22 Senate: Referred to Committee on Agriculture, Conservation and Natural Resources
HB 80 Healthcare Regulatory Sandbox Program; established, report, sunset date.

## Summary as passed House:

Healthcare Regulatory Sandbox Program; established. Requires the Department of Health to establish the Healthcare Regulatory Sandbox Program to enable a person to obtain limited access to the market in the Commonwealth to temporarily test an innovative healthcare product or service on a limited basis without otherwise being licensed or authorized to act under the laws of the Commonwealth. Under the Program, an applicant requests the waiver of certain laws, regulations, or other requirements for a 24-month testing period, with an option to request an additional six-month testing period. The bill provides application requirements, consumer protections, procedures for exiting the Program or requesting an extension, and recordkeeping and reporting requirements. The bill requires the Department to provide an annual report to the Chairmen of the House Committee on Health, Welfare and Institutions and the Senate Committee on Education and Health that provides information regarding each Program
participant and that provides recommendations regarding the effectiveness of the Program. The bill has an expiration date of July 1, 2027.

02/11/22 House: Engrossed by House - committee substitute HB8OH2
02/14/22 House: Read third time and passed House (54-Y 46-N)
02/14/22 House: VOTE: Passage (54-Y 46-N)
02/16/22 Senate: Constitutional reading dispensed
02/16/22 Senate: Referred to Committee on Education and Health

## HB 102 Prescriptions; off-label use.

## Summary as passed House:

Prescriptions; off-label use. Provides that a prescriber may prescribe, administer, or dispense and a pharmacist may dispense a drug that has been approved for a specific use by the U.S. Food and Drug Administration for an off-label use when the prescriber or pharmacist determines, in his professional judgment, that such off-label use is appropriate for the standard of care and such prescribing, administering, or dispensing is to improve health care outcomes. The bill also prohibits a hospital from denying, revoking, terminating, diminishing, or curtailing in any way any professional or clinical privilege of any licensed health care provider with prescriptive authority or authority to dispense drugs solely on the grounds that such health care provider prescribes, administers, or dispenses a drug that has been approved for a specific use by the U.S. Food and Drug Administration for an off-label use, provided that such prescribing, administering, or dispensing is in accordance with laws of the Commonwealth and is to improve health care outcomes.

02/11/22 House: Engrossed by House - committee substitute HB102H1
02/14/22 House: Read third time and passed House (52-Y 46-N)
02/14/22 House: VOTE: Passage (52-Y 46-N)
02/16/22 Senate: Constitutional reading dispensed
02/16/22 Senate: Referred to Committee on Education and Health
HB 244 Regulatory Budget Program; DPB to establish a continuous Program, report.

Summary as passed House:
Department of Planning and Budget; Regulatory Budget Program; report. Directs the Department of Planning and Budget, under the direction of the Secretary of Finance, to
establish a continuous Regulatory Budget Program with the goal of setting a two-year target for each executive branch agency subject to the Administrative Process Act to (i) reduce regulations and regulatory requirements, (ii) maintain the current number of regulations and regulatory requirements, or (iii) allow regulations and regulatory requirements to increase by a specific amount over a two-year period. The bill requires the Secretary of Finance to report to the Speaker of the House of Delegates and the Chairman of the Senate Committee on Rules on the status of the Program no later than October 1 of each odd-numbered year. Finally, the bill provides that the Department, in consultation with the Office of the Attorney General, shall, by March 1, 2023, issue guidance for agencies regarding the Program and how an agency can comply with the requirements of the Program.

02/15/22 House: Reconsideration of passage agreed to by House
02/15/22 House: Passed House (63-Y 36-N)
02/15/22 House: VOTE: Passage \#2 (63-Y 36-N)
02/16/22 Senate: Constitutional reading dispensed
02/16/22 Senate: Referred to Committee on General Laws and Technology

## HB 444 Virginia Freedom of Information Act; meetings conducted through electronic meetings.

Summary as introduced:
Virginia Freedom of Information Act; meetings conducted through electronic meetings. Amends existing provisions concerning electronic meetings by keeping the provisions for electronic meetings held in response to declared states of emergency, repealing the provisions that are specific to regional and state public bodies, and allowing public bodies to conduct allvirtual public meetings where all of the members who participate do so remotely and that the public may access through electronic communications means. Definitions, procedural requirements, and limitations for all-virtual public meetings are set forth in the bill, along with technical amendments.

02/01/22 House: Read second time and engrossed
02/02/22 House: Read third time and passed House BLOCK VOTE (98-Y 0-N)
02/02/22 House: VOTE: Block Vote Passage (98-Y 0-N)
02/03/22 Senate: Constitutional reading dispensed
02/03/22 Senate: Referred to Committee on General Laws and Technology
HB 523 Pet shops; notice of deceased animals.

Summary as introduced:
Breeding of dogs and cats for research; reporting. Requires any person who or entity that breeds dogs and cats for animal testing facilities to report certain to the State Veterinarian on a monthly basis. The report shall include information regarding the birth, acquisition, death, sale, transfer, or other disposition of a dog or cat in the prior month.

02/15/22 House: Read third time and passed House (75-Y 25-N)
02/15/22 House: VOTE: Passage (75-Y 25-N)
02/15/22 House: Impact statement from DPB (HB523H1)
02/16/22 Senate: Constitutional reading dispensed
02/16/22 Senate: Referred to Committee on Agriculture, Conservation and Natural Resources
HB 555 Health care providers; transfer of patient records in conjunction with closure, etc.

## Summary as introduced:

Health care providers; transfer of patient records in conjunction with closure, sale, or relocation of practice; electronic notice permitted. Allows health care providers to notify patients either electronically or by mail prior to the transfer of patient records in conjunction with the closure, sale, or relocation of the health care provider's practice. Current law requires health care providers to provide such notice by mail.

02/07/22 House: Read third time and passed House (99-Y 0-N)
02/07/22 House: VOTE: Passage (99-Y 0-N)
02/08/22 Senate: Constitutional reading dispensed
02/08/22 Senate: Referred to Committee on Education and Health
02/17/22 Senate: Reported from Education and Health (15-Y 0-N)
HB 831 Digestate; definition, definition of anaerobic digestion.

## Summary as passed House:

Fertilizer; digestate. Clarifies that a regulated product, for the purposes of fertilizer law, includes digestate. Digestate is defined in the bill as a biologically stable material derived from the process of anaerobic digestion. The bill also includes digestate in fertilizer labeling requirements.

02/08/22 House: Reconsideration of passage agreed to by House 02/08/22 House: Passed House BLOCK VOTE (99-Y 0-N)

02/08/22 House: VOTE: Block Vote Passage \#2 (99-Y 0-N)
02/09/22 Senate: Constitutional reading dispensed
02/09/22 Senate: Referred to Committee on Agriculture, Conservation and Natural Resources
HB 1330 Companion animals; duty to identify submitted animal, microchip.

## Summary as introduced:

Companion animals; duty to identify submitted animal; microchip. Requires veterinarians, public or private animal shelters, and releasing agencies to seek to identify the lawful owners of the unidentified companion animals that are submitted to them by scanning for embedded microchips. The bill provides that such scanning shall be conducted at the time of intake, at the time of assessment, and prior to disposition and that the owner shall be contacted by the most expedient method available if a chip is detected. The bill also requires that documentation of such scanning and any attempts to contact the owner be maintained for at least 30 days from the date of final disposition of the animal.

02/14/22 House: Engrossed by House - committee substitute HB1330H1
02/15/22 House: Read third time and passed House BLOCK VOTE (100-Y 0-N)
02/15/22 House: VOTE: Block Vote Passage (100-Y 0-N)
02/16/22 Senate: Constitutional reading dispensed
02/16/22 Senate: Referred to Committee on Agriculture, Conservation and Natural Resources
SB 87 Dealers; prohibits sale of dogs or cats for experimental purposes.

## Summary as introduced:

Dealers; sale of dogs or cats for experimental purposes. Prohibits a dealer or commercial dog or cat breeder from importing for sale, selling, or offering for sale a dog or cat bred by a person who has received certain citations pursuant to the federal Animal Welfare Act. Current law only prohibits such activities related to the sale of dogs. The bill also clarifies that selling includes selling the dog or cat for experimental purposes.

02/14/22 Senate: Engrossed by Senate - committee substitute SB87ES1
02/14/22 Senate: Printed as engrossed 22106321D-ES1
02/14/22 Senate: Constitutional reading dispensed (40-Y 0-N)
02/14/22 Senate: Passed Senate (40-Y 0-N)
02/17/22 Senate: Impact statement from DPB (SB87ES1)

SB 88 Breeders of cats and dogs; records of animals sold or transferred to animal testing facility.

Summary as introduced:
Breeders; records of animals sold or transferred to animal testing facility. Requires entities that breed dogs or cats for sale or transfer to an animal testing facility to keep records of each animal for two years from the date of the sale or transfer, and to annually submit a summary of the records to the State Veterinarian.

02/10/22 Senate: Passed by for the day
02/11/22 Senate: Passed by for the day
02/14/22 Senate: Read second time and engrossed
02/14/22 Senate: Constitutional reading dispensed (40-Y O-N)
02/14/22 Senate: Passed Senate (40-Y 0-N)
SB 89 Pet shops; sale of unneutered or unspayed dogs and cats prohibited, penalty.

## Summary as introduced:

Pet shops; sale of unneutered or unspayed dogs and cats prohibited; penalty. Prohibits a pet shop from selling a dog or cat unless it has first been spayed or neutered. A violation is a Class 3 misdemeanor.

01/05/22 Senate: Prefiled and ordered printed; offered 01/12/22 22101414D
01/05/22 Senate: Referred to Committee on Agriculture, Conservation and Natural Resources 01/18/22 Senate: Impact statement from DPB (SB89)
01/24/22 Senate: Assigned ACNR sub: Companion Animals
02/08/22 Senate: Continued to 2023 in Agriculture, Conservation and Natural Resources (10-Y $0-\mathrm{N}$ )

SB 90 Breeders of dogs and cats for animal testing facilities; adoption of dogs and cats.

## Summary as introduced:

Breeders of dogs and cats for animal testing facilities; adoption of dogs and cats.
Requires a breeder of dogs and cats for sale or transfer to an animal testing facility that no longer has a need for a dog or cat in its possession to offer the animal for adoption prior to euthanizing it. Currently, only animal testing facilities are subject to this requirement.

02/10/22 Senate: Passed by for the day
02/11/22 Senate: Passed by for the day
02/14/22 Senate: Read second time and engrossed
02/14/22 Senate: Constitutional reading dispensed (40-Y 0-N)
02/14/22 Senate: Passed Senate (40-Y 0-N)

## SB 317 Out-of-state health care practitioners; temporary authorization to practice.

## Summary as passed Senate:

Out-of-state health care practitioners; temporary authorization to practice; licensure by reciprocity for physicians; emergency. Allows a health care practitioner licensed in another state or the District of Columbia who has submitted an application for licensure to the appropriate health regulatory board to temporarily practice for a period of 90 days pending licensure, provided that certain conditions are met. The bill directs the Department of Health Professions to pursue reciprocity agreements with jurisdictions that surround the Commonwealth to streamline the application process in order to facilitate the practice of medicine. The bill requires the Department of Health Professions to annually report to the Chairmen of the Senate Committee on Education and Health and the House Committee on Health, Welfare and Institutions the number of out-of-state health care practitioners who have utilized the temporary authorization to practice pending licensure and have not subsequently been issued full licensure. The bill contains an emergency clause.

## EMERGENCY

01/24/22 Senate: Committee amendments agreed to 01/24/22 Senate: Engrossed by Senate as amended SB317E
01/24/22 Senate: Printed as engrossed 22103982D-E
01/25/22 Senate: Read third time and passed Senate (40-Y 0-N)
01/26/22 Senate: Impact statement from DPB (SB317E)

## SB 442 Dogs and cats; breeding for research, reporting to State Veterinarian.

## Summary as introduced:

Breeding of dogs and cats for research; reporting. Requires any person who or entity that breeds dogs and cats for animal testing facilities to report certain to the State Veterinarian on a
monthly basis. The report shall include information regarding the birth, acquisition, death, sale, transfer, or other disposition of a dog or cat in the prior month.

02/10/22 Senate: Passed by for the day
02/11/22 Senate: Passed by for the day
02/14/22 Senate: Read second time and engrossed
02/14/22 Senate: Constitutional reading dispensed (40-Y 0-N)
02/14/22 Senate: Passed Senate (40-Y 0-N)

## SB 604 Animal cruelty; companion animals, penalty.

## Summary as introduced:

Animal cruelty; companion animals; penalty. Clarifies that dogs and cats in the possession of a person who or an entity that breeds dogs or cats for sale or transfer to an animal research facility are considered companion animals for the purposes of animal cruelty statutes. The bill also provides that breeding dogs or cats for sale or transfer to a research facility, or breeding dogs or cats within a research facility, does not constitute bona fide scientific or medical experimentation for purposes of animal cruelty statutes.

02/14/22 Senate: Engrossed by Senate as amended SB604E
02/14/22 Senate: Printed as engrossed 22104107D-E
02/14/22 Senate: Constitutional reading dispensed ( $40-\mathrm{Y} 0-\mathrm{N}$ )

02/17/22 Senate: Impact statement from VCSC (SB604E)

Periodic Review of this Chapter<br>Includes a Small Business Impact Review

Date Filed: 10/21/2021

## Review Announcement

Pursuant to Executive Order 14 (as amended July 16, 2018) and §§ 2.2-4007.1 and 2.2-4017 of the Code of Virginia, this regulation is undergoing a periodic review.

The review of this regulation will be guided by the principles in Executive Order 14 (as amended July 16, 2018). http://TownHall.Virginia.Gov/EO-14.pdf.

The purpose of this review is to determine whether this regulation should be repealed, amended, or retained in its current form. Public comment is sought on the review of any issue relating to this regulation, including whether the regulation (i) is necessary for the protection of public health, safety, and welfare or for the economical performance of important governmental functions; (ii) minimizes the economic impact on small businesses in a manner consistent with the stated objectives of applicable law; and (iii) is clearly written and easily understandable.

In order for you to receive a response to your comment, your contact information (preferably an email address or, alternatively, a U.S. mailing address) must accompany your comment. Following the close of the public comment period, a report of both reviews will be posted on the Town Hall and a report of the small business impact review will be published in the Virginia Register of Regulations.

## Legal Basis

Identify (1) the promulgating agency, and (2) the state and/or federal legal authority for the regulatory change, including the most relevant citations to the Code of Virginia or Acts of Assembly chapter number(s), if applicable. Your citation must include a specific provision, if any, authorizing the promulgating agency to regulate this specific subject or program, as well as a reference to the agency's overall regulatory authority.

Regulations are promulgated under the general authority of Chapter 24 of Title 54.1 of the Code of Virginia. Section 54.1-2400, which provides the Board of Veterinary Medicine the authority to promulgate regulations to administer the regulatory system:

## § 54.1-2400. General powers and duties of health regulatory boards.

The general powers and duties of health regulatory boards shall be:
...6. To promulgate regulations in accordance with the Administrative Process Act (§ 2.2-4000 et seq.) that are reasonable and necessary to administer effectively the regulatory system, which shall include provisions for the satisfaction of board-required continuing education for individuals registered, certified, licensed, or issued a multistate licensure privilege by a health regulatory board through delivery of health care services, without compensation, to low-income individuals receiving health services through a local health department or a free clinic organized in whole or primarily for the delivery of those health services. Such regulations shall not conflict with the purposes and intent of this chapter or of Chapter 1 ( $\$ 54.1-100$ et seq.) and Chapter 25 ( $\$ 54.1-2500$ et seq.).

The statutory authority for the Board to promulgate regulations to regulate veterinary medicine is found in:

## § 54.1-3804. Specific powers of Board.

In addition to the powers granted in § 54.1-2400, the Board shall have the following specific powers and duties:

1. To establish essential requirements and standards for approval of veterinary programs.
2. To establish and monitor programs for the practical training of qualified students of veterinary medicine or veterinary technology in programs of veterinary medicine or veterinary technology at institutions of higher education.
3. To regulate, inspect, and register all establishments and premises where veterinary medicine is practiced.
4. To establish requirements for the licensure of persons engaged in the practice of veterinary medicine, pursuant to $\$ 54.1-3800$, as part of a veterinary medical education program accredited by the American Veterinary Medical Association Council on Education and located in the Commonwealth.

## § 54.1-3805. License required.

No person shall practice veterinary medicine or as a veterinary technician in this
Commonwealth unless such person has been licensed by the Board.

## Alternatives to Regulation

#### Abstract

Describe any viable alternatives for achieving the purpose of the regulation that were considered as part of the periodic review. Include an explanation of why such alternatives were rejected and why this regulation is the least burdensome alternative available for achieving its purpose.

Licenses and registrations issued by the Board of Veterinary Medicine are mandated by Chapter 38 of Title 54.1 of the Code of Virginia. There are no alternatives for implementation of the mandates other than the promulgation of reasonable regulations that are enforceable and protect the public health and safety.

## Public Comment

> Summarize all comments received during the public comment period following the publication of the Notice of Periodic Review, and provide the agency response. Be sure to include all comments submitted: including those received on Town Hall, in a public hearing, or submitted directly to the agency. Indicate if an informal advisory group was formed for purposes of assisting in the periodic review.

The Notice of Periodic Review was published in the Register on November 22, 2021 with public comment requested until December 22, 2021 on any issue relating to this regulation, including whether the regulation (i) is necessary for the protection of public health, safety, and welfare or for the economic performance of important governmental functions; (ii) minimizes the economic impact on small businesses in a manner consistent with the stated objectives of applicable law; and (iii) is clearly written and easily understandable. There are over 73 persons on the Town Hall notification list for the Board of Veterinary Medicine; there were no comments during the comment period.

## Effectiveness

Pursuant to § 2.2-4017 of the Code of Virginia, indicate whether the regulation meets the criteria set out in Executive Order 14 (as amended, July 16, 2018), including why the regulation is (a) necessary for the protection of public health, safety, and welfare, and (b) is clearly written and easily understandable.

This chapter has been in effect as VR645-01-1 before the creation of the Virginia Administrative Code. It has been amended 17 times in the past nine years. It continues to be effective in protecting the public by setting rules for qualifications and practice of veterinarians, veterinary technicians, equine dental technicians, and veterinary establishments. Whenever amendments are promulgated, language is reviewed to ensure that it is clearly written and easily understandable.

## Decision

Explain the basis for the promulgating agency's decision (retain the regulation as is without making changes, amend the regulation, or repeal the regulation).

The Board decision is to retain the regulation with amendments. The Board has identified the following areas of regulation that it will consider for amendments:

- Review and update requirements for faculty \& intern/resident licensure
- Requirements for veterinary establishments
- Change requirement for posting licenses to allow for license verification posting
- Review and update unprofessional conduct regulations
- Review and update section on delegation of duties to unlicensed assistants
- Review and update licensure requirements

After further opportunity for review and recommendations for amendments, the Board will publish a Notice of Intended Regulatory Action.

## Small Business Impact

As required by $\S 2.2-4007.1 E$ and $F$ of the Code of Virginia, discuss the agency's consideration of: (1) the continued need for the regulation; (2) the nature of complaints or comments received concerning the regulation; (3) the complexity of the regulation; (4) the extent to the which the regulation overlaps, duplicates, or conflicts with federal or state law or regulation; and (5) the length of time since the regulation has been evaluated or the degree to which technology, economic conditions, or other factors have changed in the area affected by the regulation. Also, discuss why the agency's decision, consistent with applicable law, will minimize the economic impact of regulations on small businesses.
(1) There is a continued need for the regulation since the Code (Chapter 38 of Title 54.1) requires veterinarians and veterinary technicians to be licensed by the Board;
(2) The Board has not received any complaints or comments concerning the regulation;
(3) Practitioners do not find the regulation to be overly complex, but the Board will consider whether requirements could be simplified or clarified;
(4) There is no overlap duplication, or conflict with federal or state law or regulation; and
(5) As stated above, the provisions of this chapter were amended 17 times in the last nine years.

The last periodic review was concluded in 2017, and the Board has continually updated regulations while protecting the health and safety of animals in the Commonwealth. In its review, the Board will consider any additional amendments that are recommended that will streamline or clarify regulations in order to minimize the economic impact on small businesses.

## VIRGINIA BOARD OF VETERINARY MEDICINE

## Disposition of Routine Inspection Violations

The Board of Veterinary Medicine (Board) conducts routine inspections of veterinary establishments every three years. The guidance document, 76-21.2:1 Veterinary Establishment Inspection Report provides a checklist of the laws and regulations with which veterinary establishments must comply. For each violation found during an inspection, a point value is assigned. Point values are available on the veterinary establishment inspection report form.

Following an inspection in which one or more violations of the laws or regulations are cited, a veterinary establishment is required to submit a written response to the Board pursuant to 18VAC150-20-140(18) within 14 calendar days of the inspection unless an extension is granted by the Board. A response must detail the action(s) taken to correct each deficiency and may be submitted via mail, email or fax. Failure to provide a written response may subject a veterinarian-in-charge to disciplinary action.

Veterinary Establishment

| Total Points* | *Possible Action |
| :--- | :--- |
| $0-10$ points | Routine inspection in three years |
| $11-15$ points | Advisory letter; routine inspection in three years |
| $16-20$ points | Confidential consent agreement; tnannounced-routine <br> inspection in two years |
| 21 or more points | Pre-hearing consent order-; monetary penalty of $\$ 500 ;$ <br> unannounced compliance inspection in one year; re-inspection <br> fees apply |

*Violations found during a required re-compliance inspection may subject the establishment and the
veterinarian-in-charge to additional action by the Board.

## Board of Veterinary Medicine

## Frequently Asked Questions - Prescription Monitoring Program

1. What is the Prescription Monitoring Program (PMP)?
2. What are the PMP reporting requirements for an individual veterinarian?
3. What covered substances have to be reported to the PMP?
4. What are the options for meeting the reporting requirements?
5. What information must be reported?
6. May a veterinary establishment report on behalf of some or all of the veterinarians in a group practice?
7. Are the PMP reporting requirements mandatory for veterinarians?
8. Does every veterinarian need a DEA registration to comply with the PMP reporting requirements?
9. How does a veterinarian obtain a DEA registration?
10. What is the contact information for PMP and DEA questions?
11. Do the PMP requirements apply to a veterinarian practicing as an employee of the Department of Defense (United States Army, Navy, Coast Guard, Air Force), another federal agency or state government?
12. May a veterinarian dispense seven days of a covered substance for a course of treatment and subsequently write a prescription for the same substance to be filled at a pharmacy?
13. Are there any special dispensing or prescribing considerations for gabapentin?
14. If reporting dispensed prescriptions to the PMP, how are vacations or extended leave handled?
15. If a veterinarian is waivered and not dispensing more than seven days of a covered substance, what is the required length of time between another seven days?
16. Must a veterinarian reporting dispensed covered substances, report all dispensing regardless of the length of time?
17. Is a veterinarian required to declare waiver or reporting status annually?
18. What is a National Drug Code (NDC) number?
19. Are veterinarians that report to the PMP required to have a prescription number for dispensed covered substances?
20. For an animal owned by a company such as pet store or a public or private shelter, what information should be submitted for the owner's name and date of birth?
21. Are pharmacies located outside of Virginia required to report to the PMP?
22. When prescribing a covered substance to be filled in a commercial pharmacy, is the veterinarian required to provide the owner's date of birth on the written prescription?
23. What is the process for updating a waiver or account development form?
24. Is there a tutorial on helping the veterinarian understand new reporting requirements?
25.24. Why is it important for all of a pet's dispensed prescriptions to be linked to the same owner?
26.25. What information can a veterinarian get from the PMP
27.26. Where can a veterinarian get additional training about the PMP
25. What is the Prescription Monitoring Program (PMP)?
[^1]Virginia's Prescription Monitoring Program (PMP) is a 24/7 database containing information on dispensed covered substances (see FAQ \#3 for information on covered substances). The primary purpose of the PMP is to promote safe prescribing and dispensing practices for covered substances by providing timely and essential information to healthcare providers. Law enforcement and health profession licensing boards use the PMP to support investigations related to doctor shopping, diversion, and inappropriate prescribing and dispensing.

Note: The PMP reporting requirements and regulations for prescribing opioids (see Regulations Governing the Practice of Veterinary Medicine, 18VAC150-20-174) are two separate actions. Please ensure compliance with both actions.

## 2. What are the PMP reporting requirements for an individual veterinarian?

A veterinarian who dispenses a covered substance to an owner of an animal patient must report to the PMP. Dispense is defined in § 54.1-2519 of the Code of Virginia as "to deliver a controlled substance to an ultimate user, research subject, or owner of an animal patient by or pursuant to the lawful order of a practitioner, including the prescribing and administering, packaging, labeling or compounding necessary to prepare the substance for that delivery."
(See \#3 for exemptions from reporting requirement)

## 3. What covered substances have to be reported to the PMP?

The Code of Virginia states the following:

## § 54.1-2519. Definitions.

"Covered substance" means all controlled substances included in Schedules II, III, and IV; controlled substances included in Schedule V for which a prescription is required; naloxone; and all drugs of concern that are required to be reported to the Prescription Monitoring Program, pursuant to this chapter. "Covered substance" also includes cannabidiol oil or THA-A cannabis products dispensed by a pharmaceutical processor in Virginia.

Exemption Note: The dispensing of covered substances by veterinarians to animals within the usual course of their professional practice for a course of treatment to last seven days or less is not required to be reported to the PMP.

In addition, feline buprenorphine and canine butorphanol are exempt from the reporting requirement. However, every veterinary establishment licensed by the Board of Veterinary Medicine must maintain records of the dispensing of feline buprenorphine and canine butorphanol, reconcile such records monthly, and make such records available for inspection upon request.

## 4. What are the options for meeting the reporting requirements?

All individual veterinarians must decide which option provided below best fits his/her dispensing and/or prescribing practices, as requirements are specific, and complete the required PMP paperwork.

## Option 1:

## IF

Veterinarian only writes prescriptions for reportable covered substances to be filled at a pharmacy; OR veterinarian does not dispense any reportable covered substances

## THEN

Submit a waiver request: Request for a Waiver or an Exemption from Reporting for Veterinarians

## Option 2:

IF
Veterinarian only dispenses reportable covered substances for a course of treatment to last seven days or less (Note: A veterinarian may not dispense multiple seven-day prescriptions of reportable covered substances for the same course of treatment to circumvent the law)

## THEN

Submit a waiver request: Request for a Waiver or an Exemption from Reporting for Veterinarians

## Option 3:

## IF

Veterinarian dispenses reportable covered substances for a course of treatment to last more than seven days

## THEN

Complete and submit an Account Development Form: Dispenser Registration Form for PMP Reporting Account (NOTE: For Option 3, the reporting of covered substances dispensed must occur within 24 hours or next business day, whichever comes later AND a Zero Report must be submitted if no dispensing takes place within a 24 -hour period. The link to the reporting guidelines is provided below under Helpful Hints.)

## Helpful Hints for Option 3:

- Links to Important Reporting Guidance:
- Link to the reporting guidance information at Virginia Prescription Monitoring Program Reporting Requirements.
- Prior to creating an account in the PMP Clearinghouse, the first step is to complete the Account Development Form located on the PMP Homepage. You may send the completed form to the PMP via email or fax. Once

> received further instructions regarding set-up and use of the PMP Clearinghouse will be provided.
> - Link to the Virginia Data Submission Dispenser Guide at Virginia Data Submission Dispenser Guide.

- The Account Development Form contains information to set up the dispenser's account. Be sure to answer questions on this form with detailed information about business hours to set up your account accurately. Information in your account is used for PMP reports and for compliance tracking.
- Most veterinarians will use a web-based form to report prescription information. See Dispenser Guide for more information.
- Reminder: Reporting of dispensed covered substances must occur within 24 hours or next business day, whichever comes later.
- Reminder: If no dispensing or dispensing of a covered substance for 7-days or less takes place within a 24 -hour period, a Zero Report is required.

## 5. What information must be reported?

In cases where the ultimate user of a covered substance is an animal, the dispenser shall report the following information required by § 54.1-2521 of the Code of Virginia for the owner of the animal:

1. The recipient's name and address.
2. The recipient's date of birth.
3. The covered substance that was dispensed to the recipient.
4. The quantity of the covered substance that was dispensed.
5. The date of the dispensing.
6. The prescriber's identifier number.
7. The dispenser's identifier number.
8. The method of payment for the prescription.
9. Any other non-clinical information that is designated by the Director as necessary for the implementation of this chapter in accordance with the Department's regulations.
10. Any other information specified in regulations promulgated by the Director as required in order for the Prescription Monitoring Program to be eligible to receive federal funds.
11. May a veterinary establishment report on behalf of some or all of the veterinarians in a group practice?

Yes. Please contact the PMP directly for additional instructions if the registered veterinary establishment will report dispensing on your behalf. The email address is pmp@dhp.virginia.gov.

## 7. Are the PMP reporting requirements mandatory for veterinarians?

Yes. The Code of Virginia states the following:

## § 54.1-2521. Reporting requirements.

Page | 4
A. The failure by any person subject to the reporting requirements set forth in this section and the Department's regulations to report the dispensing of covered substances shall constitute grounds for disciplinary action by the relevant health regulatory board.

## 8. Does every veterinarian need a DEA registration to comply with the PMP reporting requirements?

A majority of the licensed veterinarians in Virginia will need a DEA registration to comply with the PMP reporting requirements. The purpose of the PMP is to capture an individual veterinarian's prescribing habits for identified covered substances. The DEA registration number is the unique identifier for a veterinarian when reporting to the PMP.

## 9. How does a veterinarian obtain a DEA registration?

To obtain a DEA registration go to https://www.deadiversion.usdoj.gov/; locate on the upper right hand-left-hand side of the screen "Registration Support"; click on "New Applications"; select "Practitioner" as your "Business Category."

Note: The registration process utilizes "DVM" as the broad category to identify all veterinarians.

## 10. What is the contact information for PMP and DEA questions?

Questions related to the PMP should be directed to pmp@dhp.virginia.gov
Questions related to DEA registration support is the following:
Call: 1-800-882-9539 (8:30 a.m. - 5:50 p.m. ET)
Email: DEA.Registration.Help@usdoj.gov
Locate Field RegistrationSpecialists
11. Do the PMP requirements apply to a veterinarian holding a Virginia license practicing as an employee of the Department of Defense (United States Army, Navy, Coast Guard, Air Force), another federal agency or state government?

Yes. PMP requirements apply to all veterinarians that hold a current active license from the Virginia Board of Veterinary Medicine. However, a licensee who does not dispense to citizens of the Commonwealth of Virginia outside of his/her official duties is eligible for a waiver. To submit a waiver request, go to Request for a Waiver or an Exemption from Reporting for Veterinarians.
12. May a veterinarian dispense seven days of a covered substance for a course of treatment and subsequently write a prescription for the same substance to be filled at a commercial pharmacy?

The statute explicitly creates an exemption for veterinarians dispensing a covered substance for seven days or less for a course of treatment and does not address an additional prescription that would be dispensed by a commercial pharmacy.

## 13. Are there any special dispensing or prescribing considerations for gabapentin?

Page \| 5

As of July 1, 2019, gabapentin is a Schedule V controlled substance in Virginia. The Drug Enforcement Administration (DEA) has not yet scheduled gabapentin. Therefore, a prescriber is not required to hold a DEA registration in order to possess or prescribe gabapentin, but gabapentin must be reported to PMP.

## 14. If reporting dispensed prescriptions to the PMP, how are vacations or extended leave handled?

If you have completed an Account Development Form and are required to report, you may not submit future zero reports to accommodate vacations or extended leave. For extended leave, you may assign an individual to report on your behalf. However, this would not apply if you have relief veterinarians practicing and dispensing to patients in your absence.

## 15. If a veterinarian is waivered and not dispensing more than seven days of a covered substance, what is the required length of time between dispensing another seven days?

The Code of Virginia does not address how long the wait period is before you may dispense another seven days of a covered controlled substance. However, the Code of Virginia does state that the dispensing is exempt for a course of treatment to last seven days or less as provided below:

## § 54.1-2522. Reporting exemptions.

The dispensing of covered substances under the following circumstances shall be exempt from the reporting requirements set forth in § 54.1-2521:

> 7. Dispensing of covered substances by veterinarians to animals within the usual course of their professional practice for a course of treatment to last seven days or less or if such covered substance is feline buprenorphine or canine butorphanol.

In addition, FAQ\#4 states: A veterinarian may not dispense multiple seven-day prescriptions of reportable covered substances for the same course of treatment to circumvent the law.
16. Must a veterinarian reporting dispensed covered substances, report all dispensing regardless of the length of time?

If a veterinarian is required to report dispensed covered substances, he or she is not required to report the dispensing of covered substances for a course of treatment to last seven days or less; however, he or she may choose to report all dispensed covered substances.

## 17. Is a veterinarian required to declare waiver or reporting status annually?

Waiver status is intended to be permanent. However, if you experience a change in waiver/reporting status please notify PMP staff in order for those changes to be accommodated. The PMP program does not send notices of approval of waiver requests; however you may request a confirmation at the time you send your waiver. Relief veterinarians may only file one waiver form; therefore, it is the relief veterinarian's responsibility to determine if the hospital they are considering working for can accommodate his/her waiver status.

## 18. What is a National Drug Code (NDC) number?

A National Drug Code number is a universal product identifier and is present on all nonprescription and prescription medication packages. The NDC number can be found on the medication/tablet package, if not please contact your distributor. NDC's will always be 11 numbers and will be formatted in a 5-4-2 grouping (12345-1234-12). However, some labelers will sometimes drop a leading zero in one of the groupings creating a 10-digit number. These occurrences must be "normalized". To normalize an NDC number add a leading zero to whichever section is missing a digit; 1234-123-1 becomes 01234-0123-01. The NDC number must be entered without dashes or spaces for it to be accepted.

## 19. Are veterinarians that report to the PMP required to have a prescription number for dispensed covered substances?

A prescription number is required for covered substances reported to the PMP as indicated in the Data Submission Dispenser Guide. The prescription number is also a required element in the American Society for Automation in Pharmacy (ASAP) reporting standard. Veterinarians must establish a numbering system to report dispensing to the PMP.
20. For an animal owned by a company such as a pet store or a public or private shelter, what information should be submitted for the owner's name and date of birth?

The dispensing entity must report the dispensing of the covered substance to the PMP. When reporting these prescriptions, please use the following data elements:

1. first name: the animal name
2. last name: the pet store/shelter name
3. date of birth: $1 / 1 / 2000$

The remaining required reporting elements should not be affected.

## 21. Are pharmacies located outside of Virginia required to report to the PMP?

Out-of-state pharmacies, including compounding pharmacies, that ship into Virginia are required to be registered by the Virginia Board of Pharmacy as a non-resident pharmacy. Holding such a registration requires the pharmacy to comply with the laws related to Virginia's PMP reporting requirements for dispensed covered substances.
22. When prescribing a covered substance to be filled in a commercial pharmacy, is the
veterinarian required to provide the owner's date of birth on the written prescription?

Either the veterinarian or the pharmacist filling the prescription may obtain or record an owner's date of birth on the prescription.

## 23. What is the process for updating a waiver or account development form?

Page | 7

If your waiver and/or reporting status has changed, please contact the Virginia PMP staff at pmp@dhp.virginia.gov. If you have previously been waivered but need to begin reporting, you can begin the process by completing an Account Development Form. If you have previously been reporting but have decided to discontinue dispensing covered substances that are not exempt from reporting, please contact the Virginia PMP and complete a Wavier Form.

## 24. Is there a tutorial on helping the veterinarian understand new reporting requirements?

 Please review the tutorial on Understanding the Keterinarian's Role in Safe Preseribing to learn more.
## 25 24. Why is it important for all of a pet's dispensed prescriptions to be linked to the same owner?

When querying the PMP regarding a human patient, an authorized user must be able to review all dispensed covered substances for that human and all of his/her pets. Therefore, it is important to report the same owner's information for the same pet. For example, if different family members pick up a prescription on different occasions and the dispensed covered substance is reported using different names and dates of birth, the pet's prescriptions will show up on multiple human patient profiles.

## 2625. What information can a veterinarian get from the PMP?

Using the PMP website, a veterinarian registered with the PMP can review:

- A report of animal prescriptions for covered substance dispensed to the owner of an animal(s), and
- A report that lists their own prescribing history for covered substances for the previous 10 months.

## 2726. Where can a veterinarian get additional training about the PMP?

There is a series of instructional videos for registered users of the PMP at:
https://www.dhp.virginia.gov/PractitionerResources/PrescriptionMonitoringProgram/AboutPMP/Media/

This report contains the results of the 2021 Veterinarian Survey. More than 3,900 veterinarians voluntarily participated in this survey. The Virginia Department of Health Professions' Healthcare Workforce Data Center (HWDC) administers the survey during the license renewal process, which takes place every December for veterinarians. These survey respondents represent $79 \%$ of the 5,017 veterinarians licensed in the state and $84 \%$ of renewing practitioners.

The HWDC estimates that 3,723 veterinarians participated in Virginia's workforce during the survey period, which is defined as those veterinarians who worked at least a portion of the year in the state or who live in the state and intend to return to work as a veterinarian at some point in the future. During the past year, Virginia's veterinarian workforce provided 3,480 "full-time equivalency units," which the HWDC defines simply as working 2,000 hours per year.

More than $70 \%$ of all veterinarians are female, including $85 \%$ of those veterinarians who are under the age of 40 . In a random encounter between two veterinarians, there is a $22 \%$ chance that they would be of different races or ethnicities, a measure known as the diversity index. For those veterinarians who are under the age of 40 , the diversity index increases to $28 \%$. Both of these values are well below the diversity index of $60 \%$ for Virginia's population as a whole. Nearly three out of every ten veterinarians grew up in rural areas, and $16 \%$ of these professionals currently work in non-metro areas of the state. In total, $9 \%$ of all veterinarians currently work in non-metro areas of Virginia.

Nearly all veterinarians are currently employed in the profession, $68 \%$ hold one full-time job, and $37 \%$ work between 40 and 49 hours per week. The vast majority of veterinarians work in the private sector, including $91 \%$ who work at forprofit enterprises. With respect to establishment types, $46 \%$ of all veterinarians work in group practices, while another $42 \%$ are employed at solo practices or partnerships. The typical veterinarian earns between $\$ 100,000$ and $\$ 110,000$ per year. In addition, $74 \%$ of veterinarians receive at least one employer-sponsored benefit, including $56 \%$ who have access to health insurance. More than $90 \%$ of veterinarians are satisfied with their current work situation, including $55 \%$ who indicated that they are "very satisfied".

Summary of Trends

In this section, all statistics for the current year are compared to the 2018 veterinarian workforce. Few clear trends were noted between 2018 and 2021. Some of the most notable are the number of licensed veterinarians in Virginia ( 5,017 vs. 4,470 ), the size of Virginia's veterinarian workforce ( 3,723 vs. 3,322 ), and the number of FTEs provided by this workforce ( 3,840 vs. 3,119 ) all increased by $12 \%$. In addition, Virginia's renewing veterinarians were also more likely to respond to this survey ( $84 \%$ vs. $77 \%$ ).

Further, females constitute a greater proportion of Virginia's veterinarian workforce ( $74 \%$ vs. $70 \%$ ) and the workforce is becoming younger; the median age in 2021 was 44 compared to 45 since 2018. The percentage of veterinarians under the age of 40 has also increased ( $40 \%$ vs. $36 \%$ ), and the diversity index of this workforce has grown as well ( $22 \%$ vs. $20 \%$ ). Virginia's veterinarians are slightly less likely to have grown up in a rural area ( $27 \%$ vs. $29 \%$ ) and this population with rural childhood location is slightly less likely to work in non-metro areas ( $16 \%$ vs. 18\%).

Education debt burden has increased considerably for veterinarians; the median debt held by all veterinarians is now $\$ 130,000-\$ 140,000$ compared to $\$ 110,000-\$ 120,000$ in 2018 . The percent with debt among all veterinarians stayed at $45 \%$ but declined slightly for veterinarians under age 40 ( $70 \%$ vs $76 \%$ ). Meanwhile, the rate of involuntary unemployment has declined ( $0 \%$ vs. $1 \%$ ), the decline is even more drastic when compared to the $4 \%$ rate of 2020. Veterinarians are slightly less likely to work in group private practices ( $46 \%$ vs. $47 \%$ ) but more likely to work in solo private practices/partnerships ( $42 \%$ vs. $41 \%$ ). At their primary work location, veterinarians are more likely to fill a patient care role ( $87 \%$ vs. $86 \%$ ).

The median annual income of the veterinarian workforce has increased (\$100k-\$110k vs. \$90k-\$100k). In addition, veterinarians are more likely to receive at least one employer-sponsored benefit ( $74 \% \mathrm{vs} .70 \%$ ). Regardless, a slightly lower percentage of veterinarians indicate that they are satisfied with their current work situation ( $91 \%$ vs. $92 \%$ ).

## Weighting is used to estimate

 the figures in this report. Unless otherwise noted, figures refer to the Virginia Workforce only. For more information on the HWDC's methodology, visit: https://www.dhp.virginia.gov/ PublicResources/HealthcareW orkforceDataCenter/
## Definitions

1. Virginia's Workforce: A licensee with a primary or secondary work site in Virginia at any time between January 2021 and December 2021 or who indicated intent to return to Virginia's workforce at any point in the future.
2. Full-Time Equivalency Unit (FTE): The HWDC uses 2,000 (40 hours for 50 weeks) as its baseline measure for FTEs.
3. Licensees in VA Workforce: The proportion of licensees in Virginia's Workforce.
4. Licensees per FTE: An indication of the number of licensees needed to create 1 FTE. Higher numbers indicate lower licensee participation.
5. Workers per FTE: An indication of the number of workers in Virginia's workforce needed to create 1 FTE. Higher numbers indicate lower utilization of available workers.

FTEs per 1,000 Residents

This report contains the results of the 2021 Veterinary Technician Workforce survey. More than 2,200 veterinary technicians voluntarily participated in this survey. The Virginia Department of Health Professions' Healthcare Workforce Data Center (HWDC) administers this survey during the license renewal process, which takes place every December for veterinary technicians. These survey respondents represent $88 \%$ of the 2,551 veterinary technicians who are licensed in the state and $99 \%$ of renewing practitioners.

The HWDC estimates that 2,267 veterinary technicians participated in Virginia's workforce during the survey period, which is defined as those veterinary technicians who worked at least a portion of the year in the state or who live in the state and intend to return to work as a veterinary technician at some point in the future. During the past year, Virginia's veterinary technician workforce provided 1,747 "full-time equivalency units," which the HWDC defines simply as working 2,000 hours per year.

More than three out of every five veterinary technicians are under the age of 40 , and $96 \%$ of veterinary technicians who are under the age of 40 are female. In a random encounter between two veterinary technicians, there is a $20 \%$ chance that they would be of different races or ethnicities, a measure known as the diversity index. For veterinary technicians who are under the age of 40 , this diversity index increases to $24 \%$. Both of these values are well below the comparable diversity index of $60 \%$ for Virginia's population as a whole. More than one-third of all veterinary technicians grew up in a rural area, and $14 \%$ of these professionals currently work in a non-metro area of Virginia. In total, $6 \%$ of all veterinary technicians currently work in a non-metro area of the state.

More than $80 \%$ of all veterinary technicians are currently employed in the profession, $68 \%$ hold one full-time job, and $43 \%$ work between 40 and 49 hours per week. More than $90 \%$ of veterinary technicians work in the private sector, including $87 \%$ who work at a for-profit enterprise. The median annual income of this workforce is between $\$ 30,000$ and $\$ 40,000$. In addition, more than four-fifths of all veterinary technicians receive at least one employer-sponsored benefit, including $62 \%$ who have access to health insurance. Nine out of every ten veterinary technicians indicated that they are satisfied with their current work situation, including $49 \%$ who indicated that they are "very satisfied."

## Summary of Trends

In this section, all statistics for the current year are compared to the 2018 veterinary technician workforce. The number of licensed veterinary technicians in Virginia has increased by $9 \%(2,551 \mathrm{vs} .2,334)$. In addition, the size of Virginia's veterinary technician workforce has increased by $10 \%$ ( $2,267 \mathrm{vs}$. 2,060 ), but the number of FTEs provided by this workforce has remained essentially constant ( 1,747 vs. 1,745 ). Virginia's renewing veterinary technicians are more likely to respond to this survey ( $99 \%$ vs. $94 \%$ ).

The percentage of veterinary technicians who are under the age of 40 has fallen ( $61 \%$ vs. $63 \%$ ). The diversity index of Virginia's veterinary technicians has increased ( $20 \%$ vs. $18 \%$ ), and this is also the case among those veterinary technicians who are under the age of 40 ( $24 \%$ vs. $21 \%$ ). This has occurred during a time in which Virginia's overall population has also become more diverse ( $60 \%$ vs. $56 \%$ ). Although there has been no change in the percentage of veterinary technicians who grew up in a rural area (37\%), veterinary technicians who grew up in a rural area are more likely to work in a non-metro area of the state ( $14 \%$ vs. $12 \%$ ).

Veterinary technicians are less likely to be employed in the profession ( $84 \%$ vs. $86 \%$ ). With respect to establishment type, veterinary technicians are more likely to work at a solo practice or partnership ( $54 \%$ vs. $52 \%$ ) instead of a group practice ( $29 \%$ vs. $30 \%$ ). There has been no change in the median annual income of Virginia's veterinary technician workforce ( $\$ 30 \mathrm{k}-\$ 40 \mathrm{k}$ ). Likewise, there has been no change in the percentage of veterinary technicians who receive at least one employer-sponsored benefit (84\%). Veterinary technicians are less likely to carry education debt ( $29 \%$ vs. $35 \%$ ), but the median debt amount among those veterinary technicians with education debt has increased ( $\$ 20 \mathrm{k}$ - $\$ 30 \mathrm{k}$ vs. $\$ 10 \mathrm{k}-\$ 20 \mathrm{k})$. Veterinary technicians are less likely to indicate that they are satisfied with their current work circumstances ( $90 \%$ vs. $92 \%$ ), including those who indicated that they are "very satisfied" ( $49 \%$ vs. $53 \%$ ).

## A Closer Look:

| Licensees |  |  |

## Definitions

1. The Survey Period: The survey was conducted in December 2021.
2. Target Population: All veterinary technicians who held a Virginia license at some point between January 2021 and December 2021.
3. Survey Population: The survey was available to veterinary technicians who renewed their licenses online. It was not available to those who did not renew, including some veterinary technicians newly licensed in 2021.

\section*{Weighting is used to estimate} the figures in this report. Unless otherwise noted, figures refer to the Virginia Workforce only. For more information on the HWDC's methodology, visit: https://www.dhp.virginia.gov/ PublicResources/HealthcareW orkforceDataCenter/

\section*{Definitions}
1. Virginia's Workforce: A licensee with a primary or secondary work site in Virginia at any time between January 2021 and December 2021 or who indicated intent to return to Virginia's workforce at any point in the future.
2. Full-Time Equivalency Unit (FTE): The HWDC uses 2,000 (40 hours for 50 weeks) as its baseline measure for FTEs.
3. Licensees in VA Workforce: The proportion of licensees in Virginia's Workforce.
4. Licensees per FTE: An indication of the number of licensees needed to create 1 FTE. Higher numbers indicate lower licensee participation.
5. Workers per FTE: An indication of the number of workers in Virginia's workforce needed to create 1 FTE. Higher numbers indicate lower utilization of available workers.

\section*{Veterinary Medicine Monthly Snapshot for December 2021}

Veterinary Medicine has closed more cases in December than received. Veterinary Medicine closed 23 patient care cases and 24 non-patient care cases for a total of 47 cases

Cases Closed
\begin{tabular}{|l|r|}
\hline Patient Care & 23 \\
\hline Non-Patient Care & 24 \\
\hline Total & 47 \\
\hline
\end{tabular}

Veterinary Medicine has received 10 patient care cases and 8 non-patient care cases for a total of 18 cases.
\begin{tabular}{|l|r|}
\hline \multicolumn{2}{|c|}{ Cases Received } \\
\hline Patient Care & 10 \\
\hline Non-Patient Care & 8 \\
\hline Total & \(\mathbf{1 8}\) \\
\hline
\end{tabular}

As of December 31, 2021 there were 99 patient care cases open and 100 non-patient care cases open for a total of 199 cases.
\begin{tabular}{|l|r|}
\hline \multicolumn{2}{|c|}{ Cases Open } \\
\hline Patient Care & 99 \\
\hline Non-Patient Care & 100 \\
\hline Total & 199 \\
\hline
\end{tabular}

There are 8,723 Veterinary Medicine licensees as of January 1, 2021. The number of current licenses are broken down by profession in the following chart.
\begin{tabular}{|l|r|}
\hline \multicolumn{2}{|c|}{ Current Licenses } \\
\hline Equine Dental Technician & 22 \\
\hline Veterinarian & 4,779 \\
\hline Veterinary Establishment - Ambulatory & 304 \\
\hline Veterinary Establishment - Stationary & 901 \\
\hline Veterinary Faculty & 95 \\
\hline Veterinary Intern/Resident & 73 \\
\hline Veterinary Technician & 2,549 \\
\hline Total for Veterinary Medicine & \(\mathbf{8 , 7 2 3}\) \\
\hline
\end{tabular}

There were 32 licenses issued for Veterinary Medicine for the month of December. The number of licenses issued are broken down by profession in the following chart.
\begin{tabular}{|l|r|}
